Create an outstanding perennial border - how to choose and combine plants - Create an outstanding

perennial border - how to choose and combine plants by The Middle-Sized Garden 357,638 views

2 years ago 19 minutes - Tips on choosing and combining **perennial**, plants for **your garden**, from top gardeners Steve Edney and Lou Dowle **of**, the No ...

Welcome

Growing dahlias - everything you need to know

The dahlia on the left is 'Lovely Eyes Loulou'. Verbena bonariensis in the background

The grass in the background is Pennisetum. Centre: unknown echinacea seedling. Front: Eryngium agavefolium

Dahlia on left is 'Wishes & Dreams'. Centre edge of bed: Allium senescens 'Lisa Blue'

Echinacea and persicaria

Dahlia 'Lovely Eyes Loulou'

Think about the proportions of your perennial border, not just the size

Purple plant on left is Verbena officinalis 'Bampton'

Give your border a smart edge

How to choose plants

Plants clockwise from bottom left: Eryngium yuccifolium, Stipa 'Kleinfountain', Hylotelephium (formerly known as sedum) Matrona, with Verbena officinalis 'Bampton' on right

Start with your soil and climate - not just your gardening 'zone'

Eryngium yuccifolium

Potentilla 'Miss Wilmott'

Choose long flowering plants for the front edges

The big grass is Stipa giganteum 'Kleinfountain'

Hylotelephium (formerly known as sedum) 'Matrona'

Geranium 'Dilys'

Fill borders with plants to avoid bare earth - that helps keep weeds down

Edit your borders during the season, cutting back plants that are getting too dominant

When you buy plants think about what season they flower, how long they flower, their attraction to wildlife and winter interest as well as suitable for soil and climate

Verbena officinalis 'Bampton'

Contrast low rounded plants with upright shapes

Seedheads of Eryngium agavefolium

Use plants of different heights to create drama in your perennial border

Don't focus solely on flower colour, but on every aspect of the plant especially its foliage

Rule of thirds - plants look good around a third bigger than the plant near it

But grasses can be much bigger because they're transparent

Rule of thirds - don't plant more than one third of your plants as grasses in a border

Plants don't work well in a monoculture, fill a border with many different types

If a plant doesn't look right, it may look better with different plants next to it

Most perennials don't reach their full height and flowering potential until their third year

Ricinus 'New Zealand Purple'
