### 99 Percent Mine

From the USA Today bestselling author of *The Hating Game*, soon to be a movie starring Lucy Hale and Austin Stowell, an unforgettable romantic comedy about a woman who finally has a shot at her long time crush—if she dares. Crush (n.): a strong and often short-lived infatuation, particularly for someone beyond your reach... Darcy Barrett has undertaken a global survey of men. She's travelled the world, and can categorically say that no one measures up to Tom Valeska, whose only flaw is that Darcy's twin brother Jamie saw him first and claimed him forever as his best friend. Despite Darcy's best efforts, Tom's off limits and loyal to her brother, 99%. That's the problem with finding her dream man at age eight and peaking in her photography career at age twenty—ever since, she's had to learn to settle for good enough. When Darcy and Jamie inherit a tumble-down cottage from their grandmother, they're left with strict instructions to bring it back to its former glory and sell the property. Darcy plans to be in an aisle seat halfway across the ocean as soon as the renovations start, but before she can cut and run, she finds a familiar face on her porch: house-flipper extraordinaire Tom's arrived, he's bearing power tools, and he's single for the first time in almost a decade. Suddenly Darcy's considering sticking around to make sure her twin doesn't ruin the cottage's inherent magic with his penchant for grey and chrome. She's definitely not staying because of her new business partner's tight t-shirts, or that perfect face that's inspiring her to pick up her camera again. Soon sparks are flying—and it's not the faulty wiring. It turns out one percent of Tom's heart might not be enough for Darcy anymore. This time around, she's switching things up. She's going to make Tom Valeska 99 percent hers. This next hilarious romance includes a special PS section with two Happily Ever Afters—one for this novel featuring Darcy and Tom and the other, an epilogue featuring fan favorites Lucy Hutton and Josh Templeman from *The Hating Game*!

### Only Mostly Devastated

\*Shortlisted for the Waterstones Children's Book Prize 2021!\* Ollie and Will were a summer fling; now they're classmates. But only one of them is out...SIMON VS THE HOMO SAPIENS AGENDA meets a modern-day, queer re-imagining of GREASE. It was the very last Wednesday of August when I realized Disney had been lying to me about Happily Ever Afters. Because, you see, I was four days into mine, and my prince was nowhere to be found. "Please don't lose contact. I need to see you again," he'd said. So why was I here, banging my head against a metaphorical wall, weighing up the pros and cons of sending another message? This wasn't a big deal. It was just a guy texting another guy. A guy who knew all my biggest secrets, and had Seen. Me. NakedTM. A guy who'd convinced me he really, really liked me. A guy who'd better have been abducted by goddamn aliens... When Ollie meets Will over the summer break, he thinks he's found his Happily Ever After. But once summer's ended, Will stops texting him back, and Ollie finds himself short of his fairy-tale ending. A family emergency sees Ollie uprooted and enrolled at a new school across the country - Will's school - and Ollie finds that the sweet, affectionate and comfortably queer guy he knew from summer isn't the same one attending Collinswood High. This Will is a class clown, a basketball jock and, well, a bit of a jerk. Ollie isn't going to pine after a guy who isn't ready for a relationship. But as school life repeatedly throws them together, from music class to the lunch table, Ollie finds his resolve weakening. With the noisy drama of their friends as the backdrop - from ambitious Juliette and frosty Lara, to big-hearted Darnell and king-jock Matt - Ollie has a decision to make. The last time he gave Will his heart, Will handed it back to him trampled and battered. Ollie would have to be an idiot to trust him with it again. Right? \*Don't miss the new queer YA rom-com from Sophie Gonzales - PERFECT ON PAPER is out in March 2021!\*

### Homo Symbolicus

The emergence of symbolic culture, classically identified with the European cave paintings of the Ice Age, is now seen, in the light of recent groundbreaking discoveries, as a complex nonlinear process taking root in a remote past and in different regions of the planet. In this book the archaeologists responsible for some of these new discoveries, flanked by ethologists interested in primate cognition and cultural transmission, evolutionary psychologists modelling the emergence of metarepresentations, as well as biologists, philosophers, neuro-scientists and an astronomer combine their research findings. Their results call into question our very conception of human nature and animal behaviour, and they create epistemological bridges between disciplines that build the foundations for a novel vision of our lineage's cultural trajectory and the processes that have led to the emergence of human societies as we know them.

### The Sciences of the Artificial, reissue of the third edition with a new introduction by John Laird

Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. *The Sciences of the Artificial* distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.
