Cam chain rattle on a 2012 Triumph Street Triple R

The noise is gone after i changed the tensioner

This silver thing is the tensioner, the black case is the crackcasecover

New gasket and new black sprayed tensioner just for looks

Note the copper washer

I removed the crankcasecover with a piece of wood without leaving scratches

Using a piece of cloth to catch some oildrops

Little damage in the crackcase

A socket wedged against the guide to keep tension on the camchain

Now its time to remove the tensioner

Little bit oil on the O-ring

Fitting the spring, washer and nut in the tensioner

Remove the socket

A few rotations of the crank to re-adjust the tensioner and to be sure everything is alright.

That's the hole for the bolt with the copper washer

Cleaning, so I can check for leaking after a testride.
