Business and Company Law

The third edition of James' innovative text continues to demonstrate business law principles in a clear and accessible style. The objective of a business law subject is to ensure that students acquire sufficient knowledge of the law of business so they can recognise and solve simple legal problems, organise their affairs in order to avoid more complex or serious legal problems and appreciate the connection of legal principles within a range of commercial environments. Because the majority of students are required to study business law as part of either a commerce or business degree, this textbook follows a functional approach to the study of business law rather than doctrinal so the principles of business law are contextualised within a business environment. Business students need to know more than what the law is, they need to know where to find it, how to read it, how to use it and how it impacts on all facets of business. Students who use this textbook will develop a greater awareness of the law and its broad application to business and commercial environments.

The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for lecturers.

Business Law

Business Law is a new textbook that presents business law principles in a clear and easy to understand style. The objective of a business law subject is to ensure that students acquire enough knowledge

of the law of business so they can recognise and solve simple legal problems, organise their affairs in order to avoid more complex or serious legal problems, and appreciate the connection of legal principles within a range of commercial environments. As the majority of students are required to study business law as part of either a commerce or business degree, this textbook follows a functional approach to the study of business law rather than doctrinal so the principles of business law are contextualised within a business environment. Business students need to know more than what the law is, they need to know where to find it, how to read it, how to use it and how it impacts on all facets of business. Students who use this textbook will develop a greater awareness of the law and its broad application to business and commercial environments.

Hallmark Features: Written in a clear, accessible style by award winning law lecturer. Addressed to reader as business person. Seeks to balance legal doctrine, practical perspectives, law in context and critical perspectives. Emphasis upon material of relevance and use to business students in the 21st century. Organised into 12 manageable chapters corresponding with 12 teaching weeks of a typical semester, making it possible to use the entire textbook and cover all relevant business law topics in appropriate depth. No need to customise this textbook to suit the subject outline. Presents a functional rather than doctrinal approach, e.g. instead of 'tort law' and 'contract law', the chapters look at 'causing harm' and 'making deals'. Activity features appear throughout requiring students to reflect, research, apply or revise their understanding of legal concepts. Revision questions appear at the end of each major chapter section and provide an opportunity for students to check their knowledge before progressing. End-of-chapter quizzes contain multiple-choice questions and are ideal for self testing. Over 600 terms & definitions included in the end of book glossary. New to this Edition: Each chapter begins and ends with "Johnny and Ash" ? a framing narrative which establishes the importance and relevance of the business law concepts presented, by describing a particular problem or situation. This feature appears in each chapter and involves a range of scenarios between two characters: Johnny, a restaurant owner, and Ash, a solicitor. Johnny and Ash begin each chapter by discussing one of more of the key issues explored within the chapter, and conclude each chapter with the resolution of those issues. They do so in a way which grounds these key issues in the real world, demonstrating how and why these issues might arise in business practice. The various scenarios link together into a continuing storyline, engaging the students' interest as they progress from chapter to chapter. Chapter 3 Exercising legal skills describes and develops important legal skills such as research, reading, interpretation and writing. This is an important chapter, not found in most introductory business law textbooks. Where appropriate, tables, diagrams, flowcharts and concept maps are used to illustrate the more complex material within the text. Each chapter is periodically punctuated with questions which require the student to either reflect, research or revise key points. These questions ensure that students engage with the text actively rather than passively. Each section within a chapter concludes with a set of revision questions testing the student's ability to recall the key points from the section. Key terms used in the text are defined in the margins and in the comprehensive glossary at the end of the book. Throughout the text the student is referred to the many useful online resources relevant to the practice of business law in Australia. "Law in context" boxes offer alternative perspectives on the law described in the main text. These perspectives include the operation of the law in practice, ethical perspectives, the portrayal of the law in popular culture, philosophical or historical perspectives on the law, insights upon the law from other disciplines such as economics or social science, the political context within which the law was developed and the law in a global context. Each chapter concludes with a set of quiz questions for students to test their own understanding of the content, as well as a set of exercises where the student can apply their knowledge to the solution of particular legal problems or further explore more challenging aspects of the law.

Family businesses form the backbone of the UK economy. They also provide the bedrock of the business client base of most professional firms. This book examines the legal issues of particular relevance to family owned businesses. Often those issues stem from underlying family dynamics. Therefore advisors, be they legal financial or management need to be aware of the complexity created by these factors as well as the legal and commercial issues. The book contains an introduction to the key elements of family business thinking that have emerged over the last 30 years or so, to explain these dynamics and links these to relevant areas of professional practice. A key challenge is that professionals increasingly operate from ever narrower silos of specialisation, whereas the needs of their family business clients cross many practice areas. The book is intended to provide practitioners with an overview of family business issues from adjacent practice areas to their own, to help them offer rounded advice to family business clients. Accordingly the book will be relevant to other professionals and to those directly engaged in their own family businesses. [Subject: Trade Law, UK Law, Labor Law, Family Law]

It is hoped that this book will challenge students to think rationally and ethically. Hopefully, it will also help motivate students to learn.
