Pride of the Nation:

With today's hectic lifestyle, parents tend to focus on the academic progress of their children and perhaps do not adequately deal with the overall conduct and development of their children. With both parents working full-time and traditional joint families being replaced by nuclear families, children are likely to be deprived of basic parental and grandparental care and guidance. The child grows up in the company and influence of neighbors, friends, and caretakers. This book contains a collection of good thoughts and desirable attributes that need to be sowed in the fertile minds of our children so that they grow to be top-class human beings with strong character. They would then pass on this goodness to future generations. The Little Little Things also provides insights and inspires youngsters on how they

should approach and deal with the opportunities and challenges of personal and professional life. The book dwells upon the seemingly little little things that actually matter a lot to all of us.

The Interview

Fifty years ago, the campaign for a sovereign Sikh state - Khalistan - went global, proclaiming the birth of the new nation with an advertisement in The New York Times on 12 October 1971. The ensuing decades saw a bloodbath in which thousands, mainly Sikhs, lost their lives. Today, the campaign has all but fizzled out in its homeland but overseas, a politically plugged-in band of hardcore separatists keeps the cause alive. In Blood for Blood, veteran Canadian journalist Terry Milewski takes a close look at the global Khalistan project, its hunger for revenge and the feeble response of India's Western allies. He traces the rise and fall of diaspora militants like Talwinder Singh Parmar - the Vancouver-based founder of the Babbar Khalsa terrorist group and the man behind the 1985 'Kanishka' bomb plot which killed 329 aboard Air India Flight 182. The book provides startling new information about the Khalistan movement in Canada, the United Kingdom and India, which has been sustained for decades by Pakistan and now threatens to draw in China. Brilliantly researched, Blood for Blood brings new insights to a topic that continues to hold global interest decades after it first came to light.

The Teacher I Never Met

Inspiring Quotations by Indian President Dr. APJ Abdul Kalam

President Dr. A.P.J. Abdul Kalam: January 2004-December 2005

We are living in the age of information technology and are therefore witnessing an avalanche of data from various sources around us. Life has become so fast that we are finding it difficult to absorb and process this data to produce useful information for us. It is high time when the youth should take the lead to shape the mechanisms of developing the much needed scientific temper among the people in this age of technology, so that we can leverage the true potential of technology and use it for a prosperous tomorrow. We wish that the youth not only possess this broad vision but also work in this direction.

Engaging India

A. P. J. Abdul Kalam became President of India in July 2002. He came to the highest office in the land with doubts being cast on the wisdom of appointing a non-politician, even if it was someone as distinguished as him (he is a recipient of the Bharat Ratna for his work on India's space and defence programmes), to the post. What followed, however, was a remarkable presidency that in the next five years transformed the way people looked at this office, and made Kalam popular in a way few politicians have been. Rashtrapati Bhavan became a much more accessible place in his time, and his enthusiasm for his favourite cause—a developed and strong India—infected all those who came in touch with him. While the reasons for his popularity will be analysed for a long time, P.M. Nair, who was his Secretary, shows through a series of vignettes in *The Kalam Effect* some of the probable causes. One of them being that Kalam is just a very special human being. P.M. Nair had a long and varied career in the IAS, which he joined in 1967. In July 2002 he was appointed Secretary to the President and continued in that position all through the five years of A.P.J. Abdul Kalam's tenure at Rashtrapati Bhavan.

Dreams that Don't Let You Sleep

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.

Terrorism in India

India: it's a nation of geeks, swots and nerds. Almost one in five of all medical and dental staff in the UK is of Indian origin, and one in six employed scientists with science or engineering doctorates in the US is Asian. By the turn of the millennium, there were even claims that a third of all engineers in Silicon Valley were of Indian origin, with Indians running 750 of its tech companies. At the dawn of this scientific revolution, Geek Nation is a journey to meet the inventors, engineers and young scientists helping to give birth to the world's next scientific superpower – a nation built not on conquest, oil or minerals, but on the scientific ingenuity of its people. Angela Saini explains how ancient science is giving way to new, and how the technology of the wealthy are passing on to the poor. Delving inside the psyche of India's science-hungry citizens, she explores the reason why the government of the most religious country on earth has put its faith in science and technology. Through witty first-hand reportage and penetrative analysis, Geek Nation explains what this means for the rest of the world, and how a spiritual nation squares its soul with hard rationality. Full of curious, colourful characters and gripping stories, it describes India through its people – a nation of geeks. curious, colourful characters and gripping stories, it describes India through its people – a nation of geeks.

Inspiring Thoughts

'A gem of a book ... Inspiring and timely. Everyone should read it' Independent 'The Rule of Law' is a phrase much used but little examined. The idea of the rule of law as the foundation of modern states and civilisations has recently become even more talismanic than that of democracy, but what does it actually consist of? In this brilliant short book, Britain's former senior law lord, and one of the world's most acute legal minds, examines what the idea actually means. He makes clear that the rule of law is not an arid legal doctrine but is the foundation of a fair and just society, is a guarantee of responsible government, is an important contribution to economic growth and offers the best means yet devised for securing peace and co-operation. He briefly examines the historical origins of the rule, and then advances eight conditions which capture its essence as understood in western democracies today. He also discusses the strains imposed on the rule of law by the threat and experience of international terrorism. The book will be influential in many different fields and should become a key text for anyone interested in politics, society and the state of our world.

Thoughts Of New India

The Urdu Ghazal presents the unique flowering of the ghazal as a by-product of India's composite culture. It explores a variety of influences on the ghazal, including Sufism, Bhakti movement, and infusion of Rekhta and Persian languages and culture. The book elucidates classical ghazal forms that blossomed from the seeds sown by Amir Khusrau in the fourteenth century to achieve great heights of literary excellence during the next 300 years, notably in the works of great poets like Mir and Ghalib. It also illustrates different socio-political and cultural demands of changing times, primarily how the ghazal provided new creative models to deal with literary movements like progressivism, modernism, and postmodernism, through works of pioneering twentieth-century poets like Faiz Ahmed Faiz, Gulzar, and Javed Akhtar.

The Kalam Effect

Fail! And we are stamped for life. Don't we try and run from failure all our lives? But, 'spontaneous doing has to go through failures.' Acknowledging failure is singularly the most difficult thing to do. It takes tremendous courage to come out and say, yes, I failed. Shweta Punj chronicles sixteen such leaders who have celebrated their failure as much as their success. Each story is an anatomy of failure. So whether it was the difference between 'need' and 'want' that led Abhinav Bindra to miss that winning shot, or whether it was a suicide attempt that pushed Sabyasachi Mukherjee into fully realizing his potential—these stories will prod you to look at failure differently.

Ignited Minds

'It takes courage to be an empathetic leader. And I think if anything the world needs empathetic leadership now, perhaps more than ever.' Jacinda Ardern Jacinda Ardern was swept to office in 2017 on a wave of popular enthusiasm dubbed 'Jacindamania'. In less than three months, she rose from deputy leader of the opposition to New Zealand's highest office. Her victory seemed heroic. Few in politics would have believed it possible; fewer still would have guessed at her resolve and compassionate leadership, which, in the wake of the horrific Christchurch mosque shootings of March 2019, brought her international acclaim. Since then, her decisive handling of the COVID-19 pandemic has seen her worldwide standing rise to the point where she is now celebrated as a model leader. In 2020 she won an historic, landslide victory and yet, characteristically, chose to govern in coalition with the Green Party. Jacinda Ardern: Leading with Empathy carefully explores the influences – personal, social, political and emotional – that have shaped Ardern. Peace activist and journalist Supriya Vani and writer Carl A. Harte build their narrative through Vani's exclusive interviews with Ardern, as well as the prime minister's public statements and speeches and the words of those who know her. We visit the places, meet the people and understand the events that propelled the daughter of a small-town Mormon policeman to become a committed social democrat, a passionate Labour Party politician and a modern leader admired for her empathy and courage.

Scientist to President

Dr. Kalam was born and brought up in a multi-religious, multi-ethnic community, and this type of milieu had a profound effect on his personality. He gave equal respect to all faiths and religions; and he did not pay only lip-service to different religions. During his life, he visited the saints and seers of all faiths, discussed with them and learnt from them. He learnt what divinity and spirituality actually meant, and brought out a blended form. For him, religion is a connecting thread. He was quite at ease when he quoted from the Gita or the Hadith, or for that matter, from the holy texts of other faiths. In this book, we have made a solemn endeavour to read his mind, how he thought at every turn of his life; and this will help the readers to understand the intricacies of his thinking and how he was guided for a mission in his life. To understand him well, we have also narrated a number of incidents, accidents and events of his life, that would contribute to holistic understanding about him. He took up the challenges and worked on them wholeheartedly; whenever he failed, he overcame his negativity and came out a stronger man than ever. This is the beauty of his character, and this makes him one of the most popular public figures of all times. May his soul rest in peace! —K. Senthil Kumar, IAS

President Dr. A.P.J. Abdul Kalam: January 2004-December 2005

Dr APJ Kalam abolished the practice of having a larger chair for the Rashtrapati on a dias when attending any function. He regularly read both the Quran and the Geeta and played the veena and wrote poetry in his spare time. His favourite Mahabharata character was Vidura because he had the courage to differ and fight injustice in a peaceful manner. Caliph Umar, Mahatma Gandhi, Albert Einstein, Emperor Ashoka and Abraham Lincoln were the five greatest human beings to have lived on this earth according to Dr Kalam. The author, SM Khan, acquaints us with lesser known facts and stories which went towards making the great Dr Kalam the 'People's President'. SM Khan was press secretary to the late APJ Abdul Kalam and shared a unique relationship with the unusual President. The first state visit made by Dr Kalam in 2002 after swearing in as President was to Gujarat where he was received at the airport by the then Chief Minister and now Prime Minister of India, Mr Narendra Modi. Together they visited nine riot-torn areas and three relief camps. Details of this visit as well as those to the other states in India and various trips abroad in the course of his Presidency are captured in this book in a manner that is engaging and informative. Interspersed with interesting anecdotes and happenings, this comprehensive compendium of Dr Kalam's experiences as the President of India finally culminate in his post-presidency days with SM Khan's last poignant meeting with Dr Kalam just a few days before his passing away. A must read for both fans and those who wish to know more about the People's President, Dr APJ Kalam.

The People's President

A. P. J. Abdul Kalam became President of India in July 2002. He came to the highest office in the land with doubts being cast on the wisdom of appointing a non-politician, even if it was someone as distinguished as him (he is a recipient of the Bharat Ratna for his work on India's space and defence programmes), to the post. What followed, however, was a remarkable presidency that in the next five years transformed the way people looked at this office, and made Kalam popular in a way few politicians have been. Rashtrapati Bhavan became a much more accessible place in his time, and his enthusiasm for his favourite cause—a developed and strong India—infected all those who came in touch with him. While the reasons for his popularity will be analysed for a long time, P.M. Nair, who was his Secretary, shows through a series of vignettes in *The Kalam Effect* some of the probable causes. One of them being that Kalam is just a very special human being. P.M. Nair had a long and varied career in the IAS, which he joined in 1967. In July 2002 he was appointed Secretary to the President and continued in that position all through the five years of A.P.J. Abdul Kalam's tenure at Rashtrapati Bhavan.

Enlightened Minds

In this ground-breaking vision document, first published in 1998, Dr A.P.J. Abdul Kalam and Y.S. Rajan offer a blueprint for India to be counted among the world's top five economic powers by the year 2020. They cite growth rates and development trends to show that the goal is not unrealistic. Past successes—the green revolution and satellite-based communication linking remote regions of the country, for instance—bear them out. The same sense of purpose can make us a prosperous, strong nation in a matter of years, assert Kalam and Rajan. This is a book that every citizen who hopes for a better India must read.

Ignited Minds

In 1998, a book was published that was surprisingly ahead of its times. It was called *India 2020* and proposed that India could soon be one of the top five economies of the world. The nation had set off a series of nuclear tests and was facing worldwide sanctions. A new government had taken charge, and the economy was facing a tough time. It was not the best of times to predict that India had it in her to get on the fast track to development. The vision presented in the book would go on to inspire, directly or indirectly, many sectors of the economy to work for and achieve high growth. The book has since sold hundreds of thousands of copies. In *A Manifesto for Change*, its author A.P.J. Abdul Kalam, writing with co-author V. Ponraj, offers a sequel. As focused then as now on his dream of a developed India by 2020, the eleventh President of India examines what we need to get right to accomplish that essential goal: harnessing the stupendous energy of our youth to contribute to growth, a united Parliament that makes full use of its time for constructive debate and rises above petty party politics to achieve the larger national vision, and a plan of action that looks at development from the grassroots to giant strides in infrastructure and bridging the urban-rural disparity. It is time to leave behind the politics of antagonism and disruption behind, he suggests. As reward: a developed India as befits this beautiful land.

A.P.J. Abdul Kalam

Half the world's population—3 billion people—are below the poverty line, and 70 per cent of the world's poor live in rural areas. Target 3 Billion encapsulates Dr A.P.J. Abdul Kalam's mission to eradicate poverty from the world. With 750 million people living in villages, India has the largest rural population in the world. Based on his Indian experience, Dr Kalam recommends a sustainable and inclusive development system called PURA—Providing Urban Amenities in Rural Areas—to uplift the rural poor not by subsidies but through entrepreneurship with community participation. To make his case, Dr

Kalam cites the examples of individuals and institutions, in India and from across the world, who, with an entrepreneurial spirit and a burning desire to make a difference, have successfully generated and tapped into the potential of the rural masses. Fabio Luiz de Oliveria Rosa changed the face of the rural district of Palmares, Brazil, by acquiring for the farmers access to electricity and water, which effect, combined with better agricultural methods, led to an increase in prosperity and stemmed the migration to cities. The 123-strong Magar clan owned Magarpatta, a 430-acre plot on the outskirts of Pune, Maharashtra. In the 1990s, they organized and set up the Magarpatta city which is now home to over 35,000 residents and a working population of 65,000 and boasts of an IT park. Targets 3 Billion tells the story of the brilliantly envisaged global sustainable development system that is PURA, outlining Dr Kalam's vision for every individual and organization-a vision that can create 3 billion empowered, productive and healthy citizens, and generate 3 billion smiles.
