Data Structures Explained for Beginners - How I Wish I was Taught - Data Structures Explained for Beginners - How I Wish I was Taught by Internet Made Coder 514,477 views 1 year ago 17 minutes - If I was a beginner, here's how I wish someone explained **Data Structures**, to me so that I would ACTUALLY understand them.

How I Learned to appreciate data structures
What are data structures & why are they important?
How computer memory works (Lists & Arrays)
Complex data structures (Linked Lists)
Why do we have different data structures?

Learn how to play mahjong in 2.5 minutes - Learn how to play mahjong in 2.5 minutes by South China Morning Post 2,896,969 views 5 years ago 2 minutes, 34 seconds - Mahjong, is a tile-based game that's been played in Asia for over 300 years and is gaining global popularity. Although the game is ...

The game is played with a set of 144 tiles based on Chinese symbols and characters.

Try to think of them as playing cards in poker.

To start the game, players first shuffle the tiles

Roll the dice to decide who plays first

The player who goes first draws one extra tile to kick off the game.

Through the course of the game, players take turns to draw and discard tiles

In order to win, you need to form four suits and a pair.

While playing, you can use tiles discarded by other players just patiently wait for the tile you need to win.

There are many ways to win

The object of this 4-player game is to be the first person to declare ``Mahjong" by correctly creating a hand that exactly matches a hand on the score card.

A tile may not be called to complete a combination of the hand that requires only a single tile, nor to complete a pair unless it completes a mahjong hand.

Note: When aiming for a concealed hand all of the tiles in your hand must be drawn from the wall.

The game ends when either someone declares ``mahjong" or when there are no more tiles in the wall to be drawn.
