Misinformation about nutrition is rampant.

Rhiannon Lambert is a registered nutritionist and an author

Many people are not getting enough fiber for good health.

Not all ultra-processed foods are bad; it's about moderation.

Foods should be seen as neutral to promote a healthy relationship with food.

Key to aging well and living longer is balanced nutrition

Processed foods may have higher calorie absorption

Healthy foods are often seen as diets.

Importance of protein in a food choice

Add more plant-based foods to increase plant points and balance protein intake

Skipping breakfast and not staying hydrated can impact your energy levels and overall health.

Moderation in diet but lacking in fiber intake

Avoid excessive supplements for a healthier life

Nutrition can impact mental health.

Research shows unique bacteria strains impact gut health

Support for women in childbirth and breastfeeding is lacking

Supporting the choice of feeding for mothers

Spread awareness for making small nutritional changes

Freezing food is an underutilized resource.

Eating well on a budget and without meat is possible

Milk choice doesn't significantly impact health

Coffee consumption can impact cortisol levels and sleep quality.

Nutrition varies daily, avoid following food trends
