Witch trials occurred all over Early Modern Europe. The largest concentration was in southwestern Germany between 1561 and 1670

Variations in Early Modern European legal systems influenced the evolution of witch trials in different countries. The comparatively few prosecutions of witches in Spain, Italy, and France was due to the fact neither the Spanish nor Roman Inquisitions believed witchcraft could be proven

In 1631 Jesuit priest and professor Friedrich Spee anonymously published *Cautio Criminalis*, which argued against witch trials and the use of torture Spee was the confessor of witches who had been

condemned to death. It was this direct contact with the condemned that led him to believe that innocent people were being sent to their death.

By the fall of 1692 the witch hunting began to wane as more and more people began to doubt so many people could be guilty of Witchcraft People urged the courts not to admit spectral evidence and to rely instead on clear and convincing testimony
