Grandparents' Guide to Gifted Children

When educators (and parents) think about gifted kids, they usually focus on their intellectual needs. But gifted kids are much more than test scores and grades. In their second book together, Jim Delisle and Judy Galbraith explain what giftedness means, how gifted kids are identified, and how we might improve the identification process. Then they take a close-up look at gifted kids from the inside out-their social and emotional needs. Topics include self-image and self-esteem, perfectionism, multipotential, depression, feelings of "differentness," and stress. The authors suggest ways to help gifted underachievers and those who are bored in school, and ways to encourage healthy relationships

with friends, family and other adults. The final chapter explains how teachers can make it safe to be smart by creating the gifted-friendly classroom. Includes first-person stories, easy-to-use strategies, survey results, activities, reproducibles, and up-to-date research and resources.

The Survival Guide for Parents of Gifted Kids

A gifted education Legacy Award winner, *Parenting Gifted Kids: Tips for Raising Happy and Successful Children* provides a humorous, engaging, and encouraging look at raising gifted children today. James R. Delisle, Ph.D., offers practical, down-to-earth advice that will cause parents to reexamine the ways they perceive and relate to their children. Dr. Delisle puts forward 10 tips to parents of gifted children—ideas that reflect attitude and approach and allow for introspection and change, rather than quick, do-it-tonight solutions. Some topics of interest include understanding a child's giftedness, working with the school system, dealing with perfectionism in gifted kids, and being adult role models for children. Along the way, stories from gifted children and their parents provide insight into the lives of these individuals. What sets this book apart from other books for parents of gifted kids is its expansion beyond mere platitudes. Dr. Delisle's tips go beyond the basics, focusing on attitude, reflection, and subtle changes, rather than specific, cookie-cutter recipes for action. The 10 tips suggested and expanded upon in this book include: understanding what giftedness is . . . and what it is not; understanding the differences between gifted kids and their agemates; understanding the personality traits of gifted kids, including overexcitabilities; taking charge of your child's education; understanding the issue of perfectionism in gifted kids; examining social nuances and myths related to giftedness; examining the similarities parents share with their gifted children; setting reasonable goals; helping gifted children make a difference in the lives of others; and remembering that gifted children are kids first and gifted second. Voices of Perfectionism

Winner of the NAGC Celebrating Gifts and Talents 2007 "Most Important Book" Gold Award *Gifted Children* is a lively and informative exploration of the mystery of the gifted mind and the social and emotional needs of gifted children and their families. The authors give an insight into what is 'normal' for gifted children, acknowledge the difficulties they experience, and offer pointers for parents on how to support them at home, in the interaction with siblings and other family members, and at school. The authors identify self-acceptance and communication with others as key skills for gifted children, whose exceptional abilities in fields ranging from music and maths to linguistics and art are often complicated by poor social skills, dyslexia or other difficulties. This excellent book, written by counsellors who are also parents with first-hand knowledge of living and working with gifted children, is an accessible and positive guide full of constructive advice and encouragement for other parents. It includes practical information such as useful contact details, as well as opportunities for reflection.

Helping Gifted Children Soar

With all the talk of failing schools these days, we forget that schools can fail their brightest students, too. We pledge to “leave no child behind,” but in American schools today, thousands of gifted and talented students fall short of their potential. In *Genius Denied*, Jan and Bob Davidson describe the “quiet crisis” in education: gifted students spending their days in classrooms learning little beyond how to cope with

boredom as they "relearn" material they've already mastered years before. This lack of challenge leads to frustration, underachievement, and even failure. Some gifted students become severely depressed. At a time when our country needs a deep intellectual talent pool, the squandering of these bright young minds is a national tragedy. There are hundreds of thousands of highly gifted children in the U.S. and millions more whose intelligence is above average, yet few receive the education they deserve. Many school districts have no gifted programs or offer only token enrichment classes. Education of the gifted is in this sorry state, say the Davidsons, because of indifference, lack of funding, and the pernicious notion that education should have a "leveling" effect, a one-size-fits-all concept that deliberately ignores the needs of the gifted. But all children are entitled to an appropriate education, insist the authors, those left behind as well as those who want to surge ahead. The Davidsons show parents and educators how to reach and challenge gifted students. They offer practical advice based on their experience as founders of a nonprofit organization that assists gifted children. They show parents how to become their children's advocates, how to win support for gifted students within the local schools, and when and how to go outside the school system. They discuss everything from acceleration ("skipping" a grade) to homeschooling and finding mentors for children. They tell stories of real parents and students who overcame poor schooling environments to discover the joy of learning. Genius Denied is an inspiring book that provides a beacon of hope for children at risk of losing their valuable gift of intellectual potential.
