Eastern Hospitals and English Nurses

The author of this remarkable pseudonymous two-volume, eyewitness account of Florence Nightingale's nursing in the Crimean War was really Frances Margaret Taylor. She was the daughter of an Anglican vicar, who served the poor in his Lincolnshire parish. In 1854 Taylor was one of the earliest nurses to be recruited by Nightingale, and her book is an account of the work she and her fellow nurses carried out for the war-wounded in the hospitals at Scutari and Koulali. She describes the original filthy conditions at the old Turkish hospital, and the problems that the Lady with the Lamp and her nurses had to overcome. Impressed by the work of Catholic Sisters at the hospital, after her return to England Taylor converted to Catholicism. She became a nun, and devoted the rest of her life to helping the deprived in London's East End, and to writing articles and books devoted to promoting her charitable work and faith. She died in London in June 1900.

Eastern Hospitals and English Nurses

In this vivid and inspiring memoir, Frances Margaret Taylor recounts her experiences as a volunteer nurse during the Crimean War. With a compelling mix of personal anecdotes and detailed observations of hospital life, she offers a unique perspective on the challenges and rewards of nursing during this tumultuous period. A must-read for anyone interested in the history of nursing or the Crimean War. Eastern Hospitals and English Nurses; the Narrative of Twelve Months' Experience in the Hospitals of Koulali and Scutari

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1856 edition. Excerpt: ... CHAPTER VI. Establishment of an extra-diet kitchen--Rough luxuries--Dismissal of a nurse and her attempt to commit suicide--Arrival of Irish soldiers at the Hospital--Terrible cases of frost-bites--Private Fitzgerald--News of the death of the Russian Emperor--An earthquake--The Russian prisoners--Distressing cases of delirium--Zeal and admirable conduct of the Sisters of Mercy. How were we to supply our "extra diet" kitchen, how prepare the food on which so many depended? The erection of a shed in the barrack-yard was immediately set on foot; but it took ten days ere we gained possession of it, and our only resource was three or four small charcoal brasiers. Charcoal always drawing so much more quickly in the open air, we placed them in the barrack-yard. 112 UNPROFITABLE HOURS. "Misfortunes never come singly;" so we thought when John, the soldier cook, fell sick and had to go into the fever ward. Then the thaw came, and the yard was a mass of snow and black mud, and then it alternately froze and thawed, making our weary hours in the barrack-yard seem long indeed. Our cook ill, we cooked for ourselves, our only staff being Henry, a sailor lad, and the Greeks, who had not the slightest conscience as to appropriating anything that pleased them; serious indeed was our loss if they did, for our "free gift" store was very scanty, and of course we could only draw the exact quantity allowed by the diet roll, so that an egg once lost was not easily replaced; an ounce of arrowroot or sugar was worth more than its weight in gold, while a saucepan to boil it in, or a spoon to stir it with, was guarded by its fortunate possessors with a dragon-like vigilance. After ten days we gained possession of a S A CHANGE OF QUARTERS. 113 kitchen, which was in...

Eastern Hospitals and English Nurses; the narrative of twelve months' experience in the Hospitals of Koulali and Scutari. By a Lady Volunteer. [Miss Fanny M. Taylor].

Excerpt from Eastern Hospitals and English Nurses: The Narrative of Twelve Months' Experience in the Hospitals of Koulali and Scutari Since the publication of the First Edition of "Eastern Hospitals and English Nurses," a very great change has taken place in the state of affairs in the East. The War has ceased - the allied forces have returned to their homes - the Hospitals on the Bosphorus, in which the Writer spent much of her time, have been handed over to their rightful owners, and are once more occupied by Turkish soldiers; and now nothing is left behind to tell the future traveller of the occurrences in which this country took so important a part, but the consecrated spots of ground, dotted with monuments and grave-stones, under which lie the remains of so many thousands of brave soldiers. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. Eastern Hospitals and English Nurses

This historical sketch takes a look at the notorious Tyburn gallows in London, and the crowds that gathered there to witness public executions during the reign of Queen Elizabeth I. Drawing on contemporary accounts and anecdotes, it explores the social attitudes and customs of the time, and offers a vivid glimpse into a morbid corner of English history. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Eastern Hospitals and English Nurses

Nursing Before Nightingale is a study of the transformation of nursing in England from the beginning of the nineteenth century until the emergence of the Nightingale nurse as the standard model in the 1890s. From the nineteenth century on historians have considered Florence Nightingale, with her training school established at St. Thomas's Hospital in 1860, the founder of modern nursing. This book investigates two major earlier reforms in nursing: a doctor-driven reform which came to be called the 'ward system,' and the reforms of the Anglican Sisters, known as the 'central system' of nursing. Rather than being the beginning of nursing reform, Nightingale nursing was the culmination of these two earlier reforms.

Eastern Hospitals and English Nurses, the Narrative of Twelve Months' Experience in the Hospitals of Kouali and Scutari, by a Lady Volunteer F.M. Taylor

First published in 1860, this short work was developed by nursing pioneer Florence Nightingale for use at her training school in England, but it is meant for anyone entrusted with the well-being of another and offers commonsense suggestions for all caregivers charged with looking after the sick and injured. While some of the information is dated, there remains a wealth of timeless advice, as well as an intimate peek into a moment in medical history. Topics covered include: . ventilation and warming . noise . bed and bedding . light . cleanliness . and the benefit of variety in a patient's surroundings British nurse and teacher FLORENCE NIGHTINGALE (1820-1910) established the Nightingale Training School in 1860 and transformed nursing from a profession for poor women into a noble occupation. She was awarded the Order of Merit by the Queen of England in 1907 for her contributions to medicine.

Eastern Hospitals and English Nurses;

First published in 1914, "Florence Nightingale to Her Nurses" contains a selection of addresses given by Nightingale to the probationers and nurses of The Nightingale School at St. Thomas's Hospital. Florence Nightingale (1820–1910) was an English social reformer, statistician, and pioneer of modern nursing. She became famous during the time she served as manager and trainer of nurses during the Crimean War, giving nursing a positive reputation and becoming a Victorian culture icon. Also known as "The Lady with the Lamp"

Eastern Hospitals and English Nurses, Volume II - Scholar's Choice Edition

The following notes are by no means intended as a rule of thought by which nurses can teach themselves to nurse, still less as a manual to teach nurses to nurse. They are meant simply to give hints for thought to women who have personal charge of the health of others. Every woman, or at least almost every woman, in England has, at one time or another of her life, charge of the personal health

of somebody, whether child or invalid, -in other words, every woman is a nurse. Every day sanitary knowledge, or the knowledge of nursing, or in other words, of how to put the constitution in such a state as that it will have no disease, or that it can recover from disease, takes a higher place. It is recognized as the knowledge which every one ought to have-distinct from medical knowledge, which only a profession can have. If, then, every woman must at some time or other of her life, become a nurse, i.e., have charge of somebody's health, how immense and how valuable would be the produce of her united experience if every woman would think how to nurse. I do not pretend to teach her how, I ask her to teach herself, and for this purpose I venture to give her some hints

Eastern Hospitals and English Nurses - Scholar's Choice Edition

In this work, Florence Nightingale set out her principle of care for the sick and the injured. The author combined first-hand experience in health care with an instinct for organization and creative expression. This was the first book the author wrote for general readership.

Tyborne and Who Went Thither in the Days of Queen Elizabeth. A Sketch

No one knows if Florence Nightingale deliberately set out to become a nursing champion, but it is clear that the 1859 publication of her book *Notes on Nursing: What It Is, And What It Is Not* secured her place in nursing history. By the author's own admission, the work was not written as a training manual for nurses. Yet in many ways, this classic book, which was a best seller when issued and has been continuously in print since it was published 150 years ago, defines the precepts that became the prototype for contemporary nursing practice, provides a compelling historical perspective on the evolution of healthcare delivery, and provides an intimate glimpse into the Victorian Age. Although nurses no longer empty chamber pots, open chimney flues, or worry about their crinoline skirts catching fire, they may be interested to find among Nightingale's writings such modern-day concepts as the mind-body connection, plant therapy, and pet therapy.

Tyborne: and "who Went Thither in the Days of Queen Elizabeth." A Sketch. By the Authoress of "Eastern Hospitals and English Nurses" Miss Fanny M. Taylor

Florence Nightingale (1820–1910) was an English social reformer, statistician, and pioneer of modern nursing. She became famous during the time she served as manager and trainer of nurses during the Crimean War, giving nursing a positive reputation and becoming a Victorian culture icon. Also known as "The Lady with the Lamp"
