Mapping Marriage Law in Spanish Gitano Communities

Susan Drummond investigates what happens when the voices of comparative law and legal anthropology are invited to speak to each other. She forges this hybrid form of comparative work through small- and large-scale studies of Gitano marriage law as it emerges in a Western European state, in a modern urban centre, and in particular communities and families. Ultimately, she brings the international, national, and cultural dimensions of law into play with one another and contemplates how all of these influences bear on the spirit of Andalusian Gitano marriage law. The result is an ethos of marriage law in a thoroughly mixed legal jurisdiction.

Mapping Marriage Law in Spanish Gitano Communities

Comparative law and legal anthropology have traditionally restricted themselves to their own fields of inquiry. Mapping Marriage Law in Spanish Gitano Communities turns this tendency on its head and investigates what happens when the voices of each discipline are invited to speak to each other. Susan Drummond forges this hybrid form of comparative work through small- and large-scale studies of Gitano marriage law as it emerges in a Western European state, in a modern urban centre, and in particular communities and families. Drummond's mapping of Gitano marriage law is grounded in ethnographic fieldwork in Andalusia. The study draws initially from the tradition of comparative law to focus on the emergence of Spanish state family law in a predominantly national and international context. Drummond then adopts the role of legal anthropologist to examine a particular legal culture that exists within, and also beyond, the Spanish state: that of the Gitanos and the transnational Roma. Ultimately, she brings the international, national, and cultural dimensions of law into play with one another and contemplates how all of these influences bear on the spirit of Andalusian Gitano marriage law. The result is an ethos of marriage law in a thoroughly mixed legal jurisdiction. Mapping Marriage Law in Spanish Gitano Communities will appeal to scholars and students in comparative law and legal anthropology, as well as readers interested in Roma studies in general, and the Gitanos in particular.

Le Guide Du Routard

Task-based language instruction has proven to be highly effective, but surprisingly underutilized. Theory can only go so far and hands-on experience can greatly speed and enhance the learning of a second language. Nineteen talented instructors who have successfully implemented task-based programs explain the principles behind the programs, discuss how problems were resolved, and share details on class activities and program design. Each chapter takes the reader through the different stages in designing and setting up such programs, adjusting them, and appraising and testing them in normal classroom conditions. This book covers TBI syllabus and program design and is based on actual classroom experience. Any one of the courses or programs discussed can serve as models for others. Many of the contributors are highly respected practitioners who are presenting their programs for the first time, while others are regular participants in today's ongoing dialogue about teaching methods. Full of concrete, adaptable models of task-based language teaching drawn from a number of countries and eleven different languages—including Arabic, Chinese, Czech, English, French, German, Korean, Spanish, and Ukrainian—Task-Based Instruction in Foreign Language Education presents proven, real-world, practical courses and programs; and includes web-based activities. It demonstrates useful and practical ways to engage students far beyond what can be learned from reading textbook dialogue. TBI involves the student directly with the language being taught via cognitively engaging activities that reflect authentic and purposeful use of language, resulting in language-learning experiences that are pleasurable and effective. For all instructors seeking to help their learners enhance their understanding and grasp of the foreign language they are learning, Task-Based Instruction in Foreign Language Education is a rich and rewarding hands-on guide to effective and transformative learning.

Task-Based Instruction in Foreign Language Education

The search for new tourism experiences as well as changes in the tourism industry itself has led to new forms of individualised travel and consequentially new forms of backpacker tourism. This volume provides an up to date examination of the behaviour, attitudes and motivations of backpacker tourists as well as the growth of the infrastructure behind backpacker tourism phenomenon throughout the world. Drawing upon insights from geography, sociology, anthropology, management and marketing, Backpacker Tourism provides theoretically informed case studies of individual destinations of backpackers. This book will be of interest to students and researchers of backpacker tourism as well as those involved in the backpacker tourism industry itself.

Florida Louisiana - Guide Routard

Cet ebook est la version numérique du guide sans interactivité additionnelle. Nouvelle mise à jour du Routard, le guide de voyage n°1 en France ! Entre culture diurne et folie nocturne, Madrid offre un paradoxe génial. Guide du Routard Andalousie 2024/25

Cultural Mobility offers a model for understanding the patterns of meaning that human societies create. It has emerged under the very distinguished editorial guidance of Stephen Greenblatt and represents a new way of thinking about culture and cultures with which scholars in many disciplines will need to engage.

Hitchhiker

Twenty years ago, commercial tourism in the People's Republic of China hardly existed. Today, China has a burgeoning tourist industry, characterized by a unique style with deep roots in traditional Chinese culture. Scenic Spots is an engaging exploration of why Chinese tourists pursue certain kinds of experiences, what they make of them, and how their experiences and interpretations are shaped by the state. Working from within a Chinese cultural framework, Pál Nyíri argues that China's brand of tourism is distinct from the traditions of both Western bourgeois tourism, which values authenticity, and Soviet

tourism, with its emphasis on rugged and selfless experience. In China, tourism development is guided by the state, and “scenic spots” (jǐngdiǎn) and theme parks are used to demonstrate China’s heroic past and as tools of patriotic education and modernization – or as forms of “indoctrination.” The tourist site is perceived as a product, and, as such, it is bounded, approved, rated, and consumed. In a style both straightforward and provocative, Nyíri argues that the uniformity and undisguised commercialism of Chinese tourist sites are a direct result of the state’s ultimate authority to determine the meaning of landscape and to control culture. *Scenic Spots* serves as a lens through which to explore mechanisms of cultural control and resistance in a highly commercialized sphere of everyday life in contemporary China.

Guide du Routard New York 2023/24

Learning French from Spanish and Spanish from French provides adult English speakers who have learned either Spanish or French as a second language with the tools to learn the other as a third language. Research in the growing fields of third-language acquisition and multilingualism documents how successful language learners intuitively build on their existing knowledge as they learn a new language. In this vein, *Learning French from Spanish and Spanish from French* takes advantage of the fact that learners with intermediate proficiency in a second language are used to thinking consciously about language, know themselves as language learners, and can capitalize on what they know about one language to understand the other. With chapters conveniently organized by grammatical concept and including supplementary resources such as exercises, parallel reading texts, and audio files, this book will benefit students, travelers, and budding multilinguals alike.

Cultural Mobility

Realising that his New Year is probably going to be a disaster, as usual, our narrator, on impulse, walks into a travel agency to book a week in the sun. Sensitive to his limited means and dislike of Muslim countries, the travel agent suggests an island full of 21st century hedonism, set in a bizarre lunar landscape - Lanzarote. On Lanzarote, one can meet some fascinating human specimens, notably Pam and Barbara - 'non-exclusive' German lesbians - who can give rise to some interesting combinations. Will they succeed in seducing Rudi, the police inspector from Luxembourg, currently living in exile in Brussels? Or will he join the 'Azraelian' sect, as they prepare for humanity to be regenerated by extra-terrestrials? As for our narrator, will he consider his week's holiday on the island a success?

Scenic Spots

À nous les petites anglaises... Bon, on ne va pas se la raconter pendant des heures. Si on voyage, c'est pas pour rester enfermé dans sa chambre d'hôtel. Voyager, c'est aussi (et surtout) rencontrer des gens. Faire un brin de causette avec le gardien du musée ou tailler un rumsteak avec la jolie serveuse ou l'élégant barman... Ce guide malin, vous aidera à trouver tous les mots et les phrases qui sauvent... Et puis *Le routard de conversation Anglais* c'est toujours : 7 000 mots et expressions ; Une transcription phonétique simplifiée de chaque mot et phrase ; Des encadrés culturels et des conseils pratiques et linguistiques ; Et bien sûr... les bons plans et astuces du routard. Avec le Routard, tracez votre propre route ! Rencontres, découvertes, partage, voilà des valeurs que nous défendons !

Learning French from Spanish and Spanish from French

A union list of serials commencing publication after Dec. 31, 1949.

Lanzarote

For a long time, favelas were a source of fear for tourists visiting Rio de Janeiro. Now that they are more appealing, some have become popular tourist destinations even though they are still regarded as an "off the beaten track" activity. *Favela Tours* analyzes the factors behind the emergence of tourism in the favelas, places of otherness and authenticity for visitors who come mainly from Western Europe and North America. Based on ethnography of those involved in these practices (guides, residents and tourists), this book describes how the local and global forces are converging to make favelas part of the western tourism system: a mechanism for fabricating and assimilating otherness.

Guide du Routard New York 2024/25

The Routledge Handbook of Second Language Acquisition and Individual Differences provides a thorough, in-depth discussion of the theory, research, and pedagogy pertaining to the role individual difference (ID) factors play in second language acquisition (SLA). It goes beyond the traditional repertoire and includes 32 chapters covering a full spectrum of topics on learners' cognitive, conative, affective, and demographic/sociocultural variation. The volume examines IDs from two perspectives: one is how each ID variable is associated with learning behaviors, processes, and outcomes; the other is how each domain of SLA, such as vocabulary or reading, is affected by clusters of ID variables. The volume also includes a section on the common methods used in ID research, including data elicitation instruments such as surveys, interviews, and psychometric testing, as well as methods of data analysis such as structural equation modeling. The book is a must-read for any second language researcher or applied linguist interested in investigating the effects of IDs on language learning, and for any educator interested in taking account of learners' individual differences to maximize the effects of second language instruction.

CD-ROMs in Print

Includes entries for maps and atlases.

National Union Catalog

Digital art challenges archiving, collecting and preserving methods within and outside of gallery, library, archive and museum (GLAM) institutions. By its media, art in the digital sphere is processual, contextual, modular and ephemeral, and its creative process is collaborative. From artists, scholars, technicians and conservators—to preserve this contemporary art is a transdisciplinary task. This book brings together leading international experts from digital art theory and preservation, digital humanities, collection management, conservation and media art histories. In a transdisciplinary approach, theoretic and practice-based research from these stakeholders in art, research, education and exhibition are presented to create an overview of present preservation methods and discuss demands and opportunities for the future. Finally, the need for a new appropriate museum and archive infrastructure is shown to preserve the art of our time.

Guide du Routard Californie 2024/25

The Rough Guide to French Hotels and Restaurants 2005 edition is translated from the Guide de Routard a perennial bestseller in France, acclaimed by critics and readers alike. Characterful accommodation listings throughout France, from village inns to city-centre hotels, researched annually by Routard's team of inspectors. Extensive restaurant selections, emphasising both quality and value for money, with tips on local specialities.

Guide du Routard Floride 2024/25

Guide du Routard Inde du Nord 2020

A Discourse on Novelty and Creation

Carl Hausman presents here a sustained and systematic examination of the problems of constructing a framework for understanding the concept of creativity. His discussion is unique in focusing systematically on problems of understanding creativity, examining our assumptions about what we take to be creative, and the possibility of seeing how creativity fits into a world that we expect to behave in rational patterns. In a careful examination of this complex phenomena, Hausman suggests a way of approaching creativity in terms of a novel theory of metaphor.

A Discourse on Novelty and Creation

Over the past two decades, the number of studies of creativity has increased enormously. Although these studies represent a wide variety of perspectives, the largest proportion of them falls within the province of the social and behavioral sciences. Perhaps this is due to the impetus of experimental psychologists, who recognized the special problems that arise when originality is treated under a general theory of cognition. But whatever the reason, human creativity has come to be viewed as one of the major concerns of the twentieth century. It has been referred to as the most pressing problem of our time. In spite of the importance of the topic, few philosophers have either analyzed or speculated systematically about creativity, as a distinct topic. This neglect may be the expression of a tacit and sometimes explicit conviction that creativity must be taken for granted and not subjected to analytic scrutiny. In any case, the determination of so many behavioral and social scientists not to fall behind in the search for understanding creativity has led to a proliferation of publications that are unrelated to one another and that lack clearly ordered and reflective consideration of what creativity is. Too few writers have either acknowledged or examined what they presuppose about creative acts, about human activity, and about the nature of explanation when they focus on so complex a phenomenon as creativity.

A Discourse on Novelty and Creation

This book of readings can be traced to a twofold inception: chance and the convergence of two directed interests. The editors are a psychiatrist and philosopher, both of whom have made distinctive contributions to the perplexing problems of human creativity.

The Creativity Question

Distinguished philosophers of science and scholars in biochemistry and linguistics describe the structure and contexts of creativity in the sciences and humanities.

The Languages of Creativity

It's a sad truth that lies are becoming a part of everyday life. From pre-approved credit card mailings to college admission claims to presidential press conferences, the American public is being spun, deceived and misinformed at a dizzying rate and on a daily basis. Why is this? And what can we do about it? In this lively but serious examination of the way lies are infiltrating world, media expert Carl Hausman takes a hard look at the business of deception, an industry that is growing at an alarming rate. Uncovering the roots of misinformation in American business and politics, he reveals the way words, numbers, and images are intentionally distorted for public consumption by some of this country's major industries-including tobacco companies, airlines, financial institutions, public relations firms, and even medical practices and universities-and offers outrageous examples of some of the more egregious

assaults on the public trust. Showing readers how to spot potentially false claims, he offers advice about what we can do to stop them, with an annotated list of publications, individuals, and organizations dedicated to preventing the spread of misleading information. Whether it is paragraph-length footnotes, microscopic print or tortured statistics, the amount of propaganda being passed off as fact is both alarming and dangerous. *Lies We Live By* shows what to look for behind the double talk; but most importantly it offers ways to fight back.

Lies We Live By

Rethinking Law as Process draws on insights from 'process philosophy' in order to rethink the nature of legal decision making.

Rethinking Law as Process

"I've organized the principles of elegant writing into ten basic techniques. Each technique is explained in ten sets of instructions. When appropriate, which it usually is, I include an example clearly demonstrating how the principle being discussed has been used by an accomplished writer to great effect. But why my obsession with ten? I believe that as humans we are hard-wired to think and absorb in increments of ten"--

Write Like a Pro

CREATIVITY HAS become a popular slogan in contemporary education and society. We are urged continually to be creative with respect to all our endeavours - to be creative writers, creative cooks, creative teachers, creative thinkers, creative lovers. Ascribing creativity has become one of the principal means of praising, approving, and commending. Yet in the process of becoming a universal term of positive evaluation, the concept of creativity has tended to lose its connection with its origins. We have forgotten that creativity has to do with creating, that it is connected with great achievements and quality productions. And as a consequence of this lapse of memory, most attempts to foster creativity in educational practice have been misleading at best and dangerous at worst. We have come to settle for the encouragement of certain personality traits at the expense of the encouragement of significant achievement - and this in the name of creativity. If we are not clear about what is meant by creativity, we may end up sacrificing creativity precisely in the process of trying to foster it. This book is an attempt to be clear about creativity. The Context For the poet is an airy thing, a winged and a holy thing; and he cannot make poetry until he becomes inspired and goes out of his senses and no mind is left in him. I Plato If creativity and its growth are to be viewed scientifically, creativity must be defined in a way that permits objective observation and measurement . . .

Achieving Extraordinary Ends: An Essay on Creativity

This text presents an introduction to the mechanics, tools, and techniques of television and radio announcing. This revised edition introduces new material on cutting-edge technologies and ethics in the broadcasting industry.

The Darkroom Builder's Handbook

This is the first empirical investigation of scientific creativity based on research interviews with living Nobel laureates in physics, chemistry, and physiology or medicine, whose formulations are compared to those of a control group of engineering faculty members. Findings were that three cognitive creative processes described herein - janusian, homospatial, and sep-con articulation - as well as strong motivation, passion, and other accompanying emotions, were responsible for creative breakthroughs leading to outstanding scientific discoveries in the Nobel laureate group.

Announcing

This book presents ten techniques for getting your point across in all venues - including new media.

Moonlighting

For those who aspire to work in broadcasting, here is an easy-to-understand guide to production. It introduces the latest broadcast equipment, gives basic examples and projects, then considers more advanced topics.

Positive Public Relations

Albert Rothenberg, a psychiatrist, and Carl R. Hausman, a philosopher, have prepared a truly comprehensive interdisciplinary book of readings on creativity. This group of selections from the works of writers in psychiatry, philosophy, psychology, psychoanalysis, and education brings together, for the first time, major theoretical works, outstanding empirical findings, and discussions of the definition and nature of creativity. The organization of *The Creativity Question* is unique: it illustrates the various approaches and basic assumptions underlying studies of creativity throughout the course of history up to the present time. The main body of selections appears under the categories of descriptions, attempts at explanation, and alternate approaches. As specific orientations to creativity can be traced to particular initiating thinkers and investigators, there is a special chapter on seminal accounts containing selections from the works of Plato, Aristotle, Kant, Galton, and Freud. Another chapter includes recent illustrations of special types of exploratory trends: creativity of women, brain research, synectics, extrasensory perception, behaviorism, and creativity computer programming. This organization highlights the tension between strictly scientific accounts and alternative approaches offering new ways of understanding. The editors have provided for the books as a whole and for each chapter explanation and discussion of the basic issues raised by the various approaches to creativity.

Flight from Wonder

Drawing on a number of cutting-edge discoveries from brain research as well as on his own insights as a neuroscientist and neuropsychologist, Goldberg presents a wide-ranging discussion of history, culture, and evolution to arrive at an original understanding of the nature of human creativity. He discusses the origins of language, the nature of several neurological disorders, animal cognition, virtual reality, and even artificial intelligence. Included are his bold predictions about the future directions of creativity and innovation in society, and how they will change the ways the human brain develops and ages.

Present Like a Pro

Each of the chapters in this volume is a response to theoretical and practical questions regarding the relationship between the art object and language in art history. Accessible to readers of all social science disciplines, the issues discussed challenge the boundaries of thought that some contemporary theorizing sustains.

Modern Video Production

This third volume of American University Publications in Philosophy continues the tradition of presenting books in the series shaping current frontiers and new directions in philosophical reflection. In a period emerging from the neglect of creativity by positivism, Professors Dutton and Krausz and their eminent colleagues included in the collection challenge modern philosophy to explore the concept of creativity in both scientific inquiry and artistic production. In view of the fact that Professor Krausz served at one time as Visiting Professor of Philosophy at The American University we are especially pleased to include this volume in the series. HAROLD A. DURFEE, for the editors of American University Publications in Philosophy EDITORS' PREFACE While the literature on the psychology of creativity is substantial, surprisingly little attention has been paid to the subject by philosophers in recent years. This fact is no doubt owed in part to the legacy of positivism, whose tenets have included a sharp distinction between what Hans Reichenbach called the context of discovery and the context of justification. Philosophy in this view must address itself to the logic of justifying hypotheses; little of philosophical importance can be said about the more creative business of discovering them. That, positivism has held, is no more than a merely psychological question: since there is no logic of discovery or creation, there can be no philosophical reconstruction of it.

Common Sense Self Defense

An in-depth, step-by-step guide to researching, selecting, and operating a franchise, this book examines the varied aspects of franchises, from the legal and financial to business planning, negotiating, selecting a location, training, growth, and trouble-shooting.

Do Your Own Public Relations

Announcing for Broadcasting and the Internet is the standard text for traditional broadcasters and emerging pioneers. While many still pursue careers in traditional fields such as television and radio news announcing, broadcast performance has expanded to Internet radio, podcasting, home

voice-over production, and performance on YouTube and other Internet video venues. This text is an update of the classic text *Announcing*. The practical guide to mastering the techniques and mechanics of broadcast announcing remains, updated to give readers the ability to produce their own portfolio of performance products and get started in the career they want. It covers audio and video editing programs, new streaming media, and how to develop a powerful, consistent, and noteworthy speaking voice.

The Creativity Question

Contemporary society has seen an unprecedented rise in both the demand and the desire to be creative, to bring something new into the world. Once the reserve of artistic subcultures, creativity has now become a universal model for culture and an imperative in many parts of society. In this new book, cultural sociologist Andreas Reckwitz investigates how the ideal of creativity has grown into a major social force, from the art of the avant-garde and postmodernism to the 'creative industries' and the innovation economy, the psychology of creativity and self-growth, the media representation of creative stars, and the urban design of 'creative cities'. Where creativity is often assumed to be a force for good, Reckwitz looks critically at how this imperative has developed from the 1970s to the present day. Though we may well perceive creativity as the realization of some natural and innate potential within us, it has rather to be understood within the structures of a very specific culture of the new in late modern society. *The Invention of Creativity* is a bold and refreshing counter to conventional wisdom that shows how our age is defined by radical and restrictive processes of social aestheticization. It will be of great interest to those working in a variety of disciplines, from cultural and social theory to art history and aesthetics.

Creativity

This is a volume on the concepts, theories, models and social consequences of creativity. It contains articles by well-known cognitive scientists, economists, mathematicians, philosophers and psychologists.

The Language of Art History

This monograph provides new insights into variation in metonymy, focusing especially on changes of naming with respect to a particular concept. Its systematically designed and presented case studies delineate how both linguistic and cultural-social factors exert an influence on metonymic conceptualization, and demonstrate the importance of corpus data and quantitative methods in exploring and visualizing metonymic variation.

The Concept of Creativity in Science and Art

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Small-business Franchises Made Simple

Differences—cultural, religious, racial, gender, age—are at the heart of the most disruptive and disturbing concerns from personal relationships to global politics. *Creative Encounters* argues for the higher goal of appreciating difference as being essential to creativity and innovation, even if often experienced as stressful and complex.

Announcing for Broadcasting and the Internet

In this volume, distinguished neurologist Jason W. Brown extends the microgenetic theory of the mind by offering a new approach to the problem of time and free will. Brown bases his work on a unitary process model of brain and behavior. He examines the problem of subjective time and free will, the experiential present, the nature of intentionality, and the creative properties of physical growth and mental process.

The Invention of Creativity

This text shows how video production skills are applied in an institutional setting, be it business and industry, hospitals, government, or education. INSTITUTIONAL VIDEO offers an overview of the field; it also shows how video departments interact within an organization (Part I) and how institutional programs are planned, produced, and evaluated (Parts II and III); and it examines specialized applications and shows how technologies keep changing the scope of the profession (Part IV).

Crisis of Conscience

Conversations on Peirce provides a loosely related set of essays dealing with the philosophy of American pragmatist Charles Peirce that developed out of conversations between the authors over the last decade. The essays deal generally with the ways in which Peirce was both a realist and an idealist. Several of the essays also explore the consequences of these ideas in Peirce's thought.

The Complexity of Creativity

This edited collection addresses the problem of how the creation of novel spaces of governance relates to imaginaries of connectivity in time. While connectivity seems almost ubiquitous today, it has been imagined and practiced in various ways and to varying political effects in different historical and geographical contexts. Often the conception of new connectivities also gives birth to new spaces of governance. The political denomination of spaces – whether maritime, continental, social, or virtual – reflects the situatedness of power. Yet, such crafting of new spaces also expresses particular imaginaries and technologies of connectivity that make governance possible. Whereas the study of international relations has traditionally focused on the role of agency and structure in power relations, the affects, beliefs, attitudes, and practices that intervene in how groups of people connect in given times have not attracted much scholarly attention. Overall, the detailed and original case studies examined in the book range from the 16th century, to the 19th century, to the present, and from Spain, to the Maritime Alps, to Germany, to the Mediterranean, to China, to East Asia. The historical and geographical variety of the cases serves to highlight the diversity of the meaning and function of connectivity in the constitution of novel spaces of governance.

Variation in Metonymy

Discourse and Creativity examines the way different approaches to discourse analysis conceptualize the notion of creativity and address it analytically. It includes examples of studies of creativity from a variety of traditions and examines the following key areas, how people interpret and use discourse, the processes and practices of discourse production, discourse in modes other than written and spoken language, and the relationship between discourse and the technologies used to produce it. Discourse and Creativity combines a forward-thinking and interdisciplinary approach to the topic of creativity; this collection will be of great value to students and scholars in applied linguistics, stylistics, and communication studies.

A Discourse about the Charge of Novelty Upon the Reformed Church of England

Does a particular song take you back to a certain time and place? More than 100 celebrities were asked what songs bring back special memories.* Film star Joan Collins The Way You Look Tonight reminds her of the first dance at her wedding to Percy Gibson.* TV presenter Richard Madeley remembers playing guitar at the local folk club when he hears American Pie by Don McLean.* Pavarotti's rendition of Nessun Dorma sets off memories of the 1990 World Cup for Gary Lineker* Joanna Lumley thinks of her childhood in the Far East whenever she hears Nat King Cole singing Stardust. Music is one of the most evocative forces on earth. A whole cascade of memories can be brought on by a single tune. They Can't Take That Away From Me is a musical memory tour with the stars to a place where it is yesterday once more.

Creative Encounters, Appreciating Difference

This leading text continues to provide students with the best introduction to radio production available today! The new edition of "Modern Radio Production" continues to present a current, comprehensive look at radio production and programming, integrating new material on cutting-edge technologies with explanation of traditional equipment and practices. The authors' clear writing style, excellent descriptions and explanations, and attention to detail ensure that the text is consistent and appropriate for use in undergraduate courses.
