The Unbearable Bassington

"The Unbearable Bassington" by Saki (the pen-name of H. H. Munro) is one of many examples of the author's witty, bizarre, and perhaps a bit cynical writing style. An example of what were considered the typical manners and status quo in Edwardian society, "The Unbearable Bassington" is part commentary, part humor, and completely entertaining for readers of all ages and walks of life, even now, many years after its publication.

Power Play

The fully revised and updated version of this classic text examines the link between three key obsessions of the 21st century: the media, sport and popular culture. Gathering new material from around the 2007 Rugby World Cup, the Beijing Olympics and the rise of new sports stars such as boxing's Amir Khan and cycling's Victoria Pendleton, the authors explore a wide range of sports, as well as issues including nationalism, gender, race, political economy and the changing patterns of media sport consumption. For those interested in media and sport the second edition combines new and original material with an overview of the developing field of media sport, and examines the way in which the media has increasingly come to dominate how sport is played, organized and thought about in society. It traces the historical evolution of the relationship between sport and the media and examines the complex business relationships that have grown up around television, sponsors and

sport.Covers the following topics: the history of media in sport; television, sport and sponsorship; why sport matters to television; sports stars; sports journalism; fans and the audience; sport in the digital media economy.

The Terrible Old Man

"The Terrible Old Man" is a short story by H. P. Lovecraft, written on January 28, 1920, and first published in the *Tryout*, an amateur press publication, in July 1921. It's notable as the first story to make use of Lovecraft's imaginary New England setting, introducing the fictional town of Kingsport. The Terrible Old Man is a strange elderly man "so old that no one can remember when he was young, and so taciturn that few know his real name". He lives alone in an ancient house on Water Street in the town of Kingsport. The Terrible Old Man reappears in the story "The Strange High House in the Mist" in a more benevolent role.

God of the Machine

The God of the Machine presents an original theory of history and a bold defense of individualism as the source of moral and political progress. When it was published in 1943, Isabel Paterson's work provided fresh intellectual support for the endangered American belief in individual rights, limited government, and economic freedom. The crisis of today's collectivized nations would not have surprised Paterson; in *The God of the Machine*, she had explored the reasons for collectivism's failure. Her book placed her in the vanguard of the free-enterprise movement now sweeping the world. Paterson sees the individual creative mind as the dynamo of history, and respect for the individual's God-given rights as the precondition for the enormous release of energy that produced the modern world. She sees capitalist institutions as the machinery through which human energy works, and government as a device properly used merely to cut off power to activities that threaten personal liberty. Paterson applies her general theory to particular issues in contemporary life, such as education, social welfare, and the causes of economic distress. She severely criticizes all but minimal application of government, including governmental interventions that most people have long taken for granted. *The God of the Machine* offers a challenging perspective on the continuing, worldwide debate about the nature of freedom, the uses of power, and the prospects of human betterment. Stephen Cox's substantial introduction to *The God of the Machine* is a comprehensive and enlightening account of Paterson's colorful life and work. He describes *The God of the Machine* as "not just theory, but rhapsody, satire, diatribe, poetic narrative." Paterson's work continues to be relevant because "it exposes the moral and practical failures of collectivism, failures that are now almost universally acknowledged but are still far from universally understood."

The Hunt for Zero Point

This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. *The Hunt for Zero Point* explores the scientific speculation that a "zero point" of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, *The Hunt for Zero Point* traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, *The Hunt for Zero Point* journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

With a *Critical Eye: An Intellectual and His Times* recounts Vidich's career in the wider cultural context of his life and work. Providing a window into post-World War II intellectual life, the richness of the autobiography lies not only in Vidich's perspectives on the academic world but also in his personal and sociological observations about the world around him. Best known for his book *Small Town in Mass Society* (co-authored with Joseph Bensman, 1958), Vidich taught for more than forty years at the New School for Social Research in New York. He published eighteen books, co-edited a book series with Robert Jackall, and was the founding editor of the *International Journal of Politics, Culture, and Society*. Antonio, professor of sociology at the University of Kansas. "The autobiography is lucidly and unpretentiously written." Book jacket.

NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. "Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy."—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National

Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America’s greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who’d dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America’s finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. “*Rocket Men* is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book.”—The New York Times Book Review
