

Legislation On The Indochina War Hearings Ninety Second Congress First Session

[#Indochina War](#) [#Legislation Hearings](#) [#Ninety-Second Congress](#) [#First Session](#) [#Vietnam War Legislation](#)

These documents likely pertain to legislative hearings held during the Ninety-Second Congress, First Session, concerning legislation related to the Indochina War, often referring to the Vietnam War era. They offer insights into the congressional deliberations, potential laws considered, and perspectives on the conflict during that period, providing valuable historical context for understanding the US involvement in Southeast Asia and the legislative response to the war.

Our collection serves as a valuable reference point for researchers and educators.

Getting Things Done in Washington

Boyett has written a book that will inspire you, lift your spirits, renew your faith in what progressives can accomplish, and show you a way forward. *Getting Things Done in Washington* tells the exciting stories of six great moments of progressive legislative history and the people who made them happen: James Madison and the founding fathers struggle to expand the power of the federal government, The Ladies of Beekman Hill, George Wiley and the struggle for pure food and drugs, Wilbur Mills and the struggle for universal health insurance, Robert Wagner and the struggle for the right of labor to organize, John Sherman and the struggle to rein in and regulate big business, and Lyndon Johnson and the struggle for civil rights legislation. Boyett describes what it was like to live in America before progressives secured these historic pieces of legislation and how these legislative achievements changed the lives of every American. He introduces you to the fascinating men and women who led the efforts to pass this legislation and shows us how to defeat conservatives and once again get progressive things done in Washington. *Getting Things Done in Washington* is vivid and exciting history. It will inspire you to work even harder for progressive causes. Most importantly, it will give you the tools to begin getting things done in Washington.

The Activist Humanist

An argument that humanists have the tools—and the responsibility—to mobilize political power to tackle climate change As climate catastrophes intensify, why do literary and cultural studies scholars so often remain committed to the separation of aesthetic study from the nitty-gritty of political change? In this thought-provoking book, Caroline Levine makes the case for an alternative view, arguing that humanists have the tools to mobilize political power—and the responsibility to use those tools to avert the worst impacts of global warming. Building on the theory developed in her award-winning book, *Forms*, Levine shows how formalist methods can be used in the fight for climate justice. Countering scholars in the environmental humanities who embrace only “modest gestures of care”—and who seem to have moved directly to “mourning” our inevitable environmental losses—Levine argues that large-scale, practical environmental activism should be integral to humanists’ work. She identifies three major infrastructural forms crucial to sustaining collective life: routines, pathways, and enclosures. Crisscrossing between art works and public works—from urban transportation to television series and from food security programs

to rhyming couplets—she considers which forms might support stability and predictability in the face of growing precarity. Finally, bridging the gap between academic and practical work, Levine offers a series of questions and exercises intended to guide readers into political action. The Activist Humanist provides an essential handbook for prospective activist-scholars.

African American Lives

In the long-awaited successor to the "Dictionary of American Negro Biography," the authors illuminate history through the immediacy of individual experience, with authoritative biographies of some 600 noteworthy African Americans.

American Landmark Legislation

While we are all familiar with the lives of prominent Black civil rights leaders, few of us have a sense of what is entailed in developing a White anti-racist identity. Few of us can name the White activists who joined the struggle against discrimination, let alone understand the complexities, stresses and contradictions of doing this work while benefiting from the privileges they enjoyed as Whites. This book fills that gap by vividly presenting – in their own words – the personal stories, experiences and reflections of fifteen prominent White anti-racists. They recount the circumstances that led them to undertake this work, describe key moments and insights along their journeys, and frankly admit their continuing lapses and mistakes. They make it clear that confronting oppression (including their own prejudices) – whether about race, sexual orientation, ability or other differences – is a lifelong process of learning. The chapters in this book are full of inspirational and lesson-rich stories about the expanding awareness of White social justice advocates and activists who grappled with their White privilege and their early socialization and decided to work against structural injustice and personal prejudice. The authors are also self-critical, questioning their motivations and commitments, and acknowledging that – as Whites and possessors of other privileged identities – they continue to benefit from White privilege even as they work against it. This is an eye-opening book for anyone who wants to understand what it means to be White and the reality of what is involved in becoming a White anti-racist and social justice advocate; is interested in the paths taken by those who have gone before; and wants to engage reflectively and critically in this difficult and important work. Contributing Authors Warren J. Blumenfeld Abby L. Ferber Jane K. Fernandes Michelle Fine Diane J. Goodman Paul C. Gorski Heather W. Hackman Gary R. Howard Kevin Jennings Frances E. Hearings

This handbook describes ways in which society shapes the mental health of its members, and shapes the lives of those who have been identified as mentally ill. The text explores the social conditions that lead to behaviors defined as mental illness, and the ways in which the concept of mental illness is socially constructed around those behaviors. The book also reviews research that examines socially conditioned responses to mental illness on the part of individuals and institutions, and ways in which these responses affect persons with mental illness. It evaluates where the field has been, identifies its current location and plots a course for the future.

Common Situs Picketing, Hearing, 89-1, June 21 - 30, 1965

Every once in a while, I get a chance to listen to broadcasts on the radio or watch networking on television. And the more and more I do this, the more and more I get deeply concerned with the quality of so-called religious material presented on such via comments, discussions, lectures, preachings, teachings, etc. Every so often, I get led to deal with some of the monumental misunderstandings that menace the messianic ministry, mission, momentum, motion, motive, and movement. As these pessimistic, provocational presentations prevent permeation of positive providential pressure on the profound populace's psyche patterns, I constantly think about the repercussions they have on the

spiritual psyche. It is very unfortunate that we are letting our guards down and allowing this type of pessimistic provocational presentations to prevent the permeation of positive providential pressure on the profound populace's psyche patterns. There are two strategies/tactics/ways to deal with this type of teaching and preaching: one is defensive and the other is offensive. The offensive tactic/strategy/way to guard against it is to constantly teach and preach against it, thereby exposing it for what it is and minimizing it, if not eliminating it--this is referred to as the sword of the Spirit, which is the word of God; the defensive tactic/strategy/way to guard against it is to block or prevent it from entering your mind by literally putting a spiritual device of some sort over your mind--this is referred to as the helmet of salvation.

Hearings, Reports and Prints of the House Committee on Education and Labor

Vol. 2, no. 49 called "Memorial edition" (Belle Case La Follette)

Congressional Record
