 Steps in Recombinant DNA Technology or rDNA technology | Biotechnology - Steps in Recombinant
 DNA Technology or rDNA technology | Biotechnology by biologyexams4u 725,103 views 10 years ago
 8 minutes, 17 seconds - We have grouped together all our popular **recombinant DNA**, technology
 into a free course for a better learning experience.
 Introduction
 Definition of Recombinant DNA Technology, or rDNA technology
 Summary of steps in rDNA technology
 Step 1: identification and isolation of gene of interest From where we get our gene of interest?
 Step 2: Insertion of this isolated gene in a suitable vector using restriction enzyme and ligase.
 What is a gene cloning vector? What is called rDNA molecule?
 Step 3: Introduction of this vector into a suitable organism or cell called the host (transformation)
 Step 4: Selection of the transformed host cell
 Step 5: Multiplication or expression of the introduced gene in the host
