"Bate's writing is smart and compelling." --Publishers Weekly From the acclaimed author of *The Girls' Guide to Love and Supper Clubs* comes a witty, honest novel, perfectly seasoned with both humor and heart, about daring to bite into the life you really want. . . Sydney Strauss is obsessed with food. Not with eating it—though she does that too—but with writing about the wonders of the gastronomic world, from obscure fruit hybrids to organic farming techniques. Since food journalism jobs are more coveted than Cronuts®, Sydney pays her bills working for one of TV's biggest egomaniacs—until she's left scrambling for shifts at a local farmers' market. Stacking muffins for the Wild Yeast Bakery isn't going to win her any James Beard awards. But soon Sydney is writing the market's weekly newsletter, and her quirky stories gain attention from a prominent food columnist. After years of putting her love life into deep freeze, she's even dating again. And then Sydney gets a shot at the story, one that could either make her career or burn it to a crisp—along with her relationship and her reputation. . . "A breezy, idiomatic voice." – Publishers Weekly "Full of humor and lots of genuine heart." – RT Book Reviews "In smart and crisp prose, Bate tells a winning story about food, love and second chances, with recipes appended. Great fun." - Booklist Praise for *The Girls' Guide to Love and Supper Clubs* "Bate deftly conjures up a witty, resilient heroine, surrounds her with delightful friends and frenemies, and sends them all on a rollicking quest for love and delicious food." --Kirkus "Engaging. . . Even Bate's implausible happy ending feels right." --Publishers Weekly (Starred Review) "The food—oh my goodness—the food! From the Dupont Circle farmers' market to the Maine Avenue Fish Market, Hannah leads readers on a culinary tour of D.C.'s locavore scene. Do not read this book hungry." --Washington Post

The Value of a Second Bite at the Apple

This book analyzes the effect on consumer welfare of settlements of patent infringement lawsuits that consist of a royalty-free license for delayed entry by a potentially infringing horizontal competitor of the incumbent patent-holder. Settlements that split the remaining patent life in a way that reflects the expected outcome of the trial do not in general improve consumer welfare compared to the litigation alternative. This result arises because such settlements can undermine potential entrants' incentives to challenge the incumbent's monopoly. If settlements of patent infringement lawsuits cause a reduction in the investment in development of competing products, consumers may prefer that the parties to such disputes litigate rather than settle.

The Value of a Second Bite at the Apple

Sydney Strauss is obsessed with food. Not just with eating it – though she loves that too – but with writing about it as an aspiring cookery reporter. But food journalism jobs are more coveted than cupcakes, and so Sydney is stuck working for one of TV's biggest egomaniacs – until she's left scrambling for shifts at the local farmers' market. Selling muffins at the Wild Yeast Bakery is hardly going to make her the next Nigella. But soon Sydney is writing the market's weekly newsletter, and her quirky stories gain attention from a prominent food columnist. After years of being left on the shelf, she's even dating again. And then Sydney gets a shot at the story, one that could either make her career or burn it to a cinder – along with her relationship and her reputation...

The Stall of Second Chances

Rewriting the Supreme Court's landmark gay rights decision Jack Balkin and an all-star cast of legal scholars, sitting as a hypothetical Supreme Court, rewrite the famous 2015 opinion in *Obergefell v. Hodges*, which guaranteed same-sex couples the right to marry. In eleven incisive opinions, the authors offer the best constitutional arguments for and against the right to same-sex marriage, and debate what *Obergefell* should mean for the future. In addition to serving as Chief Justice of this imaginary court, Balkin provides a critical introduction to the case. He recounts the story of the gay rights litigation that led to *Obergefell*, and he explains how courts respond to political mobilizations for new rights claims. The social movement for gay rights and marriage equality is a powerful example of how—through legal imagination and political struggle—arguments once dismissed as “off-the-wall” can later become established in American constitutional law.

What *Obergefell v. Hodges* Should Have Said

Another Bite at the Apple: A Guide to Section 2255 Motions for Federal Prisoners is the first book of its kind to focus on the special procedures and concerns that arise when a prisoner moves to vacate, set aside, or correct a federal conviction or sentence under Section 2255. This book is especially important

now as Section 2255 proceedings have become significantly more complex with the enactment of the Antiterrorism and Effective Death Penalty Act.

'The moment I got my job at Virago in 1978 I knew it would be a long time before I would leave. I certainly wouldn't have had the brazen hope then-only twenty-five and very recently new to Britain-that I would ever become the Publisher, but I did know that I had found my home: where books, ideas, politics, imagination, feminism, and business was the air we breathed . . .' A Bite of the Apple is part-memoir, part history of Virago, and part thoughts on over forty years of feminist publishing. This is the story of how the authors and staff who, driven by passion, conviction and excitement, have made Virago Press one of the most important and influential English-language publishers in the world. Lennie Goodings has been with the iconic press founded by Carmen Callil almost since the start. First a publicist and then for over twenty years, publisher and editor, she has worked with extraordinary authors: Margaret Atwood, Marilynne Robinson, Sarah Waters, Linda Grant, Natasha Walter, Naomi Wolf and Maya Angelou among many others. Virago has been a life-changer for Lennie Goodings - but certainly not only for her. Following the chronology of the press and the enormous breadth of the Virago titles published over these years, she sets her story in the context of feminism, and segues into thoughts on editing, post-feminism, reading, breaking boundaries, and the Virago Modern Classics. Virago lives within the tension between idealism and pragmatism; between sisterhood and celebrity; between watching feminism wax and wane at the same time as knowing so many of the battles are still to be won. This book is about how it felt to be there. A Bite of the Apple is a celebration of writing, of publishing, and of reading.

A Bite of the Apple

Defining more than 10,000 words and phrases from everyday slang to technical terms and concepts, this dictionary of the audiovisual language embraces more than 50 subject areas within film, television, and home entertainment. It includes terms from the complete lifecycle of an audiovisual work from initial concept through commercial presentation in all the major distribution channels including theatrical exhibition, television broadcast, home entertainment, and mobile media. The dictionary definitions are augmented by more than 700 illustrations, 1,600 etymologies, and nearly 2,000 encyclopedic entries that provide illuminating anecdotes, historical perspective, and clarifying details.

On paper, David Epslamowitz has it all. At only thirty years old, he is the proud owner of one the most successful hedge funds and resides in a posh three-story penthouse on the most prominent street in the Big Apple. He is known on the street as a devoted philanthropist renowned for his good-looks and obnoxiously infinite bank account. Nevertheless, David struggles internally for the balance of what truly inspires him while at the same time trying to fulfill his deceased father's expectations. Ultimately he fills this void in the eyes of an alluring French actress and learns what truly fulfills him... love. It seems that nothing can keep David from being with her but the closer he gets, the more it seems someone is trying to sabotage the relationship. Slowly, David discovers that not only is someone out to ruin him, but that he and those close to him are in extreme danger. Living in a suburb of the Big Apple since a teen, Viktor Kozlov became the most sought-after assassin, just like his father before him. He's been hired by the government, the mafia and anyone who could afford him for his extraordinary ability to make his "hits" appear as accidental deaths. However, Viktor struggles for the balance of who he is and who he is destined to be until one day when an unusual client arrives at his house with an extra unusual request. *Don't Bite the Apple* is a suspenseful thriller that will keep you pleading for clues to solve the mystery of David's fate. Fear, laugh and cry with David as the twists are revealed and you discover why, when, and who connects him to the most dangerous assassin in the world. This story epitomizes the question of what it is to be successful. Success is not measured by wealth; rather, it has to do with the difference between what you were born with and what you did with it. In that search for who you are, the greater your access to money, the more temptations that are available to you and those around you, especially in the Big Apple.

Don't Bite the Apple

The name of Zoltan P. Dienes (1916-) stands with those of Jean Piaget and Jerome Bruner as a legendary figure whose theories of learning have left a lasting impression on the field of mathematics education. Dienes' name is synonymous with the Multi-base blocks (also known as Dienes blocks) which he invented for the teaching of place value. He also is the inventor of Algebraic materials and logic blocks, which sowed the seeds of contemporary uses of manipulative materials in mathematics instruction. Dienes' place is unique in the field of mathematics education because of his theories on how mathematical structures can be taught from the early grades onwards using multiple embodiments through manipulatives, games, stories and dance. Dienes' notion of embodied knowledge presaged other cognitive scientists who eventually came to recognize the importance of embodied knowledge and situated cognition - where knowledge and abilities are organized around experience as much as they are organized around abstractions. Dienes was an early pioneer in what was later to be called sociocultural perspectives and democratization of learning. This monograph compiled and edited by Bharath Sriraman honors the seminal contributions of Dienes to mathematics education and includes several recent unpublished articles written by Dienes himself. These articles exemplify his principles of guided discovery learning and reveal the non-trivial mathematical structures that can be made accessible to any student. The monograph also includes a rare interview with Dienes in which he reflects on his life, his work, the role of context, language and technology in mathematics teaching and learning today. The book finds an important place in any mathematics education library and is vital reading for mathematics education researchers, cognitive scientists, prospective teachers, graduate students and teachers of mathematics.

Mathematics Education and the Legacy of Zoltan Paul Dienes

Hannah Sugarman seems to have it all. She works for an influential think tank in Washington, D.C., lives in a swanky apartment with her high-achieving boyfriend, and is poised for an academic career just like her parents. The only problem is that Hannah doesn't want any of it. What she wants is much simpler; to cook. When her relationship collapses, Hannah seizes the chance to do what she's always loved and launches an underground supper club out of her new landlord's town house. Though her delicious dishes become the talk of the town, her secret venture is highly problematic, given that it is not, technically speaking, legal. She also conveniently forgets to tell her landlord she has been using his place while he is out of town. On top of that, Hannah faces various romantic prospects that leave her guessing and confused, parents who don't support cooking as a career, and her own fears of taking a risk and charting her own path. A charming romantic comedy, *The Girls' Guide to Love and Supper Clubs* is a story about finding yourself, fulfilling your dreams, and falling in love along the way.

Since the 1987 appearance of *A Dictionary of Modern Legal Usage*, Bryan A. Garner has proved to be a versatile and prolific writer on legal-linguistic subjects. This collection of his essays shows both profound scholarship and sharp wit. The essays cover subjects as wide-ranging as learning to write, style, persuasion, contractual and legislative drafting, grammar, lexicography, writing in law school, writing in law practice, judicial writing, and all the literature relating to these diverse subjects.

The Girls' Guide to Love and Supper Clubs

Cider Cocktails - Another Bite of the Apple, the first collection of cider cocktail recipes published since Prohibition. Nineteenth and early 20th century cocktail manuals are full of cider-based drinks - punches and fizzes and toddies and more - but cider didn't bounce back into America's glasses until recently. Now that it's easily available again, cider is finding its way into the creative tool box of many modern mixologists. And who not? Cider is made in a whole range of flavors and styles, providing ample opportunity to exploit its mixing possibilities. With 30 cocktail recipes inspired by pre-Prohibition classics and today's craft cocktail movement plus 10 recipes for cider-infused appetizers, *Cider Cocktails - Another Bite of the Apple* gives cocktail and cider enthusiasts alike something exciting to prepare for their next big event or an evening with a handful of friends.

Garner on Language and Writing

Rev. ed. of: *A dictionary of modern legal usage* / Bryan A. Garner. 2nd ed. 1995.

Cider Cocktails - Another Bite of the Apple

Ever the Leader gathers together selected speeches and writings from one of the great scholars and commentators of higher education. William G. Bowen's career at Princeton University—from economics professor to provost to a sixteen-year tenure as president—was marked by extraordinary accomplishments during times of great change, both at the university and in the country. But it was in Bowen's second act, as president of the Andrew W. Mellon Foundation and founding chairman of ITHAKA, that he took the lessons he learned as a highly productive leader of one of the nation's most esteemed universities and applied them to a broader set of problems in higher education. This volume of work from Bowen's later career captures this expansion of his thought and influence. Comprising remarks and articles on the subjects of university values, educational opportunity, college sports, technology, and colleagues and peers in higher education leadership, *Ever the Leader* is more than just a concise distillation of Bowen's research and thinking on some of the most urgent issues of the day—it is a portrait of leadership in action. The selected papers, talks, and articles exemplify Bowen's commitment and singular ability to communicate strong, persuasive arguments for change, and to motivate others to engage with the truly hard questions facing higher education leaders. Filled with formidable insights, *Ever the Leader* will be required reading for university presidents, policymakers, and all those who carry on the struggle for equity and excellence in higher education.

Poison Apple Books: Thrilling. Bone-chilling. These books have bite! Ashlee Lambert, the queen bee from *THIS TOTALLY BITES*, has had a tough time ever since she became a full-fledged vampire. But now that she's moving from New York City to sunny Los Angeles, she's excited to make a fresh new start. But Ashlee never counted on a clique of popular mean girls or awful sunburns. Keeping her huge secret is suddenly harder than ever. And when something -- or someone -- starts attacking people at her school, Ashlee realizes she's not the only vampire in town. It's up to Ashlee to figure out who's behind the attacks before her cover is blown forever!

Wanted: First Contact Translator. Salary Commensurate With Experience Estlin Hume awakes alone in his home outside of Twin Butte, Alberta, to find that he's surrounded by aliens, soldiers, scientists, spies, and affectionate squirrels. That's nothing new. But now there's a giant (12 acres x 16 fathoms) saltwater tank full of cuttlefish suspended above his house. WTF! Adopted by a pair of newly arrived aliens to serve as their translator, Estlin is trapped at the center of a first contact crisis. Unfortunately, the aliens have silently climbed the nearest tree, leaving him to contend with the hundreds of cuttlefish. He is inundated with ill-advised governmental and military directives—punctuated by random acts of violence from unknown nefarious agents—as everyone is determined to find out for themselves what the aliens really want. No matter the cost! No matter the outcome!

Men of Fighters - The Mark

On the Internet, seekers investigate anonymous manifestos that focus on the findings of brilliant scientists said to have discovered pathways into alternate realities. Gathering on web forums, researchers not only share their observations, but also report having anomalous experiences, which they believe come from their online involvement with these veiled documents. Seeming logic combines with wild twists of lost Moorish science and pseudo-string theory. Enthusiasts insist any obstacle to revelation is a sure sign of great and wide-reaching efforts by consensus powers wishing to suppress all the liberating truths in the Incunabula Papers (included here in complete form). In Legend-Tripping Online, Michael Kinsella explores these and other extraordinary pursuits. This is the first book dedicated to legend-tripping, ritual quests in which people strive to explore and find manifest the very events described by supernatural legends. Through collective performances, legend-trippers harness the interpretive frameworks these stories provide and often claim incredible, out-of-this-world experiences that in turn perpetuate supernatural legends. Legends and legend-tripping are assuming tremendous prominence in a world confronting new speeds of diversification, connection, and increasing cognitive load. As guardians of tradition as well as agents of change, legends and the ordeals they inspire contextualize ancient and emergent ideas, behaviors, and technologies that challenge familiar realities. This book analyzes supernatural legends and the ways in which the sharing spirit of the internet collectivizes, codifies, and makes folklore of fantastic speculation.

This Festschrift is in honor of Ker-I Ko, Professor in the Stony Brook University, USA. Ker-I Ko was one of the founding fathers of computational complexity over real numbers and analysis. He and Harvey Friedman devised a theoretical model for real number computations by extending the computation of Turing machines. He contributed significantly to advancing the theory of structural complexity, especially on polynomial-time isomorphism, instance complexity, and relativization of polynomial-time hierarchy. Ker-I also made many contributions to approximation algorithm theory of combinatorial optimization problems. This volume contains 17 contributions in the area of complexity and approximation. Those articles are authored by researchers over the world, including North America, Europe and Asia. Most of them are co-authors, colleagues, friends, and students of Ker-I Ko.

Poison Apple #8: At First Bite

An intimate look at the life of Steve Jobs by the mother of his first child providing rare insight into Jobs's formative, lesser-known years Steve Jobs was a remarkable man who wanted to unify the world through technology. For him, the point was to set people free with tools to explore their own unique creativity. Chrisann Brennan knows this better than anyone. She met him in high school, at a time when Jobs

was passionately aware that there was something much bigger to be had out of life, and that new kinds of revelations were within reach. *The Bite in the Apple* is the very human tale of Jobs's ascent and the toll it took, told from the author's unique perspective as his first girlfriend, co-parent, friend, and—like many others—object of his cruelty. Brennan writes with depth and breadth, and she doesn't buy into all the hype. She talks with passion about an idealistic young man who was driven to change the world, about a young father who denied his own child, and about a man who mistook power for love. Chrisann Brennan's intimate memoir provides the reader with a human dimension to Jobs' myth. Finally, a book that reveals a more real Steve Jobs.

This resource is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction. 176pp.

The Rosetta Mind

How do honeybees find their way home? Why is Venus so hot? How can you measure the speed of the wind? What makes a sound loud or soft? Discover the awesome answers to these and other fascinating mysteries in biology, chemistry, physics, earth science, and astronomy. Just try these 201 fun, safe, low-cost experiments at home or in the classroom. You'll look through a drop of water to find out how a magnifying lens works. Using a Styrofoam ball, a pencil, and a lamp, you'll learn why the Moon appears and disappears. With just a jar and some ice cubes, you can demonstrate how rain is formed. Each experiment includes an illustration and easy to follow step-by-step instructions. This companion volume to the enormously popular 200 *Goosey, Slippery, Slimy, Weird, and Fun Experiments* brings together magical projects from Janice VanCleave's *Science for Every Kid* and *Spectacular Science Projects* series--plus 40 all-new experiments that make science come to life. Developing Home Port Facilities for Three NIMITZ-class Aircraft Carriers in Support of the U.S. Pacific Fleet, (CA, WA, HI)

This guidebook provides an overview of the choices faced by businesses that find themselves accused of infringing a patent. It includes a summary of potential defenses and options available to an accused infringer. Strategies for keeping the cost of defense down are discussed as is the often overlooked issue of finality. Compact and readable, this book can be used by businesses to shine some light on a process that can seem like a black box. It can also serve as a convenient resource for the busy patent litigator or as a digestible introduction for lawyers new to patent litigation. This second edition has been revised to reflect new developments, including the passage of the America Invents Act of 2011. Other new features include a glossary and a section on the process of litigation.

Rosie Sanders, often described as the best painter of the world's most famous fruit, has devoted years to researching this book and submitting the apples to hour upon hour of meticulous observation. In 144 beautifully detailed watercolours she depicts the unrivalled range of form, colour and texture which characterize such varieties as Beauty of Bath, Peasgood Nonsuch, Cox's Orange Pippin and Egremont Russet. Painted with their blossom, twig and leaf, Rosie offers detailed descriptions of each apple's aroma, flavour and season as well as something of the history of each variety. The book is enhanced by a practical essay on apple growing by Harry Baker, fruit officer for many years at the Royal Horticultural Society and one of Britain's foremost authorities on apple growing.

Contemporary Issues in International Arbitration and Mediation: The Fordham Papers (2007)

Seminar paper from the year 2023 in the subject English Language and Literature Studies - Linguistics, grade: 1.3, LMU Munich (Department of English Studies), course: Dictionaries, language: English, abstract: This paper examines how it can be decided which idioms to include in a dictionary, what criteria need to be met, and how to make sure the layout is helpful and clear to users. First, the research background is laid down, including a definition of idioms and an examination of their challenges. In this

part, idioms in dictionaries will also be focused on, as well as food-related idioms. Next, 25 food-related idioms will be analysed in terms of frequency, transparency, frozenness and size, as those categories give the most information about their function and perception. Finally, the results are discussed, focusing on implications for dictionaries. For the analysis, the Corpus of Contemporary American English (COCA) is used, mainly for checking the frequency of idioms and creating a frozenness scale. The transparency of each idiom is rated by the researcher with feedback from peers, and for size, the letters in each idiom are counted automatically with the Excel COUNT function. It has to be considered that this study is of a rather small scope and is therefore not representative, but can be seen more as a case study. The suggestions and recommendations made at the end can still be applied to most idiom representations in dictionaries. The goal of this paper is to advise dictionary creators in their view on idioms, and also inform dictionary users on the use of idioms in dictionaries in general.
