Indian Armours in the National Museum Collection

India is a vast sub-continent, with a complex history and a great array of languages, cultures and religions. This short introduction to one aspect of that great culture is intended merely as an appetiser, and is by no means intended as the last word on any aspect of Indian arms and armour. By 'India' I mean the whole Indian sub-continent rather than any political term. The history which forms a background to the story of Indian arms and armour saw empires rise and fall, but the remarkable constancy in the exquisite weapons used by their defenders and opponents marks Indian arms and armour out as something beyond mere statehood. was the catalyst to all sorts of studies of Indian culture and it is no accident that much of the pioneering work on Indian arms and armour was carried out by English scholars. The most notable of these, and the author of the first serious study of Indian armour and arms, was William Egerton, Lord Egerton of Tatton in Cheshire, whose catalogue of the collection of the Indian Museum in London (a collection now absorbed into the Victoria and Albert Museum) appeared in 1880. Yet despite a few important works in the 20th century, such as Philip Rawson's *The Indian Sword* and Russell Robinson's *Oriental Armour*, and new works such as Robert Elgood's *Hindu Arms and Ritual in The 21st Century*, the scientific study of Indian arms and armour has not advanced to the level, say, of Japanese arms and armour. armour in the Royal Armouries. Almost all the holdings are concentrated in the period from the formation of the Mughal empire in the 16th century to the end of the 19th century when western firearms technology had been widely adopted, and it is hoped that this small publication will help in making an important western collection of Indian armour and arms accessible.

An Introduction to Indian Arms and Armour

A well illustrated book about the various arm and armour that have been use in the east. For want of a volume describing the subject, the author wrote this book. It starts with a sketch of the military history of India from the earliest invasions up to the first Burmese war of 1824. It then gives a descriptive catalogue of Indian Arms with introductory notes on styles of decoration, processes of manufacture

and ethnological characteristics. Various areas are described in separate chapters. The descriptions are complimented with a map, 23 full page illustrations and numerous wood cuts. This book was first published in 1896.

A Description of Indian and Oriental Armour

This book has a selection of 186 of the most interesting arms in the Jaipur royal palace and discusses them as weapons in their social and historical context. The book breaks new ground in Indian arms scholarship and is also a very readable account that takes in Rajput, Mughal and British Indian history, anthropology and art history. The objects are stunning. One in a series illustrating the collections of the Maharaja Sawai Man Singh II Museum, City Palace, Jaipur, the book will be essential for all museum curators, dealers and collectors working in the field.

Tracing the development of the weapons of the Indian warrior, from the earliest to modern times, this text also provides illustrations of a wide variety of the arms and armour discussed.

A Description of Indian and Oriental Armour

Armor and weaponry were central to Islamic culture not only as a means of conquest and the spread of the faith, but also as symbols of status, wealth, and power. The finest arms were made by master craftsmen working with the leading designers, goldsmiths, and jewelers, whose work transformed utilitarian military equipment into courtly works of art. This book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the West. The Metropolitan Museum's holdings span ten centuries and include representative pieces from almost every Islamic culture from Spain to the Caucasus. The collection includes rare early works, among them the oldest documented Islamic sword, and is rich in helmets and body armor, decorated with calligraphy and arabesques, that were worn in Iran and Anatolia in the late fifteenth century. Other masterpieces include a jeweled short sword (yatagan) with a blade of "watered" steel that comes from the court of Süleyman the Magnificent, a seventeenth-century gold-inlaid armor associated with Shah Jahan, and two gold-inlaid flintlock firearms belonging to the guard of Tipu Sultan of Mysore. Presenting 126 objects, each handsomely photographed and richly documented with a detailed description and discussion of its technical, historical, and artistic importance, this overview of the Met's holdings is supplemented by an introductory essay on the formation of the collection, and appendixes on iconography and on Turkman-style armor.

Indian Arms and Armour: Human armour and shield

India is a vast sub-continent with a complex history and a great array of languages, cultures and religions. This book serves as a short introduction to the exquisite weapons used in the region, focusing on the Royal Armouries' collections from the sixteenth to the nineteenth centuries. Beautiful photography is interwoven with remarkable historical and cultural detail about archery, swords, shields, daggers, firearms, artillery and elephant armour.

Arms and Armour at the Jaipur Court

- An introduction and overview to the arms and armor of the Indian region- The book is designed for easy use with pull out details from objects and timelines, maps and explanations of design details. *Arms & Armour Of India, Nepal & Sri Lanka* is a very visually-driven and broad-based introduction to the unique world of arms and armor of the Indian region, encompassing India, Pakistan, Nepal, and Sri Lanka, areas with strong martial traditions. It provides an overview of types of arms and armor, with extensive geographical and historical context with many illustrated maps, their decoration and methods of adornment, as well as the iconographic and religious symbology. A unique and valuable feature of the book is an illustrated glossary. It is specifically designed to suit the needs of anyone wanting to familiarize themselves with this topic and the region. It can serve as a reference for the novice collector, and as an image resource for experts. This would include anyone interested in arms and armor in general, antique dealers, museums, general art market, educators, and of course, collectors. There has been increased interest in both collecting and scholarship regarding Indic arms and armor. Nearly every major auction on Indian and Islamic material tends to include arms and armor.

An Illustrated Handbook of Indian Arms

The museum of the East India Company formed, for a large part of the nineteenth century, one of the sights of London. In recent years, little has been remembered of it beyond its mere existence, while an assumed negative role has been widely attributed to it on the basis of its position at the heart of one of Britain's arch-colonialist enterprises. Extensively illustrated, *The India Museum Revisited* provides a full examination of the museum's founding manifesto and evolving ambitions. It surveys the contents of its multi-faceted collections – with respect to materials, their manufacture and original functions on the Indian sub-continent – as well as the collectors who gathered them and the manner in which they were mobilized to various ends within the museum. From this integrated treatment of documentary and material sources, a more accurate, rounded and nuanced picture emerges of an institution that contributed in major ways, over a period of 80 years, to the representation of India for a European audience, not only in Britain but through the museum's involvement in the international exposition movement to audiences on the continent and beyond.

Arms and Armour

Originally created in the late 19th century to catalog Indian and Oriental arms and armor for a British museum, this volume has long since become a sourcebook of vital information on the military history of India. Enhanced with excellent illustrations, it remains one of the few books available on the subject, providing factual accounts of events ranging from the earliest invasions of the subcontinent in 200 B.C. to the decline of the Mogul Empire (early 18th century) and the First Burmese War in 1824. In addition to information on military history, succeeding chapters describe Indian swords, helmets, knives, shields, daggers, spears, javelins, blowpipes, sabers, and a host of other weapons, including arms used for athletic and sacrificial purposes. Descriptive notes, grouped according to geographical areas, comment on styles of decoration, manufacturing processes, and ethnological characteristics. A shorter section of the book includes detailed information on Arab and Persian arms (maces, battle axes, matchlock guns, bows and arrows, etc.) and Japanese armor. Students of Far Eastern arms and armor as well as enthusiasts of military history will welcome this comprehensive reference. 350 halftones and line illustrations.

Islamic Arms and Armor in The Metropolitan Museum of Art

A shorter section of the book includes detailed information on Arabian and Persian arms and Japanese armor. Illustrations and notes describe helmets, daggers, sabers, maces, blowpipes, and other weapons--all grouped according to geographical areas. Cornelius Ryan: The Longest Day (D-Day June 6, 1944), A Bridge Too Far (LOA #318)

For the 75th anniversary of D-Day, a deluxe collector's edition gathering two gripping masterpieces of military history. Library of America presents two of the best books ever written about World War II in a deluxe collector's edition featuring 88 pages of photographs, full-color endpaper maps, rare archival material revealing how the books were written, and a new introduction by Pulitzer Prize-winning journalist and historian Rick Atkinson (The Liberation Trilogy). The Longest Day tells the story of the Allies' greatest success, the Normandy invasions of June 6, 1944, Operation Overlord; A Bridge Too Far recounts perhaps their greatest failure, the catastrophic airborne invasion of Holland in September 1944, known as Operation Market Garden. Together, they reveal not only the twisting fortunes of war and the grand sweep and scale of the largest amphibious and airborne invasions ever mounted, but also the very real human experience of combat, the small but momentous individual acts that can change the course of history. No one has told these stories more powerfully than Cornelius Ryan. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

A Bridge Too Far

On 17th September 1944, the people of southern England gaped as the mightiest airborne force in history thundered overhead en route for Arnhem.

The Last Battle

The Battle for Berlin was the final struggle of World War II in the European theatre, the last offensive against Hitler's Third Reich, which devastated one of Europe's historic capitals and brought an end to the Nazi regime. It lasted more than two weeks across April -- May 1945, and was one of the bloodiest and most pivotal episodes of the war, one which would play a part in determining the shape of international politics for decades to come. **THE LAST BATTLE** is a story of brutal extremes, of stunning military triumph alongside the stark conditions that the civilians of Berlin experienced in the face of the Allied assault. It is history at its best, a masterful illumination of the effects of war on the lives of individuals, and one of the enduring works on World War II.

The Longest Day

A classic military history, now in a fully illustrated and redesigned edition. First published in 1959, *The Longest Day* is one of the bestselling military history books of all time, and the inspiration for the legendary 1962 film released by 20th Century Fox. The author, war journalist Cornelius Ryan, pioneered a new style of military history writing based on interviews with more than a thousand battle participants from both sides. From these powerful stories emerges a vivid description of the crucial 24 hours that made up D-Day. This beautifully designed archive edition incorporates 25 original research documents with Ryan's classic text, all further enhanced by the addition of 120 photographs.

A Bridge Too Far

An account of Market-Garden, the massive combined airborne and ground divisions operation planned by Field Marshal Montgomery to take the strategic bridge at Arnhem and insure the defeat of the Third Reich during World War II.

Cornelius Ryan: *The Longest Day* (D-Day June 6, 1944), *A Bridge Too Far* (LOA #318)

For the 75th anniversary of D-Day, a deluxe collector's edition gathering two gripping masterpieces of military history. Library of America presents two of the best books ever written about World War II in a deluxe collector's edition featuring 88 pages of photographs, full-color endpaper maps, rare archival material revealing how the books were written, and a new introduction by Pulitzer Prize-winning journalist and historian Rick Atkinson (*The Liberation Trilogy*). *The Longest Day* tells the story of the Allies' greatest success, the Normandy invasions of June 6, 1944, Operation Overlord; *A Bridge Too Far* recounts perhaps their greatest failure, the catastrophic airborne invasion of Holland in September 1944, known as Operation Market Garden. September Hope

Acclaimed historian John C. McManus, author of *The Dead and Those About to Die*, explores World War II's most ambitious invasion, Operation Market Garden, an immense, daring offensive to defeat Nazi Germany before the end of 1944. "A riveting and deeply moving story of uncommon courage."—Alex Kershaw, *New York Times* bestselling author of *The First Wave* August 1944 saw the Allies achieve more significant victories than in any other month over the course of the war. The Germans were in disarray, overwhelmed on all fronts. Rumors swirled that the war would soon be over. On September 17, the largest airborne drop in military history commenced over Holland—including two entire American divisions, the 101st and the 82nd. Their mission was to secure key bridges at such places as Son, Eindhoven, Grave, and Nijmegen until British armored forces could relieve them. The Germans, however, proved much stronger than the Allies anticipated. In eight days of ferocious combat, they

mauled the airborne, stymied the tanks, and prevented the Allies from crossing the Rhine. September Hope conveys the American perspective like never before, through a vast array of new sources and countless personal interviews to create a truly revealing portrait of this searing human drama.

Watching War Films With My Dad

Al Murray's (AKA The Pub Landlord) musing on his childhood where his fascination with history and all things war began. Have you ever watched a film with someone who, at the most dramatic scene, argues that the plane on screen hasn't been invented yet? Or that the tank rumbling towards the hero at the end of the film is the wrong tank altogether? Al Murray is that someone. Try as he might, he can't help himself. Growing up in the 1970s, Al, with the help of his dad, became fascinated with the history of World War Two. They didn't go to football; they went to battlefields. Because like so many of his generation whose childhood was all about Airfix, Action Man and Where Eagles Dare, he grew up in the cultural wake of the Second World War. Part memoir, part life obsession, this is Al Murray musing on what he knows best. And he's sure to tell you things about history that you were never taught at school.

Arnhem

The Sunday Times #1 Bestseller The great airborne battle for the bridges in 1944 by Britain's Number One bestselling historian and author of the classic Stalingrad 'Our greatest chronicler of the Second World War . . . his fans will love it' - Robert Fox, Evening Standard 'The eye for telling detail which we have come to expect from Antony Beevor. . . this time, though, he turns his brilliance as a military historian to a subject not just of defeat, but dunderhead stupidity' Daily Mail On 17 September 1944, General Kurt Student, the founder of Nazi Germany's parachute forces, heard the growing roar of aeroplane engines. He went out on to his balcony above the flat landscape of southern Holland to watch the air armada of Dakotas and gliders carrying the British 1st Airborne and the American 101st and 82nd Airborne divisions. He gazed up in envy at this massive demonstration of paratroop power. Operation Market Garden, the plan to end the war by capturing the bridges leading to the Lower Rhine and beyond, was a bold concept: the Americans thought it unusually bold for Field Marshal Montgomery. But could it ever have worked? The cost of failure was horrendous, above all for the Dutch, who risked everything to help. German reprisals were pitiless and cruel, and lasted until the end of the war. The British fascination with heroic failure has clouded the story of Arnhem in myths. Antony Beevor, using often overlooked sources from Dutch, British, American, Polish and German archives, has reconstructed the terrible reality of the fighting, which General Student himself called 'The Last German Victory'. Yet this book, written in Beevor's inimitable and gripping narrative style, is about much more than a single, dramatic battle. It looks into the very heart of war. 'In Beevor's hands, Arnhem becomes a study of national character' - Ben Macintyre, The Times 'Superb book, tirelessly researched and beautifully written' - Saul David, Daily Telegraph 'Complete mastery of both the story and the sources' - Keith Lowe, Literary Review 'Another masterpiece from the most feted military historian of our time' - Jay Elwes, Prospect Magazine 'The analysis he has produced of the disaster is forensic' - Giles Milton, Sunday Times 'He is a master of his craft . . . we have here a definitive account' - Piers Paul Read, The Tablet

Endgame, 1945

To end a history of World War II at VE Day is to leave the tale half told. Endgame 1945 highlights the gripping personal stories of nine men and women, ranging from soldiers to POWs to war correspondents, who witnessed firsthand the Allied struggle to finish the terrible game at last. Endgame 1945 highlights the gripping personal stories of nine men and women, ranging from soldiers to POWs to war correspondents, who witnessed firsthand the Allied struggle to finish the terrible game at last. Through their ground-level movements, Stafford traces the elaborate web of events that led to the war's real resolution: the deaths of Hitler and Mussolini, the liberation of Buchenwald and Dachau, and the Allies' race with the Red Army to establish a victors' foothold in Europe, to name a few. From Hitler's April decision never to surrender to the start of the Potsdam Conference, Stafford brings an unprecedented focus to the war's "final chapter." Narrative history at its most compelling, Endgame 1945 is the riveting story of three turbulent months that truly shaped the modern world.

The PIAT

Designed in 1942, Britain's innovative Projector, Infantry, Anti-Tank (PIAT) provided British and Commonwealth troops with a much-needed means of taking on Germany's formidable Panzers. Replacing the inadequate Boys anti-tank rifle, it was conceived in the top-secret World War II research and development organization known colloquially as 'Churchill's Toyshop', alongside other ingenious weapons such as the sticky bomb, the limpet mine and the time-pencil fuse. Unlike the more famous US bazooka, the PIAT had its roots in something simpler than rocket science. Operated from the shoulder, the PIAT was a spigot mortar which fired a heavy high-explosive bomb, with its main spring soaking up the recoil. The PIAT had a limited effective range. Troops required nerves of steel to get close enough to an enemy tank to ensure a direct hit, often approaching to within 50ft of the target, and no fewer than six Victoria Crosses were won during World War II by soldiers operating PIATs. A front-line weapon in every theatre of the conflict in which Commonwealth troops fought, from Europe to the Far East, the PIAT remained in service after 1945, seeing action during the Greek Civil War, the Arab-Israeli conflict and the Korean War. This illustrated study combines detailed research with expert analysis to reveal the full story of the design, development and deployment of this revolutionary weapon.

The God Con

The crucifix is in! You can fool most of the people most of the time. In The God Con, Lee Moller, a life-long atheist and skeptic, looks at organized religion through the lens of the con. Organized religion has been selling an invisible product, that it never has to deliver, for thousands of years. It has given us bigotry, rampant pedophilia, terrorism, and bloodshed beyond imagining. And its acolytes have, in turn, given organized religion power over their bank accounts, their reproduction, and their very "souls".

Run Silent, Run Deep

This is a story of the silent service—the submarine crews which destroyed the Japanese merchant marine. A narrative taut with drama, told with the intimacy of a confession, it deals with two strong-headed men: their loves, their jealousies, and their destinies in the lonely and desperate struggle between the hunter and the hunted. Few war novels will rival Run Silent, Run Deep in the naked realism of its action. None will surpass its rising excitement and brilliant descriptions of men in combat. Unlike many war novels, here is a story that deals with war from the perspective of command. Edward Beach re-creates with fidelity the anguish, agony, and triumphs of command decisions. In Commander Richardson, he has created a character who embodies all that is fine, all that is human, in an excellent naval officer. In a sense, Run Silent, Run Deep is a monument, not to the misfits and the mistakes, but to those men who rose to greatness under the sometimes unbearable tensions of action.

A Drop Too Many

No one who has read of Arnhem can have failed to have been inspired by gallantry of the 2nd Parachute Regiment, which held the north end of the key road bridge over the Rhine not for 24 hours for which it was equipped, but for 3 days and 4 nights. Commanded by the then Lt-Col Frost, they beat off repeated armoured and infantry assaults by far greater numbers, until forced out of the ruined and burning positions by losses, lack of ammunition, and the failure of the whole Arnhem operation. Their sacrifice stands as one of the most heroic defences of all time. General Frost's story is, in effect, that of the battalion. His tale starts with the Iraq Levies and goes on the major airborne operations in which he

took part - Bruneval, Tunisia, Sicily, Italy, Arnhem - and continues with his experiences as a prisoner and the reconstruction of the battalion after the German surrender. Though written with modesty and humour, the book is shot through with the fire and determination of the fighting soldier, and throws important new light on many controversies, not only those of Arnhem.

The Hinge of Fate

The British prime minister recounts battles from Midway to Stalingrad, and how the Allies turned the tide of WWII: "Superlative." —The New York Times The Hinge of Fate is the dramatic account of the Allies' changing fortunes. In the first half of the book, Winston Churchill describes the fearful period in which the Germans threaten to overwhelm the Red Army, Rommel dominates the war in the desert, and Singapore falls to the Japanese. In the span of just a few months, the Allies begin to turn the tide, achieving decisive victories at Midway and Guadalcanal, and repulsing the Germans at Stalingrad. As confidence builds, the Allies begin to gain ground against the Axis powers. This is the fourth in the six-volume account of World War II told from the unique viewpoint of the man who led his nation in the fight against tyranny. The series is enriched with extensive primary sources, as we are presented with not only Churchill's retrospective analysis of the war, but also memos, letters, orders, speeches, and telegrams, day-by-day accounts of reactions as the drama intensifies. Throughout these volumes, we listen as strategies and counterstrategies unfold in response to Hitler's conquest of Europe, planned invasion of England, and assault on Russia, in a mesmerizing account of the crucial decisions made as the fate of the world hangs in the balance. "No memoirs by generals or politicians . . . are in the same class." —The New York Times

Stalingrad

Antony Beevor's Stalingrad is a harrowing look at one of history's darkest moments. In October 1942, a panzer officer wrote 'Stalingrad is no longer a town... Animals flee this hell; the hardest stones cannot bear it for long; only men endure'. The battle for Stalingrad became the focus of Hitler and Stalin's determination to win the gruesome, vicious war on the eastern front. The citizens of Stalingrad endured unimaginable hardship; the battle, with fierce hand-to-hand fighting in each room of each building, was brutally destructive to both armies. But the eventual victory of the Red Army, and the failure of Hitler's Operation Barbarossa, was the first defeat of Hitler's territorial ambitions in Europe, and the start of his decline. An extraordinary story of tactical genius, civilian bravery, obsession, carnage and the nature of war itself, Stalingrad will act as a testament to the vital role of the soviet war effort. 'A superb re-telling. Beevor combines a soldier's understanding of war's realities with the narrative techniques of a novelist . . . This is a book that lets the reader look into the face of battle' Orlando Figes, Sunday Telegraph 'A brilliantly researched tour de force of military history' Sarah Bradford, The Times Antony Beevor is the renowned author of Stalingrad, which won the Samuel Johnson Prize, the Wolfson Prize for History and the Hawthornden Prize for Literature, and Berlin, which received the first Longman-History Today Trustees' Award. His books have sold nearly four million copies.

Ulysses

Poets of World War II

Arnhem - it was the last major battle lost by the British Army, lost not by the men who fought there but by the overconfidence of generals, faulty planning and the failure of a relieving force given too great a task. If the operation of which Arnhem formed a part had been successful, the outcome of the war and the history of post-war Europe would have been greatly altered. Yet is it worth another book? I had fulfilled all my literary ambitions by researching and writing thirteen full-length books and was ready to retire from that laborious craft when Peter van Gorsel, head of Penguin's Dutch office, asked me to write a book on Arnhem for the fiftieth anniversary in 1994. It was the first time that my publishers had requested a book; all previous subjects had been my choice. I eventually agreed for several reasons. I had not previously researched and written about the British Army in the Second World War and had not previously done any work in Holland; so two fresh fields were opened up to me. I also felt that the fighting in and around Arnhem had still not been described in the detail that it merited.

Reporting World War II: American Journalism 1938-1946

Harold Robbins, the world's most popular and captivating storyteller, has created what may well be the most significant book ever written about the rise of the labor unions. The 1979 novel, freshly re-released, is the saga of Daniel Boone "Big Dan" Huggins, who rises from poverty and the mines of West Virginia to become the most respected and feared labor organizer in the nation. Daniel's life and death are tied to the challenges and fortunes of American labor. Once he is gone, his youngest son Jonathan must take up the reins of his father's cause, returning to Daniel's roots to better understand the path that led him to his destiny. Robbins has a gift for combining popular fiction with the most pertinent subjects of the twentieth century, to create a snapshot of the time. Relevant, respectful, and very readable, *Memories of Another Day* proves once again why Harold Robbins' books have sold more copies than any other American writer in history.

Memories of Another Day

For the centenary of America's entry into World War I, A. Scott Berg presents a landmark anthology of American writing from the cataclysmic conflict that set the course of the 20th century. Few Americans appreciate the significance and intensity of America's experience of World War I, the global cataclysm that transformed the modern world. Published to mark the centenary of the U.S. entry into the conflict, *World War I: Told by the Americans Who Lived It* brings together a wide range of writings by American participants and observers to tell a vivid and dramatic firsthand story from the outbreak of war in 1914

through the Armistice, the Paris Peace Conference, and the League of Nations debate. The eighty-eight men and women collected in the volume--soldiers, airmen, nurses, diplomats, statesmen, political activists, journalists--provide unique insights into how Americans of every stripe perceived the war, why they supported or opposed intervention, how they experienced the nightmarish reality of industrial warfare, and how the conflict changed American life. Richard Harding Davis witnesses the burning of Louvain; Edith Wharton tours the front in the Argonne and Flanders; John Reed reports from Serbia and Bukovina; Charles Lauriat describes the sinking of the Lusitania; Leslie Davis records the Armenian genocide; Jane Addams and Emma Goldman protest against militarism; Victor Chapman and Edmond Genet fly with the Lafayette Escadrille; Floyd Gibbons, Hervey Allen, and Edward Lukens experience the ferocity of combat in Belleau Wood, Fismette, and the Meuse-Argonne; and Ellen La Motte and Mary Borden unflinchingly examine the "human wreckage" brought into military hospitals. W.E.B. Du Bois, James Weldon Johnson, Jessie Fauset, and Claude McKay protest the racist treatment of black soldiers and the violence directed at African Americans on the home front; Carrie Chapman Catt connects the war with the fight for women suffrage; Willa Cather explores the impact of the war on rural Nebraska; Henry May recounts a deadly influenza outbreak onboard a troop transport; Oliver Wendell Holmes weighs the limits of free speech in wartime; Woodrow Wilson envisions a world without war. A coda presents three iconic literary works by Ernest Hemingway, E. E. Cummings, and John Dos Passos. With an introduction and headnotes by A. Scott Berg, brief biographies of the writers, and endpaper maps. The Patton Papers

A provocative reconsideration of a presidency on the brink of Civil War Almost no president was as well trained and well prepared for the office as James Buchanan. He had served in the Pennsylvania state legislature, the U.S. House, and the U.S. Senate; he was Secretary of State and was even offered a seat on the Supreme Court. And yet, by every measure except his own, James Buchanan was a miserable failure as president, leaving office in disgrace. Virtually all of his intentions were thwarted by his own inability to compromise: he had been unable to resolve issues of slavery, caused his party to split--thereby ensuring the election of the first Republican president, Abraham Lincoln--and made the Civil War all but inevitable. Historian Jean H. Baker explains that we have rightly placed Buchanan at the end of the presidential rankings, but his poor presidency should not be an excuse to forget him. To study Buchanan is to consider the implications of weak leadership in a time of national crisis. Elegantly written, Baker's volume offers a balanced look at a crucial moment in our nation's history and explores a man who, when given the opportunity, failed to rise to the challenge.
