

Environmental Pollution And Health Hazards

[#environmental pollution](#) [#health hazards](#) [#pollution effects](#) [#public health risks](#) [#environmental degradation](#)

Environmental pollution, encompassing contaminants in air, water, and soil, poses significant and diverse health hazards to humans and ecosystems. Exposure to these pollutants can trigger a wide range of ailments, from respiratory and cardiovascular diseases to neurological disorders and cancers, highlighting the urgent need for robust environmental protection and public health interventions to mitigate these profound risks.
