The Devil's Gap

The scene on May 10, 1973, seemed like something out of a Hollywood blockbuster. In the town of Kenora, on the north shore of the Lake of the Woods near the Ontario-Manitoba border, a man was robbing a bank in the most bombastic way. Paul Higgins walked into the bank armed with a home-made bomb and Dead Man's Switch in his mouth to detonate it. If anyone were to shoot him and if he let go of the switch, he would blow himself up and take as many people with him as possible. The police were in a standoff. Was it worth the risk to shoot? Acclaimed journalist Joe Ralko has spent his entire life mulling over this case. It wasn't his career that put him on the trail of Paul Higgins-Joe was there! He was a curious high school student who watched the drama unfold from the street. He had a clear line of sight down the sidewalk as Higgins emerged from the bank fifty feet away. What happened next would go down in Canadian history. Ralko would become fascinated with every aspect of the case. It was only years later, after he had established himself as a writer and while recovering from his first battle with cancer, that he decided to finally tell the story.

Crimes Committed by Terrorist Groups

This is a print on demand edition of a hard to find publication. Examines terrorists' involvement in a variety of crimes ranging from motor vehicle violations, immigration fraud, and mfg. illegal firearms to counterfeiting, armed bank robbery, and smuggling weapons of mass destruction. There are 3 parts: (1) Compares the criminality of internat. jihad groups with domestic right-wing groups. (2) Six case studies of crimes includes trial transcripts, official reports, previous scholarship, and interviews with law enforce. officials and former terrorists are used to explore skills that made crimes possible; or events and lack of skill that the prevented crimes. Includes brief bio. of the terrorists along with descriptions of their org., strategies, and plots. (3) Analysis of the themes in closing arguments of the transcripts in Part 2. Illus.

Superfreakonomics

Here at last is the long awaited sequel to the international bestselling phenomenon, *Freakonomics*. Steven Levitt, the original rogue economist, and Stephen Dubner have been working hard, uncovering the hidden side of even more controversial subjects, from charity to terrorism and prostitution. And with their inimitable style and wit, they will take us on another even more gripping journey of discovery. *Superfreakonomics* will once again transform the way we look at the world.

Folk Devils and Moral Panics

'Richly documented and convincingly presented' -- *New Society* Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The History of Terrorism

This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

The Threat of Pandemic Influenza

Public health officials and organizations around the world remain on high alert because of increasing concerns about the prospect of an influenza pandemic, which many experts believe to be inevitable. Moreover, recent problems with the availability and strain-specificity of vaccine for annual flu epidemics in some countries and the rise of pandemic strains of avian flu in disparate geographic regions have alarmed experts about the world's ability to prevent or contain a human pandemic. The workshop summary, *The Threat of Pandemic Influenza: Are We Ready?* addresses these urgent concerns. The report describes what steps the United States and other countries have taken thus far to prepare for the next outbreak of "killer flu." It also looks at gaps in readiness, including hospitals' inability to absorb a surge of patients and many nations' incapacity to monitor and detect flu outbreaks. The report points to the need for international agreements to share flu vaccine and antiviral stockpiles to ensure that the 88 percent of nations that cannot manufacture or stockpile these products have access to them. It chronicles the toll of the H5N1 strain of avian flu currently circulating among poultry in many parts of Asia, which now accounts for the culling of millions of birds and the death of at least 50 persons. And it compares the costs of preparations with the costs of illness and death that could arise during an outbreak.

Immigration Policy and the Terrorist Threat in Canada and the United States

"In June 2007, the Fraser Institute held a conference in Toronto, Ontario, titled, "Immigration Policy, Border Controls, and the Terrorist Threat In Canada and the United States." The chapters in this volume, which arose from this conference, raise fundamental questions about weaknesses in Canada's current immigration policies and procedures." "The contributors to this volume identify serious threats and weaknesses in the immigration, asylum, and border regimes from both Canadian and American perspectives. The authors are not opposed to effectively managed immigration or allowing genuine refugees who pose no security threat to enter the country through a well-vetted system. All believe that the vast majority of immigrants pose no danger, but are simply seeking to improve their freedom and prosperity. Nevertheless given the stakes raised by terrorist attacks, the entry of even a small number of potentially dangerous individuals should warrant major attention and policy review."--BOOK JACKET.

The Financial Crisis Inquiry Report

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film *In Debt We Trust* warned of the economic meltdown in 2006. He has since written three books on the subject including *Plunder: Investigating Our Economic Calamity* (Cosimo Books, 2008), and *The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail* (Disinfo Books, 2011), a companion to his latest film *Plunder The Crime Of Our Time*. He can be reached online at www.newsdissector.com.

The Future of the Public's Health in the 21st Century

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of *Healthy People 2010*, and outlines a systems approach to assuring the nation's health in

practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

The Prohibition of Torture in Exceptional Circumstances

This book reframes the historical, legal and moral discourse on the question of whether torture can be justified in exceptional circumstances.

Pedagogy of the Oppressed

Now a major motion picture called *The Mauritanian* 'A vision of hell, beyond Orwell, beyond Kafka' JOHN LE CARRÉ The first and only diary written by a Guantánamo detainee during his imprisonment, now with previous censored material restored. Mohamedou Ould Slahi was imprisoned in Guantánamo Bay in 2002. There he suffered the worst of what the prison had to offer, including months of sensory deprivation, torture and sexual assault. In October 2016 he was released without charge. This is his extraordinary story.

Guantánamo Diary

Documents the influenza epidemic of 1918 which killed approximately 40 million people around the world.

Flu

A NEW YORK TIMES BESTSELLER The official book behind the Academy Award-winning film *The Imitation Game*, starring Benedict Cumberbatch and Keira Knightley It is only a slight exaggeration to say that the British mathematician Alan Turing (1912-1954) saved the Allies from the Nazis, invented the computer and artificial intelligence, and anticipated gay liberation by decades--all before his suicide at age forty-one. This New York Times--bestselling biography of the founder of computer science, with a new preface by the author that addresses Turing's royal pardon in 2013, is the definitive account of an extraordinary mind and life. Capturing both the inner and outer drama of Turing's life, Andrew Hodges tells how Turing's revolutionary idea of 1936--the concept of a universal machine--laid the foundation for the modern computer and how Turing brought the idea to practical realization in 1945 with his electronic design. The book also tells how this work was directly related to Turing's leading role in breaking the German Enigma ciphers during World War II, a scientific triumph that was critical to Allied victory in the Atlantic. At the same time, this is the tragic account of a man who, despite his wartime service, was eventually arrested, stripped of his security clearance, and forced to undergo a humiliating treatment program--all for trying to live honestly in a society that defined homosexuality as a crime. The inspiration for a major motion picture starring Benedict Cumberbatch and Keira Knightley, *Alan Turing: The Enigma* is a gripping story of mathematics, computers, cryptography, and homosexual persecution.

Alan Turing: The Enigma

Describes the author's childhood relocation from France to the U.S., where as a naturalized citizen he joined the military and served multiple tours in Afghanistan before he was wounded while protecting his patrol from a suicide bomber.

8 Seconds of Courage

The suicide bombings carried out in London in 2005 by British Muslims revealed an enormous fifth column of Islamist terrorists and their sympathizers. Under the noses of British intelligence, London has become the European hub for the promotion, recruitment and financing of Islamic terror and extremism - so much so that it has been mockingly dubbed Londonistan. In this ground-breaking book Melanie Phillips pieces together the story of how Londonistan developed as a result of the collapse of traditional

English identity and accommodation of a particularly virulent form of multiculturalism. Londonistan has become a country within the country and not only threatens Britain but its special relationship with the U.S. as well.

Londonistan

By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Shortlisted for the Man Booker Prize “A novel as accomplished as anything being written.”—*Newsweek* *Number9Dream* is the international literary sensation from a writer with astonishing range and imaginative energy—an intoxicating ride through Tokyo’s dark underworlds and the even more mysterious landscapes of our collective dreams. David Mitchell follows his eerily precocious, globe-striding first novel, *Ghostwritten*, with a work that is in its way even more ambitious. In outward form, *Number9Dream* is a Dickensian coming-of-age journey: Young dreamer Eiji Miyake, from remote rural Japan, thrust out on his own by his sister’s death and his mother’s breakdown, comes to Tokyo in pursuit of the father who abandoned him. Stumbling around this strange, awesome city, he trips over and crosses—through a hidden destiny or just monstrously bad luck—a number of its secret power centers. Suddenly, the riddle of his father’s identity becomes just one of the increasingly urgent questions Eiji must answer. Why is the line between the world of his experiences and the world of his dreams so blurry? Why do so many horrible things keep happening to him? What is it about the number 9? To answer these questions, and ultimately to come to terms with his inheritance, Eiji must somehow acquire an insight into the workings of history and fate that would be rare in anyone, much less in a boy from out of town with a price on his head and less than the cost of a Beatles disc to his name. Praise for *Number9Dream* “Delirious—a grand blur of overwhelming sensation.”—*Entertainment Weekly* “To call Mitchell’s book a simple quest novel . . . is like calling Don DeLillo’s *Underworld* the story of a missing baseball.”—*The New York Times Book Review* “*Number9Dream*, with its propulsive energy, its Joycean eruption of language and playfulness, represents further confirmation that David Mitchell should be counted among the top young novelists working today.”—*San Francisco Chronicle* “Mitchell’s new novel has been described as a cross between Don DeLillo and William Gibson, and although that’s a perfectly serviceable cocktail-party formula, it doesn’t do justice to this odd, fitfully compelling work.”—*The New Yorker* “Leaping with ease from surrealist fables to a teenage coming-of-age story and then spinning back to Yakuza gangster battles and World War II-era kamikaze diaries, Mitchell is an aerial freestyle ski-jumper of fiction. Somehow, after performing feats of literary gymnastics, he manages to stick the landing.”—*The Seattle Post-Intelligencer*

Number9Dream

Discusses the Allied invasion of Normandy, with extensive details about the planning stage, called Operation Overlord, as well as the fighting on Utah and Omaha Beaches.

Cross Channel Attack

The shocking, heart-breaking - and often very funny - true story behind *Oranges Are Not the Only Fruit*. In 1985 Jeanette Winterson's first novel, *Oranges Are Not the Only Fruit*, was published. It was Jeanette's version of the story of a terraced house in Accrington, an adopted child, and the thwarted giantess Mrs Winterson. It was a cover story, a painful past written over and repainted. It was a story of survival. This book is that story's the silent twin. It is full of hurt and humour and a fierce love of life. It is about the pursuit of happiness, about lessons in love, the search for a mother and a journey into madness and out again. It is generous, honest and true. 'Unforgettable... It's the best book I have ever read about the cost of growing up' Daisy Goodwin, *Sunday Times* **ONE OF THE GUARDIAN'S 100 BEST BOOKS OF THE 21st CENTURY**

Why Be Happy When You Could Be Normal?

'Brilliant...wild and exhilarating' *New Yorker* Sgt Raymond Shaw is a hero of the first order. He's an ex-prisoner of war who saved the life of his entire outfit, a winner of the Congressional Medal of Honor, the stepson of an influential senator...and the perfect assassin. Brainwashed during his time as a POW he is a 'sleeper', a living weapon to be triggered by a secret signal. He will act without question, no matter what order he is made to carry out. To stop Shaw, his former commanding officer must uncover the truth behind a twisted conspiracy of torture, betrayal and power that will lead both to the highest levels of the government. - and to Shaw's own past...

A Question Of Trust

This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

The Manchurian Candidate

In compiling this annotated bibliography on the psychology of terrorism, the author has defined terrorism as "acts of violence intentionally perpetrated on civilian noncombatants with the goal of furthering some ideological, religious or political objective." The principal focus is on nonstate actors. The task was to identify and analyze the scientific and professional social science literature pertaining to the psychological and/or behavioral dimensions of terrorist behavior (not on victimization or effects). The objectives were to explore what questions pertaining to terrorist groups and behavior had been asked by social science researchers; to identify the main findings from that research; and attempt to distill and summarize them within a framework of operationally relevant questions. To identify the relevant social science literature, the author began by searching a series of major academic databases using a systematic, iterative keyword strategy, mapping, where possible, onto existing subject headings. The focus was on locating professional social science literature published in major books or in peer-reviewed journals. Searches were conducted of the following databases October 2003: Sociofile/Sociological Abstracts, Criminal Justice Abstracts (CJ Abstracts), Criminal Justice Periodical Index (CJPI), National Criminal Justice Reference Service Abstracts (NCJRS), PsycInfo, Medline, and Public Affairs Information Service (PAIS). Three types of annotations were provided for works in this bibliography: Author's Abstract -- this is the abstract of the work as provided (and often published) by the author; Editor's Annotation -- this is an annotation written by the editor of this bibliography; and Key Quote Summary -- this is an annotation composed of "key quotes" from the original work, edited to provide a cogent overview of its main points.

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary

The mother of Brittany Maynard, whose 2014 decision to die with dignity advanced debates over patient rights in end-of-life issues, describes Brittany's determination to end her life on her own terms and her legacy of hope and empowerment for others facing their own mortality.

Psychology of Terrorism

Dead Men Risen, winner of the prestigious Orwell Prize for Books, is the epic story of a beleaguered British battle group fighting desperately to prevent the Taliban from seizing Afghanistan's Helmand province just as the U.S. Marines arrive to take over. Bestselling author Toby Harnden describes how men from the coal mining valleys and slate quarry villages of Wales found themselves in the

most intense combat faced by British troops for a generation. Underequipped and overstretched, the fighting prowess of the Welsh Guards in the killing fields of Sangin and Nawa awed the U.S. Marines. NATO commander General Stanley McChrystal, who was awaiting a response to his urgent request to President Barack Obama for more troops, hailed their "burn-in-your-gut passion." Harnden was on the ground with the Welsh Guards in Helmand in 2009. He gained access to a trove of secret military documents and conducted nearly three hundred interviews in Afghanistan, England, Wales, and the United States to produce this timeless and profound account of men at war. Commanding the Welsh Guards was Lieutenant Colonel Rupert Thorneloe, a passionate believer in the justness of the war who was dismayed by the military and political incompetence surrounding it. In chilling detail, Harnden reveals how and why Thorneloe—the first British battalion commander to die in action since the 1982 Falklands War—was killed by an IED during Operation Panther's Claw. By the time the fighting was over, almost no rank had been spared. From the searing heat of the poppy fields and the mud compounds of Helmand to the dreaded knock on the door back home, the reader is transported there. Harnden weaves the experiences of the soldiers, their historical forbears and the flawed NATO strategy into a masterly narrative. No other book about modern conflict succeeds on so many levels. *Dead Men Risen* is essential for anyone who wants to understand the reality of the Afghan war for the U.S and its allies.

Wild and Precious Life

Ted Hughes, Poet Laureate, was one of the greatest writers of the twentieth century. He was one of Britain's most important poets. With an equal gift for poetry and prose, he was also a prolific children's writer and has been hailed as the greatest English letterwriter since John Keats. His magnetic personality and insatiable appetite for friendship, love, and life also attracted more scandal than any poet since Lord Byron. His lifelong quest to come to terms with the suicide of his first wife, Sylvia Plath, is the saddest and most infamous moment in the public history of modern poetry. Hughes left behind a more complete archive of notes and journals than any other major poet, including thousands of pages of drafts, unpublished poems, and memorandum books that make up an almost complete record of Hughes's inner life, which he preserved for posterity. Renowned scholar Jonathan Bate has spent five years in the Hughes archives, unearthing a wealth of new material. His book offers, for the first time, the full story of Hughes's life as it was lived, remembered, and reshaped in his art.

Dead Men Risen

The First World War followed a period of sustained peace in Europe during which people talked with confidence of prosperity, progress, and hope. But in 1914, Europe walked into a catastrophic conflict that killed millions, bled its economies dry, shook empires and societies to pieces, and fatally undermined Europe's dominance of the world. It was a war that could have been avoided up to the last moment—so why did it happen? Beginning in the early nineteenth century and ending with the assassination of Archduke Franz Ferdinand, award-winning historian Margaret MacMillan uncovers the huge political and technological changes, national decisions, and just as important, the small moments of human muddle and weakness that led Europe from peace to disaster. This masterful exploration of how Europe chose its path toward war will change and enrich how we see this defining moment in our history.

Index de Périodiques Canadiens

The affecting autobiography of a small-town sportswriter drafted into Suicide Charlie--the bastard U.S. Army infantry company that fought in the hot zones of Vietnam where the combat was the bloodiest. Kirkus Reviews called it "probing, painful At times as piercing as a splinter in the soul".

Ted Hughes

From the ebook Preface: "This book majors on the presentation of empirical evidence in the form of data. The most digestible form for communicating such material is through the use of Tables and Figures, generally graphs. Consequently, the book has a great many Tables and Figures and the latter are often in colour. Viewing on a device capable of rendering colours is therefore recommended although monochrome will be adequate in most cases." The Empathy Gap proposes the thesis that men and boys are extensively disadvantaged across many areas of life, including in education, health-care, genital integrity, criminal justice, domestic abuse, working hours, taxation, pensions, paternity, homelessness, suicide, sexual offences, and access to their own children after parental separation. The claim is justified in the book by empirical evidence, mostly but not exclusively from the UK,

involving nearly 1,000 references, 179 Figures and 49 Tables. To most people, of both sexes, this will appear to be a perverse perspective as disadvantage has become the province of women, girls and minorities, not males. Yet the empirical case supporting the disadvantages suffered by men and boys is undeniable to the objective mind. But if this is so, why is the popular perception that males are privileged whereas disadvantage is the province of the opposite sex? Why do the male disadvantages go largely unremarked, by both sexes, if they are so pervasive? Presenting the case for widespread and substantial male disadvantage is also a challenge to the usual hegemonic paradigm of feminist theory. These issues are addressed within *The Empathy Gap* by presenting an entirely different orientation on the social psychology of relations between the sexes. Out goes the idea of an oppressive patriarchy. Instead, a man's participation in the human pair bond is seen to be altruistic, a phenomenon arising originally from evolution and enacted in the individual via the emotional psyche. This is the origin of an asymmetry in the perception of the sexes which normalises the preferencing of females and therefore inevitably disadvantages males as a corollary. The successful evolved strategy involves male utility and relative male disposability, the latter being facilitated by a muted empathy for males, by both sexes - the empathy gap. Rather than working to overcome this male disposability, as a true egalitarian movement would have done, feminism has fed upon it and amplified it. The feminist project relies upon the true state of affairs remaining unacknowledged, and the empathy gap is instrumental in its own invisibility. In respect of this theory, the author makes no claim for originality. The ideas presented have been circulating within the sub-culture for decades. However, the focus of the book is to show how these ideas are manifest in practice.

The War That Ended Peace

Change is hard. It doesn't have to be. We all know that change is hard. It's unsettling, it's time-consuming, and all too often we give up at the first sign of a setback. But why do we insist on seeing the obstacles rather than the goal? This is the question that bestselling authors Chip and Dan Heath tackle in their compelling and insightful book. They argue that we need only understand how our minds function in order to unlock shortcuts to switches in behaviour. Illustrating their ideas with scientific studies and remarkable real-life turnarounds - from the secrets of successful marriage counselling to the pile of gloves that transformed one company's finances - the brothers Heath prove that deceptively simple methods can yield truly extraordinary results.

Suicide Charlie

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.

The Empathy Gap

WATERSTONES NON-FICTION BOOK OF THE MONTH AUGUST 2018 AND A SUNDAY TIMES BESTSELLER 'An astonishingly detailed picture of espionage in the 1980s, written with pacey journalistic verve and an eerily contemporary feel.' Ben Macintyre, *The Times* 'A gripping story of courage, professionalism, and betrayal in the secret world.' Rodric Braithwaite, British Ambassador in Moscow, 1988-1992 'One of the best spy stories to come out of the Cold War and all the more riveting for being true.' *Washington Post* January, 1977. While the chief of the CIA's Moscow station fills his gas tank, a stranger drops a note into the car. In the years that followed, that stranger, Adolf Tolkachev, became one of the West's most valuable spies. At enormous risk Tolkachev and his handlers conducted clandestine meetings across Moscow, using spy cameras, props, and private codes to elude the KGB in its own backyard - until a shocking betrayal put them all at risk. Drawing on previously classified CIA documents and interviews with first-hand participants, *The Billion Dollar Spy* is a brilliant feat of reporting and a riveting true story from the final years of the Cold War.

Switch

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Social Reintegration of Offenders and Crime Prevention

A novel from internationally acclaimed author Paulo Coelho – a dramatic story of love, life and death that shows us all why every second of our existence is a choice we all make between living and dying.

The Brain That Changes Itself

The bestselling author of "Nickel and Dimed" goes back undercover to enter the world of the white-collar unemployed. As Ehrenreich discovers, there are few social supports for these newly disposable workers--and little security even for those who have jobs.

Never Let Me Go

The basis of the Oscar-winning film from writer/director Sarah Polley, starring Rooney Mara, Claire Foy, Jessie Buckley, with Ben Whishaw and Frances McDormand. INTERNATIONAL BESTSELLER "This amazing, sad, shocking, but touching novel, based on a real-life event, could be right out of The Handmaid's Tale." -Margaret Atwood, on Twitter "Scorching . . . a wry, freewheeling novel of ideas that touches on the nature of evil, questions of free will, collective responsibility, cultural determinism, and, above all, forgiveness." -New York Times Book Review, Editors' Choice One evening, eight Mennonite women climb into a hay loft to conduct a secret meeting. For the past two years, each of these women, and more than a hundred other girls in their colony, has been repeatedly violated in the night by demons coming to punish them for their sins. Now that the women have learned they were in fact drugged and attacked by a group of men from their own community, they are determined to protect themselves and their daughters from future harm. While the men of the colony are off in the city, attempting to raise enough money to bail out the rapists and bring them home, these women--all illiterate, without any knowledge of the world outside their community and unable even to speak the language of the country they live in--have very little time to make a choice: Should they stay in the only world they've ever known or should they dare to escape? Based on real events and told through the "minutes" of the women's all-female symposium, Toews's masterful novel uses wry, politically engaged humor to relate this tale of women claiming their own power to decide.

The Billion Dollar Spy
