TIME Great Places of History

Join TIME for a grand tour of civilization's most important landmarks. Here is a "bucket list" for the intellectually curious, a lavishly illustrated survey of the places where history was forged-where influential battles were fought, where empires rose and fell, where religions were founded and artistic

renaissances flourished. This book is for readers fascinated by history and art, culture and society, politics and religion. We'll tour Moscow's Kremlin and Beijing's Forbidden City. We'll trace the caravans along the Silk Road, gaze at the stars with Babylonian magi, dispute ethics at the Acropolis. Here are the 100 "must see" places for any well-traveled earthling. How many have you seen?

China Through Time

Take an unforgettable time-travelling journey through Chinese history with this beautifully illustrated history ebook for children. Spanning 2,500 years and 1,794 km (1,115 miles), from Hangzhou in the south to Beijing in the north, China Through Time tells the fascinating story of China's Grand Canal - the world's longest and oldest canal. Meet emperors, armies, and soldiers from early Chinese history, and follow the construction and development of the Grand Canal up to the present day. Stunning, panoramic illustrations and lively, engaging text bring key periods and turning points in the canal's history to life. Cutaway views showing the interior of boats and buildings and simple annotations highlighting important characters and places provide a wealth of detail that will stimulate children's interest in the history of China. Children will also love searching for the time-travelling cat who appears in the artworks, drawing them further into the hustle and bustle of each scene. Perfect for parents and children to pore over and discuss together time and again, China Through Time also makes a gorgeous gift or collector's item. Fun, interactive, and includes compelling detail, it vividly presents Chinese history to children as they have never seen it before.

A Street Through Time

Have you ever wondered what your street was like thousands of years ago? This illustrated history ebook for children takes you on a 12,000-year journey to find out the story of a single street. Think of the street you live on. Now think of how it may have looked in the Stone Age in 10,000 BCE, or in Victorian times during the Industrial Revolution, or how it may look 50 years from now. A Street Through Time takes you on a time-travelling journey that you won't forget. Highly detailed illustrations bring 15 key periods in time to life. You will see magnificent buildings go up and come down, new churches built on the site of ancient temples, wooden bridges destroyed and then remade in stone, and statues demolished then unearthed many years later. You'll find out how people lived long ago - the tools they used, what they wore and what they did all day. Revised and updated for a new generation, A Street Through Time now includes a look at the street 50 years in the future.

Great City Maps

Journey back in time and take a walk through the historic streets of the world's greatest cities. Great City Maps is the companion title to DK's Great Maps and takes a focused look at over 70 gorgeously illustrated historical maps and plans of cities around the globe. Dive into the detail of each beautiful map and learn about interesting features with visual tours of the maps' highlights - such as the Old London Bridge of London in 1572 and the orchards of Brooklyn in 1767 New York. Cities are centres of civilisation and the way their maps portray them reflects their politics, religion, and culture. See how certain cities, and cartographic techniques, changed over time. More than just a bird's-eye-view, this unputdownable book tells the tales behind the cities from the hubs of ancient peoples to modern mega-cities, and profiles the iconic cartographers and artists who created each map. Perfect for history, geography, and cartography enthusiasts and a stunning gift for armchair explorers of all ages, Great City Maps is your window into the world's most fascinating cities.

'Time Travelling Through History' is a collection of short stories situated in various historical eras.

History Year by Year

Marco Polo, Ferdinand Magellan, David Livingstone, Amelia Earhart, Neil Armstrong: these are some of the greatest travellers of all time. This book chronicles their stories and many more, describing epic voyages of discovery from the extraordinary migrations out of Africa by our earliest ancestors to the latest voyages into space. In antiquity, we follow Alexander the Great to the Indus and Hannibal across the Alps; in medieval times we trek beside Genghis Khan and Ibn Battuta. The Renaissance brought Columbus to the Americas and the circumnavigation of the world. The following centuries saw gaps in the global maps filled by Tasman, Bering and Cook, and journeys made for scientific purposes, most famously by von Humboldt and Darwin. In modern times, the last inhospitable ends of the earth were reached including both poles and the world's highest mountain and new elements were conquered. With evocative photographs, paintings and portraits, The Great Journeys in History reveals the stories of those who were there first, who explored the unexplored and who set out into the unknown, bringing alive the romance and thrill of travel.

Time Travelling Through History

From the birth of civilization to modern times, over twelve thousand years of human endeavor. Major events and epochs, and cultural and scientific advances from all over the world are juxtaposed, showing what was happening in different places at the same time. A sweeping saga from the first human footsteps in Africa; the first cities and empires; conquests and dynasties; the era of the great explorers to the development of the modern world. Discover - the first mighty civilizations in Egypt - the Mongol hordes who created the greatest land empire - ever - how South American gold fueled Spain's 'Golden Age' - why the 20th century 'took off' with the Wright's brothers' historic flight ... and much more. Cool illustrated maps and illustrations show what was happening in different places at the same time, including milestones such as the first flushing toilets, the Inca world, how independence was won in the United States and how Mandela became South Africa's first black president.

The Great Journeys in History

Many a nation has walked God's earth, has long enjoyed its good things, has come into being and passed away, without our knowing anything of its history, or even whether it had a history at all. For no nation has a history except one that makes history, that is to say, that influences the course of human development. It is with races as with individuals; none is kept in mind by posterity save those who have distinguished themselves by ideas that have modified the life of mankind, or (which comes to the same thing) have been pioneers in fresh fields of action. The greater the spiritual gain a nation has brought to the rest of the world, the longer and more steadily its life has flowed in the channels it was the first to make, the longer is its history told among them. The nations of history are those which have put forward, in one fashion or another, their claim to the dominion of the world. Thus we may fitly ask what claim it is that is made upon our interest by the history of the Jewish nation. And the answer will be, that nothing which excites our attention, or stirs us to admiration or imitation in the history of other nations, is here present in any large measure. Israel was always a small, nay, a petty nation, settled in a narrow space, never of any considerable importance in the political history of the East; it never brought forth a Ramses II, a Sargon, an Esarhaddon, an Assurbanapal, a Nebuchadrezzar, or a Cyrus to bear its banner into distant lands. Yet, for all this, the history of Israel has, for us, an interest quite different from that of those other nations of antiquity. And if, as we see, Israel is far surpassed in martial glory by the peoples of the great empires, and by the Romans in their influence on the development of law, there are yet other points in which it must yield unquestioned precedence to other nations of antiquity. We do not find in Israel the same feeling for beauty as among the Greeks, who, like no nation before them or after, showed forth the laws of beauty in every sphere of intellectual life, and to this day, in such matters, stand forth in a perfection which has never again been attained, far less excelled. Among the Hebrews there is nothing analogous, nothing comparable to what we admire in the Hellenic people. It has no epic, nothing that can be compared with the Iliad and the Odyssey, against which the Germans set the Nibelungen Lied, and the Finns the Kalewala; it has not the slightest rudiments of a drama—the Song of Songs and Job are not dramas. There is a school of lyrical poetry unsurpassed for all time, and the music that corresponds to it. But the bent towards science, which actuates the Greeks, is wholly lacking—wholly lacking the bent towards[2] philosophy. Nor was it ever eminent in ancient days, in the walks of commerce, enterprise and invention, by which, also, a nation may conquer the world; its intellectual life is absolutely one-sided, a one-sidedness that produces on us the effect of extreme singularity. But the attraction it has for us does not lie in this singularity. It is due, rather, to the circumstance that this small nation has exerted a far greater influence over the course of the history of the whole human race than the Greeks or Romans, that to us it has become typical in many more respects than they. Our present modes of thought and feeling, our lives and actions, are far more profoundly influenced by the world of thought and feeling which Israel brought to the birth, than by that

of Greece or Rome. Our whole civilisation to-day is saturated with tendencies and impulses which have their origin in Israel. To be continue in this ebook...

A Child Through Time

Embark on an unforgettable time-travelling journey along one of the world's greatest landmarks: the Great Wall of China. Spanning 2,700 years and over 21,000km (13,000 miles), this beautifully illustrated children's ebook reveals the fascinating story of the Great Wall and the individuals that helped build it. What started out as a frontier defence against northern tribesmen has, over time, become one of the seven great wonders of the world. Exquisite panoramic illustrations and engaging text bring to life key periods and turning points in the Great Wall's history - from the first defensive forts built in 656 BCE to its painstaking present-day restoration. Cutaway views reveal the interiors of important buildings, and pull-out details introduce fascinating facts and key characters. Children will also love searching for the adventurous time-travelling fox who appears in each of the artworks. Perfect for parents and children to pore over together, *The Great Wall Through Time* makes a gorgeous gift or collector's item. Fun, interactive, and packed with details, it vividly presents Chinese history to children as they have never seen it before.

The Civil and Military History of Cornwall; with Illustrations from Devonshire

The history of Greek civilisation forms the centre of the history of antiquity. In the East, advanced civilisations with settled states had existed for thousands of years; and as the populations of Western Asia and of Egypt gradually came into closer political relations, these civilisations, in spite of all local differences in customs, religion, and habits of thought, gradually grew together into a uniform sphere of culture. This development reached its culmination in the rise of the great Persian universal monarchy, the "kingdom of the lands," i.e. "of the world." But from the very beginning these oriental civilisations are so completely dominated by the effort to maintain what has been won that all progress beyond this point is prevented. And although we can distinguish an individual, active, and progressive intellectual movement among many nations,—as in Egypt, among the Iranians and Indians, while among the Babylonians and Phœnicians nothing of the sort is thus far known,—nevertheless the forces that represent tradition are in the end everywhere victorious over it and force it to bow to their yoke. Hence, all oriental civilisations culminate in the creation of a theological system which governs all the relations and the whole field of thought of man, and is everywhere recognised as having existed from all eternity and as being inviolable to all future time. With the cessation of political life and the establishment of the universal monarchy, the nationality and the distinctive civilisation of the separate districts are restricted to religion, which has become theology. The development of oriental civilisation then subsides in the competition of these religions and the unavoidable coalescence consequent thereupon. This is true even of that nation which experienced the richest intellectual development, and did the most important work of all oriental peoples—the Israelites. When the great political storms from which the universal monarchy arose have spent their rage, Israel, the nation, has developed into Judaism; and under the Persian rule and with the help of the kingdom it organises itself as a church which seeks to put an end to all free individual movement, upon which the greatness of ancient Israel rests. It was just the same with the ruling nation, the Persians, however vigorous their entrance into history under Cyrus. The Persian kingdom is, indeed, a civilised state, but the civilisations that it includes lack the highest that a civilisation can offer: an energetic, independent life, a combination of the firm institutions and permanent attainments of the past with the free, progressive, and creative movement of individuality. So the East, after the Persian period, was unable of its own force to create anything new. It stagnated, and,

had it not received new elements from without, had it been left permanently to itself, would perhaps in the course of centuries have altered its external form again and again, but would hardly have produced anything new or have progressed a step beyond what had already been attained. But when Cyrus and Darius founded the Persian kingdom, the East no longer stood alone. The nations and kingdoms of the East came into communication with the coast of the Mediterranean very early—not later than the beginning of the second millennium B.C.; and under their influence, about 1500 B.C., a civilisation arose among the Greeks bordering the Ægean. We call it the Mycenæan, and in spite of its formal dependence upon the East it could, in the field of art (where alone we have an exact knowledge of it), take an independent and equal place beside the great civilisations of the East.

The Historians' History of the World Vol.2 (of 25) (Illustrations)

"Lost in Time" is a captivating exploration of some of the world's most enigmatic and fascinating historical sites. From the Pyramids of Giza to the Hanging Gardens of Babylon, readers are taken on a journey of discovery as each chapter delves into the secrets and mysteries of these ancient places. The book begins with the discovery of an enigmatic map that provides the first clue to unlocking the secrets of these sites. As readers follow the trail of clues, they will travel through time and across the globe, visiting places such as Machu Picchu, the Forbidden City, and Petra. Along the way, they will learn about the cultures and civilizations that built these incredible structures, and uncover the secrets that have remained hidden for centuries. With stunning illustrations and engaging storytelling, "Lost in Time" is a must-read for anyone fascinated by the wonders of the ancient world.

The Great Wall Through Time

A complete world history should, properly speaking, begin with the creation of the world as man's habitat, and should trace every step of human progress from the time when man first appeared on the globe. Unfortunately, the knowledge of to-day does not permit us to follow this theoretical obligation. We now know that the gaps in the history of human evolution as accessible to us to-day, vastly exceed the recorded chapters; that, in short, the period with which history proper has, at present, to content itself, is a mere moment in comparison with the vast reaches of time which, in recognition of our ignorance, we term "prehistoric." But this recognition of limitations of our knowledge is a quite recent growth—no older, indeed, than a half century. Prior to 1859 the people of Christendom rested secure in the supposition that the chronology of man's history was fully known, from the very year of his creation. One has but to turn to the first chapter of Genesis to find in the margin the date 4004 B.C., recorded with all confidence as the year of man's first appearance on the globe. One finds there, too, a brief but comprehensive account of the manner of his appearance, as well as of the creation of the earth itself, his abiding-place. Until about half a century ago, as has just been said, the peoples of our portion of the globe rested secure in the supposition that this record and this date were a part of our definite knowledge of man's history. Therefore, one finds the writers of general histories of the earlier days of the nineteenth century beginning their accounts with the creation of man, B.C. 4004, and coming on down to date with a full and seemingly secure chronology. Our knowledge of the world and of man's history has come on by leaps and bounds since then, with the curious result that to-day no one thinks of making any reference to the exact date of the beginnings of human history,—unless, indeed, it be to remark that it probably reaches back some hundreds of thousands of years. The historian can speak of dates anterior to 4004 B.C., to be sure. The Egyptologist is disposed to date the building of the Pyramids a full thousand years earlier than that. And the Assyriologist is learning to speak of the state of civilisation in Chaldea some 6000 or 7000 years B.C. with a certain measure of confidence. But he no longer thinks of these dates as standing anywhere near the beginning of history. He knows that man in that age, in the centres of progress, had attained a high stage of civilisation, and he feels sure that there were some thousands of centuries of earlier time, during which man was slowly climbing through savagery and barbarism, of which we have only the most fragmentary record. He does not pretend to know anything, except by inference, of the "dawnings of civilisation." Whichever way he turns in the centres of progress, such as China, Egypt, Chaldea, India, he finds the earliest accessible records, covering at best a period of only eight or ten thousand years, giving evidence of a civilisation already far advanced. Of the exact origin

of any one of the civilisations with which he deals he knows absolutely nothing. "The Creation of Man," with its fixed chronology, is a chapter that has vanished from our modern histories. To be continue in this ebook...

Criminal Trials, Supplying Copious Illustrations of the Important Periods of English History During the Reigns of Queen Elizabeth and James I.

Several causes have lately augmented both the means and the motives for a more thorough study of History. Modern criticism, no longer accepting primitive traditions, venal eulogiums, partisan pamphlets, and highly wrought romances as equal and trustworthy evidence, merely because of their age, is teaching us to sift the testimony of ancient authors, to ascertain the sources and relative value of their information, and to discern those special aims which may determine the light in which their works should be viewed. The geographical surveys of recent travelers have thrown a flood of new light upon ancient events; and, above all, the inscriptions discovered and deciphered within half a century, have set before us the great actors of old times, speaking in their own persons from the walls of palaces and tombs. Nor is the new knowledge of little value. If we look familiarly into the daily life of our fellow-men thousands of years ago, it is to find them toiling at the same problems which perplex us; suffering the same conflict of passion and principle; failing, it may be, for our warning, or winning for our encouragement; in any case, reaching results which ought to prevent our repeating their mistakes. The national questions which fill our newspapers were discussed long ago in the Grove, the Agora, and the Forum; the relative advantages of government by the many and the few, were wrought out to a demonstration in the states and colonies of Greece; and no man whose vote, no woman whose influence, may sway in ever so small a degree the destinies of our Republic, can afford to be ignorant of what has already been so wisely and fully accomplished. Present tasks can only be clearly seen and worthily performed in the light of long experience; and that liberal acquaintance with History which, under a monarchical government, might safely be left as an ornament and privilege to the few, is here the duty of the many. The present work aims merely to afford a brief though accurate outline of the results of the labors of Niebuhr, Bunsen, Arnold, Mommsen, Rawlinson, and others—results which have never, so far as we know, been embraced in any American school-book, but which within a few years have greatly increased the treasures of historical literature. While it may have been impossible, within our limits, to reproduce the full and life-like outlines in which they have portrayed the characters of ancient times, we have sought, with their aid, at least to ascertain the limits of fact and fable. With but few exceptions, and those clearly stated as such, we have introduced no narrative which can reasonably be doubted. The writer is more confident of justice of aim than of completeness of attainment. No one can so acutely feel the imperfections of a work like this, as the one who has labored at every point to avoid or to remove them; to compress the greatest amount of truth into the fewest words, and while reducing the scale, to preserve a just proportion in the details. To hundreds of former pupils, who have never been forgotten in this labor of love, and to the kind judgment of fellow-teachers—some of whom well know that effort has not been spared, even where ability may have failed—this Manual is respectfully submitted.

The Historians' History of the World Vol.3 (of 25) (Illustrations)

Delve into the social and cultural history of 100 of the world's most important cities. From the first towns in Mesopotamia to today's global metropolises, cities have marked the progress of civilization. Written in the form of illustrated "biographies"

Lost in Time

This illustrated encyclopedia takes the reader through time, showing the reality of what it was like to live in the past. It investigates the whole of the human era, from prehistoric times to life in the modern world. The development of human civilisation is explained in a lively and accessible style, from great cities built and destroyed, and wars lost and won, to the birth of new religions, and advances in science and exploration. The high spots of human achievement are brought to life with illustrations, maps and photographs.

This book is a result of an effort made by us towards making a contribution to the preservation and repair of original classic literature. In an attempt to preserve, improve and recreate the original content, we have worked towards: 1. Type-setting & Reformatting: The complete work has been re-designed via professional layout, formatting and type-setting tools to re-create the same edition with rich typography, graphics, high quality images, and table elements, giving our readers the feel of holding a 'fresh and newly' reprinted and/or revised edition, as opposed to other scanned & printed (Optical Character Recognition - OCR) reproductions. 2. Correction of imperfections: As the work was re-created from the scratch, therefore, it was vetted to rectify certain conventional norms with regard to typographical mistakes, hyphenations, punctuations, blurred images, missing content/pages, and/or other related subject matters, upon our consideration. Every attempt was made to rectify the imperfections related to omitted constructs in the original edition via other references. However, a few of such imperfections which could not be rectified due to intentional\unintentional omission of content in the original edition, were inherited and preserved from the original work to maintain the authenticity and construct, relevant to the work. We believe that this work holds historical, cultural and/or intellectual importance in the literary works community, therefore despite the oddities, we accounted the work for print as a part of our continuing effort towards preservation of literary work and our contribution towards the development of the society as a whole, driven by our beliefs. We are grateful to our readers for putting their faith in us and accepting our imperfections with regard to preservation of the historical content. HAPPY READING!

Fairy Tales Every Child Should Know

There are 24 separate stories in Fairy Tales Every Child Should Know. Stories with plenty of familiarity, but may have some surprises from the way they were portrayed by Disney or other modern tellings include: Snow White (or in this version, the Magic Mirror), Hansel and Gretel, Aladdin, Ali Baba, Cinderella, Puss in Boots, The Golden Goose, the Three Bears, Beauty and the Beast, etc. The author of this book of fantasy stories, Hamilton Wright Mabie, beautiful recorded these great lines for children: "The fairy tale belongs to the child and ought always to be within his reach, not only because it is his special literary form and his nature craves it, but because it is one of the most vital of the textbooks offered to him in the school of life. "In ultimate importance it outranks the arithmetic, the grammar, the geography, the manuals of science; for without the aid of the imagination none of these books is really comprehensible . . . No one can understand the modern world without the aid of the imagination, and

as the frontiers of knowledge are pushed still further away from the obvious and familiar, there will be an increasing tax on the imagination." Fairy Tales Every Child Should Know (Esprios Classics)

Hamilton Wright Mabie (December 13, 1846 - December 31, 1916) was an American essayist, editor, critic, and lecturer. At the young age of 16 he passed his college entrance examination, but waited a year before he attended Williams College (1867) and the Columbia Law School (1869). He received honorary degrees from his own alma mater, from Union College, and from Western Reserve and Washington and Lee universities. Although he passed his bar exams in 1869 he hated both the study and practice of law. In 1876 he married Jeanette Trivett. In the summer of 1879 he was hired to work at the weekly magazine, Christian Union (renamed The Outlook in 1893), an association that lasted until his death.

Fairy Tales Every Child Should Know

Fairy Tales Every Child Should Know This book is illustrated version of Fairy Tales Every Child Should Know. The fairy tale is a poetic recording of the facts of life, an interpretation by the imagination of its hard conditions, an effort to reconcile the spirit which loves freedom and goodness and beauty with its harsh, bare and disappointing conditions. It is, in its earliest form, a spontaneous and instinctive endeavor to shape the facts of the world to meet the needs of the imagination, the cravings of the heart. It involves a free, poetic dealing with realities in accordance with the law of mental growth; it is the naïve

activity of the young imagination of the race, untrammelled by the necessity of rigid adherence to the fact.

Folk Tales Every Child Should Know

Classics for Your Collection: goo.gl/U80LCr ----- We have always loved stories. people have always entertained each other by telling tales around the campfire; traveling storytellers were huge crowd-pullers. Many of these stories were passed down through the generations, largely unchanged. "The stories made by the people, and told before evening fires, or in public places and at the gates of inns in the Orient, belong to the ages when books were few and knowledge limited, or to people whose fancy was not hampered by familiarity with or care for facts; they are the creations, as they were the amusement, of men and women who were children in knowledge, but were thinking deeply and often wisely of what life meant to them, and were eager to know and hear more about themselves, their fellows, and the world. In the earlier folk-stories, one finds a childlike simplicity and readiness to believe in the marvellous, and these qualities are found also in the French peasant's version of the career of Napoleon. Folk and Fairy Tales Every Child Should Know

In those early days before magazines or newspapers or books the most learned men were ignorant of things which intelligent children know to-day. Only a very few men and women could read or write; and all kinds of beliefs about animals, birds, witches, fairies, giants, and the magical qualities of herbs and stones flourished like weeds in a neglected garden. There came into existence an immense mass of misinformation about all manner of things; some of it very stupid, much of it very poetic and interesting. Below the region of exact knowledge accessible to men of education, lay a region of popular fancies, ideas, proverbs, and superstitions in which the great mass of men and women lived, and which was a kind of invisible playground for children. Much of the popular belief about animals and the world was touched with imagination and was full of suggestions, illustrations, and pictorial figures which the poets were quick to use. * * * * "Fairy Tales Every Child Should Know" contains a collection of twenty-four famous fairy tales from a wide array of classical works (Grimm's Fairy Tales, 1001 Arabian Nights, Hans Christian Andersen, and others), which most parents have told to their children throughout time. These tales are immortal and include: "The Enchanted Stag;" "Puss in Boots;" "Jack and the Beanstalk;" "The Princess on the Pea;" "The Ugly Duckling;" "Beauty and the Beast;" "Hansel and Gretel;" "Jack the Giant Killer;" "The Second Voyage of Sinbad the Sailor;" "The Story of Aladdin, or the Wonderful Lamp," and many more. delightful tales. * * * * "Folk Tales Every Child Should Know" similarly pulls from the rich traditions of countries all over the world to deliver twenty classic stories such as: "Why the Sea is Salt;" "The Dragon and the Prince;" "The Story of Tom Tim Tot;" and "The Good Children." * * * * "Fairy Tales Every Child Should Know" and "Folk Tales Every Child Should Know" were originally published in 1905 and 1912, respectively. This volume faithfully reproduces the stories in those editions, with minor edits to correct some words to a more modern spelling (i.e, changing traveller to traveler). * * * * Check our other Children's, Juvenile, and Adult books at www.FlyingChipmunkPublishing.com, or Friend us on Facebook for our latest releases.

The group of stories brought together in this book differ from legends because they have with one exception no core of fact at the centre from myths because they make no attempt to personify or explain the forces or processes of nature from fairy stories because they do not often bring on to the stage actors of a different nature from ours. The stories collected in this volume have been selected from many sources, because in the judgment of the editor, they are sound pieces of writing, wholesome in tone, varied in interest and style, and interesting. It is his hope that they will not only furnish good reading, but that they will suggest the kind of reading in this field that should be within the reach of children. Scroll Up and Grab Your Copy! Fairy Tales Every Child Should Know - Scholar's Choice Edition

The group of stories brought together in this volume differ from legends because they have, with one exception, no core of fact at the centre, from myths because they make no attempt to personify or

explain the forces or processes of nature, from fairy stories because they do not often bring on to the stage actors of a different nature from ours. They give full play to the fancy as in "A Child's Dream of a Star," "The King of the Golden River," "Undine," and "The Snow Image"; but they are not poetic records of the facts of life, attempts to shape those facts "to meet the needs of the imagination, the cravings of the heart." In the Introduction to the book of Fairy Tales in this series, those familiar and much loved stories which have been repeated to children for unnumbered generations and will be repeated to the end of time, are described as "records of the free and joyful play of the imagination, opening doors through hard conditions to the spirit, which craves power, freedom, happiness; righting wrongs, and redressing injuries; defeating base designs; rewarding patience and virtue; crowning true love with happiness; placing the powers of darkness under the control of man and making their ministers his servants." The stories which make up this volume are closer to experience and come, for the most part, nearer to the every-day happenings of life.

Fairy Tales Every Child Should Know

The fairy tale is a poetic recording of the facts of life, an interpretation by the imagination of its hard conditions, an effort to reconcile the spirit which loves freedom and goodness and beauty with its harsh, bare and disappointing conditions. It is, in its earliest form, a spontaneous and instinctive endeavor to shape the facts of the world to meet the needs of the imagination, the cravings of the heart. It involves a free, poetic dealing with realities in accordance with the law of mental growth; it is the naive activity of the young imagination of the race, untrammelled by the necessity of rigid adherence to the fact. This collection of tales, gathered from the rich literature of the childhood of the world, or from the books of the few modern men who have found the key of that wonderful world, is put forth not only without apology, but with the hope that it may widen the demand for these charming reports of a world in which the truths of our working world are loyally upheld, while its hard facts are quietly but authoritatively dismissed from attention. The modern child passes through the same stages as did the children of four thousand years ago. He, too, is a poet. He believes that the world about him throbs with life and is peopled with all manner of strange, beautiful, powerful folk, who live just outside the range of his sight; he, too, personifies light and heat and storm and wind and cold as his remote ancestors did. He, too, lives in and through his imagination; and if, in later life, he grows in power and becomes a creative man, his achievements are the fruits of the free and vigorous life of his imagination. The fairy tale belongs to the child and ought always to be within his reach, not only because it is his special literary form and his nature craves it, but because it is one of the most vital of the textbooks offered to him in the school of life. In ultimate importance it outranks the arithmetic, the grammar, the geography, the manuals of science; for without the aid of the imagination none of these books is really comprehensible. Classics included in this volume include: One Eye, Two Eyes, Three Eyes, The Magic Mirror, The Enchanted Stag, Hansel and Grethel, The Story of Aladdin, This Story of Ali Baba, The Second Voyage of Sinbad the Sailor, The White Cat, The Golden Goose, The Twelve Brothers, The Fair One With the Golden Locks, Tom Thumb, Blue Beard, Cinderella, Puss In Boots, The Sleeping Beauty In the Wood, Jack and The Bean-Stalk"

Fairy Tales Every Child Should Know

Hamilton Wright Mable (December 13, 1846 - December 31, 1916) was an American essayist, editor, critic, and lecturer. At the young age of 16 he passed his college entrance examination, but waited a year before he attended Williams College (1867) and the Columbia Law School (1869). He received honorary degrees from his own alma mater, from Union College, and from Western Reserve and Washington and Lee universities. Although he passed his bar exams in 1869 he hated both the study and practice of law. In 1876 he married Jeanette Trivett. In the summer of 1879 he was hired to work at the weekly magazine, Christian Union (renamed The Outlook in 1893), an association that lasted until his death.

Fairy Tales Every Child Should Know

The fairy tale is a poetic recording of the facts of life, an interpretation by the imagination of its hard conditions, an effort to reconcile the spirit which loves freedom and goodness and beauty with its harsh, bare and disappointing conditions. It is, in its earliest form, a spontaneous and instinctive endeavor to shape the facts of the world to meet the needs of the imagination, the cravings of the heart. Classics included in this volume include: One Eye, Two Eyes, Three Eyes, The Magic Mirror, The Enchanted Stag, Hansel and Grethel, The Story of Aladdin, This Story of Ali Baba, The Second Voyage of Sinbad the Sailor, The White Cat, The Golden Goose, The Twelve Brothers, The Fair One With the Golden Locks, Tom Thumb, Blue Beard, Cinderella, Puss In Boots, The Sleeping Beauty In the Wood, and Jack and The Bean-Stalk

Fairy Tales Every Child Should Know

Fascinating stories of life, love, and history. These are not necessarily fairy tales; the volume contains stories of all types. Great reading for 8 to 18 years old and up!

Fairy Tales Every Child Should Know

The group of stories brought together in this volume differ from legends because they have, with one exception, no core of fact at the centre, from myths because they make no attempt to personify or explain the forces or processes of nature, from fairy stories because they do not often bring on to the stage actors of a different nature from ours. They give full play to the fancy as in "A Child's Dream of a Star," "The King of the Golden River," "Undine," and "The Snow Image"; but they are not poetic records

of the facts of life, attempts to shape those facts "to meet the needs of the imagination, the cravings of the heart." In the Introduction to the book of Fairy Tales in this series, those familiar and much loved stories which have been repeated to children for unnumbered generations and will be repeated to the end of time, are described as "records of the free and joyful play of the imagination, opening doors through hard conditions to the spirit, which craves power, freedom, happiness; righting wrongs, and redressing injuries; defeating base designs; rewarding patience and virtue; crowning true love with happiness; placing the powers of darkness under the control of man and making their ministers his servants." The stories which make up this volume are closer to experience and come, for the most part, nearer to the every-day happenings of life.

Fairy Tales Every Child Should Know

Books are as much a part of the furnishing of a house as tables and chairs, and in the making of a home they belong, not with the luxuries but with the necessities. A bookless house is not a home; for a home affords food and shelter for the mind as well as for the body. It is as great an offence against a child to starve his mind as to starve his body, and there is as much danger of reducing his vitality and putting him at a disadvantage in his lifework in the one as in the other form of deprivation. There was a time when it was felt that shelter, clothing, food and physical oversight comprised the whole duty of a charitable institution to dependent children; to-day no community would permit such an institution to exist unless it provided school privileges. An acute sense of responsibility toward children is one of the prime characteristics of American society, shown in the vast expenditures for public education in all forms, in the increasing attention paid to light, ventilation, and safety in school buildings, in the opening of play grounds in large cities, in physical supervision of children in schools, and the agitation against the employment of children in factories, and in other and less obvious ways. Children are helpless to protect themselves and secure what they need for health of body and mind; they are exceedingly impressionable; and the future is always in their hands. The first and most imperative duty of parents is to give their children the best attainable preparation for life, no matter at what sacrifice to themselves. There are hosts of fathers and mothers who recognize this obligation but do not know how to discharge it; who are eager to give their children the most wholesome conditions, but do not know how to secure them; who are especially anxious that their children should start early and start right on that highway of education which is the open road to honorable success.

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.
