Aphasia and Language

This groundbreaking work brings together leading scientist-practitioners to review what is known about aphasia and to relate current knowledge to treatment. Integrating traditional linguistic formulations with new insights derived from cognitive neuroscience, this volume explores the neuropsychological bases of both normal and pathologic language. It reflects an understanding of brain structure and function based on new developments in connectionist modeling and functional neuroimaging.

Pattern Recognition and Image Analysis

This book constitutes the refereed proceedings of the 8th Iberian Conference on Pattern Recognition and Image Analysis, IbPRIA 2017, held in Faro, Portugal, in June 2017. The 60 regular papers presented in this volume were carefully reviewed and selected from 86 submissions. They are organized in topical sections named: Pattern Recognition and Machine Learning; Computer Vision; Image and Signal Processing; Medical Image; and Applications.

Nursing for Wellness in Older Adults

Now in its Fifth Edition, this text provides a comprehensive and wellness-oriented approach to the theory and practice of gerontologic nursing. Organized around the author's unique "functional consequences theory" of gerontologic nursing, the book explores "normal" age-related changes and risk factors that often interfere with optimal health and functioning, to effectively identify and teach health-promotion interventions. The author provides research-based background information and a variety of practical assessment and intervention strategies for use in every clinical setting. Highlights of this edition include expanded coverage of evidence-based practice, more first-person stories, new chapters, and clinical tools such as assessment tools recommended by the Hartford Institute of Geriatric Nursing.

The Communication Disorders Casebook

NOW PUBLISHED BY PLURAL! The Communication Disorders Casebook: Learning by Example, Second Edition focuses on current issues and trends in speech-language pathology (SLP) clinical practice. New and advanced students as well as practitioners will benefit from this comprehensive collection of real-world examples provided by experienced clinicians and scholars. The cases follow an easy-to-understand structure that allows readers to accompany an SLP through the steps of evaluation, diagnosis, treatment, and follow-up of individuals with speech, language, swallowing, and hearing challenges and their families. The clinical studies employ a holistic, person-first approach that considers the beliefs, values, lived experiences, and social contexts of patients throughout the lifespan. With a deep commitment to case-based learning, Shelly S. Chabon, Ellen R. Cohn, and Dorian Lee-Wilkerson have curated a valuable compendium of thought-provoking studies that encourage readers to think like clinicians, with empathy, understanding, and knowledge. New to the Second Edition * New and updated cases to reflect current research and clinical practice * Many new references in both the cases and online Instructor's Manual Key Features * A focus on conceptual knowledge areas * Comprehensive case histories from leading experts * Step-by-step explanations of diagnoses, treatment options, and outcomes * Basic and advanced learning objectives * Comprehension and analysis questions to evaluate understanding of case studies * Suggested activities and readings

Learning with a Visual Brain in an Auditory World

Children diagnosed with an autism spectrum disorder (ASD) often present parents and educators with perplexing symptoms. This book presents strategies that are based on the language of the way individuals with ASD learn.

Dialogue Editing for Motion Pictures

Dialogue editing is a crucial yet invisible part of filmmaking. Do it right, and no one notices. Do it wrong, and your film or video sounds messy, distracting, and unrealistic. This is a book for people who need to edit production sound for film, TV, or video but were never taught how to do it. It goes step by step through the process and covers all the workflows you are likely to encounter. Efficient working practices are emphasized throughout, so you learn to save time and avoid needless repetition. Many dialogue editors are hobbled by a lack of understanding of the non-sound aspects of filmmaking. Unlike editors who cut effects, backgrounds or Foley, a dialogue editor's work is directly affected by what has gone on before. How a film was shot, recorded and edited will dramatically influence the dialogue editing process. Much of this book, then, deals with things which at first glance don't appear to be dialogue. You will find overviews of film picture and sound postproduction--film, tape, NTSC, PAL, 24p, and HD. There are summaries of film picture editing, OMF manipulation, and ADR management.

Dialogue Editing for Motion Pictures

Dialogue editing is a crucial yet invisible part of filmmaking. Do it right, and no one notices. Do it wrong, and your film or video sounds messy, distracting, and unrealistic. Delirium

This text provides a comprehensive, state-of-the-art overview of acute brain dysfunction in the critically ill. The book covers the basic pathophysiology of delirium, epidemiology, risk factors, outcomes associated with delirium, prevention and treatment of delirium, and challenges and techniques for improving delirium awareness. Written by experts in the field, *Delirium: Acute Brain Dysfunction in the Critically Ill* is a valuable resource for clinicians and practitioners that will help guide patient management and stimulate investigative efforts in this field.

Person-Centered Memory and Communication Interventions for Dementia

Person-Centered Memory and Communication Interventions for Dementia: A Case Study Approach is the third volume in the “Medical Speech-Language Pathology” book series. It is a practical, peer-reviewed resource for speech-language pathologists (SLPs) working with people with dementia. In this unique text, the authors cover a variety of evidence-based clinical procedures for the memory, communication, and behavioral challenges of people with dementia. The aim is to empower SLPs and other clinicians to implement practices that elevate the personhood of people living with various dementia syndromes. Throughout this clinician-friendly text, the authors cover three main areas of focus: elevating personhood, the “how tos” of clinical procedures, and the organizational-level barriers and facilitators to implementation. After an introductory chapter, the next eight chapters describe a detailed case study that explains specific person-centered assessment and treatment methods. The cases depict a diverse group of people providing insights into the range of concerns and joys involved in supporting memory and communication in a manner that is culturally responsive and equitable.

Key Features: * The only dementia text that incorporates a culturally responsive approach to cases that reflect the increasing diversity of the aging population * Specific examples of the “how tos” of person-centered, evidence-based care * Detailed personal, assessment, and treatment histories for each case, with a table of goals and intervention procedures, as well as illustrations of memory and communication strategies * Each chapter starts with an “At-A-Glance” section to highlight the person and ends with a summary of key points of the treatment and implementation factors * Uses a highly readable writing style with boxes, tables, and figures to support the text

Tele-AAC

Tele-AAC: Augmentative and Alternative Communication Through Telepractice is the first comprehensive resource guide to Tele-AAC. Tele-AAC is the use of telepractice specifically for providing services to individuals using augmentative and alternative communication (AAC). This text establishes Tele-AAC as a new service delivery model and promotes safe, efficacious, evidence-based, and ethical telepractice for individuals who need AAC systems. The goal is to provide readers with fundamental information about policy and service delivery of AAC services via telepractice to enable clinical practice. The text details the specific technical components unique to Tele-AAC service delivery, and how the technology, personnel, and service delivery practices may vary across settings and populations. It offers didactic and case-based content for speech-language pathologists across all levels, from introductory to advanced. Chapters are included that clarify and define the term Tele-AAC, highlight the procedures used while providing assessment and intervention via Tele-AAC, identify ethical and cultural considerations while providing Tele-AAC, and demonstrate its application in a variety of settings. The content has been enriched by the input and knowledge offered by leaders from both telepractice and AAC disciplines, and offers readers the right combination of foundational information and principles to help form a base of understanding for practitioners engaging in Tele-AAC. The field of Tele-AAC is evolving and will transform as the technology changes and advances. This text provides a threshold of understanding from which the field and practitioners can grow.

Activity Schedules for Children with Autism

Activity schedules--a set of pictures or words--enable children with autism to engage in activities with greater independence. This guide provides a detailed overview and instructions. With these simple but revolutionary teaching tools, children need less adult supervision and are able to complete specific tasks on their own.

Adding Value to Long-Term Care

Tools for making long-term care facilities into caring and desirable places to live and work Written for health care administrators, medical directors, nursing executives, architects, and facility planners, *Adding Value to Long-Term Care* is a comprehensive resource that provides the tools and information needed to improve the clinical environment for residents, staff, and families; strengthen overall business operations; and secure a facility's financial future. This essential book and companion diskette are filled with a wealth of down-to-earth advice, helpful checklists, and easily reproducible forms-tools for effective business and clinical planning. Authors Dianne Lazer and Tobi Schwartz-Cassell present a comprehensive approach-The Value System-that will help to improve the structure of residents' days with a new model of programming, reenergize staff training and motivation, revitalize staff so they can engage productively with residents' families, and improve compliance with regulatory demands. "Adding Value to Long-Term Care is a must read. The Value System offers vast improvement in the clinical care of skilled nursing facility patients, improves staff morale and patient resident satisfaction, and creates a positive marketing advantage."—John C. McMeekin, president and chief executive officer, Crozer-Keystone Health System "How we care for the most ill, infirm, and frail elderly represents the central moral challenge confronting our society. This book contains a straightforward strategy to help meet this challenge through a creative and cost-effective transformation of long-term care. The authors have made a valuable contribution to all of us working in the fields of geriatrics and long-term and palliative care in our efforts to improve the quality of living and dying for the people we serve."—Ira Byock, M.D., author of *Dying Well* "Lazer and Schwartz-Cassell show a sophisticated grasp of many aspects of long-term care. Adding Value to Long-Term Care is a very impressive, multilevel volume that should be of great usefulness to all professionals concerned about aging in the United States."—Robert M. Goisman, M.D., assistant professor of psychiatry, Harvard Medical School "This book presents a concept that is widely advocated but seldom put into practice. Its major strength lies in the clear, concise, 'how-to-implement' guide."—Sylvia Beatam, Health Care Administrator, Hyde Park Convalescent Home, MA

The Autism Social Skills Picture Book

Colorful pictures demonstrating nearly thirty social skills, including conversation, play, emotion management, and empathy, help engage and motivate students who need extra help learning appropriate social skills.

Compendium of HHS Evaluations and Relevant Other Studies

The needs of deaf and hearing people with limited functioning can be a challenge for the mental health practitioner to meet. This text provides concrete guidance for adapting best practices in cognitive-behavioral therapy to deaf and hearing persons who are non- or semi-literate, and who have greatly impaired language skills or other cognitive deficits, such as mental retardation, that make it difficult for them to benefit from traditional talk- and insight-oriented psychotherapies. --

Your Official America Online Guide to Pictures Online

Winner of: 2014 Christopher Award, Books for Young People 2014 ILA Primary Fiction Award 2015 MLA Mitten Award Honor Human Rights in Children's Literature Honor With humor and warmth, this children's picture book raises awareness about poverty and hunger Best friends Sofia and Maddi live in the same neighborhood, go to the same school, and play in the same park, but while Sofia's fridge at home is full of nutritious food, the fridge at Maddi's house is empty. Sofia learns that Maddi's family doesn't have enough money to fill their fridge and promises Maddi she'll keep this discovery a secret. But because Sofia wants to help her friend, she's faced with a difficult decision: to keep her promise or tell her parents about Maddi's empty fridge. Filled with colorful artwork, this storybook addresses issues of poverty with honesty and sensitivity while instilling important lessons in friendship, empathy, trust, and helping others. A call to action section, with six effective ways for children to help fight hunger and information on antihunger groups, is also included.

Cognitive-behavioral Therapy for Deaf and Hearing Persons with Language and Learning Challenges

Care of patients with skin problems -- Care of patients with burns -- Assessment of the respiratory system -- Care of patients requiring oxygen therapy or tracheostomy -- Care of patients with noninfectious upper respiratory problems -- Care of patients with noninfectious lower respiratory problems -- Care of patients with infectious respiratory problems -- Care of critically ill patients with respiratory problems -- Assessment of the cardiovascular system -- Care of patients with dysrhythmias -- Care of patients with

cardiac problems -- Care of patients with vascular problems -- Care of patients with shock -- Care of patients with acute coronary syndromes -- Assessment of the hematologic system -- Care of patients with hematologic problems.

Activities of Daily Living for Physical Rehabilitation

Visuals of all kinds (photographs, checklists, line drawings, cartoons, flowcharts, stick figures, etc.) are commonly used as supports for individuals on the autism spectrum who tend to think and learn visually. However, not all visuals are created equal and, therefore, visuals don't all work equally well. This companion to *Learning With a Visual Brain in an Auditory World* helps the reader understand how to match the developmental levels of pictures and visuals to the developmental level of the person looking at the visual. In this way, appropriate visuals provide the language development for children with autism spectrum disorders. Drawing from their experience with children and youth for decades, the authors also show how effective communication can help reduce the confusion and anxiety that often lead to behavioral outbursts. --Google Books.

Maddi's Fridge

Sometimes less is more. This brief new textbook to train nursing assistants teaches all state, federal, and safety requirements. It is beautifully illustrated and clearly photographed with color tabs for easy location of material. Organized around learning objectives, it contains rationales for procedural steps and an emphasis on resident's rights and passing the certification exam.

Medical-surgical Nursing

NEW! Eight completely new chapters cover Theory and Practice Models for Occupational Therapy With Children, Development of Occupations and Skills From Infancy Through Adolescence, Therapeutic Use of Self, Observational Assessment and Activity Analysis, Evaluation Interpretation, and Goal Writing, Documenting Outcomes, Neonatal Intensive Care Unit, and Vision Impairment. NEW! A focus on theory and principles Practice Models promote clinical reasoning. NEW! Emphasis on application of theory and frames of reference in practice appear throughout chapters in book. NEW! Developmental milestone tables serve as quick reference guides. NEW! Online materials included to help facilitate your understanding of what's covered in the text. NEW! Textbook is organized into six sections to fully describe the occupational therapy process and follow OTPF.

Visual Thinking Strategies for Individuals with Autism Spectrum Disorders

Presented are specific ways to help Alzheimers patients and their families, involve family and care givers in treatment, maintain communication and ADL skills, improve the quality of life for patients and their families, increase chances of third-party payment.

The Nursing Assistant's Handbook

Focusing on children from infancy to adolescence, *Occupational Therapy for Children and Adolescents*, 7th Edition provides comprehensive, full-color coverage of pediatric conditions and treatment techniques in all settings. Its emphasis on evidence-based practice includes updated references, research notes, and explanations of the evidentiary basis for specific interventions. And coverage of new research and theories, new techniques, and current trends, with additional case studies, keeps you in step with the latest advances in pediatric OT practice. Written by educators Jane Case-Smith and Jane Clifford O'Brien, this text is the Number One book in pediatric OT! Case studies help you apply concepts to actual situations you may encounter in practice. Research Notes boxes and evidence-based summary tables help you interpret evidence and strengthen your clinical decision-making skills. Learning resources on Evolve include video clips, review activities, and additional case studies. Learning objectives indicate what you will be learning in each chapter and serve as checkpoints in studying for examinations. A glossary makes it easy to look up key terms. NEW video clips and case studies on the Evolve website demonstrate important concepts and rehabilitation techniques. NEW Autism Spectrum Disorder chapter contains important information for OTs not addressed in other texts. NEW Neuromotor: Cerebral Palsy chapter addresses the most prevalent cause of motor dysfunction in children. NEW Adolescent Development chapter helps you manage the special needs of teenagers and young adults. NEW contemporary design includes full-color photos and illustrations. UPDATED

content and references ensure you have access to the comprehensive, research-based information that will guide you in making optimal decisions in practice.

Case-Smith's Occupational Therapy for Children and Adolescents - E-Book

Don't engineer by coincidence-design it like you mean it! Filled with practical techniques, *Design It!* is the perfect introduction to software architecture for programmers who are ready to grow their design skills. Lead your team as a software architect, ask the right stakeholders the right questions, explore design options, and help your team implement a system that promotes the right -ilities. Share your design decisions, facilitate collaborative design workshops that are fast, effective, and fun-and develop more awesome software! With dozens of design methods, examples, and practical know-how, *Design It!* shows you how to become a software architect. Walk through the core concepts every architect must know, discover how to apply them, and learn a variety of skills that will make you a better programmer, leader, and designer. Uncover the big ideas behind software architecture and gain confidence working on projects big and small. Plan, design, implement, and evaluate software architectures and collaborate with your team, stakeholders, and other architects. Identify the right stakeholders and understand their needs, dig for architecturally significant requirements, write amazing quality attribute scenarios, and make confident decisions. Choose technologies based on their architectural impact, facilitate architecture-centric design workshops, and evaluate architectures using lightweight, effective methods. Write lean architecture descriptions people love to read. Run an architecture design studio, implement the architecture you've designed, and grow your team's architectural knowledge. Good design requires good communication. Talk about your software architecture with stakeholders using whiteboards, documents, and code, and apply architecture-focused design methods in your day-to-day practice. Hands-on exercises, real-world scenarios, and practical team-based decision-making tools will get everyone on board and give you the experience you need to become a confident software architect.

Fairy Tales : Ten Pictures

Master the assistive strategies you need to make confident clinical decisions and help improve the quality of life for people with disabilities. Based on the Human Activity Assistive Technology (HAAT) model developed by Al Cook, Sue Hussey and Jan Polgar, *Assistive Technologies: Principles & Practice*, 5th Edition, provides detailed coverage of the broad range of devices, services, and practices that comprise assistive technology. This new text offers a systematic process for ensuring the effective application of assistive technologies — and focuses on the relationship between the human user and the assisted activity within specific contexts. It features over 30 new photos and illustrations, as well as, updated chapters and case studies that reflect current technology. Human Activity Assistive Technology (HAAT) framework locates assistive technology within common, everyday contexts for more relevant application. Focus on clinical application guides application of concepts to real-world situations. Study questions and chapter summaries in each chapter help assessment of understanding and identification of areas where more study is needed. Coverage of changing AT needs throughout the lifespan emphasizes how AT fits into people's lives and contributes to their full participation in society. Principles and practice of assistive technology provide the foundation for effective reasoning. Ethical issues content provides vital information to guide AT service delivery. Explicit applications of the HAAT model in each of the chapters on specific technologies and more emphasis on the interactions among the elements make content even easier to understand. New! Thoroughly updated chapters to reflect current technology and practice. New! Expanded discussion on assistive robotics and smart technologies. New! Review of global initiatives on Assistive Technology. New! Updated art program with 30+ new photos and illustrations. New! Updated case studies to reflect changes in technology and practice since last edition.

Therapeutic Interventions in Alzheimer's Disease

Prepare for success in the classroom! Corresponding to the chapters in the 9th edition of Lewis' market-leading *Medical-Surgical Nursing*, this study guide offers a complete review of content and a wide range of activities to help you understand key nursing concepts. Alternate item format questions reflect the most current NCLEX test plan. To make studying easier, answers for all exercises are included in the back of the book. A wide variety of clinically relevant exercises and activities includes NCLEX examination-style multiple-choice questions, prioritization and delegation questions, case studies, fill-in-the-blank questions, anatomy and physiology review, critical thinking activities, and more. Answers to all questions are included in the back of the book, giving you immediate feedback as you

study. Additional alternate item format questions incorporating prioritization and delegation are included to better prepare you for the most current NCLEX exam. Attractive two-color design ties the study guide to the textbook.

Occupational Therapy for Children and Adolescents - E-Book

This title was first published in 2000: *Caring for Older People* provides a unique insight into the world of community care in the 1990's. It presents findings from a national study of social care from the perspectives of older service users, their carers and care managers. Descriptive findings from this longitudinal study - conducted by the PSSRU from 1994 and funded by the Department of Health - are set in the context of the history of community care and developments since the passage of the 1990 NHS and Community Care Act. The study's findings highlight important challenges for policy and practice development in the new millennium.

Design It!

The Home Health Aide Handbook is unlike any other handbook or pocket guide on the market. Not only is it inexpensive, but it's full-color, loaded with photos and illustrations! Use it for training and encourage your aides to carry it with them into the field to use as a quick reference tool. The second edition contains updated information on: all of the federal requirements for home health aides a considerable emphasis on observing and reporting HIPAA and how to protect a client's privacy home care focus boxes nutrition and the USDA's MyPyramid numerous procedures emphasizing how they are performed in the home, including a new two-step procedure for taking blood pressure care guidelines for specific diseases pain management chart of medical and commonly-used abbreviations mercury-free thermometers home-care specific tips for housekeeping and cooking disaster guidelines comprehensive glossary, and easy-to-use index, including a table of where to find procedures

Assistive Technologies- E-Book

NEW! Every Moment Counts content is added to The Occupational Therapy Process chapter, promoting pediatric mental health. NEW! Coverage of educational expectations is added to the Educational System chapter. NEW! Coverage of "signature" constraint-induced movement therapy (CIMT) is added to Cerebral Palsy chapter. NEW photographs and illustrations are added throughout the book. NEW video clips on the Evolve companion website show the typical development of children/adolescents. NEW! Extensive assessment and abbreviations appendices are added to Evolve. NEW! Expanded glossary is added to Evolve.

Study Guide for Medical-Surgical Nursing

This book constitutes the refereed proceedings of the International Conference on Embedded and Ubiquitous Computing, EUC 2007, held in Taipei, Taiwan, in December 2007. The 65 revised full papers presented were carefully reviewed and selected from 217 submissions. The papers are organized in topical sections. They include sections on power aware computing, reconfigurable embedded systems, wireless networks, real-time/embedded operating systems, and embedded system architectures.

Caring for Older People

The go-to resource for class, clinical, and practice...now in full color! A team of noted OTA and OT leaders and educators deliver practical, in-depth coverage of the most common adult physical conditions and the corresponding evidence-based occupational therapy interventions. The authors blend theory and foundational knowledge with practical applications to OTA interventions and client-centered practice. This approach helps students develop the critical-thinking and clinical-reasoning skills that are the foundation for professional, knowledgeable, creative, and competent practitioners. New & Updated! Content that incorporates language from the 4th Edition of the Occupational Therapy Practice Framework and aligns with the latest ACOTE standards New & Updated! Full-color, contemporary photographs that reflect real clients and OT practitioners in diverse practice settings New Chapters! Occupational Justice for Diverse and Marginalized Populations, Motor Control and Neurotherapeutic Approaches, Sexual Activity and Intimacy, Dementia: Understanding and Management, and The Influence of Aging on Occupational Performance "Evidence-Based Practice," highlights recent research articles relevant to topics in each chapter, reinforcing the evidence-based perspective presented throughout the text. "Putting It All Together: Sample Treatment and Documentation" uses evaluation,

treatment, and documentation based on one relevant case from each diagnosis chapter to connect what students are learning in the classroom and the lab to real-world, skilled, client-centered care. "Technology & Trends" highlights new and relevant technology or treatment trends and also shows how common technologies may be used in unique ways. Client examples provide context for how the conditions impact function and how to consider the person when doing an intervention. "Case Studies" based on real-life examples illustrate important learning points and feature questions to develop critical-thinking and problem-solving skills. Review questions at the end of each chapter assess progress, knowledge, and critical thinking while offering practice with certification-style questions.

Postgraduate Medicine

Pointing Pictures is a compact visual aid for understanding words and expressing ideas. It is perfect for adults and children with communication disorders serving as a simple and easy-to-use reference with visual category tabs and clear colorful pictures.

The Home Health Aide Handbook

Core nursing content is presented in a comprehensive outline format review, plus chapter study questions and a comprehensive examination. Both contain answer keys with rationales for correct and incorrect responses.

The Publisher's Office Manual

Covers the empirical foundations and current practice of developmental neuropsychology from infancy through adolescence, to adulthood and into later life.

Physical Rehabilitation for Daily Living

Pediatric Skills for Occupational Therapy Assistants E-Book
