Die Schöne Literatur

The first compendium on robotic art of its kind, this book explores the integration of robots into human society and our attitudes, fears and hopes in a world shared with autonomous machines. It raises questions about the benefits, risks and ethics of the transformative changes to society that are the consequence of robots taking on new roles alongside humans. It takes the reader on a journey into the world of the strange, the beautiful, the uncanny and the daring – and into the minds and works of some of the world's most prolific creators of robotic art. Offering an in-depth look at robotic art from the viewpoints of artists, engineers and scientists, it presents outstanding works of contemporary robotic art and brings together for the first time some of the most influential artists in this area in the last three decades. Starting from a historical review, this transdisciplinary work explores the nexus between robotic research and the arts and examines the diversity of robotic art, the encounter with robotic otherness, machine embodiment and human–robot interaction. Stories of difficulties, pitfalls and successes are recalled, characterising the multifaceted collaborations across the diverse disciplines required to create robotic art. Although the book is primarily targeted towards researchers, artists and students in robotics, computer science and the arts, its accessible style appeals to anyone intrigued by robots and the arts.

PETER BLEGVAD's cult comic strip LEVIATHAN ran for seven years in *The Independent* on Sunday review. It was memorably described by Simpsons creator Matt Groening as "one of the greatest, weirdest things I've ever stared at". Quirky and referential, dark and droll, by turn, Blegvad's cartoons are indeed unlike anything else in print. THE BOOK OF LEVIATHAN assembles the cream of Levi and Cat's adventures in a 160pp hardback - startlingly produced, with flat-bound, mirrored cover boards and full colour printing throughout. It is an object to treasure, and a snip at £12.99

Sneaky Pie for President

Perhaps because 19th-century German writer Theodor Storm wrote mostly Novellen -- tightly structured long stories composed in lyrical prose -- little of his work is available in English. Hans and Heinz Kirch consists of three of these Novellen, two

Ludy Bauer

The author of these two novellas, Lou Andreas Salomé, is not as well known through her own writing as through her friendships with such men as Friedrich Nietzsche, Rainer Maria Rilke, Sigmund Freud, Martin Buber, et al. and on whom she had significant influence. As one of the first women to study at a European university, her relationships with men differed vastly from those of other women of her time, and one might count her among the avant-garde of the women's movement. Fenitschka, the first of the two stories in this volume, is based on an experience in Lou Salomé's life which gave rise to the libretto of the better known of two operas, Lulu by Alan Berg. The second opera entitled Deviations was written only a few years ago by the Italian composer and conductor Giuseppe Sinopoli. Whereas the first work bears only a very slight and less than favorable resemblance to the character of this exceptional woman, the second, though not a chronological account of her life, captures her spirit much more faithfully and once again bears witness to the fact that she aroused and stimulated the creativity of those whose lives she touched.

'Memoirs of such richness are rare . . . a joy' JAMES NAUGHTIE 'A remarkable personal journey, by one of the great political correspondents of our world - eloquent, enlightening, exhilarating' PHILIPPE SANDS A trailblazer for women in journalism, Hella Pick arrived in Britain in 1939 as a child refugee from Austria. Over nearly four decades she covered the volatile global scene, first in West Africa, followed by America and long periods in Europe. In her thirty-five years with the Guardian she reported on the end of Empire in West Africa, the assassination of President Kennedy, Martin Luther King's march from Selma to Montgomery, the Vietnam peace negotiation in Paris, the 1968 student revolt in France, the birth of the Solidarity movement in Poland, and the closing stages of the Cold War. A request for coffee on board a Soviet ship anchored in Malta led to a chat with Mikhail Gorbachev. A request for an interview with Willy Brandt led to a personal friendship that enabled her to come to terms with Germany's Nazi past. Her book is also a clarion call for preserving professionalism in journalism at a time when social media muddies the waters between fact and fiction, and between reporting and commentary. INVISIBLE WALLS tells the dramatic story of how a Kindertransport survivor won the trust and sometimes the friendship of world leaders, and with them a wide range of remarkable men and women. It speaks frankly of personal heartache and of a struggle over her Jewish identity. It is also the intensely touching story of how, despite a gift for friendship and international recognised achievements as a woman journalist, a continuing sense of personal insecurity has confronted her with a series of invisible walls.

Invisible Walls

This book provides examples of pollutants, such as accidental oil spills and non-degradable plastic debris, which affect marine organisms of all taxa. Terrestrial runoff washes large amounts of dissolved organic materials from agriculture and industry, toxic heavy metals, pharmaceuticals, and persistent organic pollutants which end up into rivers, coastal habitats, and open waters. While this book is not intended to encyclopaedically list all kinds of pollution, it rather exemplifies the problems by concentrating on a number of serious and prominent recent developments. The chapters in this book also discuss measures to decrease and remove aquatic pollution to mitigate the stress on aquatic organisms. Aquatic ecosystems provide a wide range of ecological and economical services. In addition to providing a large share of the staple diet for a fast growing human population, oceans absorb most of the anthropogenically emitted carbon dioxide and mitigate climate change. As well as rising temperatures and ocean acidification, pollution poses increasing problems for aquatic ecosystems and organisms reducing its functioning and services which are exposed to a plethora of stress factors.

John Riew': Ein Fest Auf Haderslevhuus

Luke is here presented as contributing to New Testament Christology through his treatment of Old Testament Christological texts. This redaction-critical study argues that Luke's use of the Old Testament is not so much a 'proof from prophecy' as a 'proclamation' that draws both upon prophecies and upon patterns. This proclamation as it is developed in Luke-Acts serves to turn the reader's attention from seeing Jesus as Messiah to seeing him eventually as Lord.

Mein Lebensabend

With a surprising number of people professing a belief that we are living in the Biblical End Times, this lively 1902 deconstruction of the Book of Revelation is even more relevant than ever. Analyzing the final chapters of the Bible on a verse-by-verse basis-and finding much to be contentious about, particularly when it comes to other interpretations of the book-Bullinger reveals a powerful, devotional way to approach Revelation. British clergyman ETHELBERT WILLIAM BULLINGER (1837-1913) was one of the most respected Bible scholars of the 19th century. He is author of numerous works including Great Cloud of Witnesses and How to Enjoy the Bible.

This is because England's biggest county is also England's most epic and most historically exciting. It has everything: unimaginably beautiful countryside, derelict castles, cliff-hugging coastlines, brutally bleak moors, quirkily quaint villages, wondrously winding waterways and industrial monsters of cities. Many of the most interesting episodes in English history have happened here: the Wars of the Roses, the English Civil War, the birth of the industrial revolution, the rise of the Labour movement. But when people think of Yorkshire they also think of the unusual and the unsung: Bettys delightful tea rooms, cricket at Scarborough, the windswept steps of Whitby Abbey, the steam railway of the Railway Children, Mother Shipton's Cave, and racing at Doncaster and York. Yorkshire has also given birth to some of the greatest and most talented figures in English history: Brian Clough, Harold Wilson, John Wycliffe, William Wilberforce, the Brontë Sisters, David Hockney and Barbara Hepworth.

Winner of Spain's prestigious Alfaguara Prize in Fiction, *Caracol Beach* is a gripping, kaleidoscopic novel about isolation, love, fear, and the collision of strangers' lives on one fateful night in a Florida town. On the outskirts of the quiet resort community of Caracol Beach, its unlikeliest--and perhaps most dangerous--resident plots his own demise. A Cuban veteran of the war in Angola, the sole survivor of an ambush that killed off the rest of his platoon, Beto Milanés has for eighteen years been racked with guilt and grief and tormented by terrible visions. Determined to end his suffering but unable to take his own life, he sets out to find someone who will do it for him. So begins a night of madness, violence, and, ultimately, redemption. Drawn into the soldier's nightmare world are an improbable group of men and women, whose lives will never again be the same: an aging police chief with a penchant for pizza; a foulmouthed prostitute; a transvestite with a killer judo chop; a beautiful student haunted by her own ghosts; and two ill-fated would-be heroes. With audacity, humor, and deep insight into the human condition, Eliseo Alberto explores the horror of war, the pain of exile, the power of forgiveness, and the inescapable, sometimes cruel toll of destiny. The story that unfolds is at once shocking and comic, surprising and poignant, evoking classic tragedy and the absurdity of modern life. Combining the narrative power of a master storyteller with the phantasmagoric vision of a filmmaker, Eliseo Alberto has created a literary tour de force.

The Flying Spy

Rudolf Bultmann remains the most influential New Testament scholar of the twentieth century. He weds rigorous source and form criticism to an unrelenting historicism while still articulating a robust, challenging, and relevant theology. Bultmann's grand achievement is not that he convinced everyone. Rather, it is that his work still remains the measuring stick for the study of the New Testament and early Christianity. Bultmann was no mere historian, technical critic, or New Testament theologian. Bultmann's genius--and some think his Achilles heel--resides in his strategic use of existential philosophy as a means of interpreting the significance of Christianity. In *History and Eschatology*, first presented as the 1955 Gifford Lectures, Bultmann steps back to address larger philosophical questions about the relationship between history and the Christian future and then expands to consider how meaning exists within history. Bultmann begins with a discussion of ancient cyclical understandings of history before exploring the fundamental eschatological shift in historical understanding. Bultmann credits the Judeo-Christian tradition with reconceptualizing history as linear with a clear end, culminating in the second coming of Christ. But, as Bultmann argues, this new understanding of history was not without its own problems. The early church's profound disappointment in Christ's failure to return forced a Christian reinterpretation of history--a teleological one--that flourished in the Renaissance and eventuated, surprisingly, in Marxism. According to Bultmann, this teleology neglects the individual's participation in the Christ event. In the end, Bultmann draws on Paul and John to challenge this purely teleological approach and ground a Christian understanding of history and eschatology in the historical event of Christ that is both timeless and immediately present. Only through this Christ event, both in the past and future, does life find eternal meaning.
