Lemon Essential Oil for Weight Loss

How It Works Lemon contains the fat-dissolving powers of limonene. Researchers found that lemon oil used in conjunction with grapefruit oil increased lipolysis.

The chemical component limonene - induces lipolysis, the process whereby body fat and protein is broken down and dissolved.

It also raises norepinephrine levels, a stress hormone and neurotransmitter responsible for the fight-or-flight mechanism. This increases oxygen in the brain for better cognitive function and ramps up the heart rate and blood flow which allows muscles to work faster and better.

As a mood booster, lemon essential oil is a particularly powerful treatment for alleviating negative feelings.
