Planting the Seeds of Pregnancy

Miscarriage is common, but we still don't talk about it. Pregnancy loss is no one's fault, but it's surrounded by guilt, shame, and isolation. We often don't know what to say when someone is grieving. Not Broken: Picking up the Pieces After Miscarriage can provide comfort to someone healing after miscarriage. Through images and words of inspiration, it can provide the hope someone needs when they need it the most.

Planting the Seeds of Pregnancy

Hospital visits, calendar watching, disheartening test results and scheduled sex can make trying for a baby a stressful experience, and the strain it puts on couples and individuals struggling with infertility can impact hugely on the likelihood of successful conception. With an approach that puts wellbeing at the heart of fertility, this easy-to-follow guide by top fertility specialist Ann Bracken offers

a proven successful alternative to formal counselling. Her comprehensive and supportive book gives help and guidance on how to enhance and improve the outcome. With a focus on mindfulness-based stress reduction techniques, which have been scientifically proven to help overcome the stress and anxiety associated with fertility problems, the author examines the emotional issues around fertility and conception and offers step-by-step exercises to help readers improve their chances of conceiving. With a whole chapter on nutrition by renowned nutritionist Dr Marilyn Glenville, the integrated mind/body approach in this book offers a plan for the best possible chance of getting pregnant. Offering the perfect blend of emotional support and practical advice on lifestyle changes for infertility this is a must-have book for every couple hoping to get pregnant, written by an expert author with years of experience as a Fertility Counsellor and Mindfulness-Based Therapist. 'After 20 years of supporting fertility patients I am convinced that an integrated mind-body approach delivers the best outcome. Ann Bracken has a practical and compassionate approach, as demonstrated in her brilliant new book. It is a much-needed antidote to the all-too-often stressful and soul-searching path to parenthood. I will be recommending it to my fertility patients' Emma Cannon, integrated fertility and pregnancy expert, acupuncturist and author of *The Baby-Making Bible* 'All too often the management of reproductive health is seen through the narrow prism of a particular clinician or clinic. This book provides the perfect balance outlining the integrative mind and body approach and provides an essential complement to the medical aspects of the fertility journey' Dr James Nicopoulos, Consultant Gynaecologist & Subspecialist in Reproductive Medicine, The Lister Clinic, Lister Hospital, Chelsea, London 'Ann Bracken expertly shows readers how to weave mindfulness into their lives to help them take care of their wellbeing as they live through a challenging process. Her book includes a great deal else besides, but I was impressed by how she makes mindfulness so readily accessible.' Padraig O'Morain, mindfulness teacher and psychotherapist, author of *Mindfulness on the Go*, *Mindfulness for Worriers*

Not Broken

An exploration of integrated approaches to infertility. With specialist contributors, the book covers common conditions that reduce fertility, including immunological abnormalities, and explores how nutrition, acupuncture, reflexology and yoga can provide invaluable emotional and physiological support for couples undergoing assisted reproduction.

Mind Body Baby

This book provides a practical, multidisciplinary approach to support a broad range of health professionals, social workers, public health workers and others tasked with providing health and care to young adults. The continuum of life begins with the health and wellness of parents prior to conception, followed by embryonic and fetal development, and continues throughout life. Each person's life stages prepare them for the next and determine their health outcome and wellbeing over time. The text highlights the importance of promoting health throughout the lifespan, the influence of intergenerational health, and the concept of the Developmental Origins of Health and Disease in epigenetic processes and embryology. Authors underscore the importance of advancing health equity and lift up some of the ethical considerations in this work. The authors explore specific interventions in four major categories: Lifestyle, Infections, Nutrition, and Contraception / Pregnancy Planning (LINC). Preconception care is defined by the World Health Organization as the provision of biomedical, behavioural and social health interventions to women and couples before conception. Preconception care includes evidence-based interventions to improve health status, to reduce behaviours, individual and environmental factors that contribute to poor health outcomes. This book offers readers evidence-based guidance regarding fertility awareness and sperm health, genetic counselling and lifestyle assessments, as well as mental wellbeing, alcohol, tobacco and pharmacotherapy, and specialist care for those with chronic conditions, including a review of medications. It also covers relevant infections, including HIV and the Zika virus, as well as different types of environmental and occupational exposure. The book employs a framework focusing on health promotion, the social determinants of health, and the science behind preconception care. Strategies for improving preconception and interconception health, including examples from around the globe, are described in detail.

Taking Charge of Your Fertility

Delivers current knowledge from global experts at the forefront of fertility and ART healthcare The first publication of its kind, this book on fertility and assisted reproductive technology (ART) is a globally focused, authoritative guide to state-of-the-art information about modern fertility and ART healthcare. Written for clinicians, public health officials, women's health experts, scientists, students, scholars, and other interested individuals, the book encompasses theoretical, research, policy, and clinical practice aspects of fertility and ART healthcare. The book features the diverse contributions of multidisciplinary researchers, scholars, and clinicians from eight countries who explore contemporary health care perspectives regarding individuals and families dealing with infertility and fertility challenges including such advanced technologies as in-vitro fertilization, intrauterine insemination, and oocyte preservation. The book addresses theoretical underpinnings of fertility and ART healthcare including new ways of conceptualizing research and theoretical concepts. Practical aspects involved with administering and treating the many women and men whose lives are affected by fertility challenges are illuminated. Complex policy concerns resulting from the rapid advances in fertility and ART are considered. The health care needs of those seeking fertility evaluation and treatment including access to care locally and globally are examined in depth. The book also includes discussions about novel approaches and emerging populations in fertility and ART healthcare that expand the scope of care. Thought-provoking case examples from contemporary care practices will help the reader to synthesize information. Key Features: Delivers thought provoking ART research and practice issues for health care clinicians, scholars, and scientists Synthesizes evolving theory, research, clinical practice, and public policy concerns Addresses complex considerations within the practice and delivery of fertility and ART services Written by international thought leaders and emerging scholars on the forefront of ART

Making Babies offers a proven 3-month program designed to help any woman get pregnant. Fertility medicine today is all about aggressive surgical, chemical, and technological intervention, but Dr. David and Blakeway know a better way. Starting by identifying "fertility types," they cover everything from recognizing the causes of fertility problems to making lifestyle choices that enhance fertility to trying surprising strategies such as taking cough medicine, decreasing doses of fertility drugs, or getting acupuncture along with IVF. Making Babies is a must-have for every woman trying to conceive, whether naturally or through medical intervention. Dr. David and Blakeway are revolutionizing the fertility field, one baby at a time.

Fertility and Assisted Reproductive Technology (ART)

Not Broken is a comprehensive, evidence-based but easy-to-read guide for anyone who wants to understand all aspects of miscarriage and recurrent pregnancy loss. Whether you are a patient struggling with miscarriages or a medical provider caring for patients with recurrent pregnancy loss, you will learn something from this resource. Dr. Shahine explains not only a typical Western medicine approach to evaluation and treatment for miscarriage but also includes Eastern approaches to care, lifestyle factors that will decrease your risk of miscarriage, and the emotional impact of recurrent pregnancy loss. You will finish this book feeling more empowered to be an advocate for your care and more hopeful than ever to continue towards your family goals. "I have one word to describe this fabulous book: FINALLY. Women with recurrent pregnancy loss have been needing this book for years." - Dr. Alice Domar, associate professor of obstetrics, gynecology, and reproductive biology at Harvard Medical School and author of Conquering Infertility and Finding Calm for the Expectant Mom

Making Babies

This textbook is the new edition of Purnell's famous Transcultural Health Care, based on the Purnell twelve-step model and theory of cultural competence. This textbook, an extended version of the recently published Handbook, focuses on specific populations and provides the most recent research and evidence in the field. This new updated edition discusses individual competences and evidence-based practices as well as international standards, organizational cultural competence, and perspectives on health care in a global context. The individual chapters present selected populations, offering a balance of collectivistic and individualistic cultures. Featuring a uniquely comprehensive assessment guide, it is the only book that provides a complete profile of a population group across clinical practice settings. Further, it includes a personal understanding of the traditions and customs of society, offering all health professionals a unique perspective on the implications for patient care.

Supportive, practical advice for couples who are trying to conceive. Denise Wiesner's integrative East-meets-West approach, developed over twenty years of practice, has helped thousands of couples relax, reconnect, and conceive. The stress of trying to get pregnant can wreak havoc with a couple's intimate relationship—right at a time when that connection is most important—and the frustration and shame couples may feel can have a harmful effect and reduce their chances of conceiving. Wiesner gives couples the tools they need to repair their sexual relationship, rebuild their self-confidence, and reclaim their intimacy and desire. She includes advice from leading experts in Western reproductive medicine and Traditional Chinese Medicine; offers sensual practices from yoga, qigong, and Tantra; and answers questions couples have about sex, intimacy, and both naturally occurring and medically assisted fertility.

Textbook for Transcultural Health Care: A Population Approach

This work focuses on the therapeutics, safety and risk information of herbs and supplements used during pregnancy and lactation for obstetricians, maternal-fetal medicine specialists and primary care physicians.

Conceiving with Love

Licorice (*Glycyrrhiza*) is one of the most widely used in foods, herbal medicine and one of the extensively researched medicinal plants of the world. In traditional medicine licorice roots have been used against treating many ailments including lung diseases, arthritis, kidney diseases, eczema, heart diseases, gastric ulcer, low blood pressure, allergies, liver toxicity, and certain microbial infections. Licorice extract contains sugars, starch, bitters, resins, essential oils, tannins, inorganic salts and low levels of nitrogenous constituents such as proteins, individual amino acids, and nucleic acids. A large number of biologically active compounds have been isolated from *Glycyrrhiza* species, where triterpene, saponins and flavonoids are the main constituents which show broad biological activities. The present book will discuss the botany, the commercial interests as well as the recent studies on the phytochemistry and pharmacology of licorice. It will also describe the side effects and toxicity of licorice and its bioactive components, an underrepresented subjects of importance. It will be the first book to present global perspectives of licorice in detail. It will serve as a carefully researched introduction for students, healthcare practitioners, botanists and plant biochemists; full of historical background and bridges the gap between botany, ecology, pharmacology, as well as treatment of diseases.

Herbal Medicines in Pregnancy and Lactation

Taking a new and innovative angle on social work, this book seeks to remedy the lack of holistic perspectives currently used in Western social work practice by exploring Indigenous and other culturally diverse understandings and experiences of healing. This book examines six core areas of healing through a holistic lens that is grounded in a decolonizing perspective. Situating integrative healing within social work education and theory, the book takes an interdisciplinary approach, drawing from social memory and historical trauma, contemplative traditions, storytelling, healing literatures, integrative health, and the traditional environmental knowledge of Indigenous Peoples. In exploring issues of water, creative expression, movement, contemplation, animals, and the natural world in relation to social work practice, the book will appeal to all scholars, practitioners, and community members interested in decolonization and Indigenous studies.

Alex John London defends a conception of the common good that grounds a moral imperative with two requirements. The first is to promote research that enables key social institutions to effectively, efficiently and equitably safeguard the basic interests of individuals. The second is to ensure that research is organized as a voluntary scheme of social cooperation that respects its various contributors' moral claim to be treated as free and equal. Connecting research to the goals of a just social order grounds a framework for assessing and managing research risk that reconciles these requirements and justifies key oversight practices in non-paternalistic terms. The result is a new understanding of research ethics that resolves coordination problems that threaten these goals and provides credible assurance that the requirements of this imperative are being met.--

As women of childbearing age have become heavier, the trade-off between maternal and child health created by variation in gestational weight gain has become more difficult to reconcile. Weight Gain During Pregnancy responds to the need for a reexamination of the 1990 Institute of Medicine guidelines for weight gain during pregnancy. It builds on the conceptual framework that underscored the 1990 weight gain guidelines and addresses the need to update them through a comprehensive review of the literature and independent analyses of existing databases. The book explores relationships between weight gain during pregnancy and a variety of factors (e.g., the mother's weight and height before pregnancy) and places this in the context of the health of the infant and the mother, presenting specific, updated target ranges for weight gain during pregnancy and guidelines for proper measurement. New features of this book include a specific range of recommended gain for obese women. Weight Gain During Pregnancy is intended to assist practitioners who care for women of childbearing age, policy makers, educators, researchers, and the pregnant women themselves to understand the role of gestational weight gain and to provide them with the tools needed to promote optimal pregnancy outcomes.

The Infertility Cure

With all the enormous resources that are invested in medicine, it is sometimes a mystery why there is so much sickness still in evidence. Our life span, though higher than at any time in history, has now leveled off and has not significantly increased in the last two generations. There is a one-third increase in long-term illness in the last 20 years and a 44% increase in cancer incidence, which are not related to demographic issues. In some modern countries, the level of morbidity (defined as days off work because of sickness) has increased by two thirds in this time. Despite \$1 trillion spent on cancer research in 20 years, the "War On Cancer" has recently been pronounced a complete failure by the u. s. President's Cancer Panel. Evidently we still have a long way to go. The goal of "Health for

All by the Year 2000" as the World Health Organization has put it, is another forgotten dream. As ever, the answer will be found in breaking out of the old philosophical patterns and discovering the new, as yet unacceptable concepts. The problems of medicine today require a Kuhnian breakthrough into new paradigms, and new ways of thinking. And these new ways will not be mere variations of the old, but radical departures. This book, and the conference upon which it was based, is part of a search for these new pathways.

In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—*Staying with the Trouble* further cements Haraway's reputation as one of the most daring and original thinkers of our time.

Staying with the Trouble

This is the first book to set out a full range of research strategies for evaluating the clinical practice of acupuncture. Leading acupuncturists and researchers with international reputations share their expertise. They illustrate their descriptions with practical examples of what has worked and what has not. It outlines many of the key challenges in the field. These challenges relate to the nature of acupuncture and the gap between current research evidence and the actual experiences of acupuncturists in the field. By focusing the chapters on key research questions, rather than methods, the book has a user-friendly feel. Each chapter is easily accessible with brief explanations of research designs as well as vignettes of relevant past research. The book is based on a deep understanding of acupuncture, with its inherent complexity in practice, whether based on traditional principles or more modern concepts. By incorporating a more sophisticated understanding of the field, this book details a range of strategies aiming to develop the evidence base with the utmost rigour. It is the first book on acupuncture research to take this unique view, integrating the very best of evidence-based medicine with a genuine sensitivity to the discipline of acupuncture, from its traditional and holistic roots to its more modern interpretations.
