The 15 Commitments of Conscious Leadership

You'll never see leadership the same way again after reading this book. These fifteen commitments are a distillation of decades of work with CEOs and other leaders. They are radical or provocative for many. They have been game changers for us and for our clients. We trust that they will be for you too. Our experience is that unconscious leadership is not sustainable. It won't work for you, your team or your organization in the long term. Unconscious leadership can deliver short term results, but the costs of living and leading unconsciously are great. Fear drives most leaders to make choices that are at odds with healthy relationships, vitality and balance. This fear leaves a toxic residue that won't be as easily tolerated in an increasingly complex business environment. Conscious leadership offers the antidote to fear. These pages contain a comprehensive road map to guide you to shift from fear-based to trust-based leadership. Once you learn and start practicing conscious leadership you'll get results in the form of more energy, clarity, focus and healthier relationships. You'll do more and more of what you are passionate about, and less of what you do out of obligation. You'll have more fun, be happier, experience less drama and be more on purpose. Your team will get results as well. They'll be more

collaborative, creative, energized and engaged. They'll solve issues faster, and once resolved the issues won't resurface. Drama and gossip will all but disappear, and the energy and resources that fueled them will be redirected towards innovation and creativity. Any one of these commitments will change your life. All of them together are revolutionary. Leaders who practice the 15 commitments: - End blame and criticism - Speak candidly, openly and honestly, in a way that invites others to do the same - Find their unique genius - Let go of taking everything-especially themselves and their problems-so seriously - Create win for all solutions - Experience a new relationship to time and money where there is always enough What do you need to bring to the table? Be curious. Sounds so simple, and yet in our experience it's a skill few have mastered. Most of us are far more interested in being right and proving it, than we are in learning, growing and shifting out of our old patterns. By default we gravitate towards the familiar. We're asking you to take a chance and explore the unfamiliar. You'll get scared and reactive. We all do. So what? Just stay curious and let us introduce you to a whole new world of leadership.

Conscious Leadership

A WALL STREET JOURNAL BESTSELLER! From Whole Foods CEO John Mackey and his coauthors, a follow-up to groundbreaking bestseller *Conscious Capitalism*—revealing what it takes to lead a purpose-driven, sustainable business. John Mackey started a movement when he founded Whole Foods, bringing natural, organic food to the masses and not only changing the market, but breaking the mold. Now, for the first time, *Conscious Leadership* closely explores the vision, virtues, and mindset that have informed Mackey's own leadership journey, providing a roadmap for innovative, value-based leadership—in business and in society. *Conscious Leadership* demystifies strategies that have helped Mackey shepherd Whole Foods through four decades of incredible growth and innovation, including its recent sale to Amazon. Each chapter will challenge you to rethink conventional business wisdom through anecdotes, case studies, profiles of conscious leaders, and innovative techniques for self-development, culminating in an empowering call to action for entrepreneurs and trailblazers—to step up as leaders who see beyond the bottom line.

Finding Your True North

Based on Bill George's bestselling book *True North*, this personal guide offers leaders a comprehensive method for identifying their unique "True North." The book offers methods for personal reflection and includes targeted exercises that help leaders hone in on the purpose of their leadership and developing their authentic leadership skills.

High Performing Investment Teams

High Performing Investment Teams "Although most leaders agree teamwork is important, few businesses effectively build collaborative, synchronized teams. *High Performing Investment Teams* is an excellent guidepost for any manager striving to create a winning team and develop bench strength for the future." —John W. Rogers Jr., Chairman and Chief Executive Officer, Ariel Capital Management, LLC "Turning individual talent into team performance is the ultimate challenge for an investment organization, but also the key to building a sustainable investment franchise. Focus Consulting has captured the essence of how to leverage your intellectual capital for maximum and enduring success." —Michelle R. Seitz, CFA, Principal, Head of Investment Management, Executive Committee Member, William Blair & Company, LLC "Focus Consulting's work on behaviors of top teams is clear, effective, and practical. We recommend it highly for investment firms that are serious about world-class collaboration." —Terry Toth, President, Northern Trust Global Investments "Focus Consulting really understands that attracting and motivating talented people makes all the difference for asset managers. Their work is based on years of experience helping investment firms build strong cultures with productive behaviors." —Scott Powers, Chief Executive Officer, Old Mutual Asset Management "Focus Consulting understands the people aspect of the investment business. They know the investment business and how to make collaboration work." —Harin de Silva, PhD, CFA, President, Analytic Investors

Conscious Capitalism, With a New Preface by the Authors

The bestselling book, now with a new preface by the authors At once a bold defense and reimagining of capitalism and a blueprint for a new system for doing business, *Conscious Capitalism* is for anyone hoping to build a more cooperative, humane, and positive future. Whole Foods Market cofounder John Mackey and professor and *Conscious Capitalism*, Inc. cofounder Raj Sisodia argue that both business and capitalism are inherently good, and they use some of today's best-known and most

successful companies to illustrate their point. From Southwest Airlines, UPS, and Tata to Costco, Panera, Google, the Container Store, and Amazon, today's organizations are creating value for all stakeholders—including customers, employees, suppliers, investors, society, and the environment. Read this book and you'll better understand how four specific tenets—higher purpose, stakeholder integration, conscious leadership, and conscious culture and management—can help build strong businesses, move capitalism closer to its highest potential, and foster a more positive environment for all of us.

Conscious Leadership

It is within everyone's ability to switch on the energy attached to living consciously and stepping into leadership as a limitless enterprise. *Conscious Leadership: 7 Principles that WILL change your business and change your life*, offers leaders from all walks of life insightful alternatives and practices that will enrich your leadership skills while bringing into alignment the whole you, with all your unique and essential humanness. "When you operate as a conscious leader, present and engaged in lifting up those you lead and serve, you switch on your highest self, the human being you were designed to be. Remember this is not a dress rehearsal, but the real deal. Are you practicing to live your life or embracing your most powerful and luminescent self? The choice is yours to make. The real you can and will be more than what others say you are. Be courageous, be fulfilled and be the director of a joyful and meaningful life. Illuminate your ambitions to make a significant difference."

No Bullsh*t Leadership

WINNER OF BUSINESS BOOK OF THE YEAR AWARD 2020: LEADERSHIP FOR THE FUTURE
A Financial Times Business Book of the Month 'A brilliant set of leadership tools that will help you succeed whatever your goal' - Sir Clive Woodward 'A punchy, plainly written guide, offering a readable and enlightened view of what leaders do and how they should do it' - Financial Times 'A new rubric on leadership' - Evening Standard
Inspiration behind the No Bullsh*t Leadership Intelligence Squared podcast
Leadership is not some special club, open only to elites. It's not a gold star given only to those with expensive degrees. Leadership is for everyone. Based on the author's hard-won experience as a Global CEO, this smart, fun book delivers a step-by-step working manual on how to lead - for anyone. Full of simple and direct approaches, it demystifies an over-analysed subject to get to the heart of modern leadership: the life-changing, career-transforming power to get stuff done. These principles and actionable steps apply to every field, from small businesses to community initiatives, from schools to sports teams to global enterprises. No matter your goal, this book will show you how to: - make effective decisions - build a world-class team - take care of yourself and others - achieve results

Education for Sustainable Development

Matt Mochary coaches the CEOs of many of the fastest-scaling technology companies in Silicon Valley. With *The Great CEO Within*, he shares his highly effective leadership and business-operating tools with any CEO or manager in the world. Learn how to efficiently scale your business from startup to corporation by implementing a system of accountability, effective problem-solving, and transparent feedback. Becoming a great CEO requires training. For a founding CEO, there is precious little time to complete that training, especially at the helm of a rapidly growing company. Now you have the guidance you need in one book.

The Great CEO Within: The Tactical Guide to Company Building

In *Sustainable Leadership*, Andy Hargreaves and Dean Fink address one of the most important and often neglected aspects of leadership: sustainability. The authors set out a compelling and original framework of seven principles for sustainable leadership characterized by Depth of learning and real achievement rather than superficially tested performance; Length of impact over the long haul, beyond individual leaders, through effectively managed succession; Breadth of influence, where leadership becomes a distributed responsibility; Justice in ensuring that leadership actions do no harm to and actively benefit students in other schools; Diversity that replaces standardization and alignment with diversity and cohesion; Resourcefulness that conserves and renews leaders' energy and doesn't burn them out; and Conservation that builds on the best of the past to create an even better future. This book is a volume in the Jossey-Bass Leadership Library in Education—a series designed to meet the demand for new ideas and insights about leadership in schools.

Sustainable Leadership

Reconstructing Value prepares contemporary business leaders for the increasingly important task of developing a sustainability vision and translating it across levels in an organization. The book is based on insights gained over the past decade from research involving hundreds of practitioners, front line

managers to senior executives, who have been working to integrate sustainability within their organizations. It illustrates how building capacity for managing the complex issues of sustainability requires key process skills that leaders need to develop. This book equips readers to respond to the risks and opportunities presented by global sustainability issues and reinvent new ways of doing business that will enhance organizational effectiveness while also building a more sustainable world. Each chapter includes process questions to guide reflective practice and to build the requisite leadership capabilities for turning a sustainability vision into a value-added organizational strategy. *Reconstructing Value* helps readers to build integrative thinking skills – such as how to engage critical, complexity, strategic and design thinking capabilities to enable organizational change – that can assist them with becoming successful sustainability champions within their organizations.

Reconstructing Value

As he did in *WHO NOT HOW*, Dr. Benjamin Hardy shares one of Dan Sullivan's simple yet profound teachings that until now has been known only to his Strategic Coach clients: unsuccessful people focus on "The Gap," but successful people focus on "The Gain." "[T]his one simple concept is a masterclass on positive psychology, healthy relationships, mental well-being, and high-performance. Everything that psychologists know about how to create a high-functioning and successful person can be achieved using The GAP and the GAIN." - Dr. Benjamin Hardy Most people, especially highly ambitious people, are unhappy because of how they measure their progress. We all have an "ideal," a moving target that is always out of reach. When we measure ourselves against that ideal, we're in "the GAP." However, when we measure ourselves against our previous selves, we're in "the GAIN." That is where the GAP and the GAIN concept comes in. It was developed by legendary entrepreneur coach Dan Sullivan and is based on his work with tens of thousands of successful entrepreneurs. When Dan's coaching clients periodically take stock of all that they've accomplished-both personally and professionally-they are often shocked at how much they have actually achieved. They weren't able to appreciate their progress because no matter how much they were getting done, they were usually measuring themselves against their ideals or goals. In this book you will learn that measuring your current self vs. your former self has enormous psychological benefits. And that's really the key to this deceptively simple yet multi-layered concept that will have you feeling good, feeling grateful, and feeling like you are making progress even when times are tough, which will in turn bolster motivation, confidence, and future success. If you're finding that happiness eludes you no matter how much you've achieved, then learning this easy mindset shift will set you on a life-changing path to greater fulfillment and success.

The Gap and The Gain

The book is based on the exchange of professional experiences which featured in an IUCN CEC workshop in August 2002. Practitioners from around the world shared their models of good practice and explored the challenges involved in engaging people in sustainability. The difficulties facing practitioners vary between country and context but some challenges are universal: A lack of clarity in communicating what is meant by sustainable development; An ambition to educate everyone to bring about a global citizenship; Social, organisational or institutional factors constrain change to sustainable development, yet there is an emphasis on formal education, and community educators do not receive the same support; A lack of balance in addressing the integration of environmental, social and economic dimensions leading to an interpretation that ESD is mainly about environment and conservation issues; New learning (rather than teaching) approaches are called for to promote more debate in society. Yet, few are trained or experienced in these new approaches. Practitioners need support to explore new ways of promoting learning. [Foreword, ed].

Engaging People in Sustainability

This handbook is the practical guide to becoming a great manager. It covers all the major topics including hiring, coaching, feedback, one-on-ones, and decision making. It also covers some of softer, but equally important, topics like conflict resolution and mental health. Great management changes lives. In fact, it's one of the most single overlooked pieces of leverage in the world. Great managers are remembered like great teachers, inspirations who help others soar. That's why it's such a shame management training is so often overlooked. Successful individual-contributors are rewarded with a 'promotion' into management and then, more often than not, left to sink or swim. If you're a new manager, this book will shine a friendly light on the road ahead. And if you're an old dog, perhaps it'll

teach you a trick or two. This handbook was written by Alex MacCaw and stress-tested at a company called Clearbit.

Education for Sustainable Development Goals

The pivotal events of our lives go by largely uncelebrated: children pass into adulthood, two people become parents, a family moves to a new home. Karyl Huntley's *Real Life Rituals* is a hands-on guide that offers you ways to celebrate the significant moments and passages of life. Designed to be adapted for large groups or parties of one, Huntley's rituals include spiritually grounded ways to: Celebrate the birth of a child; Honor a school graduate; Bless a new home; Commemorate an anniversary; Enhance or release romantic relationships. *Real Life Rituals* also provides celebrations for those special times of the year--solstices, equinox, and holidays--that have been acknowledged by people through the ages. Other rituals include: Blessing a New Home; Transitioning to a New Job; Welcoming a New Pet; Coming of Age for Girls and Boys; Blessing a Baby; Honoring a School Graduate; and Celebrating a First Driver's License, among others. From the Author: Many of life's experiences are so profound that they are difficult to describe in words. These are the precise experiences you invite when you perform a ritual: you move yourself into change or unity, surrender or gratitude, in ways that are so powerful that they are beyond words. You experience true spirituality. Though not associated with any particular denomination or philosophy, the essential nature of ritual is sacred. The rituals in this book speak to the experiences that we all share just by being born on this earth. We share the seasons of the year and the seasons of our lives. Built into these cycles are sacred lessons that you are here to experience--lessons of unity, creation, change, and release. The sacredness of a ritual allows your spirit to inhabit these lessons in a way that goes deeper than words; that is the blessing of ritual.

The Manager's Handbook

Are You Scaring Your People into Mediocrity? All leaders want to outperform, outsell, and outinnovate the competition. And most teams are fully capable of doing so. The problem: we consistently say and do things that spark unconscious fears and keep our people stuck in their Critter State. This primitive fight, flight, or freeze mode distills all decision making to one question: What will keep me safest? Lying low, sucking up, procrastinating, and doing a good enough job may keep employees breathing, but it doesn't make for vital organizations. Leaders have to get their people unstuck and fully engaged, replacing their old, limiting mental patterns with new patterns that foster optimal performance. New York Times bestselling author and applied neuroscience expert Christine Comaford knows what it takes to move people from the Critter State into the Smart State, where they have full access to their own creativity, innovation, higher consciousness, and emotional engagement. When an entire culture maintains that state, it becomes what she calls a SmartTribe. Focused. Accountable. Collaborative. Imbued with the energy and passion to solve problems and do what needs doing, again and again and again. Comaford brings to this book more than thirty years of company-building experience, combined with her expertise in behavioral modification and organizational development. She has helped hundreds of leaders navigate rapid growth, maximize performance, resolve internal conflicts, and execute turnarounds with the full support of their people. Now she shares potent yet easy-to-learn neuroscience techniques that will help you do the same. You'll learn how to move your team forward and reach your next revenue inflection point using the five key Accelerators of the Smart State—focus, clarity, accountability, influence, and sustainability. You'll get better at anticipating and moving through your own stuck spots and those of your people. Using her proven system, Comaford's clients have already created hundreds of millions of dollars in new value. They've seen their revenues and profits increase by up to 210% annually; individuals become up to 50% more productive and 100% more accountable; marketing demand generation grow by up to 237%; new products and services created up to 48% faster; and sales close up to 50% faster. They spot changes in their markets more quickly, then pounce on them to create the future they want. Ultimately, SmartTribes will help you and your team achieve optimal performance and engagement—brilliance—and leave competitors in the

We don't need leaders who know about leadership - we need leaders who embody the capacity to lead in the midst of ambiguity and complexity. The concept of embodied leadership is derived from somatic coaching, a unique approach that brings the body forward as an advocate in creating a place for change and transformation. It brings together language, action, feeling and meaning and is based on the idea that the mind and body are inextricably linked: to develop one, you must cultivate

the other. Embodied Leadership deconstructs our thinking about the body using key discoveries in neuroscience to demonstrate the uses and benefits of a somatic approach, particularly in the area of emotional intelligence. There are practical exercises throughout to develop embodied leadership skills and personal development.

In this instant New York Times Bestseller, Geoff Smart and Randy Street provide a simple, practical, and effective solution to what The Economist calls “the single biggest problem in business today”: unsuccessful hiring. The average hiring mistake costs a company \$1.5 million or more a year and countless wasted hours. This statistic becomes even more startling when you consider that the typical hiring success rate of managers is only 50 percent. The silver lining is that “who” problems are easily preventable. Based on more than 1,300 hours of interviews with more than 20 billionaires and 300 CEOs, Who presents Smart and Street’s A Method for Hiring. Refined through the largest research study of its kind ever undertaken, the A Method stresses fundamental elements that anyone can implement—and it has a 90 percent success rate. Whether you’re a member of a board of directors looking for a new CEO, the owner of a small business searching for the right people to make your company grow, or a parent in need of a new babysitter, it’s all about Who. Inside you’ll learn how to • avoid common “voodoo hiring” methods • define the outcomes you seek • generate a flow of A Players to your team—by implementing the #1 tactic used by successful businesspeople • ask the right interview questions to dramatically improve your ability to quickly distinguish an A Player from a B or C candidate • attract the person you want to hire, by emphasizing the points the candidate cares about most In business, you are who you hire. In Who, Geoff Smart and Randy Street offer simple, easy-to-follow steps that will put the right people in place for optimal success.

13 Guidelines for Effective Teams

The Tao of Leadership is an invaluable tool for anyone in a position of leadership. This book provides the most simple and clear advice on how to be the very best kind of leader: be faithful, trust the process, pay attention, and inspire others to become their own leaders. Heider's book is a blend of practical insight and profound wisdom, offering inspiration and advice. This book is used as a Management/Leadership training text by many Fortune 500 corporations, including IBM, Mitsubishi, and Prudential. What others are saying about this book: This is a particularly readable and accessible version of a great but difficult work. - Publisher's Weekly

Who

Leadership is hard. How can you balance compassion for your people with effectiveness in getting the job done? A global pandemic, economic volatility, natural disasters, civil and political unrest. From New York to Barcelona to Hong Kong, it can feel as if the world as we know it is coming apart. Through it all, our human spirit is being tested. Now more than ever, it's imperative for leaders to demonstrate compassion. But in hard times like these, leaders need to make hard decisions—deliver negative feedback, make difficult choices that disappoint people, and in some cases lay people off. How do you do the hard things that come with the responsibility of leadership while remaining a good human being and bringing out the best in others? Most people think we have to make a binary choice between being a good human being and being a tough, effective leader. But this is a false dichotomy. Being human and doing what needs to be done are not mutually exclusive. In truth, doing hard things and making difficult decisions is often the most compassionate thing to do. As founder and CEO of Potential Project, Rasmus Hougaard and his longtime coauthor, Jacqueline Carter, show in this powerful, practical book, you must always balance caring for your people with leadership wisdom and effectiveness. Using data from thousands of leaders, employees, and companies in nearly a hundred countries, the authors find that when leaders bring the right balance of compassion and wisdom to the job, they foster much higher levels of employee engagement, performance, loyalty, and well-being in their people. With rich

examples from Netflix, IKEA, Unilever, and many other global companies, as well as practical tools and advice for leaders and managers at any level, *Compassionate Leadership* is your indispensable guide to doing the hard work of leadership in a human way.

The Tao of Leadership

Fundamentally, coaching is about enabling someone to feel heard and to access new insights into their own life. But how can you facilitate someone else's thinking when you don't know what they already know? It is almost impossible to remember models and questions whilst giving your companion your full attention at the same time. Coaching simply means that you can listen and notice more, getting quickly to the heart of the conversation. Whether you are brand new to coaching, are a trained coach who has lost confidence, or have many years' experience coaching at a senior level, this deeply practical book will teach you how to:

- Do less so that your companion can do more
- Understand why saying what you see is more useful than listening to any particular story
- Put boundaries around a conversation, making it more effective for your companion and easier for you
- Tailor how you sit and how you speak to allow a collaborative environment
- End any conversation in partnership

Tailored to help the practising coach, this deeply practical book is nonetheless useful for anyone who has conversations with people. "Claire stimulated a desire to know more about how to use existing skills in new and simplified ways. An altogether great book." Clive Avril, Executive Coach and Mentor (ACC) "This is the kind of book that, after reading, you will want to have nearby for easy reference and reminders. I suspect that the well-worn pages will be a symbol of the book's lasting contribution to coaching – and to transformational conversations. A clear, concise summation of coaching that will benefit the new and the seasoned coach alike." J. Val Hastings, MCC and President of Coaching4Today's Leaders and Coaching4Clergy "This book is written for anyone with an interest in coaching who is looking to improve their coaching style in the workplace. It is ideal for people who are working to complete their studies and gain accreditation from any of the coaching bodies... This is now one of my all time favourite coaching books... I found something new in every chapter of the book." Claire Caine, EMCC Book Club Review "Simplifying Coaching is great at bringing you back to basics and reflecting on trying to resist the urge to 'actively help', rather than allowing the client to do the thinking. In a small book, it covers a lot of ground, and I would recommend reading the whole book and then dipping into it periodically for practical advice on particular topics. It is a brilliant and simple book that every coach should read." Sally Twisleton, EMCC Book Club Review Claire Pedrick has been coaching for over 30 years. A coach, mentor coach and coaching supervisor, she trains managers, leaders and experienced coaches across multiple sectors to reap the benefits of working more simply. Claire is the Founding Partner of 3D Coaching. Claire received an award from Henley Business School for Outstanding Contribution to Coaching 2022

"Unleashed is worth an afternoon of your time, whether or not you are already a leader. It is sparkily written and personal, drawing on the experiences of co-authors (and spouses) Frei and Morriss."—Financial Times Leadership isn't easy. It takes grit, courage, and vision, among other things, that can be hard to come by on your toughest days. When leaders and aspiring leaders seek out advice, they're often told to try harder. Dig deeper. Look in the mirror and own your natural-born strengths and fix any real or perceived career-limiting deficiencies. Frances Frei and Anne Morriss offer a different worldview. They argue that this popular leadership advice glosses over the most important thing you do as a leader: build others up. Leadership isn't about you. It's about how effective you are at empowering other people—and making sure this impact endures even in your absence. As Frei and Morriss show through inspiring stories from ancient Rome to present-day Silicon Valley, the origins of great leadership are found, paradoxically, not in worrying about your own status and advancement, but in the unrelenting focus on other people's potential. *Unleashed* provides radical advice for the practice of leadership today. Showing how the boldest, most effective leaders use a special combination of trust, love, and belonging to create an environment in which other people can excel, Frei and Morriss offer practical, battle-tested tools—based on their work with companies such as Uber, Riot Games, WeWork, and others—along with interviews and stories from their own personal experience, to make these ideas come alive. This book is your indispensable guide for unleashing greatness in other people . . . and, ultimately, in yourself. To learn more, please visit theleadersguide.com.

Somewhere deep inside, you know what your gift, purpose, and mission are. Boyd Varty, a lion tracker and life coach, reveals how the wisdom from the ancient art of tracking can teach you how to recognize these essential ingredients in a meaningful life. Know how to navigate, don't worry about the destination, and stay alert. These are just a few of the strategies that contribute to both successful lion tracking and a life of fulfillment. When we join Boyd Varty and his two friends tracking lions, we are immersed in the South African bush, and, although we learn some of the skills required for actual tracking, the takeaways are the strategies that can be applied to our everyday lives. Trackers learn how to use all of their senses to read the environment and enter into a state of "greater aliveness." When we learn to find and follow our inner tracks, we learn to see what is deeply important to us. In the same way the trip in the classic *Zen and the Art of Motorcycle Maintenance* was a vehicle to examine how to live out our values, the story of this one-day adventure—with danger and suspense along the way—uses the ancient art of tracking to convey profound lessons on how to live a purposeful, meaningful life of greater harmony.

Well known technology executive and angel investor Elad Gil has worked with high growth tech companies like Airbnb, Twitter, Google, Instacart, Coinbase, Stripe, and Square as they've grown from small companies into global brands. Across all of these break-out companies, a set of common patterns has evolved into a repeatable playbook that Gil has codified in *High Growth Handbook*. Covering key topics including the role of the CEO, managing your board, recruiting and managing an executive team, M&A, IPOs and late stage funding rounds, and interspersed with over a dozen interviews with some of the biggest names in Silicon Valley including Reid Hoffman (LinkedIn), Marc Andreessen (Andreessen Horowitz), and Aaron Levie (Box), *High Growth Handbook* presents crystal clear guidance for navigating the most complex challenges that confront leaders and operators in high-growth startups. In what Reid Hoffman, cofounder of LinkedIn and co-author of the #1 NYT bestsellers *The Alliance* and *The Startup of You* calls "a trenchant guide," *High Growth Handbook* is the playbook for turning a startup into a unicorn.

Most managers already know that cultural differences are important when they're dealing with business partners from other countries. They understand that the current business environment is increasingly global. What today's managers don't fully get is that they must learn and use global management skills in every interaction they have. Managers who buy this book will be able to make sense of common situations that they do not understand. After reading this book they will be able to recognize, assess, react to and solve complex management situations where diverse styles, personalities and cultures are in play. *The New Global Manager* is a daily resource for managers, providing practical tools and frameworks like OAR(TM) and 4DCulture(TM), strategies and tips for successfully managing abroad and at home, face-to-face and virtually. If you are a new manager, or a manager with 20 years of experience, this is the comprehensive resource you've been waiting for.

This book shatters the barriers between traditional Finance and Human Resources by demonstrating that People Economics is a win-win for both companies and their employees. There have been many attempts to bring clarity to the term 'human capital', People Economics breaks through with common language and a relevant framework. The stories, real-life examples and calculable metrics provide tangible ways to bring human capital measurement to life. ESG and sustainability reporting, corporate transparency and disclosure of human capital measures are rapidly gaining prominence for investors, analysts, regulators and consumers. The United States lags other nations in this field; People Economics offers a path to rapidly accelerate understanding of this complex and challenging arena. It is an essential reference for investors, executives, human resources and finance professionals, and business educators.

The New Global Manager

Neurological research definitively and repeatedly concludes that there is a bottleneck in our cognitive function - when we do more than one thing at a time, we become less efficient and more error-prone. Our systems get overloaded and we crash. In fact, we are actually wired to monotask - to give dedicated focus to one task at a time. Whether you call it monotasking, mindfulness, being present, or any other name, the goal is the same: Give your focus to one thing at a time and do it with your all. When we do things with our full focus, completely tuning our bodies and our brains in to one activity-like reading a book, listening to someone in a conversation, or paying attention to our surroundings while we go for a walk - amazing things can happen. Drawing on research in cognitive science, neuroscience, and mindfulness, *The Twelve Monotasks* shows that by concentrating on twelve everyday activities and approaching them with a focused mindset, we can rebuild and expand our attention spans. When we focus on what we are doing, where we are and who we are with, we can rediscover our ability to enjoy life, connect with others, and succeed in all that we do. And in the end, it makes us happier, more productive, and more present - in all aspects of our lives.
