VATS Lobectomy Illustrated by Blackmon for STS - VATS Lobectomy Illustrated by Blackmon for STS by Shanda Blackmon 161,801 views 9 years ago 20 minutes - VATS Lobectomy Illustrated Step-by-Step.

located on the left anterior axillary line

beginning any right-sided lung resection

retract the lung anteriorly providing a posterior exposure of the pleural
damage the vagus nerve running longitudinally next to the esophagus

approach the anterior hilum of the lung

encircle the upper lobe branches of the pulmonary vein

dividing the truncus anterior of the pulmonary artery

divide either the right upper lobe bronchus

stapled from the utility port beginning anteriorly towards the posterior area

placed into an endo catch bag

perform the posterior dissection of the pleura

detected the superior pulmonary vein

pass this passer behind the pulmonary vein

encounter the bronchus

divide the fissure completing a right middle lobe

place the right middle lobe into an endo catch bag

begin to see the bronchus
dividing the pulmonary vein
encircling the bronchus to the right
passing the stapler behind the bronchus
using blunt dissection with the tonsil sponge
dissect the right lower lobe bronchus
dissecting out the pulmonary artery by identifying the major fissure
divided the pulmonary artery going to the right lower lobe
begin to dissect out the right middle lobe branch
perform the posterior pleural dissection
divide the hilar
begin by detecting the superior and inferior pulmonary vein
expose the second branch coming off of the pulmonary artery
approaching the left upper lobe bronchus
disconnecting the left upper lobe from the left lower lobe identifying
stapled and divided the bronchus
divided from an anterior approach through the utility incision
dissecting the pleura
divided the inferior branch of the pulmonary vein
