

The Dying Times

[#the dying times](#) [#end of an era](#) [#societal collapse fiction](#) [#bleak future tales](#) [#apocalyptic narratives](#)

Explore 'The Dying Times,' a compelling collection that delves into the final moments of a fading world, capturing the essence of an end of an era. These stories weave together narratives of societal decline, resilience amidst desolation, and the stark realities faced as civilizations teeter on the brink. Perfect for readers fascinated by apocalyptic themes and the human spirit's endurance in the face of insurmountable odds.

Educators can use these resources to enhance their classroom content.

Thank you for stopping by our website.

Realms of Time

"Definitely the best of the series!""Felt like I was part of the team--so much flippen fun.""Devoured it. Ready for the next book, like right NOW."-----Welcome to the fourth installment of the Scrapyard Ship series, Realms of Time. Captain Jason Reynolds and his team are up against a new, and unexpected foe--an adversarial force that has every intention of aligning with the powerful and dreaded Craing Empire. The enemy strikes from Earth's high orbit, deploying five time-shifting spheres. The spheres are strategically positioned to link-up and set Earth's clock back 100 years, erasing present time. But when that course of action is interrupted by The Lilly's crew, the results become far worse. Fluctuating time realms rapidly spread across the globe and threaten to rip the planet apart. Join Jason, Billy, Traveler, Ricket and Dira on their mission as they literally travel to the ends of time to bring Earth back to the twenty-first century.

Hab 12

"Buckle up--this is another crazy ride!" The Scrapyard Ship sci-fi "cliff-hanger" adventures continue with HAB 12, the second book in the series: Captain Jason Reynolds faces new challenges, not only on Earth but from the far side of the universe as well. The only way to stop the Craing this time will be to square off with them on their home turf. Jason's been informed that three powerful Craing warships, having similar technology as The Lilly, will soon be en route to Earth. The Alliance must destroy the Craing's wormhole means of distant space travel to avert Earth's total annihilation. Unfortunately, there's no way to reach the Craing worlds in time, at least not through conventional means. It's up to Jason and his hand-picked assault team to traverse, by advanced phase-shifting means, through the hazardous environment of HAB 12. This is an adventure fraught with carnivores of a Jurassic Age magnitude, and a terrain so deadly that turning back may be their only hope of survival. Note from the

author: Don't be surprised by cliff-hanger endings. I'll do my best to keep Scrapyard Ship as well as the Tapped In series books coming so you won't have long to wait for the next book. Enjoy!

Scrapyard Legacy

Better buckle up ... the Scrapyard Ship gang is back for a new interstellar romp!... Over the past year, things have been relatively peaceful within the Planetary Alliance. Captain Jason Reynolds is looking forward to a fishing trip in the deep wilderness on Alantia Dastile with Michael, his six-year-old son. His wife, Dira, and his father, the Fleet Omni, are away on a diplomatic mission to the Sommis of Adriark. It's the perfect time for an interstellar getaway. Or is it? Jason just needs to check on one thing first--a flurry of mechanical issues recently plaguing the Parcical, the Omni's Rogue Class spacecraft--something about a Zoo habitat using increasing amounts of the vessel's memory, that and a flurry of malfunctions with onboard Caldurian technologies. Caught off guard, it's soon discovered; a different kind of war is coming. The Alliance is not prepared. The U.S. Fleet is not prepared. A new enemy rears its ugly head and quickly becomes the dominant force within the sector. For those who survive the coming rampage -- the coming war -- everything will change. The Scrapyard Ship gang unites one more time for this action-packed adventure. Together, they will endeavor to give the Planetary Alliance a fighting chance against almost certain devastation that's heading toward the Sol system.

Space Vengeance

"I LOVED this book!" "Great Book!" "Get Another Fix!" "Fun and Great Series!" "The crazy ride continues... and never lets up!" Captain Jason Reynolds is back! In the third installment of the Scrapyard Ship sci-fi adventure series, Space Vengeance, Jason, his family, and The Lilly's crew face the impending destruction of their internal nano-devices. What's worse, what remains of the Craing fleet, some 1500 warships, is back and headed straight toward the already decimated planets within Allied space. In what looks to be a one-way suicide mission, Jason must leave Nan and Mollie behind on Earth and out of harm's way. While war rages on sixty light years from Earth, maniacal space raider Captain Stalls and hundreds of his pirated warships close in on Earth. Stalls knows exactly what he wants: to find and kill Captain Reynolds and take the beautiful Nan Reynolds for his own. Note from the author: If you've made it to this third installment, you already realize this is an ongoing series. With that said, more often than not these books have cliff-hanger endings!

Plague Ship

Chairman Juan Cabrillo and the rest of the Corporation's mercenaries fight to stop a corrupt activist group from unleashing a viral attack in this #1 New York Times bestselling adventure from the Oregon Files. Captained by the rakish, one-legged Juan Cabrillo and manned by a crew of former military and spy personnel, the Oregon is a private enterprise, available for any government agency that can afford it. They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate -- and as perilous -- as any he has ever known and pitted against a cult with monstrously lethal plans for the human race. . . plans he may already be too late to stop

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While

this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Starship Alexander

A washed-up captain. A worn-out ship. A crew of green cadets. And they're Earth's only hope. The Alexander is the last true warship, a relic from the days of interstellar war. She's destined for the scrapyards, and her captain, Richard Hammett, is about to retire. Their last mission is a training run with a ship full of cadets. It's supposed to be a routine hop through a wormhole Gate. But Gates have been going offline, one after another, and Hammett knows in his bones it means trouble. The kind of trouble only a real warship can handle. Defying orders, he takes the Alexander through another Gate, and puts the ship smack dab in the path of an alien invasion. Now a captain at the end of his career will have to take dozens of terrified cadets and forge them into a crew of warriors, because the Alexander is all that stands between the Earth and the swarming ships of the Hive.

Gun Ship

Fifty years have passed since the first Earth Day, on 22 April 1970. This accessible, incisive and timely collection of essays brings together a diverse set of expert voices to examine how the Earth's environment has changed over this past half century, and what lies in store for our planet over the coming fifty years. *Earth 2020: An Insider's Guide to a Rapidly Changing Planet* responds to a public increasingly concerned about the deterioration of Earth's natural systems, offering readers a wealth of perspectives on our shared ecological past, and on the future trajectory of planet Earth. Written by world-leading thinkers on the front-lines of global change research and policy, this multi-disciplinary collection maintains a dual focus: some essays investigate specific facets of the physical Earth system, while others explore the social, legal and political dimensions shaping the human environmental footprint. In doing so, the essays collectively highlight the urgent need for collaboration across diverse domains of expertise in addressing one of the most significant challenges facing us today. *Earth 2020* is essential reading for everyone seeking a deeper understanding of the past, present and future of our planet, and the role of humanity in shaping this trajectory.

Earth 2020: An Insider's Guide to a Rapidly Changing Planet

Examines differences in taste between modern French classes, discusses the relationship between culture and politics, and outlines the strategies of pretension.

Distinction

An ancient starship discovered...An eternal enemy revealed...An impossible mission to save humankind...The Goliath has been discovered, the first of its secrets revealed. Now the race is on for Captain Mitchell Williams and his crew to return to Liberty and recover Origin's lost memories before the enemy can complete its violent conquest. It's a mission with a near-zero chance of success. A mission that only the Riggers would be crazy enough to accept, and skilled enough to survive. A mission that will test the limits of Mitchell's mind, body, and soul, and force him to make an impossible choice that could cost the lives of millions. This is war, and if he can't win a battle for a single planet, how can he possibly change the outcome of a conflict that has raged beyond eternity?

The End of Liberty (War Eternal, Book Two)

The Weightless World

A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers. Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurship, and DIY aesthetic to create a successful business and way of life. *Pretty Much Everything* is a mid-career survey of work, case studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and

presents the process behind his design with projects like Field Notes and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what appears on the page. With Draplin’s humor and pointed observations on the contemporary design scene, Pretty Much Everything is the complete package

Draplin Design Co.

Move Over, Buffy! Tinker Not Only Kicks Supernatural Butt Shes a Techie Genius, Too! Inventor, girl genius Tinker lives in a near-future Pittsburgh which now exists mostly in the land of the elves. She runs her salvage business, pays her taxes, and tries to keep the local ambient level of magic down with gadgets of her own design. When a pack of wargs chase an Elven noble into her scrap yard, life as she knows it takes a serious detour. Tinker finds herself taking on the Elven court, the NSA, the Elven Interdimensional Agency, technology smugglers and a college-minded Xenobiologist as she tries to stay focused on what’s really important her first date. Armed with an intelligence the size of a planet, steel toed boots, and a junk yard dog attitude, Tinker is ready to kick butt to get her first kiss. At the publisher’s request, this title is sold without DRM (Digital Rights Management). “Each and every character is fascinating, extraordinarily well-developed, and gets right under your skin. . . . A terrific, memorable story.” ³/₄Julie E. Czerneda, author of *In the Company of Others* “Spencer takes her readers on a fast-paced journey into disbelief. [Her] timing is impeccable and the denouement stunning.” ³/₄Romantic Times (four-star review) “This novel [Alien Taste] is keeper-shelf material.” ³/₄BookBrowser “Wonderfully inventive . . . a fun protagonist.” ³/₄Locus

Tinker

The Great Space They knew the day would come--the day when Earth itself would come under direct attack by the Craing. After destroying much of Jhardon and the Mau planet of Carz-Mau, an elite Vanguard fleet of seven Craing dreadnaughts, planet killers, enters Earth's orbit. Captain Jason Reynolds and the crew aboard his Caldurian ship, The Lilly, are once again pulled into action to fend off what just might be their most ruthless and powerful adversary yet. In an unanticipated turn of events, thousands of molt weevils are unleashed on Earth, swarming insectoid aliens with one intent ... kill every man, woman, and child on the surface of the planet. Nan and Mollie must utilize their own cunning and resourcefulness to stay alive long enough to be rescued.

The Great Space

“TRANSMISSION is riveting, unexpected, and firmly rooted in strong psychological profiles backed with thriller and sci-fi elements: what more could readers wish for? (Just the quick publication of Book Two, Arrival.)” --Midwest Book Review From #1 worldwide bestselling fantasy author Morgan Rice comes book #3 in a long-anticipated science fiction series. With planet Earth destroyed, what will become of 13 year old Kevin and Chloe in the mother ship? Will the aliens enslave them? What do they want? Is there any hope of escape? And will Kevin and Chloe ever return to Earth again? “Action-packed Rice’s writing is solid and the premise intriguing.” –Publishers Weekly, re *A Quest of Heroes* “A superior fantasy... A recommended winner for any who enjoy epic fantasy writing fueled by powerful, believable young adult protagonists.” –Midwest Book Review, re *Rise of the Dragons* “An action packed fantasy sure to please fans of Morgan Rice’s previous novels, along with fans of works such as *THE INHERITANCE CYCLE* by Christopher Paolini.... Fans of Young Adult Fiction will devour this latest work by Rice and beg for more.” –The Wanderer, *A Literary Journal* (regarding *Rise of the Dragons*) Book #4 in the series is also now available! Also available are Morgan Rice’s many series in the fantasy genre, including *A QUEST OF HEROES (BOOK #1 IN THE SORCERER’S RING)*, a free download with over 1,300 five star reviews!

Ascent (The Invasion Chronicles—Book Three): A Science Fiction Thriller

The Hidden Ship - Blurb I am Brian Polk, a captain in the U.S. Air Force. Was already back stateside for close to a year when all hell broke loose--otherwise I'd be dead right now--like the tens of millions of other poor souls lost. Military installations worldwide were the first targets hit. It was a reign of terror--an interstellar invasion--the beginning of the end of civilization as we knew it. The largest cities were turned to rubble. Government centers were laid to waste, then law enforcement resources were targeted. Finally, the aliens eliminated humanity's means to electronically communicate. The Earupitan's technology, their weaponry, was so remarkable and advanced that we never had a chance. But now, two years later, we're long past self-incrimination--playing the blame game. Today they walk

brazenly among us-their reptilian eyes always watchful, always scrutinizing. At their discretion they drag any of us into their headquarters. Most seized never see the light of day after that. Many of us live in fear, wondering what's next for humanity. Then again, there are some amongst us who have befriended the enemy. But not me. I'm far more interested in killing them, maybe all of them. Luckily, I possess something of theirs. Something dangerous. So in my own small way I just might make a difference-that, or die trying.

The Hidden Ship

For the first time ever, Bill Willingham's acclaimed, Eisner Award-winning series FABLES is presented in a deluxe hardcover edition collecting issues #1-10. When a savage creature known only as the Adversary conquered the fabled lands of legends and fairy tales, all of the infamous inhabitants of folklore were forced into exile. Disguised among the normal citizens of modern-day New York, these magical characters have created their own peaceful and secret society within an exclusive luxury apartment building called Fabletown. When Snow White's party-girl sister, Rose Red, is apparently murdered, it's up to Fabletown's sheriff, the reformed and pardoned Big Bad Wolf, to find the killer. Meanwhile, trouble of a different sort brews at the Fables' upstate farm where non-human inhabitants are preaching revolution – and threatening Fabletown's carefully nurtured secrecy.

Fables: The Deluxe Edition Book One

First Contact: Assess human with the flawed, rudimentary, mind ... It's a moonless summer night when a severely damaged intergalactic spacecraft enters Earth's upper orbit. The alien pilot is desperate. Needs to hold up long enough to make repairs--do so before his pursuers find him. Cuddy Perkins lives a simple life with his mother, his dog Rufus, and a scattering of farm animals that still inhabit their old, dilapidated, Woodbury Tennessee ranch. He was used to the insults; retard ... simpleton ... village idiot. Momma says to just ignore them ... people can be heartless. But Cuddy already knew he was different. Ever since the accident back when he was seven. He didn't know how long ago that was, exactly, but he did know he was pretty big now--he was taller than his older brother, Kyle ... who was in prison, as well as the Woodbury Sheriff--the man who put him there. Unbeknownst to Cuddy Perkin's, his simple, uneventful, life was about to be turned completely upside down.

The Simpleton

This is a study of the material life of information and its devices; of electronic waste in its physical and electronic incarnations; a cultural and material mapping of the spaces where electronics in the form of both hardware and information accumulate, break down, or are stowed away. Where other studies have addressed "digital" technology through a focus on its immateriality or virtual qualities, Gabrys traces the material, spatial, cultural and political infrastructures that enable the emergence and dissolution of these technologies. In the course of her book, she explores five interrelated "spaces" where electronics fall apart: from Silicon Valley to Nasdaq, from containers bound for China to museums and archives that preserve obsolete electronics as cultural artifacts, to the landfill as material repository. Digital Rubbish: A Natural History of Electronics describes the materiality of electronics from a unique perspective, examining the multiple forms of waste that electronics create as evidence of the resources, labor, and imaginaries that are bundled into these machines. Ranging across studies of media and technology, as well as environments, geography, and design, Jennifer Gabrys draws together the far-reaching material and cultural processes that enable the making and breaking of these technologies.

Digital Rubbish

Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

USS Hamilton

****Winner of the Financial Times and Goldman Sachs Business Book of the Year Award**** 'Brad Stone's definitive book on Amazon and Bezos' The Guardian 'A masterclass in deeply researched investigative financial journalism . . . riveting' The Times The definitive story of the largest and most influential company in the world and the man whose drive and determination changed business forever. Though Amazon.com started off delivering books through the mail, its visionary founder, Jeff Bezos, was

never content with being just a bookseller. He wanted Amazon to become 'the everything store', offering limitless selection and seductive convenience at disruptively low prices. To achieve that end, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now... Jeff Bezos stands out for his relentless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way that Henry Ford revolutionised manufacturing. Amazon placed one of the first and largest bets on the Internet. Nothing would ever be the same again.

The Arcades Project

Craing Dominion, Book 5 of the best-selling Scrapyard Ship series. Truly dark times have come to the Allied forces, the crew of The Lilly, and Earth -- we knew they were coming but nothing will have prepared you for this ...With the introduction of Craing commander Ot-Mul, there's a new standard for evil that will not only shape the rest of this series, but Science Fiction literature as a whole. Join Captain Jason Reynolds as he ventures into the proverbial lion's den in a last ditch effort to even the playing field with the Craing -- an empire that has embarked on a pursuit that will guarantee their de facto dominance for millennia to come.

The Everything Store: Jeff Bezos and the Age of Amazon

Winner of the Wellcome Book Prize 2017. Longlisted for the Man Booker International Prize 2016. Now a major French film, REPARER LES VIVANTS/HEAL THE LIVING, directed by Katell Quillevere and starring Emmanuelle Seigner. A twenty-four-hour whirlwind of death and life. In the depths of a winter's night, the heart of Simon Limbeau is resting, readying itself for the day to come. In a few hours' time, just before six, his alarm will go off and he will venture into the freezing dawn, drive down to the beach, and go surfing with his friends. A trip he has made a hundred times and yet, today, the heart of Simon Limbeau will encounter a very different course. But for now, the black-box of his body is free to leap, swell, melt and sink, just as it has throughout the years of Simon's young life. 5.50 a.m. This is his heart. And here is its story. Translated from the French by Jessica Moore

Craing Dominion

Based on first-hand experience with companies such as Volvo, BP, Proctor and Gamble, ICI and Fuji Xerox, Elkington defines the triple bottom line of 21st century business as profit, environmental sustainability and social responsibility.

Mend the Living

Bristol's Green Roots has drawn on the thoughts and memories of more than a hundred people who have worked in Bristol's environmental movement over the last 40 years to make our city, and the world, more sustainable, people-friendly and equal. Tracing the beginnings of organisations like Sustrans, Centre for Sustainable Energy and Bristol Friends of the Earth as well as the work of some of the extraordinarily dedicated sustainable businesses, community groups, initiatives and individuals, this publication celebrates the achievements of those who strive to make Bristol a better place to live. Bristol's Green Roots is a Schumacher Institute project supported by the Heritage Lottery Fund. It documents the history of Bristol's modern environmental movement to ensure that the achievements, successes and lessons learned over the past four decades are recorded for future generations.

Cannibals with Forks

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Beyond Observation is structured by the argument that the 'ethnographicness' of a film should not be determined by the fact that it is about an exotic culture – the popular view – nor because it has apparently not been authored – a long-standing academic view – but rather because it adheres to the norms of ethnographic practice more generally. On these grounds, the book covers a large number of films made in a broad range of styles across a 120-year period, from the Arctic to Africa, from the cities of China to rural Vermont. Paul Henley discusses films made within reportage, exotic melodrama and travelogue genres in the period before the Second World War, as well as more conventionally ethnographic films made for academic or state-funded educational purposes. The book explores the work of film-makers such as John Marshall, Asen Balikci, Ian Dunlop and Timothy Asch in the post-war period, considering ideas about authorship developed by Jean Rouch, Robert Gardner

and Colin Young. It also discusses films authored by indigenous subjects themselves using the new video technology of the 1970s and the ethnographic films that flourished on British television until the 1990s. In the final part of the book, Henley examines the recent work of David and Judith MacDougall and the Harvard Sensory Ethnography Lab, before concluding with an assessment of a range of films authored in a participatory manner as possible future models.

USS Hamilton

Carmer and Grit investigate a mysteriously magical flying circus in the follow-up to "a fun and frolicking middle grade adventure full of enough fantasy, humor and heart to make giddy even the most finicky reader." (BookPage) Shortly after saving the faeries of Skemantis, magician's apprentice Felix Carmer III and his faerie companion, Grit, head out to see the world. They soon come across a mysteriously magical flying circus. As they get to know the outlandish world of Rinka Tinka's Roving Wonder Show, it becomes clear there's something not quite normal about this circus or its inventor—and that recent airship disasters plaguing nearby Driftside City may have a sinister explanation. Fans of the Wildwood trilogy and Lockwood & Co. series will love the thrills and chills of Carmer and Grit, Book 2: The Crooked Castle as it takes readers up in the air with a flying circus, under the sea to the evil Unseelie kingdom, through a terrifying magical snowstorm, and on a chase with the menacing Wild Hunt.

Boy Gone

The author explores dozens of scriptural passages from the psalms, offering personal ideas and insights and sharing his testimony that "no matter what the trouble and trial of the day may be, we start and finish with the eternal truth that God is for us."--

Bristol's Green Roots

When a cluster of blazingly fast meteorites strikes Earth's upper stratosphere in the year 2129, they release three destabilizing elements into the atmosphere—Strongzine, Stradamine, and Starlox—which encircle the Earth's surface in a thick, partially solidified layer of cloud and begin to spew a constant stream of acid rain onto the surface below. Organic life forms are all but obliterated, and the human race is reduced to a tiny fraction of its population. This event is known as the Ruin. But five centuries later, humanity still survives. Cloudwalkers tells the story of Conn Brataich, a young man who lives a privileged life above the cloudbank, relying on his noble heritage—and the abilities it provides—to guide him through his beautiful but treacherous realm in the New York skylands, and Misty Casper, a Grounder who lives an arduous and somber life hundreds of feet below in the former subway tunnels of crumbling midtown Manhattan. Their two cultures live in uneasy, segregated codependence, rarely interacting until late one fall evening when, mysteriously, an experienced Cloudwalker of noble blood falls five hundred feet to his death. Conn is sent to recover the body in secret, but he doesn't expect to encounter Misty on the dangerous streets of the dying city. Their chance encounter triggers a domino effect that throws them both headlong into a struggle for their very survival. Conn and Misty soon discover that only by working together can they succeed, but first they'll have to put aside their preconceived notions about one another. Dark forces, long thought to have been expunged, have returned and are threatening to destroy both their ways of life. Through love, loss, and the looming threat of war, Misty and Conn will be forced to face their greatest fears for the sake of their very world and each other.

Beyond observation

300+ pages of diagrams, descriptions of techniques and a comprehensive overview of the role direct action plays in resistance—from planning an action, doing a soft blockade, putting up a treesit or executing a lockdown; to legal and prisoner support, direct action trainings, fun political pranks, and more. The DAM has been compiled and updated by frontline activists from around the US to help spread the knowledge and get these skills farther out in the world.

Carmer and Grit, Book Two: The Crooked Castle

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the

use of information technology can help shipping operations. Shipping and Logistics Management also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, Shipping and Logistics Management is also a useful reference for shipping practitioners and consultants.

For Times of Trouble

Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

Cloudwalkers

This updated edition of *The Secret State* revises Hennessy's picture of the Soviet threat that was presented to ministers from the last days of the Second World War to the 1960s. He maps the size and shape of the Cold War state built in response to that perceived threat, and traces the arguments successive generations of ministers, the military and civil servants have used to justify the British nuclear capability. He also adds new material exploring the threats presented by the IRA and radical Islamic terrorists post 9/11. In what circumstances would the Prime Minister authorize the use of nuclear force and how would his orders be carried out? What would the Queen be told and when? In this captivating new account, Peter Hennessy provides the best answers we have yet had to these questions.

Earth First! Direct Action Manual

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. *Out of the Ordinary* captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was serving aboard *The City of Bath*. *Out of the Ordinary* is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. *Out of the Ordinary* is a landmark publication that sets free a distinct voice from the history of the transgender movement.
