My dad was unconscious on the floor, Jason was leaning on my shoulder mumbling something about Taco Bell, and a wrench was by my foot.

Despite what you might think, these stories take place in a world very much like our own. Here you will find darkness and light, love and hate, pain and ecstasy. People just like you and I live inside these stories: the hurt, the damaged, the mad, the bad, the hopeful and the hopeless... Here, pain is often something to be endured on the way to some form of revelation. Death is not always the end. You will be faced by monsters, and you will discover that sometimes the worst monsters are those with a human face. So be careful. Remain focused. Keep your arms inside the vehicle at all times. In these stories, transformation will happen. You will encounter the extremes of human nature. And, yes, some bruising may occur.

Chideraa

Ada tuned into a song while walking into the house. Instead of the excitement and pleasure that usually came with singing, a haze of vagueness and emptiness hung on her mind. What was that for? She just couldn't tell. Maybe seeing her son, Chideraa, would make her feel better. She had left him in the sitting room. But Chideraa was not in the sitting room when she walked in. Ada searched under the bed, and table. She looked up to the ceiling and the walls, even though she knew Chideraa could not have climbed there. When she couldn't find him, she screamed, "Chideraa!" But there was no response. Love, suspense, intrigue, conspiracy, deceit, treachery, pain, and anguish are all here in author Stan-Collins Ubaka's latest book, Chideraa: Love and Bruises. Ubaka tells a story most of us can relate to. Ada was a young, innocent girl in love. This supposed beautiful feeling resulted in pain, then gain, then pain, and then ... The emotional roller coaster seemed never-ending. Chideraa: Love and Bruises educates you about the many ills in our society. You will also find there is hope despite how things look at times.

Bruises

The blood was streaming from her eyes, her ears, thick runnels ran from her nostrils like flu snot. So much blood. "How could you?" she screamed, her voice shrill. He felt the weight of his suitcases in his grip and put them down. He tried to console her, but he couldn't touch her. Bruises had mottled her exposed skin, blossoming one upon the other until every inch of her had blackened. And still it continued, past the point of discoloration as her arms and legs began to erupt in minute fissures at first pink and then a deep crimson. "You promised me," she mumbled through lips split like boiled meat as she sank to the floor, her eyes no longer capable of sight. "In sickness and in health... For better or for worse... You be the passenger, I'll drive the hearse," she said in sing-song fashion. She was laughing now, a maniacal grin spread across her ruined features. He stood by in horror and watched as her finger stretched out and, in the blood that now pooled around her, she scrawled out the word "COWARD" in tall, child-like letters... -from the story "Bruises"

Bruised

When Imogen, a sixteen-year-old black belt in Tae Kwon Do, freezes during a holdup at a local diner, the gunman is shot and killed by the police, and she blames herself for his death. Before the shooting, she believed that her black belt made her stronger than everyone else—more responsible, more capable. But now that her sense of self has been challenged, she must rebuild her life, a process that includes redefining her relationship with her family and navigating first love with the boy who was at the diner with her during the shoot-out. With action, romance, and a complex heroine, *Bruised* introduces a vibrant new voice to the young adult world—full of dark humor and hard truths. Praise for *Bruised* **STARRED REVIEW** "Offering psychological drama and an introduction to martial-arts code of behavior, the book has a meaningful message about power, control, and the internal bruises carried by victims." —Publishers Weekly, starred review "Her story is compelling, and readers will stick with her as new insights bring about a believable shift in her behavior... This distinctive debut will be appreciated by fans of contemporary fiction." —Kirkus Reviews "This layered first novel explores the aftereffects of the trauma, convincingly depicting why Imogen blames herself for a situation over which she had no control. Skilton also sensitively depicts the bond and tentative romance that develops between Imogen and Ricky. The main story line about Imogen's struggle to come to terms with what she did (and did not do) is nuanced and honest." —Horn Book "This is a useful exploration of the difference between fantasy-style omnipotence and the complexity of real-life human strength." —Bulletin of the Center for Children's Books "Skilton does a fine job capturing how a psychological process after trauma can take time and might manifest in unique, sometimes unexpected, ways." —VOYA Magazine "Poignant and emotionally raw at times and humorous at others, this debut novel adeptly portrays a shattered life in the wake of an unexpected act of violence and the road back to normalcy." —School Library Journal "Here is a writer to watch who handles complex issues with sensitivity in the vein of Deb Caletti and Sarah Dessen." —Booklist

Heart-shaped Bruise

Including you. But you don't know. You don't know who I used to be. Who I could have been. Sometimes I wonder if I'll ever shake off my mistakes or if I'll just carry them around with me forever like a bunch of red balloons. Awaiting trial at Archway Young Offenders Institution, Emily Koll is going to tell her side of the story for the first time. *Heart-Shaped Bruise* is a compulsive and moving novel about infamy, identity and how far a person might go to seek revenge.

"This chapter has one chance to make a first impression on the reader. Similarly, the clinician has only one chance to make a first impression on the patient who has experienced domestic and/or sexual abuse, such that the patient has the confidence to disclose what has happened to her. . She or he may have taken months or years before feeling able to speak about what has happened, so it is essential that they experience a sympathetic, non-judgemental response from the clinician. Descriptions of the positive effects of an empathetic and non-judgemental responses have been given by two female doctors who themselves sought help following sexual violence and domestic abuse, respectively.^{1,2} This positive response also has the effect of validating the patient's experience of abuse. This chapter aims to describe the magnitude of the problem of domestic and sexual violence and abuse, and cover the important aspects of the initial contact between the clinician and the patient"--Provided by publisher.

The New England Journal of Medicine

Individuals who donate their blood provide a unique and precious gift in an act of human solidarity. In order to donate blood, prospective donors should be in good health and free from any infections that can be transmitted through transfusion. Most blood donors perceive themselves to be healthy, but some are unsuitable to donate blood due to the potential risk of compromising or worsening their own health or the risk of transmission of infections to patients. Blood transfusion services (BTS) have a duty of care towards blood donors as well as to the recipients of transfusion. This duty of care extends to prospective donors who are deferred from donation--whether on a temporary or permanent basis--as well as those who donate blood and are subsequently found to have unusual or abnormal test results. BTS have a responsibility to confirm test results and provide information, counseling and support to enable these individuals to understand and respond to unexpected information about their health or risk status. Counseling is part of the spectrum of care that a BTS should be able to provide to blood donors--including referral to medical practitioners or specialist clinical services. Pre-donation counseling was recognized as one element of the strategy to reduce and, if possible, prevent the donation of blood by individuals who might be at risk for HIV and other TTI including hepatitis B and C viruses as well as to inform the donor of the donation process and testing of blood for HIV. Post-donation counseling was acknowledged to be a necessary element of donor management as an adjunct to informing donors of unusual or abnormal test results. Blood donor counseling by trained specialist staff

is now considered to be a key component of the blood system in most countries with a well-developed blood transfusion service. It may be required at a number of stages in the blood donation process or following blood screening and should be available at any point at which the BTS has an interface with donors. In many countries, however, blood donor counseling is not yet available in a structured way. Blood Donor Counselling: Implementation Guidelines has therefore been developed to provide guidance to blood transfusion services that have not yet established donor counseling programs.
