This volume offers 17 essays on the apocryphal/deuterocanonical books of Ben Sira (Ecclesiasticus) and Tobit. Four essays explore Tobit's connections with Genesis (Irene Nowell), Job (Anathea Porter-Young), Psalms (Stephen Ryan), and the New Testament (Vincent Skemp), with a fifth considering the medieval Hebrew and Aramaic Tobit texts (Loren Stuckenbruck and Stuart Weeks). Five further essays examine Ben Sira's links with Genesis (Maurice Gilbert), Exodus (Friedrich Reiterer), Kings (Pancratius Beentjes), Prophets (Leo Perdue), and Proverbs (Jeremy Corley). Seven more essays on Ben Sira refer to the patriarch Joseph (Robert Hayward), Ezra (Michael Duggan), fear of God (Renate Egger-Wenzel), Qoheleth (Edward Owens), First Enoch (Benjamin Wright), Letter of James (Núria Caldach-Benages), and Matthew's Gospel (James Aitken).

SAT Total Prep 2022

As men and women throughout England were called up for war work during World War II, the country needed to generate as much food and wealth as possible to support them. Children quickly came to be seen as a vital resource. Many children worked the land, planting and harvesting crops, raising money for the war effort, and carrying out a range of other tasks. That war work followed on debates throughout the preceding decades about the character and proper activities of childhood, debates that saw commentators in education and workers' organizations arguing about whether children should stay in school and learn or should combine their education with war-related work. The work of children during the war raised a question that still has relevance today: Should children be conceptualized as citizens of the future or as participating citizens now? That debate has led to even larger questions about the social construction of childhood. As children have increasingly withdrawn from paid and unpaid work, their contribution today can best be understood through their work at school, though that work is often disguised or devalued as mere socialization. The interwar years and the war years in England were a key time for re-thinking childhood, and the issues that were raised then still have relevance to the role of children in society today.

The Mirror

Now in its third edition, this classic text remains the seminal resource for in-depth information about major concepts and principles of the cultural-historical theory developed by Lev Vygotsky, his students, and colleagues, as well as three generations of neo-Vygotskian scholars in Russia and the West. Featuring two new chapters on brain development and scaffolding in the zone of proximal development, as well as additional content on technology, dual language learners, and students with disabilities, this new edition provides the latest research evidence supporting the basics of the cultural-historical approach alongside Vygotskian-based practical implications. With concrete explanations and strategies on how to scaffold young children's learning and development, this book is essential reading for students of early childhood theory and development.

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

Japan is rightly regarded as one of the most technologically advanced countries in the world, yet the development and deployment of Internet technology in Japan has taken a different trajectory compared with Western nations. This is the first book to look at the specific dynamics of Japanese Internet use. It examines the crucial questions: * how the Japanese are using the Internet: from the prevalence of access via portable devices, to the fashion culture of mobile phones * how Japan's "cute culture" has colonized cyberspace * the role of the Internet in different musical subcultures * how different men's and women's groups have embraced technology to highlight problems of harassment and bullying * the social, cultural and political impacts of the Internet on Japanese society * how marginalized groups in Japanese society - gay men, those living with AIDS, members of new religious groups and Japan's hereditary sub-caste, the Burakumin - are challenging the mainstream by using the Internet. Examined from a variety of interdisciplinary perspectives, using a broad range of case-studies, this is an exciting and genuinely cutting-edge book which breaks new ground in Japanese studies and will be of value to anyone interested in Japanese culture, the Internet and cyberculture.

The History of Education in Ghana

This textbook looks at the relationship between views of learning, learners, knowledge and pedagogy. Worldwide, education is being subjected to a succession of policy initiatives and political interventions. Questions of what should be taught, and how, are subjects of constant debate, seldom based on research findings or theoretical principles. The articles in this volume have been chosen to show how theories can provide frameworks for analysing pedagogy and to create a dialogue about new possibilities for advancing practice. Learners and Pedagogy is a Course Reader for The Open University course E836 Learning Curriculum and Assessment.

Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

Tools of the Mind

Abstract: Studies have shown that learning outcomes are related to the amount of time students engage in learning tasks. However, visits to schools have revealed that students are often taught for only a fraction of the intended time, particularly in lower-income countries. Losses are due to informal school closures, teacher absenteeism, delays, early departures, and sub-optimal use of time in the classroom. A study was undertaken to develop an efficient methodology for measuring instructional time loss. Thus, instructional time use was measured in sampled schools in Tunisia, Morocco, Ghana, and the Brazilian state of Pernambuco. The percentage of time that students were engaged in learning vis-à-vis government expectations was approximately 39 percent in Ghana, 63 percent in Pernambuco, 71 percent in Morocco, and 78 percent in Tunisia. Instructional time use is a mediator variable that is challenging to measure, so it often escapes scrutiny. Research suggests that merely financing the ingredients of instruction is not enough to produce learning outcomes; students must also get sufficient time to process the information. The quantity-quality tradeoff that often accompanies large-scale enrollments may be partly due to instructional time restrictions. Time wastage also distorts budgetary outlays and teacher salary rates. To achieve the Millennium Development Goals students must get more of the time that governments, donors, and parents pay for.
