

chapter 4 economic dispatch and unit commitment

[#economic dispatch](#) [#unit commitment](#) [#power system optimization](#) [#energy management systems](#) [#generation scheduling](#)

Explore the fundamental principles of economic dispatch and unit commitment, crucial processes in power system optimization. This section delves into how power generation is efficiently allocated to meet demand at minimum cost (economic dispatch) and the strategic scheduling of power generation units (unit commitment) to ensure reliable and cost-effective energy management.
