What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.

The eagerly anticipated updated resource on one of the most important areas of research and development: multi-agent systems Multi-agent systems allow many intelligent agents to interact with each other, and this field of study has advanced at a rapid pace since the publication of the first edition of this book, which was nearly a decade ago. With this exciting new edition, the coverage of multi-agents is completely updated to include several areas that have come to prominence in the last several years, including auctions, computational social choice, and markov decision processes. In turn, a variety of topics that were initially considered critical have dwindled in importance, so the coverage of that subject matter is decreased with this new edition. The result of this redefined balance of coverage is a timely and essential resource on a popular topic. Introduces you to the concept of agents and multi-agent systems and the main applications for which they are appropriate Discusses the main issues surrounding the design of intelligent agents and a multi-agent society Delves into a number of typical applications for agent technology Addresses deductive reasoning agents, practical reasoning agents, reactive and hybrid agents, and more Reviews multi-agent decision making, communication and cooperation, and intelligent autonomous agents By the end of the book, you will have a firm grasp on how agents are distinct from other software paradigms and understand the characteristics of applications that lend themselves to agent-oriented software.

From Wall Street Journal bestseller Parker S. Huntington comes a broken love story laced with angst and forbidden romance. I wasn't supposed to be on that roof on Valentine's Day. Neither was Kellan Marchetti, the school's designated freak. We met on the verge of ending our lives. Somehow, the tattered strings of our tragedies tangled and tightened into an unlikely bond. We decided not to take the plunge and agreed to check on each other every Valentine's Day until school ended. Same time. One roof. Two restless souls. We kept our promise for three years. On the fourth, Kellan made a decision, and I was left to deal with the consequences. Just when I thought our story ended, another one began. They say all love stories look the same and taste different. Mine was venomous, disgraceful, and written in scarlet scars. My name is Charlotte Richards, but you can call me Venom.

FRCR Physics Notes

This book is open access under a CC BY 4.0 license. This volume describes and explains the educational method of Case-Based Clinical Reasoning (CBCR) used successfully in medical schools to prepare students to think like doctors before they enter the clinical arena and become engaged in patient care. Although this approach poses the paradoxical problem of a lack of clinical experience that is so essential for building proficiency in clinical reasoning, CBCR is built on the premise that solving clinical problems involves the ability to reason about disease processes. This requires knowledge of anatomy and the working and pathology of organ systems, as well as the ability to regard patient problems as patterns and compare them with instances of illness scripts of patients the clinician has seen in the past and stored in memory. CBCR stimulates the development of early, rudimentary illness scripts through elaboration and systematic discussion of the courses of action from the initial presentation of the patient to the final steps of clinical management. The book combines general backgrounds of clinical reasoning education and assessment with a detailed elaboration of the CBCR method for application in any medical curriculum, either as a mandatory or as an elective course. It consists of three parts: a general introduction to clinical reasoning education, application of the CBCR method, and cases that can be used by educators to try out this method.

She doesn't miss a beat in either the characterization or action, scattering clues with a delicate, precise hand. This is, in the end, the story of the anatomy of the human heart." - Booklist (starred review) Dana

Schwartz's Anatomy: A Love Story is a gothic tale full of mystery and romance. Hazel Sinnett is a lady who wants to be a surgeon more than she wants to marry. Jack Currer is a resurrection man who's just trying to survive in a city where it's too easy to die. When the two of them have a chance encounter outside the Edinburgh Anatomist's Society, Hazel thinks nothing of it at first. But after she gets kicked out of renowned surgeon Dr. Beecham's lectures for being the wrong gender, she realizes that her new acquaintance might be more helpful than she first thought. Because Hazel has made a deal with Dr. Beecham: if she can pass the medical examination on her own, Beecham will allow her to continue her medical career. Without official lessons, though, Hazel will need more than just her books—she'll need corpses to study. Lucky that she's made the acquaintance of someone who digs them up for a living. But Jack has his own problems: strange men have been seen skulking around cemeteries, his friends are disappearing off the streets, and the dreaded Roman Fever, which wiped out thousands a few years ago, is back with a vengeance. Nobody important cares—until Hazel. Now, Hazel and Jack must work together to uncover the secrets buried not just in unmarked graves, but in the very heart of Edinburgh society.

Transfusion Medicine, Apheresis, and Hemostasis: Review Questions and Case Studies is the collaborative effort that spanned a time period of 2 years and included 50 experts, many whom are national leaders in their respected fields. It also represents the passion and privilege we feel to teach the next generation of physicians in Transfusion Medicine and Apheresis. The main goal for this book is to help the readers build a solid foundation of both basic and advanced conceptual knowledge to prepare for the American Board of Pathology (ABP) certification exam in Transfusion Medicine. This book is not intended to be a substitute for textbooks, original research or review articles, and/or clinical training. Further, since the field of medicine, both from a scientific and regulatory perspective, rapidly changes, the readers are advised to continuously update their knowledge by attending national meetings and reading clinical journals. To equip the readers with the basic knowledge in critical reading and data analysis, which is an essential skill in daily medical practice, a novel chapter titled "Data Interpretation in Laboratory Medicine" was included in this book. In this chapter, the readers are asked to make logical conclusions based on the given data and/or statistical results. Moreover, there is also a chapter on "Practical Calculations in Transfusion Medicine, Apheresis, and Hemostasis" to help consolidate all the necessary formulas commonly used in daily practice for easy reference. These chapters are unique to our book and will not be found in any other currently on the market. All of the questions in this book were originally created by the authors of each chapter. Each question can either be standalone or part of a case scenario representing challenge cases in Transfusion Medicine, Apheresis, and Hemostasis. These questions often represent both rare and common clinical scenarios that the authors have seen during their clinical practice. Each question is then followed by 5 possible answers, with only one being correct (or the best answer). After the question, there is a conceptual explanation followed by a more factual explanation of the right and wrong answers. We gave the individual authors the freedom to choose how they explained the wrong answer choices. Some authors chose to be more direct (e.g. Answer A is incorrect because...), while other authors chose a more conversational style (e.g. Human resources (answer A) includes staffing, selection, orientation, training, and competency assessment of employees). This format is designed to help the student linking the conceptual and factual knowledge together to form a solid foundation for use in clinical practice. At the end of each chapter, there is a list of articles and textbooks that will prove useful to the motivated student who wishes to become an expert in the field. Another special feature to our textbook is the presence of a pre-test and post-test, which are provided to help the readers with self-assessment. As stated above, the main focus of this book is to help the readers preparing for the ABP certification exam in Transfusion Medicine. However, due to the interdisciplinary nature of the field of Transfusion Medicine, Apheresis, and Hemostasis, we believe that this book is also beneficial to and can be used by all clinicians involved in the management

of complex transfusion, apheresis, and hemostasis issues, such as hematologists, anesthesiologists, surgeons, and critical care physicians. We further believe that it is a helpful guide for these specialists to prepare for their own specialty certification exam, when the topics are related to Transfusion Medicine, Apheresis, and Hemostasis.

The Instant New York Times Bestseller and TikTok Sensation! As seen on THE VIEW! A BuzzFeed Best Summer Read of 2021 When a fake relationship between scientists meets the irresistible force of attraction, it throws one woman's carefully calculated theories on love into chaos. As a third-year Ph.D. candidate, Olive Smith doesn't believe in lasting romantic relationships--but her best friend does, and that's what got her into this situation. Convincing Anh that Olive is dating and well on her way to a happily ever after was always going to take more than hand-wavy Jedi mind tricks: Scientists require proof. So, like any self-respecting biologist, Olive panics and kisses the first man she sees. That man is none other than Adam Carlsen, a young hotshot professor--and well-known ass. Which is why Olive is positively floored when Stanford's reigning lab tyrant agrees to keep her charade a secret and be her fake boyfriend. But when a big science conference goes haywire, putting Olive's career on the Bunsen burner, Adam surprises her again with his unyielding support and even more unyielding...six-pack abs. Suddenly their little experiment feels dangerously close to combustion. And Olive discovers that the only thing more complicated than a hypothesis on love is putting her own heart under the microscope.

From the era-defining author of Generation X comes a novel of overworked coders who escape the serfdom of Bill Gates to forge their own path. They are Microserfs—six code-crunching computer whizzes who spend upward of sixteen hours a day “coding” and eating “flat” foods (food which, like Kraft singles, can be passed underneath closed doors) as they fearfully scan company e-mail to learn whether the great Bill is going to “flame” one of them. But now there’s a chance to become innovators instead of cogs in the gargantuan Microsoft machine. The intrepid Microserfs are striking out on their own—living together in a shared digital flophouse as they desperately try to cultivate well-rounded lives and find love amid the dislocated, subhuman whir and buzz of their computer-driven world.

F stands for "funny" in this perfect gift for students or anyone who has ever had to struggle through a test and needs a good laugh. Celebrating the creative side of failure in a way we can all relate to, F in Exams gathers the most hilarious and inventive test answers provided by students who, faced with a question they have no hope of getting right, decide to have a little fun instead. Whether in science (Q: What is the highest frequency noise that a human can register? A: Mariah Carey), the humanities (Q: What did Mahatma Gandhi and Genghis Khan have in common? A: Unusual names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

This lively selection brings together journalist and broadcaster Libby Purves' experiences as journalist, parent, governor and former pupil of half a dozen assorted schools from Bangkok to Tunbridge Wells, displaying her eclectic and provocative opinions and ideas on teaching and learning. This collection of the best of her writing in the Times Educational Supplement covers - sometimes thoughtfully, sometimes mockingly - everything from national policy to the eccentricities of headteachers and the limitations of IT. Education professionals over the years have received her outsider view with enthusiasm, laughter, inspiration and occasional fury. From ministerial madness to the pitfalls of uniform and the vagaries of teenagers, this book is dedicated to the amusement of a cadre of professionals Libby once planned to join, until she lost her nerve. It is dedicated, with thanks and admiration, to all teachers.

A Little Learning

Matthew Burgess is one of the directors and founders of specialist firm View Legal. Having the opportunity to help all those he has interaction with achieve their dreams is what he is passionate about. As an author Matthew is published across a range of topics including:1. Technical legal books - see www.viewlegal.com.au/product-category/books/2. Children's books, under the pseudonym 'Lily Burgess' - see www.wordsfromdaddysmouth.com.au3. Business book - The Dream Enabler - see www.thedreamenabler.com.auFor many years Matthew has collected virtually every accountant joke shared with him. This book - '101 Accountant Jokes' - gives the collection a public release for the first time. Two warnings however. First - Matthew has an accounting degree; however realised he must have been a lawyer when he narrowly avoided failing his final accounting exams. Second - if you have previously read Matthew's publication '101 Lawyer Jokes' you may be bitterly disappointed if you were thinking that any of the jokes in '101 Accountant Jokes' would be something other than globally replacing 'lawyer' with 'accountant'.

Best Ever 101 Accountant Jokes

Amy and Matt are bored. They don't want to study for their exams. They want to have a good time. So they drive to the marina at West Palm Beach, and Matt jumps into one of the boats. "We can go anywhere!" he jokes. But when the owners of the boat come back and find them, Amy and Matt are in deep trouble. Matt is a good swimmer and enjoys scuba-driving, but now he must dive for their lives.

Deep Trouble

Many people can't remember jokes, punch lines, or the point behind them. This tremendous collection of jokes (one for every day of the year and then some...) is different, because these are the shortest jokes ever written. Deep in meaning and touching on all subjects of life, they jab at everyone in every modern situation. Fun can be fleeting, and being able to tell a quick joke about any subject shows intelligence, wit, and thought. In our busy day, we don't have the time for long, complicated jokes with even longer punchlines, so celebrated humanitarian, chef, and Academy Award-winning author, Buster Gutt has compiled over 300 jokes, designed to brighten our busy lives. This book will tickle everyone who is looking to impress their friend with a quick, short joke. Q: What do you call a Jamaican proctologist? A: A Pokemon. Q: What is a lymph? A: It's walking with a lisp. Q: What do you call a funny exam question? A: A testicle. Q: Why did the chicken cross the road? A: To get to... You get it--They're short jokes. Humor is a sign of intelligence, superior wealth, and is often paired in the same sentence with sexual prowess and resistance to male pattern baldness. Don't let readers make the biggest mistake of their lives and miss out on the funniest, most gut-busting book of the season. We could all use a little laughter in our life!

The World's Shortest Jokes

There's nothing that Fred likes better than to stroll around the local graveyard. For Fred isn't your normal type of kid—he just loves all things ghoulish and ghostly, even if it means getting grief from Barry the Bully at school. But one day while mooching around the cemetery he suddenly slips down a hole and enters a whole different world—the world of ghosts! To be accepted, he must pretend to be dead (of course) and he finds himself taking the entrance exams to Ghost School. Fred succeeds and has a whale of a time, for he can now practise his spooking as much as he likes, and he meets lots of hilarious characters. When his cover is finally blown and he returns to his own world, his new friends are very useful for giving old Barry the creeps . . . Full of variety and humour with an appealing design to draw the reader in, this book is great for dipping into or reading from start to finish. There are many different types of poems and plenty of jokes and riddles to make this collection a useful resource for teachers as well as highly appealing to children.

Narrative inquiry examines human lives through the lens of a narrative, honoring lived experience as a source of important knowledge and understanding. In this concise volume, D. Jean Clandinin, one of the pioneers in using narrative as research, updates her classic formulation on narrative inquiry (with F. Michael Connelly), clarifying, extending and refining the method based on an additional decade of work. A valuable feature is the inclusion of several exemplary cases with the author's critique and analysis of the work. The rise of interest in narrative inquiry in recent years makes this an essential guide for researchers and an excellent text for graduate courses in qualitative inquiry.

This book examines translanguaging pedagogy in Asia's English-medium instruction (EMI) higher education. It presents an overview of concepts and common issues, and case studies from specific contexts in Asia. The book first interrogates macro-level English-medium instruction policies and implementation from English as a lingua franca (ELF) perspectives. Following this, implications of English as a lingua franca on English-medium instruction pedagogy will be explored, with a theoretical framework of 'translanguaging pedagogy' developed. The book concludes with a discussion on

translanguaging and how the concept contributes to English-medium instruction in Asia. Through the book, the content focuses on the specificity of each Asian English-medium instruction context from a translanguaging lens. English-medium instruction policies and translingual practices from China, Japan, Taiwan, Thailand, and Vietnam are explored, and opportunities and challenges related to translanguaging pedagogy in Asian English-medium instruction classrooms are examined.

Offering a social scientific look at humor's role in medical transactions, this volume is based on extensive field study in seven medical settings. It includes excerpts from dozens of actual conversations between patients and caregivers. Analysis of these episodes reveals that humor is a practical tool used to meet many medical objectives. It is used by patients to good-naturedly complain and to campaign for more personal attention, and by caregivers to get attention, make amends, insist on unpleasant routines, and establish rapport. Examining humor from many angles, the book begins with a phenomenological analysis of the essence of funny. This section describes what makes some things funny but not others, and how to distinguish between potentially funny and unfunny episodes in medical situations. From an ethnographic perspective, joking around is shown to be a persuasive element of medical culture. Examples illustrate how patients and caregivers use humor to negotiate the dialectics between helping and hurting, and individuality and compliance. Additionally, a close-up look at three medical transactions shows how humor is used to help a physical therapy patient overcome fear and queasiness, reduce the embarrassment of a mammography, and defuse a potential conflict between a student aide and a young patient. A final section examines techniques for initiating conversational humor. In sum, this volume provides an intimate and realistic look at medical conversations as they are conducted every day. It serves as a valuable complement to health communication texts and offers information of interest to health communication scholars, healthcare practitioners, and anyone interested in the effects and techniques of conversational humor. Richly grounded in naturally occurring data, the book can be understood and used effectively by both scholars and practitioners.

Humor and the Healing Arts

Even during the late 1960s, academia remained largely the province of men. That began to change at the University of California at Berkeley in 1969, when Marsha Hudson posted notices across campus proposing a feminist literary salon. The purpose was to discuss women's literature: a few female writers received passing notice in the classroom, but the multitude was either ignored or forgotten. The informal gatherings continued for years, growing into an activist movement that established the first Women's Studies major at Berkeley; helped produce the first major anthologies of women's poetry; and fought for equality and recognition in every corner of the education system. They risked their academic futures in the process, but the efforts of those women and others helped change the face and shape of higher learning forever. These 16 essays were written by members of Marsha's Salon and its successors, the Comparative Literature Women's Caucus, a group of female graduate students at UC-Berkeley organized in 1969 by Marsha Hudson. The group met for years, and helped lead the charge to bring sexual equality to all facets of education. These annotated essays recount the atmosphere of the time that made change necessary, the upheaval brought about by the feminist revolution in education, the direction that the movement took, and the current state of feminist learning in academia. An appendix features period letters and documents from group members (regarding the need for changes at Berkeley) as well as statistical information about women's studies and related subjects.

The Berkeley Literary Women's Revolution

We all value freedom, family, friends, work, education, health, and leisure—"the best things in life." But the pressure we experience to chase the dollar in order to satisfy both the demands of the bottom line and the demands of our seemingly insatiable desire to consume are eroding these best things in life. Our children now value profit centers, not sports heroes. Our educational system is fast becoming nothing more than a financial investment where students are encouraged to expend more energy on making the grade than on learning about their world. Our business leaders are turning young idealists into cynics when they cut corners and explain that "everybody's doing it." The need to achieve in our careers intrudes so greatly on our personal world that we find ourselves weighing the "costs" of enjoying friendships rather than working. In this book, psychologist Barry Schwartz unravels how market freedom has insidiously expanded its reach into domains where it does not belong. He shows how this trend developed from a misguided application of the American value of individuality and self-pursuit, and how it was aided by our turning away from the basic social institutions that once offered traditional community values. These developments have left us within an overall framework for living where worth is measured entirely by usefulness in the marketplace. The more we allow market considerations to guide our lives, the more we will continue to incur the real costs of living, among them disappointment and loneliness. Laughter is often no laughing matter, and, as such, it deserves continued scholarly attention as a social, cultural and historical phenomenon. This collection of essays is a meeting ground for scholars from several disciplines, including historians, philologists, and scholars of social sciences, to discuss places and roles of laughter in history, in historical narratives, and in cultural anthropology from prehistory to the present. The common foci of the papers gathered in this volume are to examine laughter and its meanings, to reflect on the place of laughter in Western history and literature, to disclose laughter's manipulative potential in historical and literary narratives, to see it in the light of the concepts of carnivalesque and playfulness, to see it as a reflection of hysterical historicizing, to see its place in comedy, farce, grotesque and irony, and to see it against its broadly understood theoretical, philosophical and psychological aspects. The book will appeal chiefly to an academic readership, including students, historians, literary and cultural scholars, sociologists, and cultural anthropologists.

The Super Duper Joke Book (Volume 1)

Some American children do not realize how blessed they are to have so many educational choices. There are more than 3,000 universities and colleges in the United States offering every subject from Architecture to Zoology. An average American student needs only the will to study and the zeal to accomplish and the sky is the limit. Some students do not explore the educational opportunities presented to them. They let the pressures of educational demands overwhelm them and many drop out of school for personal reasons. For many foreign students like me, the choices are limited and the road to success ranges from slim to none. The obstacles are many and strenuous and they include; financial problems, home sickness, culture shock, weather adjustment, Immigration Department concerns, loneliness and the list goes on. In the mist of these problems quitting is not an option. There are two goals, the will to survive and succeed because this opportunity may not be available again. My story is based on the "will" to survive and accomplish a dream. How did I survive? Find out when you read, All I wanted was an Education; the Epic of a foreign Student.

Drawing on ethnographic fieldwork in Belarus, an example of an authoritarian state, *Humor and Rumor in the Post-Soviet Authoritarian State* presents over one hundred contemporary political jokes in the contexts of their performance. Throughout, Anastasiya Astapova demonstrates the salience of the joke genre, the multiplicity of humor manifestations, and the fundamental presence of intertextual links between jokes and another folk genre—rumor. Informed by real-life fieldwork in an authoritarian regime, *Humor and Rumor in the Post-Soviet Authoritarian State* challenges many common theories of political humor, including the interpretation of political jokes as weapons of the weak. It illustrates how jokes and rumors remind communities of their fears, support paranoia, shape conformist behavior, and,

consequently, reinforce the existing hegemony. In this rare study on everyday life in and reactions to repressive regimes, Astapova unveils political humor as it is lived.

Just Around the Bend is a look beneath the fanciful images of America to the brutal betrayal of Americans by the courts, the mental health system, schools, insurance companies, banks, and even the churches. From my father's trial for murder for defending his sister against spousal abuse, to my own law practice, my life is the story of constant struggle to reach a peace that my mother once said was "just around the bend." That long bend up the mountain has run from Pennsylvania where I was born, to Nevada, and then to California. The journey challenges every reader's expectations.
