Die kürzeste Geschichte Deutschlands

Auf 250 Seiten einmal durch 2000 Jahre deutscher Geschichte: Überzeugend und souverän führt James Hawes von den alten Römern bis in die Gegenwart. Eine große Tour durch die Jahrhunderte, die in einer leidenschaftlichen Hommage an die Bundesrepublik endet. Der Sieg gegen die Römer im Teutoburger Wald, die barbarische Grausamkeit des Dreißigjährigen Kriegs, der Aufstieg des militaristischen Preußens im 18. Jahrhundert — wie Blitzlichter scheinen diese historischen Ereignisse in James Hawes' fulminantem Parforceritt durch die deutsche Geschichte auf. Die alles beherrschende Frage, die sich wie ein roter Faden durch die Seiten zieht: Gehört das Herzstück Europas zum Westen oder zum Osten? Für Hawes ist klar, dass dieses Land zum Westen zählt. Die Bundesrepublik, so wie wir sie kennen, sieht er in der Tradition des wahren, historischen Deutschlands, dem Staatshörigkeit, puritanischer Eifer und narben gesichtiger Militarismus stets fremd waren. Hawes ist sich sicher: Deutschland ist heute »Europas größte Hoffnung«.

Anthropology and Myth

The published work of Claude Levi-Strauss over the last three and a half decades has established him as one of the world's most innovative anthropologists. Yet throughout this period he was maintaining a full teaching commitment in Paris. The pieces in Anthropology and Myth illustrate (in his own words) the efforts, the tentative advances and retreats and now and again the achievements of a thought process during some thirty-two years that amount to a large proportion of an individual life and the span of a generation. Levi-Strauss used to the lecture theatre as a workshop in which to try out and develop new ideas, and many of the familiar themes of his books will be found here: analysis of myth and ritual, totemism, kinship, marriage and social structure. Offering a unique glimpse of the genesis of such subjects throughout his teaching career, this book provides a sketchbook of the themes painted elsewhere in larger, more finished form, and thus forms a document of vital importance for the history of anthropological thought.

Numerical Methods for Constrained Optimization

The General Factor of Personality improves our understanding of the personality structure and the relations between major personality dimensions, as well as major dimensions of the entire non-cognitive sphere of psychological variables. The results of the empirical testing and theoretical evaluations in this book contribute to the more comprehensive and precise theoretical framework of the General Factor of Personality (GFP) and that of the entire personality structure. Additionally, the book answers some unresolved questions concerning the nature of the GFP, including whether it is based more on correlations in real behavior or on other less substantial factors between lower-order dimensions of personality. This book is crucially important not only for theoretical reasons, but also for the tremendous practical and applied value of the assumed general dimension of personality. As a common denominator of all the most important fields of personality beyond cognition (Big Five, well-being, coping, emotionality, motivation, self-concept, self-esteem, control, wisdom and others), the GFP represents an extremely strong single predictor of the quality of life, mental health and well-being, career, academic success, and the quality of family and interpersonal relations. Reviews the theoretical and methodological work on the General Factor of Personality (GFP) Presents major research results in the field of GFP and the dimensional structure of personality Provides a balanced and objective approach to the topic of GFP, addressing criticisms and controversies Considers the practical and applied aspects of this research Draws conclusions on the bioevolutionary model of GFP to give a more thorough understanding of biological bases of human personality

The General Factor of Personality

This book explores the broad view on child well-being and the quality of life research. It starts with a discussion of the origin of the social indicator movement and a review of literature on the concepts of quality of life, (subjective) well-being and resilience. It then discusses the force of culture on child development, and shows how two prototypical environments favor either the independent or interdependent self-model. After an exploration of the shifts and changes in the child well-being indicator movement and trends of child well-being measurements, the book turns to research on Tsunami-affected children. The first part of the study gives these children and their caregivers a voice, formulating in their words what constitutes child well-being for them in the given circumstances. The concepts provided are processed in detail, contrasted, and then made into indicators. The second part of the study describes the introduction of a child well-being index based on these indicators. The book ends with four main conclusions reflected in a theoretical model of contextualized child well-being indicators.

Well-Being, Resilience and Quality of Life from Children's Perspectives

Sociology and Music Education addresses a pressing need to provide a sociological foundation for understanding music education. The music education community, academic and professional, has become increasingly aware of the need to locate the issues facing music educators within a broader sociological context. This is required both as a means to deeper understanding of the issues themselves and as a means to raising professional consciousness of the macro issues of power and politics by which education is often constrained. The book outlines some introductory concepts in sociology and music education and then draws together seminal theoretical insights with examples from practice with innovative applications of sociological theory to the field of music education. The book concludes with an Afterword by Christopher Small.

Handbook of Cross-cultural Psychology

This volume is a unique contribution to the exploration of a new perspective in the study of well-being, which tries to overcome the quantification bias by creating an account of 'the good life' in a specific place. Rather than numbers, this research focuses on local narratives, emphasising the urgent need to include a wider range of methodological approaches when engaging with well-being. The volume demonstrates through the Bolivian case study the value of qualitative research for well-being studies. It shows the potential to integrate predominant quantitative data with qualitative outcomes, such as those emerging through ethnography. It is aimed at academics, researchers and students in well-being/quality of life studies, as well as audiences in the non-profit, governmental and policy in the non-profit, governmental and policy sectors. The book provides new perspectives in achieving better indicators of well-being and quality-of-life.

Sociology and Music Education

This classic work is now reissued with an additional 16-page colour section showing much pre- and post-war equipment arranged in working layouts.

An Anthropological Journey into Well-Being

In the intervening years since this book was published in 1981, the field of optimization has been exceptionally lively. This fertility has involved not only progress in theory, but also faster numerical algorithms and extensions into unexpected or previously unknown areas such as semidefinite programming. Despite these changes, many of the important principles and much of the intuition can be found in this Classics version of Practical Optimization. This book provides model algorithms and pseudocode, useful tools for users who prefer to write their own code as well as for those who want to understand externally provided code. It presents algorithms in a step-by-step format, revealing the overall structure of the underlying procedures and thereby allowing a high-level perspective on the fundamental differences. And it contains a wealth of techniques and strategies that are well suited for optimization in the twenty-first century, and particularly in the now-flourishing fields of data science, "big data," and machine learning. Practical Optimization is appropriate for advanced undergraduates, graduate students, and researchers interested in methods for solving optimization problems.

Neues Archiv der Gesellschaft für Ältere deutsche Geschichtskunde zur Beförderung einer Gesamtausgabe der Quellschriften Deutscher Geschichten des Mittelalters

A detailed illustrated history of the locomotives of the Great Northern Railway. This book should be useful to all devotees of the GNRI, which operated the main line between Belfast and Dublin and a large number of secondary routes. It is illustrated with photographs throughout and covers the history of some 500 locomotives of about 120 types, including those of the companies, which amalgamated to form the GNRI in 1876.

Deutsche Geschichte

Published in English for the first time, Refugee Conversations is a delightful work that reveals Brecht as a master of comic satire. Written swiftly in the opening years of the Second World War, the dialogues have an urgent contemporary relevance to a Europe once again witnessing populations on the move. The premise is simple: two refugees from Nazi Germany meet in a railway cafe and discuss the current state of the world. They are a bourgeois Jewish physicist and a left-leaning worker. Their world views, their voices and their social experience clash horribly, but they find they have unexpected common ground – especially in their more recent experience of the surreal twists and turns of life in exile, the bureaucracy, and the pathetic failings of the societies that are their unwilling hosts. Their conversations are light and swift moving, the subjects under discussion extremely various: beer, cigars, the Germans' love of order, their education and experience of life, art, pornography, politics, 'great men', morality, seriousness, Switzerland, America ... despite the circumstances of both characters there is a wonderfully whimsical serendipity about their dialogue, the logic and the connections often delightfully absurd. This edition features a full introduction and notes by Professor Tom Kuhn (St Hugh's College, University of Oxford, UK).

Hornby Dublo Trains

* The reprinting of this important book will fill a gap in available publications on locomotive construction, which has existed for many years.

Friedrich Creuzer's Deutsche Schriften, neue und verbesserte: Zur Geschichte der griechischen und römischen Literatur

In lucid terms, & with the aid of some diagrams, this book provides an admirable & practical guide to the basic principles of steam locomotive construction & operation. It will fascinate & enlighten all enthusiasts of the steam locomotive.

Practical Optimization

Populäre Eisenbahnliteratur.

The Isle of Wight Railway

Originally published in 1919, this book presents a guide to advanced Latin syntax. The text was written in 'an attempt to deal in a short compass with late and exceptional idioms of Latin, and to bring them into harmony with the principles of the language'. Indexes of subjects, words and authors quoted are included at the end. This book will be of value to anyone with an interest in Latin and the history of education.

Germania

Head research and development chemist Jamal Ford has narrowed his love-life down to a science through the creation of his 30-Day Dating Plan, a guide intended to weed out the drama queens, gold-diggers, and baby mamas from his ideal: a part goddess, part sex kitten, and part Stepford Wife mate. The shallow, fun-loving 33-year-old knows he's one of Charlotte, North Carolina's most eligible bachelors, and he won't settle for anything less than the trophy wife of his dreams. Catherine "Catt" Cason has never let scheming co-workers, her loving (but overbearing) father, or her full figure slow her down. The brilliant formulating chemist takes being labeled "the cute fat girl" in stride as she fast-tracks her way to a top position with her cosmetic company, Telegenic. While she would enjoy the love of a good man, Catt refuses to risk her career or her heart being broken again just to have a warm body at her side. Besides, why settle for the love of an earthly man when she is the fiancée of Christ? When Jamal is paired with Catt to launch a new product for work, it's loathe at first sight. She thinks he's arrogant and incompetent. He thinks she's a sanctimonious kill-joy. What each believes they want may not be what God knows they need. In this game of love, rules don't exist, and no heart is safe. The Lord is speaking, but will they all be too caught up in their own agendas to listen?

Vulcan Locomotives

This Open University text, part of the 'Mapping Social Psychology' series examines the processes involved when a group of people make a decision, or take action together.

Locomotives of the Gnri

Bertolt Brecht's Refugee Conversations

The man who lives in God is never out of season. It is a disaster as a Christian to be alone and spiritual crime to claim you can do all things beside God. To be alone is not a good option to life. This day, things are falling apart, the centre could not hold. In the journey, we will encounter obstacles and challenges. At times, these challenges are the creations of the devil to slow down our success. We have common enemy who seeks to keep and hold us in bondage. He is Satan. He is against our freedom and growth. If we are to succeed, we must be aware of his antics and have courage for freedom. Without Christ we are in crisis. It is a plus to be in Christ, and majority to be in him. To be in Christ is non-negotiable. He is the gate way that leads to success. With Christ: Weakness Fear Hopelessness dies while Strength Power and courage are born. The Christian is strong or weak depending upon how closely he has cultivated the knowledge of God. The nearer we come to God, the more graciously he reveals himself to us. You can't be alone. No physician like the Lord, no tonic like his promise, no wine like his love. Find out more in this book. I say good luck. A collection of speculative tales set in and around the beautiful Canary Island of Tenerife

British Steam Locomotive Builders

Collection of quotes by Generation Y (Millennials) interviewed in New York City.

Handbook for Railway Steam Locomotive Enginemen

Originally written to romantically empathize and recognize the Godliness in my wife, this became a controversial collection of poems challenging citizens to contemplate on Christ or carnality within their emotional infrastructure. It would be extremely selfish for my wife to face such an emotional challenge alone.

The Railroad, what it Is, what it Does

When readers jot down notes in their books, they reveal something of themselves—what they believe, what amuses or annoys them, what they have read before. But a close examination of marginalia also discloses diverse and fascinating details about the time in which they are written. This book explores reading practices in the Romantic Age through an analysis of some 2,000 books annotated by British readers between 1790 and 1830. This period experienced a great increase in readership and a boom in publishing. H. J. Jackson shows how readers used their books for work, for socializing, and for leaving messages to posterity. She draws on the annotations of Blake, Coleridge, Keats, and other celebrities as well as those of little known and unknown writers to discover how people were reading and what this can tell us about literature, social history, and the history of the book.

The Railroad

The study of linguistics has been forever changed by the advent of the computer. Not only does the machine permit the processing of enormous quantities of text thereby securing a better empirical foundation for conclusions-but also, since it is a modelling device, the machine allows the implementation of theories of grammar and other kinds of language processing. Models can have very unexpected properties both good and bad-and it is only through extensive tests that the value of a model can be properly assessed. The computer revolution has been going on for many years, and its importance for linguistics was recognized early on, but the more recent spread of personal workstations has made it a reality that can no longer be ignored by anyone in the subject. The present essay, in particular, could never have been written without the aid of the computer. I know personally from conversations and consultations with the author over many months how the book has changed. If he did not have at his command a powerful typesetting program, he would not have been able to see how his writing looked and exactly how it had to be revised and amplified. Even more significant for the evolution of the linguistic theory is the easy testing of examples made possible by the implementation of the parser

and the computer-held lexicon. Indeed, the rule set and lexicon grew substantially after the successes of the early implementations created the desire to incorporate more linguistic phenomena.

An Advanced Latin Syntax

New Year's Eve, London, 1979... The sour taste in my mouth is all that is left of 1979. I had seen out the night, the year and the decade in a blaze of luminous cocktails that were still throbbing somewhere at the back of my skull. I'd spent the night in a fashionable London nightclub. Someone had fainted. At least, that's what I assumed. But now the phone rings. I answer it. A friend's voice screams at me: "He's dead! And they think I killed him!" It looked like it was going to be one of those days... The hunt is on for a murderer. There is no motive and far too many suspects. But there is one deadly clue - a bottle of mascara. Find the mascara and you find the murderer! This is not just fiction. It's how the '80s really were! Huw Collingbourne knows what he is writing about, because he was there. As a music journalist in the 1980s, he interviewed stars ranging from Boy George and Duran Duran to Spandau Ballet and Depeche Mode. He knows exactly what the '80s music and club scene was really like. He was in the music studio when Depeche Mode recorded 'Just Can't Get Enough', he went surfing with Haircut 100, he interviewed Motorhead's Lemmy over a breakfast of vodka and orange, he shared fashion tips with David Sylvian of Japan and he revealed to an astonished world that Robert Smith of The Cure dresses up as his mother when he cooks curries. Huw knows the people and the places. He went to Steve Strange's Blitz Club, rubbed shoulders with Spandau Ballet at The Camden Palace and had lunch with Adam Ant at a trendy restaurant in Primrose Hill. He interviewed stars ranging from The B52s and The Weather Girls to Judas Priest and Buster Bloodvessel. He wrote for the cult magazine, 'Flexipop!' as well as 'Number 1', 'Jackie', 'Kicks' and a range of other eighties pop music mags. He was responsible for writing a Flexipop! photo-story about cannibalism, featuring psychobilly band, The Meteors, which caused the magazine to be seized by the police and banned from sale. Never mind '80s-themed TV series such as Stranger Things and Ashes To Ashes, this book is the real deal. If you want to know what the fashion-pack world of 1980s Britain was really like, look no further. The 1980s Murder Mysteries series faithfully recreates that world, with a few murders along the way. If you enjoy murder mysteries with a dash of humour, Killers In Mascara is for you. 1980s London - the music, the nightclubs, the glitz, the glamour! Whoever would have thought murder could be so much fun! "This novel is completely original. The atmosphere generated gives a feeling of actually being there and involved in the scene. I would recommend this to anyone." Chris Bostock (of the '80s band, JoBoxers)

Catt Chasin'

We first meet, Archangel Gabriel, with his personal accomplishments behind him, proclaimed the left hand and will of Yahweh, and with the love and respect of his fellow angels, he has become the most powerful angel in heaven. During his past five-thousand years of afterlife, he first believed that he had everything he could ever want, but something was missing, he needed and wanted more. Originally, a still-born, human soul, he never had a chance at life outside of heaven. But then something happened that made him desire what he had lost. It was Yahweh's encouragement and plan for him to return to Earth and live as a human, however, returning would not be that simple. Becoming the first of his kind, Gabriel would retain his angel powers, but be without the memory of his past, thusly, forced to learn how to survive his dual nature, and obligated to recall his unknown previous life; he would require the help from one of his guardian-angel allies. But it will be Yahweh who orchestrates the situation by keeping Gabriel from knowing his fate and future destiny. Many adventures befall our hero, as he navigates through childhood, adolescence, adulthood, and the difficulties with romance. When Gabriel is forced to persevere over earthly and un-earthly villains, his lessons become more profound. With the help from his heavenly company, his fated time-line will take him through progressively greater challenges. Gabriel's weapons will go beyond his charms and magical powers, which must include his knowledge, wisdom, and resolve. This illustrious legendary figure, is the nice guy who will finish first, ultimately finding personal fulfillment, and becoming more than he could ever imagine.

Group Process, Group Decision, Group Action 2/E

Unique features: criticism as a sequential process; forming an interpretation; separating interpretation from judging; critical errors; the critics ethics; criteria for judging greatness.

Simply Unique Poetry

They met and found pure love while still at school and from different Countries. When apart for a year he became involved with a new girl, but when she became pregnant just as his pure love returned both girls went away without saying. Will he find his love and coming baby.

I am not Alone Jesus is With Me

How does personality relate to conduct? In this thought-provoking book, Maurice Parmelee explores the complexities of human behavior and the role that personality plays in shaping our actions and decisions. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

TENERIFE Tall Tales

The collection of various essays written at different times and on seemingly different topics combines a single theme: the species of Homo sapiens, its development, history, and a unique experiment of biological nature, which created a fantastic phenomenon-the human race. In some chapters, we must return to the distant past of our species' origin and the emergence of different civilizations. It is done for the narrative's logical construction to avoid the impression of separately torn pieces unrelated to each other and to make it more interesting for readers. The third book of Homo Sapiens is a logical continuation of our species' history in the modern world. The world is divided by countries, religions, and ideologies. Despite the declared principles of universal equality and the obligation to defend peace and prosperity, there is still the danger of a military solution to confrontations. Modern weapons and technology could destroy peoples and even entire countries with appalling cruelty. The history of slavery runs through all stages of the development of our species. In some countries, slavery still exists. The future of our species depends on how we deal with it today. We are living on the same planet. Will our species find a path of reconciliation and forgiveness now? The biological nature of man is manifested in his behavioral motives. However, man is a social being. He cannot live outside of society. A person is born with an already-formed brain, having certain instincts embedded in the brain's limbic system. A person acquires social skills in the development process, communicating with the surrounding society. Due to climate change, relatively recently, by historical standards, about sixty to ninety thousand years ago, some scientists count as three hundred thousand years ago, the human species came out of Africa, together with other groups of animals, in search of favorable habitats. Scientists tell us there were at least twenty different types of people, but our species, Homo sapiens, survived

Millennials of New York

She's given her best years to a man that now found himself a girlfriend half her age. She went through all the processes of being betrayed: the shock, the blame, the weeping... Then Kathryn decided to stand up and step out on her own. What's good for the goose is good for the gander. Follow the chronicles of one woman who went looking for a good time and found much more than she ever imagined. Kathryn Goodnight found her true needs. And she can handle it all.
