Symbolists and Decadents

Both a sense of urgency and a goodly amount of patience are required for any writer to produce a novel. Moving between these two poles, Jean-Philippe Toussaint here collects a series of short essays on the art of writing, both his own and that of writers he's admired, for example Kafka, Beckett, Dostoyevsky, and Proust. As Toussaint himself has said, "It's only natural for writers... to say a word about how they write and what they owe to great authors."

Urgency and Patience

Part of the series Key Concepts in Indigenous Studies, this book focuses on the concepts that recur in any discussion of the society, culture and literature among indigenous peoples. This book, the fourth in a five-volume series, deals with the two key concepts of language and orality of indigenous peoples from Asia, Australia, North America and South America. With contributions from renowned scholars, activists and experts from across the globe, it looks at the intricacies of oral transmission of memory and culture, literary production and transmission, and the nature of creativity among indigenous communities. It also discusses the risk of a complete decline of the languages of indigenous peoples, as well as the attempts being made to conserve these languages. Bringing together academic insights and experiences from the ground, this unique book, with its wide coverage, will serve as a comprehensive guide for students, teachers and scholars of indigenous studies. It will be essential reading for those in social and cultural anthropology, tribal studies, sociology and social exclusion studies, politics, religion and theology, cultural studies, literary and postcolonial studies, and Third World and Global South studies, as well as activists working with indigenous communities.

Orality and Language

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The Rejection of Consequentialism

Perfect for fans of Ann Cleeves and Elly Griffiths, a gripping, atmospheric debut that transports readers to the Channel Island of Guernsey, immersing them in the hunt for a killer whose secrets are rooted in the insular community's own dark past. I'm not afraid of the darkness...Only what it hides. Finding a drowned woman's body on the beach is the last thing journalist Jennifer Dorey's fragile psyche needs. She left London for her island home of Guernsey, England, in the aftermath of a traumatic incident that shook her to her core. Now, as a local newspaper reporter, it's Jennifer's job to prove the woman's death...but she uncovers something far bigger and more sinister than she ever could have imagined. Jennifer enlists the help of DCI Michael Gilbert to investigate a pattern of similar deaths over the last fifty years. Though he's looking forward to a comfortable—and imminent—retirement, Gilbert joins the journalist on a dark trail of island myths and folklore that leads to the door of a Nazi soldier's illegitimate son. But as Jennifer gets closer to learning the killer's identity—and his painstaking plans for mayhem—she falls ever deeper into his grasp. Sinister deeds unravel in the darkness in *The Devil's Claw*, Lara Dearman's exhilarating debut novel.

A History of Japan

From ancient times to the present day, Iranian social, political, and economic life has been dramatically influenced by psychoactive agents. This book looks at the stimulants that, as put by a longtime resident of seventeenth-century Iran, Raphaël du Mans, provided Iranians with *damagh*, gave them a "kick," got them into a good mood. By tracing their historical trajectory and the role they played in early modern Iranian society (1500-1900), Rudi Matthee takes a major step in extending contemporary debates on the role of drugs and stimulants in shaping the modern West. At once panoramic and richly detailed, *The Pursuit of Pleasure* examines both the intoxicants known since ancient times--wine and opiates--and the stimulants introduced later--tobacco, coffee, and tea--from multiple angles. It brings together production, commerce, and consumption to reveal the forces behind the spread and popularity of these consumables, showing how Iranians adapted them to their own needs and tastes and integrated them into their everyday lives. Matthee further employs psychoactive substances as a portal for a set of broader issues in Iranian history--most notably, the tension between religious and secular leadership. Faced with reality, Iran's Shi'i ulama turned a blind eye to drug use as long as it stayed indoors and did not threaten the social order. Much of this flexibility remains visible underneath the uncompromising exterior of the current Islamic Republic.
