On the Eve of the Millennium

A distinguished statesman and man of letters deplores the mounting attacks on Enlightenment values that jeopardize the very survival of the democratic institutions they inspired. Enlivening his grim

predictions with dry wit, O'Brien nevertheless conveys an apocalyptic sense of the threats facing democracy as we approach the third millennium.

Millennium's Eve

Journalist Beth Scibelli arrives in Los Angeles on Christmas Eve, 1999, to cover a mega-gathering of Christians from across the nation. Little does she suspect that within the next seven days, she and her new romantic interest, Sergeant Reagan Cole of the LAPD, will be plunged into a fiendish assassination plot aimed at America's top Christian leaders.

On the Eve of the Millenium

"All my life," writes Conor Cruise O'Brien, "I have been fascinated and puzzled by nationalism and religion; by the interaction of the two forces, sometimes in unison, sometimes antagonistic." In these wide-ranging and penetrating essays, O'Brien examines how throughout the world today these age-old forces are once again threatening democracy, the rule of law, and freedom of expression -- particularly in the United States, the nation founded on Enlightenment values. He weaves together beautifully written discussions on these and other timely, related topics. Enlivening his grim predictions with dry wit, he nevertheless conveys an apocalyptic sense of the threats facing democracy as we approach the third millennium.

Basque Politics and Nationalism on the Eve of the Millennium

"...A collection of thoughtful and far-ranging essays by two senior scholars. The book hangs together better than most edited volumes." --American Journal of Chinese Studies

Russia and China

Red jasper shall calm you when you are lost in the twists of time. Blue aquamarine shall restore health To a soul that sickens. Green malachite offers hope and energy when you are weary. Amber lights your way when all is dark, And black onyx does what it may to ward off evil. These are the powers of the Millennium Stones And they are yours to do with as you will. On the eve of the new millennium, Zoe and Davy buy a handful of precious stones from an ancient pedlar. She tells them, if they seek knowledge and understanding, to cast one into the Thames at midnight. Sceptical but daring, they follow her instructions. What follows is a bewildering series of adventures in time. Lost, friendless and in constant peril, they witness five extraordinary nights. For ages 13 and over.

People's Century, 20th

The study assesses the cost-effectiveness of the existing programmes, whether Member States' interests are properly represented, and whether the programmes give sufficient attention to the question of subsidiarity.

The Millennium Stones

A snapshot of Methodism on the eve of the millennium.

The Third World on the Eve of the New Millennium

The essays in this book challenge prevailing views on the way in which apocalyptic concerns contributed to larger processes of social change at the first millennium. Several basic questions unify the essays: What chronological and theological assumptions underlay apocalyptic and millennial speculations around the Year 1000? How broadly disseminated were those speculations? Can we speak of a mentality of apocalyptic hopes and anxieties on the eve of the millennium? If so, how did authorities respond to or even contribute to the formation of this mentality? What were the social ramifications of apocalyptic hopes and anxieties, and of any efforts to suppress or redirect the more radical impulses that bred them? How did contemporaries conceptualize and then historicize the passing of the millennial date of 1000? Including the work of British, French, German, Dutch, and American scholars, this book will be the definitive resource on this fascinating topic, and should at the same time provoke new interest in and debate on the nature and causes of social change in early medieval Europe.

European Union health policy on the eve of the millennium

The title of this book is based on Bible prophecies in the Old and New Testaments. Daniel 7:13-14 and Isaiah 2:4 are two of the many prophecies in the Old Testament. In the New Testament in Matthew 6:10, Jesus taught his disciples to pray for God's will "to be done on earth as it is in heaven." In Revelation 20:4 states about the reign of JESUS CHRIST for a 1000 years THE MILLENNIUM. In Revelation 20:1-3, the scriptures say God is going to lock Satan, the devil, up for a thousand years. This is when the millennium will come to the planet Earth-Paradise Restored. From this verse, we get the word millennium, Latin for "one thousand," the kingly rule of God by Jesus and the resurrected saints, the kingdom of heaven on planet Earth. In the millennium, crime, sickness, pain, and suffering are gone. Poverty and corruption and even prisons and funeral homes will be eventually eliminated during this one thousand years (Rev. 21:4-5).

Millennium Eve: a poem begun at Florence, in ... 1841. [By J. P., i.e. John Pring.]

Within these pages is a veritable banquet for those who savour the politics of international security. The reader is offered factual analysis, insight, new perspectives, revisited concepts, problem spotting and recipes for solutions. Academic observers from a dozen different countries in Eastern and Western Europe and on both sides of the Atlantic subject a large number of questions of topical interest in the security field to one or other of these forms of treatment. Their debate embraces reinforcement of the European pillar of the Alliance; adjustment of the balance of responsibilities between the two sides of the Atlantic; and shoring up the transatlantic partnership and perhaps broadening it into that elusive concept, a 'transatlantic community', stretching into economic and other fields. They address the perceived security vacuum in parts of Central and Eastern Europe and discuss measures to build up greater confidence between former Cold War antagonists and ways of developing in them the habits of co-operation rather than counter-operation. They draw up architectural designs for the security of the twenty-first century and grapple with the conflict of ideas circulating about the Alliance's future and particularly about its future relationship with Russia. Isolationism, nationalism, multilateralism, realism, constructivism and other -isms are helpfully put into context. Renationalisation, denationalisation and identities in formation or in decline are also investigated.

Millennium eve, a poem [signed J.P.].

This book captures the essence of what was an important starting point for the year for Dialogue among Civilizations (2001). Leaders from all continents assembled in September 2000 to share their views on the eve of the historic U.N. Millennium Summit. The political perspectives advanced then were complemented by contributions from personalities drawn from literature, the media, academia, diplomacy and international organizations. 'Dialogue among civilizations' is an essential stage in the

founding of a form of human development both sustainable and equitable, humanizing globalization and laying the basis of an enduring peace.

Awakening Siberia

In the early 90s, church leaders across the UK began to think about how to use the approaching millennium celebrations to promote Christ's message. From 1994 onwards, national cross-church bodies and think-tanks were set up to meet the challenge. "Challenging Time" is a first-hand account of the UK churches' joint initiative to put Christianity and Christian values firmly on the millennium map. The chief author and editor is Stephen Lynas, Archbishop's Officer for the Millennium 1996 - 2001. Stephen Lynas writes in a wry and engaging style about lessons learnt, and successes and failures. He writes about his own behind-the-scenes work and describes fascinating encounters in the corridors of power. The reader eavesdrops on meetings of significant church leaders, inter faith groups, Cabinet politicians, advertising and PR executives. Ultimately, he encourages churches in this country to learn from the churches' millennium experience as they face the challenge of mission in the 21st century. Part One contains the author's account of what happened leading up to and including Millennium Eve, while Part Two features contributions from significant figures, including Bishop Gavin Reid and Harriet Crabtree, offering a variety of perspectives on the success or otherwise of the churches' millennium activities.

A Charge to Keep

Dr. Seuss's classic character the Lorax has delighted children for decades while passing along a powerful message about environmental responsibility. The book's young readers, and their parents, would likely be surprised by the emergence of a new character, Truax, a kindly logger created by a longtime employee of the wood products industry, who, not surprisingly, has a far different viewpoint to share. Yet the Truax character, and the book of the same name, is just one example of a growing genre of conservative-themed narratives for young readers spawned by the continuing strength of the American political right. Highlighting the works of William Bennett, Lynne Cheney, Bill O'Reilly, and others, Michelle Ann Abate brings together such diverse fields as cultural studies, literary criticism, political science, childhood studies, brand marketing, and the cult of celebrity. Raising Your Kids Right dispels lingering societal attitudes that narratives for young readers are unworthy of serious political study by examining a variety of texts that offer information, ideology, and even instructions on how to raise kids right, not just figuratively but politically.

Dialogue Among Civilizations

Cardinal Kasper is a distinguished theologian who was a colleague of Cardinal Ratzinger, Karl Rahner, and Hans Kung at The Universities of Münster and Tübingen. Kasper now heads the Vatican's Council for Promoting Christian Unity, with the specific task of fostering relations between the Catholic Church and other Christian Churches and Ecclesial communities. Here he outlines his vision for the unity of Christian Churches. A man with an open mind, Kasper covers one of the major responsibilities of the contemporary Catholic Church. His perspective of the uniqueness of The Catholic Church and its magisterium is presented here as a modern inquiry into the nature of truth. His views are enlightening and engaging, and reflect the important role of dialogue as understood by the Catholic Church, which also listen to other traditions and learn from them. Many will read it in the hope that the thought of this renowned, open-minded Church leader may give hope to people of all traditions that they may learn to understand Jesus's injunction - 'they may be one'.

The Apocalyptic Year 1000

They say don't judge a book by its cover, but it's human nature to instinctively do it. On this cover, I've placed a framed picture of my husband as he was in life, with the words "They didn't listen, they didn't know how," indicating from where he is right now, he can see a bigger picture. I say "framed" because there is evidence indicating he was a diabetic, but in fact, he was suffering from something else. The back cover has a selection of photographs of him enjoying life against a background of honeycomb with the inscription "Life became too sweet for me." I invite you to read on with an open mind!

The Birth of the Millennium

The Birth of the Millennium is translated from the Third Reich original *Die Geburt des Jahrtausends*, which was published in 1936 and dedicated to his sons Jýrg and Wulf. The author, Kurt Eggers, was the editor of the SS newspaper *Das Schwarze Korps* and an SS war correspondent. After he was killed on the Russian front in 1943, an SS regiment was named after him: the SS-Standarte Kurt Eggers. In short, Kurt Eggers was a true National Socialist warrior-poet, whose works provide a fascinating look into the soul of the ideal SS warrior. The terms "law" [Gesetz] and "lawful" [gesetzmýýig] as used by Eggers in this book do not refer to jurisprudence, rather to a kind of law of nature, namely the law of one's own true nature. "Order" refers to the natural order, living and acting in accordance to this law. Softcover. 136pp.

Millennium

Gould addresses three questions about the millennium with his typical erudition, warmth, and whimsy: What is the concept of a millennium and how has its meaning shifted over time? How did the projection of Christ's 1,000-year reign become a secular measure? And when exactly does the millennium begin—January 1, 2000, or January 2, 2001?

Questioning the Millennium

Discusses the year 2000 as a milestone marking two thousand years of human achievement, as a threshold leading into a new millennium, and as an important anniversary of the birth of Jesus Christ.

The Story of Clocks and Calendars

The remarkable commercial success of Mel Gibson's *The Passion of the Christ* in 2004 came as a surprise to the Hollywood establishment, particularly considering the film's failure to find production funding through a major studio. Since then the Biblical epic, long thought dead in terms of mainstream marketability, has become a viable product. This collection examines the new wave of the genre, which includes such varied examples as Darren Aronofsky's *Noah* (2014) and Ridley Scott's *Exodus: Gods and Kings* (2014), along with the telenovelas of Latin America. Such texts follow previous traditions while appearing distinct both stylistically and thematically from the Biblical epic in its prime, making academic consideration timely and relevant. Featuring contributions from such scholars as Mikel J. Koven, Andrew B. R. Elliott and Martin Stollery, and a preface from Adele Reinhartz, the book will be of interest to students and scholars of film, television and religion.

We Stand at the Birth of a New Millennium, Ready to Unlock the Mysteries of Space, to Free the Earth from the Miseries of Disease, and to Harness the Energies, Industries and Technologies of Tomorrow. A New National Pride Will Stir Our Souls, Lift Our Sig

One of the not frequently mentioned characteristics of us as humans is both an interest in the past and a desire to leave records of our own time, place or selves. This is not necessarily, however, the same thing as 'history', which has a very clear meaning, namely 'enquiry'. The very essence of history is the asking of questions and the search for answers to them. These questions concern especially causation (why?), or responsibility (who?). This book is a bold attempt to survey narratives from the beginning of written records in Egypt and Mesopotamia through the major pre-classical cultures down to Herodotos, whom

Cicero named 'The Father of History', to test the accuracy of that epithet, against a current fashion of denigration of the Greek's achievement. The fascinating pre-classical cultures, usually neglected by classicists, were certainly interested in the past and recording the present, but never asked questions about them. The narrative was already fixed, governed overwhelmingly by divine control and designed usually to glorify the ruler in question. An entirely new world is revealed by Herodotos, who never stopped asking questions. History was born.

The Bible onscreen in the new millennium

July 10, 2009, marks the 500th anniversary of the birth of John Calvin. During his own time and in the centuries that followed, this Genevan's life and labors shook the West and blazed a trail for liberty around the globe, making him arguably the most important man of the last millennium. Calvin's worldview spurred Huguenot freedom-fighters to resist tyranny in France, fueled evangelistic efforts to pagan tribes, and, with John Knox's aid, rekindled freedom's fire among the sturdy Scots. Moreover, Calvin's influence compelled a hardy group of Pilgrims to settle at Plymouth Rock, and later drove a rag-tag band of patriots to fight for American independence. Perfect for a family read-aloud, John Calvin: Man of the Millennium reveals this great man of God to a new generation of Christians in need of its own reformation.

The Birth of History

Born to a prince and a princess from two different worlds, the child is heir to two thrones with too many problems. Upon his birth, he is seen as a she. Throughout his life he is put against many odds. His people see him as more a queen than king, and his court finds him to be unfit to rule. And all he wanted was to be a normal person and live a normal life. Ending wars, starting wars, within and outside his kingdom, so much for one as he. These are the trials of a king of England who never lived. This is the life of Millennium I.

John Calvin

This book provides unparalleled coverage of each of the principal organs of the United Nations. This collection offers a survey of the life of each organ since its inception in 1945, the extent to which it has fulfilled its founding mission, and proposals for reform. As well as providing comprehensive coverage of the present role of this highly influential organization, the book addresses larger questions about the role of the U.N. and the fitness for purpose of its principal organs as a means to global governance.

United Nations at the Millennium

This is a wide-ranging collection of reviews and essays from one of the UK's most important and respected writers. The author has grouped his writings into subject headings, including the visual world, film, lives, writers, science, and autobiography.

At Millennium's End

This book documents the early lives of almost 19,000 children born in the UK at the start of the 21st century, and their families. It is the first time that analysis of data from the hugely important Millennium Cohort Study, a longitudinal study following the progress of the children and their families, has been drawn together in a single volume. The unrivalled data is examined here to address important policy and scientific issues. The book is also the first in a series of publications that will report on the children's lives at different stages of their development. The fascinating range of findings presented here is strengthened by comparison with data on earlier generations. This has enabled the authors to assess the impact of a wide range of policies on the life courses of a new generation, including policies on child health, parenting, childcare and social exclusion. *Babies of the new millennium* (title tbc) is the product of an exciting collaboration from experts across a wide range of health and social science fields. The result is a unique and authoritative analysis of family life and early childhood in the UK that cuts across old disciplinary boundaries. It is essential reading for academics, students and researchers in the health and social sciences. It will also be a useful resource for policy makers and practitioners who are interested in childhood, child development, child poverty, child health, childcare and family policy.

A User's Guide to the Millennium

This collection of new essays examines the long-standing question of apocalyptic expectations around the turn of the first millennium. Including works by scholars of medieval history, literature, and religion, this book argues that apocalyptic expectations did exist around the year 1000. It provides a more balanced and nuanced approach to the issue than the traditional views that either identify a time of fear, the 'terrors of the year 1000', or deny that awareness of the millennium existed. This book, instead, recognizes that there were a variety of responses to the eschatological years 1000 and 1033 and that these responses contributed to the broader social and religious developments associated with the birth of European civilization.

A View of the Expected Christian Millennium

Man of the New Millennium is a book for us: the millions of people who want to see the end of mancruel and the start of mankind and the probably billion or so of us in this world, exasperated and disenchanted by worn-out templates, trying to find new ones. Wrapped in the most gentle of narratives, Man of the New Millennium leads us through the maze of history's travesties and today's duplicities to a future with a future, to a future whose potential is our potential, our potential as a species, and that potential special to all of us individually. Man of the New Millennium is a search for us in an age of me; it is a text for humanity in fictional dress; it is a book which changes hope from an ill-defined aspiration to a realisable ambition. It is a book of today which guarantees a quality tomorrow. Man of the New Millennium is the third book of the trilogy which also comprises The Prophet of the New Millennium and God of the New Millennium.

The Millennium

Artists, art historians, and critics look at the legacies of feminism and critical theory in the work of women artists, more than thirty years after the beginning of the modern women's movement and Linda Nochlin's landmark essay "Why Have There Been No Great Women Artists?" More than thirty years after the birth of the modern women's movement and the beginnings of feminist art-making and art history, the time is ripe to examine the legacies of those revolutions. In *Women Artists at the Millennium*, artists, art historians, and critics examine the differences that feminist art practice and critical theory have made in late twentieth-century art and the discourses surrounding it. In 1971, when Linda Nochlin published her essay "Why Have There Been No Great Women Artists?" in a special issue of *Art News*, there were no women's studies, no feminist theory, no such thing as feminist art criticism; there was instead a focus on the mythic figure of the great (male) artist through history. Since then, the "woman artist" has not simply been assimilated into the canon of "greatness" but has expanded art-making into a multiplicity of practices with new parameters and perspectives. In *Women Artists at the Millennium* artists including Martha Rosler and Yvonne Rainer reflect upon their own varied practices and art historians discuss the innovative work of such figures as Louise Bourgeois, Lygia Clark, Mona Hatoum, and Carrie Mae Weems. And Linda Nochlin considers changes since her landmark essay and looks to the future, writing, "We will need all our wit and courage to make sure that women's voices are heard, their work seen and written about." Questioning the Millennium

This book argues that long-distance trade in luxury items – such as diamonds, gold, cinnamon, scented woods, ivory and pearls, all of which require little overhead in their acquisition and were relatively easy to transport – played a foundational role in the creation of what we would call "global trade" in the first millennium CE. The book coins the term "dark matter economy" to better describe this complex – though mostly invisible – relationship to normative realities. The first full integration of dark matter economy with the emerging global flows took place in South India and Sri Lanka at the beginning of the millennium. The book then moves to other places in the world – "sweet spots" – where a particular type of affluence was generated through the trade in luxury goods. This upstream affluence manifested itself in the creation of shrines, palaces, temples and engineering works that all thickened the landscape of memory, control and extraction and also served as a defense mechanism against intrusions from afar. The book also explains the collapse of dark matter economy as a result of the cumulative energies of colonialism, modernization and nationalism that make it hard for us today to come to terms with this history. The *Long Millennium* will appeal to students and scholars alike studying the trade networks and economics of the early Middle Ages as well as anyone interested in the effect of trade on medieval society in the first millennium CE.

Lecture Sialkot was delivered (in Urdu) by the Promised Messiah on 2nd November 1904, before a large gathering of Hindus and Muslims. In this lecture, the Promised Messiah, said that although all religions had emanated from God, Islam is now the only living religion, for it alone continues to be nurtured by Divine communication. He also declared that just as he had come in the spirit of the Messiah son of Mary for the reformation of Muslims and Christians, so had he come as Krishna for the Hindus.

The Long Millennium

Felipe Fernandez-Armesto's Millennium is a new initiative in narrative history, viewing the current millennium as it draws to a close as from the future: it sweeps the past and scans the prospects to present an unprecedented vision of genuinely global history. The evidence of what this thousand years represents is explored with more intricacy and intimacy than has ever been attempted in a work of this scale, with the help of perfectly chosen details culled from the bric a brac of the past to illuminate the slow but visible tide of history as it sweeps over the course of a millennium. With its vivid writing and hundreds of illustrations, Millennium is a classic of popular history: one of the few books which has relevance for the present as well as enduring interest for the future.

A look at popes and the papacy through the prism of the names associated with the popes -- whether they be birth, priestly, or assumed names. It is the first in-depth exploration of papal names and their meanings with a revised history of papal name changes, a complete account of the rationales for the 125 known instances of assumed names, and a slew of new 'factoids.' The first documented instance of papal name change was when Mercurius, in 533 A.D., opted not to introduce the name of a pagan god into the papal rolls. Marcellus II, in 1555, was the last pope, to date, to have retained his prior name, thereby breaking a 494 year tradition . 'Marcellus', however, is a name derived from 'Mars' - the Roman god of war! The history of papal name changes contains many such intriguing twists and turns, in particular Anacletus, Sixtus I, Zephyrinus and Julius II. This book sets out to highlight them all and thereby plug a hitherto little explored aspect of papal history. Despite the interest in papal names, there has been very little dedicated analysis pertaining to their evolution. Consequently, there are many inaccuracies and omissions. Papal name change could be a much older practice than originally believed. This book is an attempt to rectify the lack of attention hitherto afforded to the story and the glory of papal names. It is a by-product of a computer-aided papal history project undertaken by the author. Web site. This book is not meant to be controversial. The subject matter, though often beguiling, still does not, however, provide sufficient scope to incite bona fide dissension. This book is meant to enlighten, and hopefully entertain. With it, the author hopes to put a stake in the ground vis-à-vis our understanding of papal names.
