SOAP for Family Medicine

SOAP for Family Medicine features 90 clinical problems with each case presented in an easy to read 2-page layout. Each step presents information on how that case would likely be handled. Questions under each category teach the students important steps in clinical care. Blackwell's new SOAP series is a unique resource that also provides a step-by-step guide to learning how to properly document patient care. Covering the problems most commonly encountered on the wards, the text uses the familiar "SOAP" note format to record important clinical information and guide patient care. SOAP format puts the emphasis back on the patient's clinical problem not the diagnosis. This series is a practical learning tool for proper clinical care, improving communication between physicians, and accurate documentation. The books not only teach students what to do, but also help them understand why. Students will find these books a "must have" to keep in their white coat pockets for wards and clinics.

SOAP for Family Medicine

Offering step-by-step guidance on how to properly document patient care, this updated Second Edition presents 90 of the most common clinical problems encountered on the wards and clinics in an easy-to-read, two-page layout using the familiar "SOAP" note format. Emphasizing the patient's clinical problem, not the diagnosis, this pocket-sized quick reference teaches both clinical reasoning and documentation skills and is ideal for use by medical students, Pas, and NPs during the Family Medicine rotation.

Current Diagnosis and Treatment in Family Medicine (2nd Edition).

This clinically oriented textbook provides a patient-focused approach to the diagnosis and treatment of somatic dysfunction—functional impairment of the musculoskeletal system and related neural and

vascular elements—in the context of family medicine practice. The book explains the clinical rationale for osteopathic manipulative treatment in specific situations and details procedures for treating common problems encountered in family medicine. Coverage begins with the philosophy and principles of osteopathic patient care. Two major sections focus on various patient populations and patients with various clinical conditions. A special section covers practice issues such as office set-up, progress notes, coding, and the standardized medical record.

Somatic Dysfunction in Osteopathic Family Medicine

SOAP for Pediatrics features over 70 clinical problems with each case presented in an easy to read 2-page layout. Each step presents information on how that case would likely be handled. Questions under each category teach the students important steps in clinical care. Blackwell's new SOAP series is a unique resource that also provides a step-by-step guide to learning how to properly document patient care. SOAP for Obstetrics and Gynecology

Primary healthcare is a field dedicated to making essential healthcare accessible to every individual across the globe. Family medicine is a specialty under the umbrella of primary healthcare. Together they are pushing the boundaries of the traditional healthcare system. This book focuses on the goals, concepts and principles of primary healthcare and family medicine. It brings forth the diverse approaches in this area and their applications in the modern times. It outlines the processes and studies that are constantly contributing towards the evolution of this field. With state-of-the-art inputs by acclaimed experts of this field, this book targets students and healthcare and public health professionals.

Current Diagnosis & Treatment in Family Medicine

These are peer-reviewed handy point-of-care tools to support clinical learning in Family Medicine. The content is aligned with SHARC-FM - the Shared Canadian Curriculum in Family Medicine. Objectives and more information is available at sharcfm.com.

Primary Healthcare and Family Medicine

Traditionally, the history of the birth control movement has been told through the accounts of the leaders, organizations, and legislation that shaped the campaign. Recently, historians have begun examining the cultural work of printed media, including newspapers, magazines, and even novels in fostering support for the cause. Broadcasting Birth Control builds on this new scholarship to explore the films and radio and television broadcasts developed by twentieth-century birth control advocates to promote family planning at home in the United States, and in the expanding international arena of population control. Mass media, Manon Parry contends, was critical to the birth control movement's attempts to build support and later to publicize the idea of fertility control and the availability of contraceptive

services in the United States and around the world. Though these public efforts in advertising and education were undertaken initially by leading advocates, including Margaret Sanger, increasingly a growing class of public communications experts took on the role, mimicking the efforts of commercial advertisers to promote health and contraception in short plays, cartoons, films, and soap operas. In this way, they made a private subject—fertility control—appropriate for public discussion. Parry examines these trends to shed light on the contested nature of the motivations of birth control advocates. Acknowledging that supporters of contraception were not always motivated by the best interests of individual women, Parry concludes that family planning advocates were nonetheless convinced of women's desire for contraception and highly aware of the ethical issues involved in the use of the media to inform and persuade.

An Introduction to Family Medicine

Preceded by Textbook of family medicine / Ian R. McWhinney, Thomas Freeman. 3rd edition. 2009.

Canadian Family Medicine Clinical Cards

Medical students often struggle when presenting new patients to the attending physicians on the ward. Case presentation is either poorly taught or not taught at all in the first two years of medical school. As a result, students are thrust into the spotlight with only sketchy ideas about how to present, prioritize, edit, and focus their case presentations. They also struggle with producing a broad differential diagnosis and defending their leading diagnosis. This text provides a comprehensive guide to give well-prepared, focused and concise presentations. It also allows students to discuss differential diagnosis, incorporate high-value care, educate their colleagues, and participate actively in the care of their patients. Linking in-depth discussion of the oral presentation with differential diagnosis and high value care, Presenting Your Case is a valuable resource for medical students, clerkship directors and others who educate students on the wards and in the clinic.

Broadcasting Birth Control

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

CURRENT DIAGNOSIS and TREATMENT in FAMILY

A 24-year-old woman is referred from the emergency department with sudden onset of left iliac fossa pain and you are the medic on duty... 100 Cases in Obstetrics and Gynaecology presents 100 commonly seen obstetric and gynaecological scenarios. English is not your mother tongue? This enjoyable book offers everything you need to cope with everyday situations as a resident in English-speaking countries, at scientific meetings or just to stay up to date with medical advances. Each chapter starts with a cartoon.

South African Family Practice Manual

As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs

that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.

Presenting Your Case

Focusing on the topics commonly found on ABFM in-training, board certification, and recertification examinations, The Family Medicine Board Review Book helps you make the most of your study time and achieve exam success. It provides valuable background information on all three AFBM exams and their formats, presents more than 1,800 multiple choice questions for self-assessment, and helps you identify areas that may require further study. Ideal for residents, practicing physicians, and nurse practitioners, this new review tool is an excellent resource for testing your knowledge of the entire field of family medicine. Questions are derived from common clinical situations, presented in ABFM-exam format. Explanations support each answer, key points are highlighted throughout, and content is weighted appropriately to the exam. Includes an atlas with clinical images and lab smears, reflecting the types of illustrations that are included on the exam. Contains additional reading suggestions for each answer to assist with further study. Use with Fast Facts for the Family Medicine Board Review for a comprehensive board exam preparation experience. Enrich Your eBook Reading Experience with Enhanced Video, Audio and Interactive Capabilities! Read directly on your preferred device(s), such as computer, tablet, or smartphone Easily convert to audiobook, powering your content with natural language text-to-speech Adapt for unique reading needs, supporting learning disabilities, visual/auditory impairments, second-language or literacy challenges, and more

Clinical Case Studies for the Family Nurse Practitioner

Developing Global Health Programming: A Guidebook for Medical and Professional Schools, 2nd edition is an essential text for any academic institution, administrator, faculty, or student interested in developing or expanding global health education and international programs. This text expands on the 1st edition and provides a comprehensive view of global health education that is useful for medical, nursing, dental, public health, and other professional schools. This book provides evidence, theory, and practical information to guide astute program development and gold standard practices. Topics covered include ethics, pre-departure training, competencies, partnership structures, and much more. In addition, need-to-know resources and networking opportunities are detailed. This authoritative text has over 90 contributors, including trainee authors guided by faculty editors through a mentorship model. Foreword by Andre Jacques Neusy, Co-Founder & CEO, Training for Health Equity Network (THEnet)

100 Cases in Obstetrics and Gynaecology

This popular reference facilitates diagnostic and therapeutic decision making for a wide range of common and often complex problems faced in outpatient and inpatient medicine. Comprehensive algorithmic decision trees guide you through more than 250 disorders organized by sign, symptom, problem, or laboratory abnormality. The brief text accompanying each algorithm explains the key steps of the decision making process, giving you the clear, clinical guidelines you need to successfully manage even your toughest cases. An algorithmic format makes it easy to apply the practical, decision-making approaches used by seasoned clinicians in daily practice. Comprehensive coverage of general and internal medicine helps you successfully diagnose and manage a full range of diseases and disorders related to women's health, emergency medicine, urology, behavioral medicine, pharmacology, and much more. A Table of Contents arranged by organ system helps you to quickly and easily zero in on the information you need. More than a dozen new topics focus on the key diseases and disorders encountered in daily practice. Fully updated decision trees guide you through the latest diagnostic and management guidelines.

Medical English

In this third book of the acclaimed series, Percy and his friends are escorting two new half-bloods safely to camp when they are intercepted by a mantichore and learn that the goddess Artemis has been kidnapped.

Occupational Therapy Practice Framework: Domain and Process

Real-life primary care case studies* from more than 50 primary care providers, including physician assistants, nurse practitioners, and physicians! 101 Primary Care Case Studies offers real-life patient scenarios and critical thinking exercises to help you work through a patient's chief complaint. Through narrative case studies, you will determine how best to diagnose, treat, and manage your patient based on the history of present illness, review of systems, relevant history, and physical examination findings. This workbook will ask probing questions to help you determine differential and most likely diagnoses, diagnostic tests to order, and appropriate patient management strategies using relevant and timely references to support your decisions. The organization of each case study simulates the patient care journey from chief complaint to outcome. Serving as a virtual clinical preceptor, this workbook can be used independently or in a classroom setting. It is accompanied by a robust online student supplement that provides answers to all questions, real outcomes of the cases, and valuable personal insights from the authors on how the patient was successfully managed. Not only will this workbook help you work through patient cases clinically, it will also share important, but often overlooked, bedside manner skills needed to successfully communicate with and care for your patients. Covering conditions across all organ systems and across the lifespan, this workbook is organized by chief complaint, providing an authentic perspective on what to expect in the patient care environment. It even includes information on pathophysiology and how to use ICD-10 and CPT (E/M) codes in your documentation. The book uniquely weaves together both the science and art of medicine by including personal insights into quality and compassionate care. Key Features Provides real-life patient cases from an interprofessional author team of physician assistants, nurse practitioners, and physicians Uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios Teaches clinical and bedside manner skills imperative for delivering quality patient care Covers patients across the lifespan, including pediatric, adolescent, adult, and geriatric populations Offers additional insight on patient education, medical and legal concerns, and interprofessional collaboration Includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases Provides instructors with a table of contents that is filterable by chief complaint, diagnosis, patient population, and organ system *Details changed to protect patient information.

The Family Medicine Board Review Book

Tells a story about the strange relationship of two migrant workers who are able to realize their dreams of an easy life until one of them succumbs to his weakness for soft, helpless creatures and strangles a farmer's wife.

Developing Global Health Programming

This Quality Book of Tools is a unique collection of quality performance indicators for primary care in Canada. Using this book will help family doctors and other primary care providers continue to improve the quality of care in their practice. Cheryl Levitt (MBBCh CCFP FCFP) is a family physician and professor in the Department of Family Medicine at McMaster University. Linda Hilts (RN BScN MEd) is a registered nurse and an assistant professor and associate member of the Department of Family Medicine at McMaster University.

Decision Making in Medicine

This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Porth

Reproduction of the original: The Condition of the Working-Class in England in 1844 by Frederick Engels

The Percy Jackson and the Olympians, Book Three: Titan's Curse

"Prepared by residents and attending physicians at Massachusetts General Hospital, this pocket-sized loose-leaf is created in the style of Pocket Medicine by providing key clinical data for students and residents and focuses on patient care in the outpatient setting. Pocket Primary Care is a handy summary of key clinical information designed to form the basis of an individual's pocket notebook or to be integrated into one's own notebook. Includes areas of: preventive medicine, cardiovascular, dermatology, endocrine, gastrointestinal, hematology, infectious disease, musculoskeletal, neurology, ophthalmology/ ENT, psychiatry/social, pulmonary, renal/urology, special populations, women's health, men's health, and geriatric"--

Population Report

Ninety-eight of the chief complaints and disorders you're most likely to encounter in the ED! A clear, concise guide for clinicians new to the Emergency Department A Doody's Core Title for 2015! Written by authors who are practicing emergency physicians and emergency medicine educators, Clinical Emergency Medicine distills the entire content of the emergency medicine curriculum into less than one hundred succinct, clinically relevant chapters. This unique book is intended to guide you through what you must know and be able to do during an actual shift and give you a better understanding of the issues and problems you will face while working in the Emergency Department. Featuring a consistent, find-it-now design, Clinical Emergency Medicine delivers concise, must-know information on ninety-eight chief complaints and disorders, ranging from asthma and chest pain to fever and poisoning. Each chapter begins with Key Points, followed by an Introduction, Clinical Presentation (History and Physical Examination), Diagnostic Studies, Medical Decision Making, Treatment and Disposition, and Suggested Reading. Whenever possible, the authors provide practical advice on drug dosing, the medical decision-making thought process, treatment plans, and dispositions that will be of value in a clinical environment. Numerous diagnostic algorithms simplify the problem and point you towards a solution. Valuable to medical students, physician assistants, nurse practitioners, and junior level residents, Clinical Emergency Medicine teaches you things that may not have been covered in medical or physician assistant school, but have an important bearing on patient outcomes.

101 Primary Care Case Studies

What is the coronavirus, and why is everyone talking about it? Engagingly illustrated by Axel Scheffler, this approachable and timely book helps answer these questions and many more, providing children aged 5-10 and their parents with clear and accessible explanations about the coronavirus and its effects - both from a health perspective and the impact it has on a family's day-to-day life. With input from expert consultant Professor Graham Medley of the London School of Hygiene & Tropical Medicine, as well as advice from teachers and child psychologists, this is a practical and informative resource to help explain the changes we are currently all experiencing. The book is free to read and download, but Nosy Crow would like to encourage readers, should they feel in a position to, to make a donation to: <https://www.nhscharitiestogether.co.uk/>

Of Mice and Men

Quality in Family Practice Book of Tools

Clinical audit is at the heart of clinical governance. Provides the mechanisms for reviewing the quality of everyday care provided to patients with common conditions like asthma or diabetes. Builds on a long history of doctors, nurses and other healthcare professionals reviewing case notes and seeking ways to serve their patients better. Addresses the quality issues systematically and explicitly, providing reliable information. Can confirm the quality of clinical services and highlight the need for improvement. Provides clear statements of principle about clinical audit in the NHS.

Immunisation against infectious diseases

Forensic Pathology is a comprehensive reference that uses a case-oriented format to address, explain and guide the reader through the varied topics encountered by forensic pathologists. Developed in response to a severe void in the literature, the book addresses topics ranging from medicolegal investigation of death to death scene investigation, forensic autopsy, and artifacts of resuscitation as well as complications of medical therapy, forensic osteology, forensic odontology, forensic photography, and death certification. The book includes various types of cases, including sudden natural death, asphyxia, motor vehicle collisions, death in custody, child abuse and elder abuse, acute psychiatric and emotional deaths, and pregnancy. It contains sample descriptions of pathological lesions which serve to aid pathologists in reporting their findings to law enforcement agencies, attorneys, and others involved in investigations of sudden death. The concepts outlined in the text are beautifully illustrated by large, colorful photographs. There are also "Do and Don't" sections at the end of each chapter that provide guidance for handling the types of cases examined. This work will benefit not only experienced forensic pathologists, but also hospital pathologists who occasionally performs medicolegal autopsies; doctors in training; medical examiners; law enforcement personnel; crime scene investigators; attorneys; and fellows and students of the medical sciences. Large, colorful photographs which beautifully illustrate the concepts outlined in the text. Sample descriptions of pathological lesions which serve to aid pathologists in reporting their findings to law enforcement agencies, attorneys, and others involved in investigations of sudden death. 'Do and Don't' sections at the end of each chapter which provide guidance for handling the types of cases examined within preceding sections.

Where There is No Doctor
