

Socials 11 Counterpoints

[#social media counterpoints](#) [#online discourse challenges](#) [#social platform debates](#) [#11 perspectives on social media](#) [#digital communication analysis](#)

This resource explores 11 crucial counterpoints concerning social media, examining various opposing views and challenges present across different social platforms. It offers a balanced perspective on their impact and functionality, highlighting why understanding these diverse arguments is key to navigating the complexities of modern digital communication and developing more effective social strategies.

Our article database grows daily with new educational and analytical content.

We sincerely thank you for visiting our website.

Counterpoints

"This collection of essays presents a rousing intellectual exercise to all who care about 'why teach this rather than that' in social studies. The approach is refreshingly comprehensive in an era when social studies is often reduced to just a few academic disciplines."-Stephen J. Thornton, Professor of Social Studies Education, University of South Florida; Author of Teaching Social Studies That Matters: Curriculum for Active Learning

Keywords in the Social Studies

In this book, H. James Garrett inquires into the processes of learning about the social world, populated as it often is with bewildering instances of loss, violence, and upheaval. In such learning, interactions invite and enliven our passionate responses, or prompt us to avoid them. Interpreting and working with these often emotional reactions is critical to social studies education and developing strategies for individuals to participate in democracy. Garrett illustrates ways that learning about the world does not occur in absence of our intimate relations to knowledge, the way learning sometimes feels like our undoing, and how new knowledge can feel more like a burden than an advantage.

Learning to be in the World with Others

This book focuses on multicultural curriculum transformation in social studies and civic education subject areas. The discussion of each area outlines critical considerations for multicultural curriculum transformation for the area by grade level and then by eight organizing tools, including content standards, relationships with and among students and their families, and evaluation of student learning and teaching effectiveness. The volume is designed to speak with PK-12 teachers as colleagues in the multicultural curriculum transformation work. Readers are exposed to "things to think about," but also given curricular examples to work with or from in going about the actual, concrete work of curriculum change. This work supports PK-12 teachers to independently multiculturally adapt existing curriculum, to create new multicultural curriculum differentiated by content areas and grade levels, and by providing

ample examples of what such multicultural transformed social studies and civic education curricula looks like in practice.

Multicultural Curriculum Transformation in Social Studies and Civic Education

Revolving around the theme of “counterpoint” extensively used by Edward Said as the interplay of diverse ideas and discrepant experiences, this book aims to explore Said’s contribution to the fields of comparative literature, literary criticism, postcolonial theory, exilic and transnational studies, and socio-political thought among many others. Overshadowed by his legitimate political positions in support to the Palestinian cause and at odds with Islamophobic hostilities, Said’s intellectual achievements in the fields of humanities and philosophical thinking should equally be acknowledged and celebrated. Said articulates his notion of counterpoints through a vivid description of the composition of Western classical music. In the counterpoint of Western classical music, various themes play off one another, with only a provisional privilege being given to any particular one; yet in the resulting polyphony there is concert and order, an organized interplay that derives from the themes, not from a rigorous melodic or formal principle outside the work. This book pays tribute to Said’s contrapuntal methodology as well as to his academic and humanistic legacy.

Teaching City Kids

Fundamental world changes that simultaneously undermine a nation-state's charisma and promote the rise of a supra-national system have wide-ranging effects upon national states within a modern global society. My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling, which are central institutions in every country. Globally, primary and secondary education initially emerged as the premier tool for nation-states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition. I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education. The analyses consist of two sections. Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970-2008. These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well-established liberal democracies. Cross-national, quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia (BC), which examines nation-building within a context of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents, including Ministry of Education reports, curricular frameworks, and high school exit exams. Process-wise, I find the incorporation of human rights and diversity reflects macro-level changes in national and global society. Content-wise, I find four main approaches to reconciling ideas of human rights and diversity with national identity: (1) framing human rights and multiculturalism as part of national identity, (2) using pedagogical approaches that promote multiple perspectives and individual agency, (3) celebrating social and scientific figures and accomplishments as the source of national pride, and (4) drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non-state actors are important and legitimate agents of social change.

Human Rights, Diversity, and National Identity

Pedagogical Matters

Social studies education is not in excellent health. The time has come to transcend the often stilted discussion about lesson plan format and the proper construction of behavioral objectives. Kincheloe suggests a reconsideration of the discourse of social studies which is grounded on the assumption that social studies teachers should control their professional lives and not merely «execute» the plans of their superiors. The idea of self-directed social studies teachers aware of their purpose offers an atmosphere of possibility to a field haunted by a lack of grounding.

Getting Beyond the Facts

Our Ecological Footprint presents an internationally-acclaimed tool for measuring and visualizing the resources required to sustain our households, communities, regions and nations, converting the seemingly complex concepts of carrying capacity, resource-use, waste-disposal and the like into a graphic form that everyone can grasp and use. An excellent handbook for community activists, planners, teachers, students and policy makers.

Our Ecological Footprint

Social Studies - The Next Generation broadens the imagination within social studies education by highlighting current, cutting-edge scholarship incorporating critical discourses. Drawing on postmodern, poststructural, postcolonial, and feminist theories often borrowed from cultural studies, curriculum theory, critical geography, women's studies, and queer studies, the scholars contributing to this volume ask new questions about social studies, use different methodologies to study the field, and report findings with new forms of textualization. This book is dialogic and even conversational, ending with provocative responses from established social studies scholars and the editors and disturbs the given and the taken for granted in social studies research.

Social Studies--the Next Generation

This Open Access book builds upon Science and Technology Studies (STS) and provides a detailed examination of how large-scale energy research projects have been conceived, and with what consequences for those involved in interdisciplinary research, which has been advocated as the zenith of research practice for many years, quite often in direct response to questions that cannot be answered (or even preliminarily investigated) by disciplines working separately. It produces fresh insights into the lived experiences and actual contents of interdisciplinarity, rather than simply commentating on how it is being explicitly advocated. We present empirical studies on large-scale energy research projects from the United Kingdom, Norway, and Finland. The book presents a new framework, the Sociology of Interdisciplinarity, which unpacks interdisciplinary research in practice. This book will be of interest to all those interested in well-functioning interdisciplinary research systems and the dynamics of doing interdisciplinarity, including real ground-level experiences and institutional interdependencies.

Sociology of Interdisciplinarity

At the beginning of the 20th century, German biologist Jakob von Uexküll created the concept of "Umwelt" to denote the environment as experienced by a subject. This concept of environment differs from the idea of passive surroundings and is defined not just by physical surroundings, but is rather a "subjective universe"

Neurobiology of Umwelt

This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental

goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

Handbook of Research in Social Studies Education

This book explores the instrumental manipulation of citizenship and narrowing definitions of national-belonging which refract political struggles in Zimbabwe, Cote d'Ivoire, Cameroon, Somalia, Tanzania, and South Africa, where conflicts are legitimated through claims of exclusionary nationhood and redefinitions of citizenship.

Making Nations, Creating Strangers

Six Lenses for Anti-oppressive Education

The Wiley Handbook of Social Studies Research is a wide-ranging resource on the current state of social studies education. This timely work not only reflects on the many recent developments in the field, but also explores emerging trends. This is the first major reference work on social studies education and research in a decade. An in-depth look at the current state of social studies education and emerging trends. Three sections cover: foundations of social studies research, theoretical and methodological frameworks guiding social studies research, and current trends and research related to teaching and learning social studies. A state-of-the-art guide for both graduate students and established researchers. Guided by an advisory board of well-respected scholars in social studies education research.

Issues for Canadians

Drawing on 15 months of ethnographic research in one of the most under-developed regions in the Caribbean island of Trinidad, this book describes the uses and consequences of social media for its residents. Jolynna Sinanan argues that this semi-urban town is a place in-between: somewhere city dwellers look down on and villagers look up to. The complex identity of the town is expressed through uses of social media, with significant results for understanding social media more generally. Not elevating oneself above others is one of the core values of the town, and social media becomes a tool for social visibility; that is, the process of how social norms come to be and how they are negotiated. Carnival logic and high-impact visuality is pervasive in uses of social media, even if Carnival is not embraced by all Trinidadians in the town and results in presenting oneself and association with different groups in varying ways. The study also has surprising results in how residents are explicitly non-activist and align themselves with everyday values of maintaining good relationships in a small town, rather than espousing more worldly or cosmopolitan values.

The Wiley Handbook of Social Studies Research

This is an open access book. This proceeding consists of research presented in ICOSI UMY, on 20-21 July 2022 at Universitas Muhammadiyah Yogyakarta. The conference covers the topic of governance, international relations, law, education, humanities, and social sciences. The COVID-19 pandemic first time that occurred in 2019, has brought many changes that constrain all countries to adapt quickly. The crisis has shown vulnerabilities and gaps in several primary systems, including healthcare, social protection, education, value chains, production networks, financial markets, and the ecosystem. One of the efforts that each country can take to rise from the COVID-19 pandemic is through strengthening multilateralism, international solidarity, and global partnerships. Hence, this conference raises the central theme "Strengthening Global Partnership for Resilience." This theme covers sub-themes that allow prospective scholars to submit their papers for 'Virtual Conferences' presentation under the following scopes: Social Sciences, Humanities, Educations, and Religious Studies. Presented papers

will also get a chance to be published in our remarkable partner publishers. Through the International Symposium on Social, Humanities, Education, and Religious Studies (ISSHERS) and Asian Conference on Comparative Laws (Asian-COL), we hope that participants will express their innovative and creative ideas to provide benefits and contribute knowledge to strengthen global partnerships among countries. Finally, all 75 papers published in this proceedings are expected not only as research output but can be developed further into prototypes or evidence for policy making.

Social Media in Trinidad

This book has received the AESA (American Educational Studies Association) Critics Choice Award 2013. Through ethnographically informed interviews and observations conducted with six Black middle and high school girls, *Hip Hop's Li'l Sistas Speak* explores how young women navigate the space of Hip Hop music and culture to form ideas concerning race, body, class, inequality, and privilege. The thriving atmosphere of Atlanta, Georgia serves as the background against which these youth consume Hip Hop, and the book examines how the city's socially conservative politics, urban gentrification, race relations, Southern-flavored Hip Hop music and culture, and booming adult entertainment industry rest in their periphery. Intertwined within the girls' exploration of Hip Hop and coming of age in Atlanta, the author shares her love for the culture, struggles of being a queer educator and a Black lesbian living and researching in the South, and reimagining Hip Hop pedagogy for urban learners.

Proceedings of the International Conference on Sustainable Innovation on Humanities, Education, and Social Sciences (ICOSI-HESS 2022)

Teachers of Color and Indigenous Teachers are underrepresented in public schools across the United States of America, with Black, Indigenous, and People of Color making up roughly 37% of the adult population and 50% of children, but just 19% of the teaching force. Yet research over decades has indicated their positive impact on student learning and social and emotional development, particularly for Students of Color and Indigenous Students. A first of its kind, the *Handbook of Research on Teachers of Color and Indigenous Teachers* addresses key issues and obstacles to ethnoracial diversity across the life course of teachers' careers, such as recruitment and retention, professional development, and the role of minority-serving institutions. Including chapters from leading researchers and policy makers, the Handbook is designed to be an important resource to help bridge the gap between scholars, practitioners, and policy makers. In doing so, this research will serve as a launching pad for discussion and change at this critical moment in our country's history. The volume's goal is to drive conversations around the issue of ethnoracial teacher diversity and to provide concrete practices for policy makers and practitioners to enable them to make evidence-based decisions for supporting an ethnoracially diverse educator workforce, now and in the future.

Hip Hop's Li'l Sistas Speak

This book explores the epistemic side of racial and sexual oppression. It elucidates how social insensitivities and imposed silences prevent members of different groups from listening to each other.

Handbook of Research on Teachers of Color and Indigenous Teachers

"Sleep is one of the most important but least understood aspects of our life, wellness, and longevity ... An explosion of scientific discoveries in the last twenty years has shed new light on this fundamental aspect of our lives. Now ... neuroscientist and sleep expert Matthew Walker gives us a new understanding of the vital importance of sleep and dreaming"--Amazon.com.

The Epistemology of Resistance

The bestselling, award-winning author of *The American Invasion of Canada* "has given great drama and immediacy to that turning point in Canadian history" (Maclean's). On Easter Monday 1917 with a blizzard blowing in their faces, the four divisions of the Canadian Corps in France seized and held the best-defended German bastion on the Western Front—the muddy scarp of Vimy Ridge. The British had failed to take the Ridge, and so had the French who had lost 150,000 men in the attempt. Yet these magnificent colonial troops did so in a morning at the cost of only 10,000 casualties. The author recounts this remarkable feat of arms with both pace and style. He has gathered many personal accounts from soldiers who fought at Vimy. He describes the commanders and the men, the organization and the training, and above all notes the thorough preparation for the attack from which the British General

Staff could have learned much. The action is placed within the context both of the Battle of Arras, of which this attack was part, and as a milestone in the development of Canada as a nation. "This wonderful book brings to life the amazing men who came across the Atlantic nearly a century ago and won a famous victory which helped change a nation forever . . . the wonderful prose of Pierre Berton is all from the heart and you should share in it." —War History Online "The cinematic writing plunks the reader in the midst of the actual battle, and a judicious use of quotes from soldiers' diaries and letters helps provide a ground-level perspective." —Quill & Quire

Why We Sleep

All Children Are All Our Children explores steps we can take in classrooms, schools, neighborhoods and communities to support the health of the children and of the families that send their children to our schools.

Vimy

We, in the West in general, and the United States in particular, have witnessed over the last twenty years a slow erosion of our civilizational self-confidence. Under the influence of intellectuals and academics in Western universities, intellectuals such as Gore Vidal, Susan Sontag, Edward Said, and Noam Chomsky, and destructive intellectual fashions such as post-modernism, moral relativism, and multiculturalism, the West has lost all self-confidence in its own values, and seems incapable and unwilling to defend those values. By contrast, resurgent Islam, in all its forms, is supremely confident, and is able to exploit the West's moral weakness and cultural confusion to demand ever more concessions from her. The growing political and demographic power of Muslim communities in the West, aided and abetted by Western apologists of Islam, not to mention a compliant, pro-Islamic US Administration, has resulted in an ever-increasing demand for the implementation of Islamic law-the Sharia- into the fabric of Western law, and Western constitutions. There is an urgent need to examine why the Sharia is totally incompatible with Human Rights and the US Constitution. This book , the first of its kind, proposes to examine the Sharia and its potential and actual threat to democratic principles. This book defines and defends Western values, strengths and freedoms often taken for granted. This book also tackles the taboo subjects of racism in Asian culture, Arab slavery, and Islamic Imperialism. It begins with a homage to New York City, as a metaphor for all we hold dear in Western culture- pluralism, individualism, freedom of expression and thought, the complete freedom to pursue life, liberty and happiness unhampered by totalitarian regimes, and theocratic doctrines.

All Children Are All Our Children

This unprecedented volume includes 30 essays by teachers and students about the teacher characters who have inspired them. Drawing on film and television texts, the authors explore screen lessons from a variety of perspectives. Arranged in topical categories, the contributors examine the "good" teacher; the "bad" teacher; gender, sexuality, and teaching; race and ethnicity in the classroom; and lessons on social class. From such familiar texts as the Harry Potter series and School of Rock to classics like Blackboard Jungle and Golden Girls to unexpected narratives such as the Van Halen music video "Hot for Teacher" and Linda Ellerbee's Nick News, the essays are both provocative and instructive. Courses that could use this book include Education and Popular Culture, Cultural Foundations, Popular Culture Studies, other media studies and television genre classes.

Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed

This new edition of the most popular elementary social studies methods text on the market houses a wealth of content, strategies, tools, and resources for teaching K-8 social studies. Writing with the same clarity, friendly tone, and solid content of previous editions, Parker details the mission of social studies education and explores the many ways this mission can be made to serve the full complement of learners in a diverse multicultural society. He lays out the elements of a strong social studies curriculum, explains effective teaching methods, and presents a wealth of field-tested examples, exercises, activities, and lesson plans that will enliven every social studies classroom. The fourteenth edition features integration with myeducationlab, Pearson's online learning environment designed to connect students with real teaching situations through assignable videos, case studies, artifacts, and a personalized study tool.

Why the West is Best

Communism, capitalism, work, crisis, and the market, described in simple storybook terms and illustrated by drawings of adorable little revolutionaries. Once upon a time, people yearned to be free of the misery of capitalism. How could their dreams come true? This little book proposes a different kind of communism, one that is true to its ideals and free from authoritarianism. Offering relief for many who have been numbed by Marxist exegesis and given headaches by the earnest pompousness of socialist politics, it presents political theory in the simple terms of a children's story, accompanied by illustrations of lovable little revolutionaries experiencing their political awakening. It all unfolds like a story, with jealous princesses, fancy swords, displaced peasants, mean bosses, and tired workers—not to mention a Ouija board, a talking chair, and a big pot called “the state.” Before they know it, readers are learning about the economic history of feudalism, class struggles in capitalism, different ideas of communism, and more. Finally, competition between two factories leads to a crisis that the workers attempt to solve in six different ways (most of them borrowed from historic models of communist or socialist change). Each attempt fails, since true communism is not so easy after all. But it's also not that hard. At last, the people take everything into their own hands and decide for themselves how to continue. Happy ending? Only the future will tell. With an epilogue that goes deeper into the theoretical issues behind the story, this book is perfect for all ages and all who desire a better world.

Screen Lessons

Imagine, thirty years after the end of World War II, Israeli Nazi-hunters, some of whom lost relatives in the gas chambers of Nazi Germany, find a silent old man deep in the Amazon jungle. He is Adolph Hitler. The narrative that follows is a profound and disturbing exploration of the nature of guilt, vengeance, language, and the power of evil—each undiminished over time. George Steiner's stunning novel, now with a new afterword, will continue to provoke our thinking about Nazi Germany's unforgettable past. "Two readings have convinced me that this is a fiction of extraordinary power and thoughtfulness. . . . [A] remarkable novel."—Bernard Bergonzi, *Times Literary Supplement* "In this tour de force Mr. Steiner makes his reader re-examine, to whatever conclusions each may choose, a history from which we would prefer to avert our eyes."—Edmund Fuller, *Wall Street Journal* "Portage largely avoids both the satisfactions of the traditional novel and the horrifying details of Holocaust literature. Instead, Steiner has taken as his model the political imaginings of an Orwell or Koestler. . . . He has produced a philosophic fantasy of remarkable intensity."—Otto Friedrich, *Time*

Social Studies in Elementary Education

This is the first book to define the philosophical and practical parameters of critical animal studies (CAS). With apolitical animal studies and exploitative animal research dominating higher education, this book offers a timely counter-narrative that demands the liberation of all oppressed beings and the environment.

Communism for Kids

From Education to Incarceration: Dismantling the School-to-Prison Pipeline is a ground-breaking book that exposes the school system's direct relationship to the juvenile justice system. The book reveals various tenets contributing to unnecessary expulsions, leaving youth vulnerable to the streets and, ultimately, behind bars.

The Portage to San Cristobal of A. H.

In *The Stigma of Genius: Einstein, Consciousness and Critical Education*, we muse over ways in which to be, to become, to recognize uniqueness and different paths to genius. Understanding that there is no prescribed procedure, we look at Einstein's life and knowledges to connect our pedagogies and students.

Defining Critical Animal Studies

The world has been facing the effects of the COVID-19 pandemic for over two years now. Daily life changed dramatically, and social distancing and remote working have become the new normal. Research about how people are facing these challenges points to common findings and concerns. The pandemic has enhanced inequalities, taken a toll on mental health, and increased the use of digital technologies. Many workers are suffering from “digital fatigue” and struggle to self-regulate their

life/work balance, as the permanent digital connection to work is reinforced and they struggle with the blurred borders concerning privacy, leisure, and rest. In this context, it is vital to research how organizations have reinvented themselves to cope with the COVID-19 pandemic and understand which of the reactive workplace communication practices and improvised solutions were considered advantageous. *Perspectives on Workplace Communication and Well-Being in Hybrid Work Environments* presents different approaches that explore the impact of the COVID-19 pandemic on workplace communication, focusing specifically on internal communication, mapping new communication practices, and assessing their consequences, namely the well-being of the workers who are coping with these changes. The book combines a scientific exploration of these ongoing changes as we transition to a post-COVID-19 world with a collection of examples and best practices that help organizations in supporting their members through these transformations and in nurturing their well-being. Covering topics such as cross-department process dependencies, hybrid work environments, and wellbeing strategies, this premier reference source is a vital resource for business leaders and managers, IT managers, human resource professionals, students and educators of higher education, librarians, researchers, and academicians.

From Education to Incarceration

Why the social character of scientific knowledge makes it trustworthy Are doctors right when they tell us vaccines are safe? Should we take climate experts at their word when they warn us about the perils of global warming? Why should we trust science when so many of our political leaders don't? Naomi Oreskes offers a bold and compelling defense of science, revealing why the social character of scientific knowledge is its greatest strength—and the greatest reason we can trust it. Tracing the history and philosophy of science from the late nineteenth century to today, this timely and provocative book features a new preface by Oreskes and critical responses by climate experts Ottmar Edenhofer and Martin Kowarsch, political scientist Jon Krosnick, philosopher of science Marc Lange, and science historian Susan Lindee, as well as a foreword by political theorist Stephen Macedo.

The Stigma of Genius

This book explains how mobile computer usability is shaped by the increasing integration of personal circumstances in organization. It represents an attempt to conceptualize an alternative model of mobile computer usability. It is motivated by the author's conviction that we do not yet have an adequate understanding of this concept because we have not taken seriously the transformation of human personality by the co-evolution of organization and ICTs. The author argues that the transformation has resulted in a human personality whose personal and organizational activities are characterized by strong continuities between them. This characterization reflects a new kind of personality of the worker, and is a critical determinant of mobile computer usability. The word 'organizational' is used to describe this kind of personality – hence an alternative organizational personality perspective on mobile computer usability. This perspective suggests that a mobile computer is more usable to a person than another one because of its satisfaction of both his personal and organizational motives, which are in turn shaped by the co-evolution of organization, technology and personality.

Perspectives on Workplace Communication and Well-Being in Hybrid Work Environments

Contents for Volume 38: Science and Technology Studies and Information Studies, by Nancy A. Van House
New Theoretic Approaches for Human-Computer Interaction, by Yvonne Rogers
Community and Electronic Community, by David Ellis, Rachel Oldridge, and Ana Vasconcelos
Latent Semantic Analysis, by Susan T. Dumais
The Use of Web Search Engines in Information Science Research, by Judit Bar-Ilan
Web Mining: Machine Learning for Web Applications, by Hsinchun Chen and Michael Chau
Data Mining in Health and Medical Information, by Peter A. Bath
Indexing, Browsing, and Searching of Digital Video, by Alan F. Smeaton
ICT's and Political Life, by Alice Robbin, Christina Courtright, and Leah Davis
Legal Aspects of the Web, by Alexandre Lopez Borrell and Charles Oppenheim
Preservation of Digital Objectives, by Patricia Galloway
The Internet and Unrefereed Scholarly Publishing, by Rob Kling

Why Trust Science?

This provocative and rich volume charts the post-9/11 debates and practice of multiculturalism, pinpointing their political and cultural implications in the United States and Europe.
