Studies in Burmese Linguistics

'Studies in Burmese Linguistics' is a unique collection of articles dedicated to the linguistics of Burmese, a major language of South East Asia with perhaps forty million speakers, more than any other language in the diverse Tibeto-Burman language family. The articles cover various sub-disciplines within linguistics which will be of general interest to a broad constituency of linguists, including the phonology and the phonetics of constituent focus, a synchronic and diachronic treatment of reflexives, a discussion of optionality in morphosyntax, an analysis of the grammaticalisation of the verb 'give' as a causativiser, three complementary articles on the verbal tense-mode-aspect system and two on Old Burmese, the language of 11-13th Century inscriptions. There is also a report of a major German-Burmese lexicography project. The contributors have been invited to write on research topics of their own choosing, making the volume a representative of current research on Burmese rather than a systematic linguistic survey of the language. While not all the articles are theory-neutral, the book has been edited to ensure accessibility to a broad readership, as well as consistent transcription, transliteration and linguistic glossing across all the articles.

Turkic Oral Epic Poetry

'This Complete Sonnets and Poems is a distinguished addition to a distinguished series. It will repay continuing study, and act as a valuable point of reference for readers concerned more generally with Shakespeare's art and language. Colin Burrow's good sense, tact and balance as an editor are deeply impressive.' -H. R. Woudhuysen, Times Literary Supplement This is the only fully annotated and modernized edition to bring together Shakespeare's Sonnets as well as all his poems (including those attributed to him after his death). A full introduction discusses his development as a poet, and how the

poems relate to his plays; detailed notes explain the language and allusions in clear modern English. While accessibly written, the edition takes account of the most recent scholarship and criticism.

This book focuses on a simple dynamic: the taking in hand of a heritage, the variety of changes induced within it, and the handing on of that legacy to new generations. Our contributors suggest, from different standpoints, that this dynamic represented the essence of 'late antiquity'. As Roman society, and the societies by which it was immediately bounded, continued to develop, through to the late sixth and early seventh centuries, the interplay between what needed to be treasured and what needed to be explored became increasingly self-conscious, versatile, and enriched. By the time formerly alien peoples had established their 'post-classical' polities, and Islam began to stir in the East, the novelties were more clearly seen, if not always welcomed; and one witnesses a stronger will to maintain the momentum of change, of a forward reach. At the same time, those in a position to play now the role of heirs were well able to appreciate how suited to their needs the 'Roman' past might be, but how, by taking it up in their turn, they were more securely defined and yet more creatively advantaged. 'Transformation' is a notion apposite to essays in honour of Peter Brown. 'The transformation of the classical heritage' is a theme to which he has devoted, and continues to devote, much energy. All the essays here in some way explore this notion of transformation; the late antique ability to turn the past to new uses, and to set its wealth of principle and insight to work in new settings. To begin, there is the very notion of what it meant to be 'Roman', and how that notion changed. Subsequent chapters suggest ways in which fundamental characteristics of Roman society were given new form, not least under the impact of a Christian polity. Augustine, naturally, finds his place; and here the emphasis is on the unfettered stance that he took in the face of more broadly held convictions - on miracles, for example, and the errors of the pagan past. The discussion then moves on to

The collapse of Communism opened up great areas of the Balkans to Western travellers. At the same time it exposed old wounds among the different peoples of this troubled area. The tragic conflicts in Yugoslavia have brought this home to the rest of the world, although the history behind these conflicts is still imperfectly known. This book aims to draw attention to those areas of potential discord inhabited by groups scarcely recognized even in their native countries.

Lyrics and Lays

Encompassing the period from the Neolithic era to the troubled present, this book studies the peoples, societies and cultures of the area situated between the Adriatic Sea in the west and the Black Sea in the east, between the Alpine region and Danube basin in the north and the Aegean Sea in the south. This is not a conventional history of the Balkans. Drawing upon archaeology, anthropology, economics, psychology and linguistics as well as history, the author has attempted a "total history" that integrates as many as possible of the avenues and categories of the Balkan experience.
