International Mountain Rescue Handbook

This is the standard handbook of rescue teams throughout the world. It covers all elements of modern search and rescue.

International Mountain Rescue Handbook

This book first appeared in 1972 and since that date it has been the standard handbook of rescue teams throughout the world. This edition brings it up to date and includes many new items of equipment and rope systems which have evolved since the last edition in 1984.

The Mountain Guide Manual

Written by the International Federation of Mountain Guides Association (IFMGA) certified mountain guides Marc Chauvin and Rob Coppelillo, The Mountain Guide Manual is the go-to reference for novice and experienced mountain guides, as well as advanced recreationalists. Covering everything from rope systems and belaying to advice on group dynamics and rescuing, the manual combines practical how-to instruction with clear graphics, illustrations, and awe-inspiring alpine imagery.

The Mammoth Book of Mountain Disasters

Caught way up on the mountain, no one is safe, from the archetypal nightmare of Tony Kurtz, seen to freeze to death by his stranded rescuers as he hung off the Eiger, to events that unfolded on the Grand Teton, where rescuers narrowly escaped being clubbed to death by their reluctant rescuees. This collection of 35 first-hand accounts will shock and inspire in equal measure. Here is the original draft of Joe Simpson's classic Touching the Void and the first full telling of Jamie Andrew's extraordinary rescue from the Alps, which made headlines in 1999. Plus a specially commissioned account of the epic winter rescue on Mount Ararat, 2000 - the most remote mission ever undertaken by a helicopter-rescue

team. And the rescuers own grim battles for survival. Compiled by one of the world's most respected mountaineers, this volume spans five continents - from the Appalachians to Mount Cook, from Peak Lenin to Siula Grande. It includes some of the brightest stars of mountaineering and mountain rescue: Joe Simpson, Doug Scott, Pete Sinclair, Milos Vrbe, Paul Nunn, Ludwig Gramminger, Karen Glazley, Ken Phillips and Blaise Agresti.

Guardians of the Peaks

Mountain rescue in western Canada developed through the Canadian Pacific Railway's use of Swiss guides to enhance the climbing experience in the early 1900s. These guides brought their knowledge of mountain rescue to the Canadian Rockies. As climbing gained in popularity with the emerging middle classes after the Second World War, tragic accidents became more common. Two accidents in 1954/55 (the deaths of a group of female climbers from Mexico on Mt. Victoria and a group of Philadelphia schoolboys on Mt. Temple) forced the government to develop a professional mountain rescue team through the Park Warden Service under the tutelage of Walter Perren (a Swiss guide and the father of mountain rescue in Canada). Perren essentially turned cowboys into competent rescue personnel, and the story takes off from there. Following five principal men through the first 50 years of mountain rescue in Canada, Guardians of the Peaks also looks at all aspects of the rescue experience. It is the story of personal tragedy and the ability of individuals to cope with this stress-laced, demanding occupation.

Mountain emergency medicine has seen exponential development due to the ever increasing number of people who hike or trek as well as practice extreme sports. Emergency physicians and nurses need to be equipped with the necessary training to be able to manage “on the field” accidents and sicknesses as well as their own physical security. Theoretical knowledge is generally of high level but practical expertise is dangerously lacking in many operators. Furthermore, treatment modalities on the field have not been completely codified and are not supported by internationally-accepted guidelines. Emergency Survival

Call-out is the definitive collection of tales about early mountain rescue in the Highlands of Scotland from Hamish MacInnes – Everest pioneer and arguably the most famous Scottish mountaineer of the twentieth century. In the late 1960s, MacInnes led the Glencoe Mountain Rescue team and together they developed innovative techniques and equipment in order to save lives – often risking their own in the process – whether night or day, and always at a moment's notice. He was a central figure in the rescue during the 1963 New Year tragedy in the Cuillins on the Isle of Skye, and led groundbreaking rescues on Buichaille Etive Mor, Ben Nevis, Bidean nam Bian and many other legendary Scottish mountains. At the heart of the stories in Call-out are the unique characters in the team and wider Glencoe community who demonstrate faultless camaraderie, and – by virtue of MacInnes's engaging storytelling – inject an almost comical slant into these sometimes-grim accounts of misadventure in the mountains. The dark allure of the frozen Scottish peaks provides a foreboding backdrop against which we learn of Hamish MacInnes's concern for human life under even the most extreme conditions. Call-out offers an inspiring portrayal of responsible and dedicated mountaineering practice, which is as pertinent today as ever.
