Seamless City, Urban Planning, Smart Cities, Urban Development, Future of Cities

The Seamless City envisions a future where urban life is effortless and interconnected. It focuses on leveraging smart technology, efficient urban planning, and integrated infrastructure to create a more livable and sustainable environment for its citizens. This holistic approach aims to improve everything from transportation and communication to resource management and public services, fostering a stronger sense of community and enhancing the overall quality of life.

The Endless City

The Urban Age Project by the London School of Economics and Deutsche Bank's Alfred Herrhausen Society.

Living in the Endless City

The companion of Phaidon's popular The Endless City, Living in the Endless City will add the cities of Mumbai, Sao Paulo and Istanbul to the six cities of the first volume with the same mix of compelling photographs, in-depth and beautifully presented data, and smart writing by global thinkers. Each city is explored in a series of essays that address vital themes, from security to climate change, looking closely at the problems that face contemporary cities and examining a variety of solutions. Like the first book, the new one includes the best writing and information from the Urban Age project, a series of conferences held by the London School of Economics that explore vital field of urban development. Drawing on the work of scholars from all over the globe, this book will give the reader access to a wealth of ideas and data about Mumbai, Sao Paulo, Istanbul and, by extension, urban life across the globe. In addition to this close focus on each of the three cities, Living in the Endless City will feature analysis of surveys done in each city. Editors Deyan Sudjic of the Design Museum and Ricky Burdett of the LSE have also chosen the best contributors to both this book and The Endless City to write thematic essays that discuss the ideas and the lessons they have drawn across all nine cities.

Shaping Cities in an Urban Age

An authoritative - and fascinating - investigation into the spatial and social dynamics of cities at a global scale Shaping Cities in an Urban Age is the third addition to Phaidon's hugely successful Urban Age series, published in collaboration with the London School of Economics (LSE) and the Alfred Herrhausen Gesellschaft (AHG). Generously illustrated with photographs, visual data, and statistics, and featuring a series of essays written by leading people in their fields, Shaping Cities in an Urban Age addresses our most urgent contemporary and future urban issues by examining a set of key forces that have combined to create the city as we know it today. From the publisher of The Endless City and Living in the Endless City.

The Image of the City

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Augmented Reality and Virtual Reality

This book features the latest research in the area of immersive technologies, presented at the 5th International Augmented and Virtual Reality Conference, held in Munich, Germany in 2019. Bridging the gap between academia and industry, it presents the state of the art in augmented reality (AR) and virtual reality (VR) technologies and their applications in various industries such as marketing, education, healthcare, tourism, events, fashion, entertainment, retail and the gaming industry. The volume is a collection of research papers by prominent AR and VR scholars from around the globe. Covering the most significant topics in the field of augmented and virtual reality and providing the latest findings, it is of interest to academics and practitioners alike.

The Despot's Accomplice

"For the first time since the end of the Cold War, the world is steadily becoming less democratic. Though the true culprits are dictators and counterfeit democrats, the West is often complicit in contributing to the global decline of democracy. In pursuit of short-term economic and political objectives, governments in Washington, London and Brussels ultimately make the world less prosperous and stable. As Brian Klaas argues in this ... new book, this is in nobody's interests, least of all Western democracies--it is time for a rethink. The Despot's Accomplice draws on interviews on the frontlines of the global struggle for democracy, from a poetry-reading, politician-kidnapping general in Madagascar, and Islamist torture victims in Tunisia, to Belarusian activists tailed by the KGB, and tea-sipping members of the Thai junta"--From publisher description.

The Endless Steppe

THE ENDLESS STEPPE is based on the author's true-life experience. It is one of The Originals from Penguin - iconic, outspoken, first. Esther Rudomin was ten years old when, in 1941, she and her family were arrested by the Russians for being 'capitalists' and transported to Siberia. The next five years spent were spent in exile where they went barefoot and hungry until the end of the Second World War. Despite the hardships endured, Esther's story radiates optimism and is a beautiful example of the resilience of the human spirit. Readers inspired by The Diary of Anne Frank, The Boy in the Striped Pyjamas or The Book Thief will love this book too. The Originals are the pioneers of fiction for young adults. From political awakening, war and unrequited love to addiction, teenage pregnancy and nuclear holocaust, The Originals confront big issues and articulate difficult truths. The collection includes: The Outsiders - S.E. Hinton, I Capture the Castle - Dodie Smith, Postcards from No Man's Land - Aidan Chambers, After the First Death - Robert Cormier, Dear Nobody - Berlie Doherty, The Endless Steppe - Esther Hautzig, Buddy - Nigel Hinton, Across the Barricades - Joan Lingard, The Twelfth Day of July - Joan Lingard, No Turning Back - Beverley Naidoo, Z for Zachariah - Richard C. O'Brien, The Wave - Morton Rhue, The Red Pony - John Steinbeck, The Pearl - John Steinbeck, Stone Cold - Robert Swindells.

City of Endless Night

1920 Dystopian Science Fiction, Alternative History ""He can talk it,"" said my playmates who attended the public schools where all teaching of the language of the outcast nation was prohibited. They invariably elected me to be ""the Germans,"" and locked me up in the old garage while they rained a stock of sun-dried clay bombs upon the roof and then came with a rush to ""batter down the walls of Berlin"" by breaking in the door, while I, muttering strange guttural oaths, would be led forth to be ""exterminated."" On rainy days I would sometimes take my favoured playmates into my uncle's library where five great maps hung in ordered sequence on the panelled wall.... The fourth map was the most fascinating and terrible. Again the black of autocracy appeared, obliterating the red of the Brotherhood of Man, spreading across half of Eurasia and thrusting a broad black shadow to the Yellow Sea and a lesser one to the Persian Gulf... and lines of dotted white retreated in concentric waves till...

Liverpool

The second book in the popular series recording inner city life in Liverpool in the 60s and 70s.

Concrete Cities

Global building and construction cultures are hard-wired to constructing too much, too badly, with major social and ecological consequences. Rob Imrie calls us to build less and to build better as a pre-requisite for enhancing welfare and well-being.

City Quitters

City Quitters portrays creative pioneers pursuing alternative ways of living and working away from big cities. What does it mean to leave city life behind? Can the reality of living in the countryside fulfil our desire for a better, simpler, more creative life? This book is an attempt to shed light on what rural life can be like today, with all its joys and challenges, providing a fresh look at the people and scenes thriving outside urban spaces. From experimental co-habitation in a renaissance castle to oversized artworks on a farm, City Quitters offers a global perspective on creative post-urban life: 22 stories from 12 countries and five continents, all based in places with fewer than 10,000 inhabitants. About the author Karen Rosenkranz is an independent trend forecaster and ethnographer based in London. She

has travelled all over the world spotting shifts in behaviour, attitudes and aesthetics, and has helped creative agencies from Amsterdam to New York uncover important socio-cultural changes. Fascinated by things that haven't found a place yet, and anything that might impact how we live in years to come, Rosenkranz continues to explore the origins of fresh and original ideas with *City Quitters*. Features

- 22 interviews with creative professionals and entrepreneurs who left a big city and are now living and working in a rural or provincial environment
- Offers fascinating insights into the personal and professional lives of creative individuals across the globe
- Shows a fresh approach to rural living beyond rustic pastimes and nostalgia

Rebel Cities: From the Right to the City to the Urban Revolution

Explores cities as the origin of revolutionary politics, where social and political issues are always at the surface, using examples from such cities as New York City and Mumbai to examine how they can be better ecologically reorganized.

Hungry City

Originally published: London: Chatto & Windus, 2008.

The Well-Tempered City

2017 PROSE Award Winner: Outstanding Scholarly Work by a Trade Publisher In the vein of Jane Jacobs's *The Death and Life of Great American Cities* and Edward Glaeser's *Triumph of the City*, Jonathan F. P. Rose—a visionary in urban development and renewal—champions the role of cities in addressing the environmental, economic, and social challenges of the twenty-first century. Cities are birthplaces of civilization; centers of culture, trade, and progress; cauldrons of opportunity—and the home of eighty percent of the world's population by 2050. As the 21st century progresses, metropolitan areas will bear the brunt of global megatrends such as climate change, natural resource depletion, population growth, income inequality, mass migrations, education and health disparities, among many others. In *The Well-Tempered City*, Jonathan F. P. Rose—the man who “repairs the fabric of cities”—distills a lifetime of interdisciplinary research and firsthand experience into a five-pronged model for how to design and reshape our cities with the goal of equalizing their landscape of opportunity. Drawing from the musical concept of “temperament” as a way to achieve harmony, Rose argues that well-tempered cities can be infused with systems that bend the arc of their development toward equality, resilience, adaptability, well-being, and the ever-unfolding harmony between civilization and nature. These goals may never be fully achieved, but our cities will be richer and happier if we aspire to them, and if we infuse our every plan and constructive step with this intention. A celebration of the city and an impassioned argument for its role in addressing the important issues in these volatile times, *The Well-Tempered City* is a reasoned, hopeful blueprint for a thriving metropolis—and the future.

The City in the Middle of the Night

Winner of the 2017 Nebula Award for Best Novel Finalist for the 2017 Hugo Award for Best Novel January is a dying planet - divided between a permanently frozen darkness on one side, and blazing endless sunshine on the other. Humanity clings to life, spread across two archaic cities built in the sliver of habitable dusk. But life inside the cities is just as dangerous as the wastelands outside. Sophie, a student and reluctant revolutionary, is supposed to be dead, after being exiled into the night. Saved only by forming an unusual bond with the enigmatic beasts who roam the ice, Sophie vows to stay hidden from the world, hoping she can heal. But fate has other plans - and Sophie's ensuing odyssey and the ragtag family she finds will change the entire world.

Maximum city

The City is my Monastery

Richard Carter swapped a life of simplicity with an Anglican religious order in the Solomon Islands for parish ministry in one of London's busiest churches, St Martin-in-the-Fields. Seeing a need for monastic values in the centre of the city, he founded the Nazareth Community. Its members gather from everyday life to seek God in contemplation, to acknowledge their dependence on God's grace and to learn to live openly and generously with all. Part story, part spiritual meditation, *The City is My Monastery* offers spiritual wisdom for daily life rooted in the Nazareth Community's seven guiding principles: Silence, Service, Scripture, Sacrament, Sharing, Sabbath Time and Staying.

Invisible Cities

Fifty-five fictional cities, each described in beautiful detail - each with a woman's name... In *Invisible Cities* Marco Polo conjures up cities of magical times for his host, the Chinese ruler Kublai Khan, but gradually it becomes clear that he is actually describing one city: Venice. As Gore Vidal wrote 'Of all tasks, describing the contents of a book is the most difficult and in the case of a marvellous invention like *Invisible Cities*, perfectly irrelevant.' This is a captivating meditation on culture, language, time, memory and the nature of human experience. 'Invisible Cities changed the way we read and what is possible in the balance between poetry and prose... The book I would choose as pillow and plate, alone on a desert island' Jeanette Winterson 'Touches inexhaustibly on the essence of the human urge to create cities, be in cities, speak of cities' Guardian 'A subtle and beautiful meditation' Sunday Times

The Language of Cities

The director of the Design Museum defines the greatest artefact of all time: the city We live in a world that is now predominantly urban. So how do we define the city as it evolves in the twenty-first century? Drawing examples from across the globe, Deyan Sudjic decodes the underlying forces that shape our cities, such as resources and land, to the ideas that shape conscious elements of design, whether of buildings or of space. Erudite and entertaining, he considers the differences between capital cities and the rest to understand why it is that we often feel more comfortable in our identities as Londoners, Muscovites, or Mumbaikars than in our national identities.

The Metropolis of Tomorrow

The metropolis of the future — as perceived by architect Hugh Ferriss in 1929 — was both generous and prophetic in vision. This illustrated essay on the modern city and its future features 59 illustrations.

Alpha City

How London was bought and sold by the Super-Rich, and what it means for the rest of us Who owns London? Today, the city is the epicentre of the world's financial markets, an elite cultural hub, and a place to hide one's wealth. In *Alpha City*, Rowland Atkinson tells the story of eager developers, sovereign wealth, and grasping politicians, all of which paved the way for the plutocratic colonisation of the cityscape. Atkinson moves through the gated communities and the mega-houses of the urban elite, charting how the rich live and their influence on the disturbing rise in evictions and displacements from the city. The book, fully updated, also looks at the capital's prospects in the aftermath of Brexit and the pandemic, showing how the super-rich may capitalise on the crisis, increasing inequality and hardship.

Places I Stopped on the Way Home

'Fee writes with stunning honesty ... utterly breathtaking' - *Bustle* A beautiful memoir from an exciting young writer, Meg Fee, on finding her way in New York City. Full of the dramas and quiet moments that make up a life, told with humour, heart, and hope. In *Places I Stopped on the Way Home*, Meg Fee plots a decade of her life in New York City – from falling in love at the Lincoln Center to escaping the roommate (and bedbugs) from hell on Thompson Street, chasing false promises on 66th Street and the wrong men everywhere, and finding true friendships over glasses of wine in Harlem and Greenwich Village. Weaving together her joys and sorrows, expectations and uncertainties, aspirations and realities, the result is an exhilarating collection of essays about love and friendship, failure and suffering, and above all hope. Join Meg on her heart-wrenching journey, as she cuts the difficult path to finding herself and finding home.

Seeing Like a State

"One of the most profound and illuminating studies of this century to have been published in recent decades."--John Gray, *New York Times Book Review* Hailed as "a magisterial critique of top-down social planning" by the *New York Times*, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail--sometimes catastrophically--in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. "Beautifully written, this book calls into sharp relief the nature of the world we now inhabit."--*New Yorker* "A tour de force."-- Charles Tilly, *Columbia University*

Post-Growth Living

An urgent and passionate plea for a new and ecologically sustainable vision of the good life. The reality of runaway climate change is inextricably linked with the mass consumerist, capitalist society in which we live. And the cult of endless growth, and endless consumption of cheap disposable commodities isn't only destroying the world, it is damaging ourselves and our way of being. How do we stop the impending catastrophe, and how can we create a movement capable of confronting it head-on? In *Post-Growth Living*, philosopher Kate Soper offers an urgent plea for a new vision of the good life, one that is capable of delinking prosperity from endless growth. Instead, she calls for a renewed emphasis on the joys of being, one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time, and less conventional and more creative ways of using it, but also for more fulfilling ways of working and existing. This is an urgent and necessary intervention into debates on climate change.

The Architecture of the City

Aldo Rossi was a practicing architect and leader of the Italian architectural movement *La Tendenza* and one of the most influential theorists of the twentieth century. *The Architecture of the City* is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

Soft City

Imagine waking up to the gentle noises of the city, and moving through your day with complete confidence that you will get where you need to go quickly and efficiently. *Soft City* is about ease and comfort, where density has a human dimension, adapting to our ever-changing needs, nurturing relationships, and accommodating the pleasures of everyday life. How do we move from the current reality in most cities—separated uses and lengthy commutes in single-occupancy vehicles that drain human, environmental, and community resources—to support a soft city approach? In *Soft City* David Sim, partner and creative director at Gehl, shows how this is possible, presenting ideas and graphic examples from around the globe. He draws from his vast design experience to make a case for a dense and diverse built environment at a human scale, which he presents through a series of observations of older and newer places, and a range of simple built phenomena, some traditional and some totally new inventions. Sim shows that increasing density is not enough. The soft city must consider the organization and layout of the built environment for more fluid movement and comfort, a diversity of building types, and thoughtful design to ensure a sustainable urban environment and society. *Soft City* begins with the big ideas of happiness and quality of life, and then shows how they are tied to the way we live. The heart of the book is highly visual and shows the building blocks for neighborhoods:

building types and their organization and orientation; how we can get along as we get around a city; and living with the weather. As every citizen deals with the reality of a changing climate, *Soft City* explores how the built environment can adapt and respond. *Soft City* offers inspiration, ideas, and guidance for anyone interested in city building. Sim shows how to make any city more efficient, more livable, and better connected to the environment.

Cities of God

Cities of God traces urban culture of north America and Western Europe during the 1970s, to ask how theology can respond to the postmodern city. Since Harvey Cox published his famous theological response to urban living during the mid-1960s very little has been written to address this fundamental subject. Through analyses of contemporary film, architecture, literature, and traditional theological resources in Augustine and Gregory of Nyssa, Graham Ward lays out a systematic theology which has the preparation and building of cities as its focus. This is vital reading for all those interested in theology and urban living.

The White City

A permanently frozen London is the setting for Roma Tearne's 'thoughtful exploration' [The Guardian] of survival in a dystopian near-future. 'Tearne reminds us that, woven into London's cosmopolitanism, are memories of places to which individuals can never return' Brixton Review of Books A permanently frozen London is the setting for this harrowing yet lyrical tale of survival in a dystopian near-future. Through endless years of glacial winter, artist Hera has known loss. Her one comfort has been her relationship with Raphael. As the thaw begins, can she track down her elusive lover?

Out of the Mountains

Analyzes four megatrends—population growth, urbanization, coastal life and connectedness-and concludes that future conflict is increasingly likely to occur in sprawling coastal cities; in underdeveloped regions of the Middle East, Africa, Latin America and Asia; and in highly networked, connected settings, in a book that also looks at gangs, cartels and warlords.

Common Space

Space is both a product and a prerequisite of social relations, it has the potential to block and encourage certain forms of encounter. In *Common Space*, activist and architect Stavros Stavrides calls for us to conceive of space-as-commons – first, to think beyond the notions of public and private space, and then to understand common space not only as space that is governed by all and remains open to all, but that explicitly expresses, encourages and exemplifies new forms of social relations and of life in common. Through a fascinating, global examination of social housing, self-built urban settlements, street trade and art, occupied space, liberated space and graffiti, Stavrides carefully shows how spaces for commoning are created. Moreover, he explores the connections between processes of spatial transformation and the formation of politicised subjects to reveal the hidden emancipatory potential of contemporary, metropolitan life.

Deep Mapping the Media City

Going beyond current scholarship on the “media city” and the “smart city,” Shannon Mattern argues that our global cities have been mediated and intelligent for millennia. *Deep Mapping the Media City* advocates for urban media archaeology, a multisensory approach to investigating the material history of networked cities. Mattern explores the material assemblages and infrastructures that have shaped the media city by taking archaeology literally—using techniques like excavation and mapping to discover the modern city's roots in time. *Forerunners: Ideas First* is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, *Forerunners* draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

City of Night

Bold and inventive in style, *City of Night* is the groundbreaking 1960s novel about male prostitution. Rechy is unflinching in his portrayal of one hustling 'youngman' and his search for self-knowledge

among the other denizens of his neon-lit world. As the narrator moves from Texas to Times Square and then on to the French Quarter of New Orleans, Rechy delivers a portrait of the edges of America that has lost none of its power. On his travels, the nameless narrator meets a collection of unforgettable characters, from vice cops to guilt-ridden married men eaten up by desire, to Lance O'Hara, once Hollywood's biggest star. Rechy describes this world with candour and understanding in a prose that is highly personal and vividly descriptive.

Endless Forest, The

A rich, passionate, multilayered portrayal of family strength and endurance from bestselling author Sara Donati In the spring of 1824, in the remote village of Paradise on the New York frontier, Nathaniel and Elizabeth Bonner celebrate a glorious reunion as their children return from far-off places: Lily and her husband from Italy, and Martha Kirby, the Bonners' ward, from Manhattan. In the peace that follows a devastating flood, childhood friends Martha and Daniel, Lily's twin brother, suddenly begin to see each other in a new light. But their growing bond is threatened when Martha's estranged mother arrives back in Paradise. Jemima Southern is a dangerous schemer who has destroyed more than one family, and her anger touches everyone, as do her secrets. Has Jemima come to claim her daughter--or does she have other, darker motives? Whatever transpires, Martha, Daniel, and all the Bonners must stand united against the threats to both heart and home.

The City We Became

'A glorious fantasy, set in that most imaginary of cities, New York' Neil Gaiman on THE CITY WE BECAME 'The most celebrated science fiction and fantasy writer of her generation. . .Jemisin seems able to do just about everything' NEW YORK TIMES 'Jemisin is now a pillar of speculative fiction, breathtakingly imaginative and narratively bold' ENTERTAINMENT WEEKLY Five New Yorkers must band together to defend their city in the first book of a stunning new series by Hugo award-winning and New York Times bestselling author N. K. Jemisin. Every city has a soul. Some are as ancient as myths, and others are as new and destructive as children. New York City? She's got five. But every city also has a dark side. A roiling, ancient evil stirs beneath the earth, threatening to destroy the city and her five protectors unless they can come together and stop it once and for all. 'The most critically acclaimed author in contemporary science fiction and fantasy' GQ 'N. K. Jemisin is a powerhouse of speculative fiction' BUSTLE ***Winner of Best Fantasy at the Audie Awards*** ***Winner of the BSFA Award for Best Novel*** ***Shortlisted for the Hugo Awards*** ***Nominated for the Nebula Awards*** Also by N. K. Jemisin: The Inheritance trilogy The Hundred Thousand Kingdoms The Broken Kingdoms The Kingdom of Gods The Dreamblood Duology The Killing Moon The Shadowed Sun

Jewel of the Endless Erg: Mage Errant

After surviving Skyhold's deadly labyrinth, Hugh and his friends are looking forwards to an uneventful summer. Their teacher Alustin has chartered a sandship for a training expedition into the vast sea of sand known as the Endless Erg, aiming for the wealthy and powerful desert city of Theras Tel. Hugh's happier than he's been in a long, long time, and he's quite excited for the fresh air, sunshine, and quiet. Of course, given Hugh's luck, their summer is going to be anything but quiet. They're about to be plunged into a morass of pirates, monsters, warring cults, flesh-tearing sandstorms, and a conspiracy against Indris Stormbreaker, the dragon queen of Theras Tel herself. At least Hugh's going to get plenty of fresh air and sunshine.

Permutation City

The story of a man with a vision - immortality : for those who can afford it is found in cyberspace. Permutation city is the tale of a man with a vision - how to create immortality - and how that vision becomes something way beyond his control. Encompassing the lives and struggles of an artificial life junkie desperate to save her dying mother, a billionaire banker scarred by a terrible crime, the lovers for whom, in their timeless virtual world, love is not enough - and much more - Permutation city is filled with the sense of wonder.

House on Endless Waters

"Elon powerfully evokes the obscurity of the past and its hold on the present as we stumble through revelation after revelation with Yoel. As we accompany him on his journey...we share in his loss,

surprise, and grief, right up to the novel's shocking conclusion.” —The New York Times Book Review In the tradition of *The Invisible Bridge* and *The Weight of Ink*, “a vibrant, page-turning family mystery” (Jennifer Cody Epstein, author of *Wunderland*) about a writer who discovers the truth about his mother's wartime years in Amsterdam, unearthing a shocking secret that becomes the subject of his magnum opus. Renowned author Yoel Blum reluctantly agrees to visit his birthplace of Amsterdam to promote his books, despite promising his late mother that he would never return to that city. While touring the Jewish Historical Museum with his wife, Yoel stumbles upon footage portraying prewar Dutch Jewry and is astonished to see the youthful face of his beloved mother staring back at him, posing with his father, his older sister...and an infant he doesn't recognize. This unsettling discovery launches him into a fervent search for the truth, shining a light on Amsterdam's dark wartime history—the underground networks that hid Jewish children away from danger and those who betrayed their own for the sake of survival. The deeper into the past Yoel digs up, the better he understands his mother's silence, and the more urgent the question that has unconsciously haunted him for a lifetime—Who am I?—becomes. Part family mystery, part wartime drama, *House on Endless Waters* is “a rewarding meditation on survival” (Kirkus Reviews, starred review) and a “deeply immersive achievement that brings to life stories that must never be forgotten” (USA TODAY).

Destination Saigon

Get a taste of the real Vietnam and its people on a sometimes funny, always fascinating journey from the bustling cities to the out of the way villages, into Buddhist monasteries and along the Mekong - a real delight for armchair travellers and those contemplating their own adventure.

The Endless Skies

Shannon Price's *The Endless Skies* is a breakout standalone epic fantasy about shapeshifting warriors perfect for fans of Adrienne Young and *Wonder Woman*. High above the sea, floats the pristine city of the Heliana. Home to winged-lion shapeshifters—the Leonodai—and protected from the world of humans by an elite group of warriors, the Heliana has only known peace. After years of brutal training, seventeen-year-old Rowan is ready to prove her loyalty to the city and her people to become one of the Leonodai warriors. But before Rowan can take the oath, a deadly disease strikes the city's children. Soon the warriors—including two of Rowan's closest friends—are sent on a dangerous mission to find a fabled panacea deep within enemy lands. Left behind, Rowan learns a devastating truth that could compromise the mission and the fate of the Heliana itself. She must make a decision: stay with the city and become a warrior like she always dreamed, or risk her future in an attempt to save everyone she loves. Whatever Rowan decides, she has to do it fast, because time is running out, and peace can only last so long... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Endless Possibility

After the disastrous Planet X party, Noah Lake knows he must learn to cope with his anger and bitterness, to learn to live as he is and not as he had been. He sets out on an impossible journey, alone, in the hopes of making himself worthy of Charlotte's love, and to slay the demons of an old life that is lost to him. As he makes his arduous way across Europe, following Charlotte's tour, Noah writes of his experiences that will become his memoir, and it is only after reading his words that Charlotte comes to fully understand the hardships Noah endured for their sake; a journey that nearly broke him in mind, body, and spirit. She knows what she must do: show Noah that while she is the light in his darkness, he is the music in her heart, and that without him, she'd be just as lost. *Endless Possibility* is the final chapters in a love story about acceptance, peace, and the bond between two souls who have found their equal in each other, and the happily ever after they both deserve.
