... a fascinating group of people--by turns loving, needing, watchful, treacherous. These and other aspects of love are artfully hidden by the protagonists until forced into the light..." —Peter Rankin. "The dampness of London, the bright sunlight and warmth of San Bernardino, the metropolitan atmosphere of Paris, and the greenness of summer at the lake are all well evoked.... Easy reading for a long holiday weekend," —Joanna Manning, The Downtowner

Aspects of Love

Aspects of Love is a book for those - worn out by cynicism - fatigued by sensory assault - wearied by the drive to experience new thrills - made fragile by the trivial - sickened by a lack of spiritual depth. In a world that longs for intimacy, this book casts a long ray of hope. J. Barrie Shepherd offers the loving gift of gentle, unhurried reflection on 1 Corinthians 13. He frames his thoughtful reflections in three parts: "The Necessity of Love," "The Qualities of Love," and "The Endurance of Love." Writing with the poet's sensitivity toward language and rhythm, Shepherd uses verses of scripture from 1 Corinthians 13 to examine facets of love, including communication, irritability, kindness, jealousy, humility, forgiveness, happiness, and hope. He draws from the works of Golda Meir, Paul Tournier, Martin Luther King, Jr.,

and Winston Churchill and closes each chapter with a prayer. God can dazzle us with the magnificance of the universe. But the heart of the universe reveals its glory in the compassion, grace, and love that come to us when we need it most, telling us, ... "You matter." --J. Barrie Shepherd

12 Aspects (of Love)

In the introduction I referenced the work of Professor Hani Henry, According to him, chair and associate professor of psychology in the Department of Sociology, Anthropology, Psychology and Egyptology at AUC, Robert Sternberg's psychological theory covers the most common reasons why we fall in love, namely: intimacy, passion and commitment. But what this entails? We have aspects and needs and wants and these must be addressed properly. These aspects are Biological, Physical, Financial, Occupational, Environmental, Social, Emotional, Cultural, Intellectual, Psychological, Moral and Spiritual. I gathered relevant knowledge and works regarding them. We can fall in love with them.

Aspects of Love

I have published single poems before in anthologies, magazines and the poetry website, Secret Attic, as a competition finalist and prize winner. We all find love at some point on this life's road. In these poems, I explore this complex journey of feelings, emotions and hopes lived out between two shared souls. Each poem is a cove on love's myriad path, inviting the reader to come in and share its succulent sweetness and dark despair. I have tried to touch that nerve in each of us, in a way that is romantic but real, traditional yet modern. Some of these poems are sensual and erotic, but they all try to convey honest meaning and understanding. This is a journey of love found, lived, lost and found again. From pleasures peak to the wilderness and back. Love is the door we keep open inside and hope will never close, for to love and be loved, means we are not alone. Welcome and well met ~Strider~ Love is a canvas furnished by Nature and embroidered by imagination~ Voltaire~

Aspects of Romantic Love: Perceptions on Love and Marriage is a modest attempt to express my perceptions of romantic love and related themes. To love and to be loved are exciting aspects of a person's emotional life. The pivotal theme of the book is love, romance, marriage and those alliances which hamper a harmonious conjugal and family life. Romantic love is a fascinating passion and an ecstatic experience. The very word 'romance' captures our imagination and fills our hearts with exciting feelings. The book is not a scientific treatise on love. It only encapsulates romantic love with all its appealing themes. My effort is to describe the splendid experience called love exclusively through my impressions. The book is a product of the year 2020 marred by the Covid-19 pandemic and the terrible human exodus during the lockdown of 2020. The unexpected global and national scenario gave ample time and opportunity for reading, writing and reflection. Writing on a subject like romantic love helped overcome the lethargy and the feeling of devastation during the lockdown. It has been an exciting creative activity and a marvellous sensation of diversion.

Aspects of Love

"A major case study of the book concerns men who have murdered their wives or partners allegedly 'out of love'. It is estimated that over 30% of all female murder victims in the United States die at the hands of a former or present spouse or partner. How can murdering a loved one be associated with the assumed moral and altruistic love? Not only is love intrinsically ambivalent, but it can also give rise to dangerous consequences. Some of the worst evils have been committed in the name of love."--BOOK JACKET.

Tapestry of Love

The title of Dr. Harris' book suggests that life is like a two-sided coin: it can be an Ocean of Love but can also be a Sea of Troubles. The subtitle clarifies this paradox: first, there are many signs of God's reality and activity in the world, and the first section of the book examines ways in which people are aware of God as both a creative and immanent presence in life. The "signs" of God are not philosophical "proofs" but empirical realities accessible to all people. In the second section, the biblical responses to suffering in the world are explored--through both Old and New Testaments. In the third section the writings of two modern apologists, C. S. Lewis and Philip Yancey, are assessed, and then finally there is a chapter of interviews with people who have known suffering in their lives.

Throughout the tales in the *Confessio Amantis*, John Gower proposes that reciprocal love is the remedy to what ails man and society. This book explores how Gower uses the aspects of love in the *Confessio*--the notions of kinde, or passionate love, and reason in the sphere of love; honeste love in the *Marriage Tales of the Four Wives*; passionate and excessive love in the *Forsaken Women's tales*; and Amans's lovesickness. In her thorough examination of Gower's work, Ellen S. Bakalian shows how Gower emphasizes and illustrates a belief that reason must rule man in all things, including his natural instincts to love.

The Prudence of Love focuses upon the intersection of philosophical, theological, and psychological issues related to love. Eric Silverman defends an account of love derived from the views of Thomas Aquinas and argues that love provides numerous psychological and relational benefits that increase the lover's happiness. Furthermore, he argues that love is beneficial according to all major contemporary accounts of happiness.

In The Complete Book of 1990s Broadway Musicals, Dan Dietz examines in detail every musical that opened on Broadway during the 1990s. In addition to including every hit and flop that debuted during the decade, this book highlights revivals and personal-appearance revues. The 1990s saw major changes in the Broadway musical, most notably: the so-called Disneyfication of shows, with the debuts of long-running hits like Beauty and the Beast and The Lion King.

Aspects of Love

A new century, new threats to love . . . Love without risks is like war without deaths - but, today, love is threatened by an alliance of liberalism and hedonism. Caught between consumerism and casual sexual encounters devoid of passion, love - without the key ingredient of chance - is in danger of withering on the vine. In In Praise of Love, Alain Badiou takes on contemporary 'dating agency' conceptions of love that come complete with zero-risk insurance - like US zero-casualty bombs. He develops a new take on love that sees it as an adventure, and an opportunity for re-invention, in a constant exploration of otherness and difference that leads the individual out of an obsession with identity and self. Liberal,

libertine and libertarian reductions of love to instant pleasure and non-commitment bite the dust as Badiou invokes a supporting cast of thinkers from Plato to Lacan via Karl Marx to form a new narrative of romance, relationships and sex - a narrative that does not fear love.

Aspects of Love

Why speak about love in all its facets? Love is a diamond—we cannot fathom its depths. By a combination of all its facets, we hope to reach a vision of true love. I realize that all people are looking for love so they can say life is beautiful. Love appears in different forms, different versions, different ages, and different cultures. It is present everywhere, but transparent, like wind and water. Could it be an element of nature that feeds us daily? Everybody knows that when we fall in love, we just need fresh water to survive. Love is the word we use the most to express a feeling of satisfaction. We use it more to express our personal sensations than those inspired in somebody else. This is not our fault; we are taught growing up to hide our feelings and say things halfway, so as not to shock. That's what it means to live in community. Society attempts to control people who have chosen to live inside it—to control love—by imposing rules that restrict behavior. Sex is one of its priorities. In the olden days, homosexuality was a normal sexual behavior; it was tolerated. At the time of Kings, incest was accepted. Each period imposes sexual taboos, and as a consequence, nowadays we live with so many taboos we don't understand them in depth. To my mind, taboos are designed to manage the general interest and safeguard society. I also think that they have to arise themselves from a loving sentiment.

This book offers an overview of Christian theology organized around the twin themes of divine and human love. The book covers the traditional theological topics as well as basic questions of theological method. It seeks to integrate a focus on love throughout. While love is regularly canvassed as a dominant theme in Christian thought, it has rarely been the focus of Christian theological construction or a constraint on theological formulation. The book seeks to suggest, chapter by chapter, how a given topic relates to the broad theme of love. The book is written in a way designed to make it accessible to university students and educated laypersons. At the same time, it takes positions on controverted scholarly issues, and the methodological approach outlined at the beginning will be of interest to academic theologians.

These selections from the sermons and writings of Archbishop Oscar Romero shared the message of a great holy prophet of modern times. Three short years transformed Romero, archbishop of San Salvador, from a conservative defender of the status quo into one of the church's most outspoken voices of the oppressed. Though silenced by an assassin's bullet, his spirit and the challenge of his life lives on.

"Waksman brings a new understanding to familiar material by treating it in an original and stimulating manner. This book tells 'the other side of the story.'"—Philip Auslander, author of *Performing Glam Rock: Gender and Theatricality in Popular Music* "While there are a number of histories of punk and metal and numerous biographies of important bands within each genre, there is no comparable book to *This Ain't the Summer of Love*. The ultimate contribution the book makes is to provoke the reader into rethinking the ongoing fluid relationship between punk, a music that enjoyed considerable critical support, and metal, a music that has been systematically denigrated by critics. This book is the product of superior scholarship; it truly breaks fresh ground and as such it is an important book that will be regularly cited in future work."—Rob Bowman, Professor of Music at York University and author of *Soulsville USA: The Story of Stax Records* "Debunking simplistic assumptions that punk rebelled and heavy metal conformed, Steve Waksman demonstrates with precisely chosen examples that for decades the two shared strategies and concerns. As a result, this important volume is among the first to extend to rock history the same much-needed revisionism that elsewhere has transformed our understanding of minstrelsy, blues, country music, and pop."—Eric Weisbard, author of *Use Your Illusion I & II*

The Mysteries of Love: Decoding the Secrets of the Heart

Organizations are not human, but they are made up of people. Examining the organization, functioning, growing and developing and moving together as one unit, the well-being and success of that organization depends on the well-being of people that make it up. Love, in its various forms, is the energy that motivates and fuels creativity, care, innovation, progress and well-being. Traditionally, organizational structures have been set up to support compliance and command and control, which often discourages love and creates policies against love at the workplace. The result has been reduced growth, productivity and retention of businesses as well as reduced well-being for employees. This reduced connectivity between individuals has also, at a higher level, adversely affected society. Without love, people are working and performing with reduced energy, and at reduced capacity. While prior research has been focused on love at the workplace from the viewpoint of psychologists, this book explores the impact of love within organizational contexts from various viewpoints including management, psychology, and philosophy. It explores love in the organizational context by looking at how it affects meaning, purpose, well-being, motivation, faith, care, spiritual development and how the identity and well-being of each person in the organization positively affects retention and the growth and success of that organization. It will be of interest to researchers, academics, and advanced students in the fields of organizational studies, leadership, and management.

The Complete Cases of Inspector Allhoff

Brilliant, decisive, and hard-charging, Deputy Inspector Allhoff was the NYPD's ace detective until bullets from a mobster's machine gun robbed him of his legs, his career, and--in the opinion of an associate--his sanity. Yet Allhoff was too good a man to be put out to pasture, so New York's police commissioner found a way to keep him employed and refer to him such cases as the department couldn't or wouldn't handle. Confined to a wheelchair and operating from a seedy tenement flat, Allhoff is assisted by two cops: Battersly, the rookie patrolman whose brief moment of cowardice cost the inspector his legs, and Simmons, the bitter career cop who detests Allhoff but sticks with the embittered cripple to protect his own pension. Created by D.L. Champion, Inspector Allhoff denied most conventions of detective-pulp fiction. He could never be confused for one of Raymond Chandler's knights errant, trudging down those mean streets. Allhoff was no Rover Boy in trench coat and fedora. He was, in fact, a sadist and a psychopath. With 30 entries published between 1938 and 1946, the Allhoff series was among the most popular and long-lived to appear in Dime Detective, the prestigious crime pulp second only to the legendary Black Mask in its impact on the genre.

Doc Savage; His Apocalyptic Life

A biography of Doc Savage, the golden giant who fought his way valiantly through 181 adventures in his fight against crime.

The Complete Cases of Cash Wale, Volume 1

Written by Peter Paige, one of Black Mask editor Fanny Ellsworth's finds after succeeding Joseph Shaw's tenure in that same role, Paige introduced the tough-as-nails detective Cash Wale and partner Sailor Duffy: a series worthy of the esteemed lineage of Black Mask magazine. Quickly plucked by Black Mask's rival, Dime Detective, the cases of Cash Wale were a mainstay of that magazine for the next decade. Never before in book form, this edition collects his first five cases: "Voodoo Frame," "The Corpse Promoter," "Lotta Had a Husband," "Wanted: Dead and Alive!," and "The Bullet From Nowhere." And it includes an all-new introduction by popular fiction authority John Wooley.

The Complete Cases of Steve Midnight, Volume 1

Down and out former playboy Steven Middleton Knight's fortune was destroyed by the Depression. Now a cabbie for the Red Owl Cab Company, he never fails to take on another mystery with each new fare. Created by John K. Butler, this fast-paced, Los Angeles-based hard-boiled series was published between 1940 and 1942 in the pages of Dime Detective, the prestigious crime pulp second only to the legendary Black Mask in its impact on the genre. Contains the following stories: "The Dead Ride Free," "The Man from Alcatraz," "Hacker's Holiday," and "The Saint in Silver."

The Complete Cases of Seekay

The cases he takes up are often bizarre and grotesque, but no more so than this anonymous private investigator himself: Seekay's entire face is covered by a mask of pink celluloid, with only his "burning black eyes" visible to those who come into contact with him-and who almost invariably are unnerved by the experience, whether friend or foe. Collecting the entire series, written by the writer of The Avenger, Paul Ernst. With an introduction by Will Murray.

What Should Schools Teach?

The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in What Should Schools Teach? The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

Murder Costs Money

Author D.L. Champion's knack for penning quirky series characters reached a new height with his stories of skinflint shamus Rex Sackler, one of Black Mask's longest-running and most beloved series. Already a reader favorite for his Inspector Allhoff stories in Black Mask's companion title, Dime Detective, Champion chronicled the offbeat cases of Rex Sackler, the greedy gumshoe who "could squeeze a nickel till the buffalo cried uncle." The Rex Sackler series allowed Champion to display his talent for sardonic wit and humor in more than two dozen frequently hilarious novelettes published in

Black Mask during the 1940s. This volume collects the first eight stories. With an all-new introduction by Ed Hulse.

The Complete Cases of Steve Midnight, Volume 2

Down and out former playboy Steven Middleton Knight's fortune was destroyed by the Depression. Now a cabbie for the Red Owl Cab Company, he never fails to take on another mystery with each new fare. Created by John K. Butler, this fast-paced, Los Angeles-based hard-boiled series was published between 1940 and 1942 in the pages of Dime Detective, the prestigious crime pulp second only to the legendary Black Mask in its impact on the genre. Volume 2 collects the final five stories: "The Killer was a Gentleman," "Dead Man's Alibi," "The Hearse from Red Owl," "Death and Taxis," and "The Corpse That Couldn't Keep Cool."

The Corpse Clue

Prolific pulp fiction author Donald Barr Chidsey's long-running series about hard-boiled Miami cop Sgt. Wentworth L. McGarvey and his sidekick, Detective Morton, was one of the most popular series to see print in Detective Fiction Weekly magazine in the late 1930s, running over 30 installments. Never before in book form, the Morton & McGarvey series is finally collected in order, along with the original pulp magazine illustrations. Volume 1 contains the first five stories from when the series was originally running in Dime Detective magazine.

Murder Pays 7 to 1

Author D.L. Champion's knack for penning quirky series characters reached a new height with his stories of skinflint shamus Rex Sackler, one of Black Mask's longest-running and most beloved series. Already a reader favorite for his Inspector Allhoff stories in Black Mask's companion title, Dime Detective, Champion chronicled the offbeat cases of Rex Sackler, the greedy gumshoe who "could squeeze a nickel till the buffalo cried uncle." The Rex Sackler series allowed Champion to display his talent for sardonic wit and humor in more than two dozen frequently hilarious novelettes published in Black Mask during the 1940s. This volume collects the next six stories, along with an all-new introduction by Karl Schadow on the long-forgotten Rex Sackler radio show.

Hate Speech Law

Hate speech law can be found throughout the world. But it is also the subject of numerous principled arguments, both for and against. These principles invoke a host of morally relevant features (e.g., liberty, health, autonomy, security, non-subordination, the absence of oppression, human dignity, the discovery of truth, the acquisition of knowledge, self-realization, human excellence, civic dignity, cultural diversity and choice, recognition of cultural identity, intercultural dialogue, participation in democratic self-government, being subject only to legitimate rule) and practical considerations (e.g., efficacy, the least restrictive alternative, chilling effects). The book develops and then critically examines these various principled arguments. It also attempts to de-homogenize hate speech law into different clusters of laws/regulations/codes that constrain uses of hate speech, so as to facilitate a more nuanced examination of the principled arguments. Finally, it argues that it is morally fitting for judicial and legislative judgments about the overall warrant of hate speech law to reflect principled compromise. Principled compromise is characterized not merely by compromise over matters of principled concern but also by compromise which is itself governed by ideals of moral duty or civic virtue (e.g., reciprocity, equality, and mutual respect).

America Walks into a Bar

When George Washington bade farewell to his officers, he did so in New York's Fraunces Tavern. When Andrew Jackson planned his defense of New Orleans against the British in 1815, he met Jean Lafitte in a grog shop. And when John Wilkes Booth plotted with his accomplices to carry out an assassination, they gathered in Surratt Tavern. In America Walks into a Bar, Christine Sismondo recounts the rich and fascinating history of an institution often reviled, yet always central to American life. She traces the tavern from England to New England, showing how even the Puritans valued "a good Beere." With fast-paced narration and lively characters, she carries the story through the twentieth century and beyond, from repeated struggles over licensing and Sunday liquor sales, from the Whiskey Rebellion to the temperance movement, from attempts to ban "treating" to Prohibition and repeal. As the cockpit of

organized crime, politics, and everyday social life, the bar has remained vital--and controversial--down to the present. In 2006, when the Hurricane Katrina Emergency Tax Relief Act was passed, a rider excluded bars from applying for aid or tax breaks on the grounds that they contributed nothing to the community. Sismondo proves otherwise: the bar has contributed everything to the American story. Now in paperback, Sismondo's heady cocktail of agile prose and telling anecdotes offers a resounding toast to taprooms, taverns, saloons, speakeasies, and the local hangout where everybody knows your name.

Doctors and Torture

This book brings into sharp relief the extent to which the medical profession has enabled or participated in actions that are at moral crossroads. Physical and psychological abuse and violations of medical codes have already been brought to light by concerned bioethicists responding to ethical lapses of the "war on terror." This book goes to the next level by looking at three areas that also merit our attention and call us to speak out against abuses. These are (1) dehumanization (such as forced nudity, hooding, sensory deprivation, exploitation of phobias, waterboarding, and environmental manipulation), (2) non-consensual forced-feeding, and (3) solitary confinement. Each area raises important questions for the medical profession. Author Wanda Teays calls upon doctors and nurses to reflect on the role they play in the unethical treatment of prisoners and detainees by crossing moral boundaries around each of these areas. In the process, we are reminded that bioethics is global, not local — and the concerns of the discipline encompass issues with a wider scope.

Intelligence, Biosecurity and Bioterrorism

This book explores how potential bio-threats and risks may evolve post 9/11 given the rapid changes in biotechnology and synthetic biology. It also explores what role intelligence communities can play in understanding threats and risks. It argues that although bio-threats and risks are largely low probability and high impact in nature, intelligence in 'Five Eyes' countries remain insufficiently prepared to understand them. This book identifies key areas where intelligence reforms need to take place including a more strategic and systematic collaboration between national security/law enforcement intelligence and the scientific community. It is aimed at intelligence analysts, those in the scientific community working on health security threats, policy makers and researchers working on biosecurity and bioterrorism threats and risks.

Ethics and Cyber Warfare

Présentation de l'éditeur : "In this work, an internationally-respected authority in military ethics describes a wholly new kind of cyber conflict that has utterly confounded the predictions of earlier experts in information warfare. Comparing this "state-sponsored hacktivism" to the transformative impact of "irregular warfare" in conventional armed conflict, Lucas offers a critique of legal approaches to governance, and outlines a new approach to ethics and "just war" reasoning (grounded in the political philosophies of Alasdair MacIntyre, John Rawls, and Jürgen Habermas) that provides both a framework for understanding these newly-emerging norms of practice for cyber conflict, and the basis for a professional "code of ethics" for the new generation of "cyber warriors." "

Summer Shock

We live in a world of "fake news\

Dixie

This book is an introduction to both offensive and defensive techniques of cyberdeception. Unlike most books on cyberdeception, this book focuses on methods rather than detection. It treats cyberdeception techniques that are current, novel, and practical, and that go well beyond traditional honeypots. It contains features friendly for classroom use: (1) minimal use of programming details and mathematics, (2) modular chapters that can be covered in many orders, (3) exercises with each chapter, and (4) an extensive reference list. Cyberattacks have grown serious enough that understanding and using deception is essential to safe operation in cyberspace. The deception techniques covered are impersonation, delays, fakes, camouflage, false excuses, and social engineering. Special attention is devoted to cyberdeception in industrial control systems and within operating systems. This material is supported by a detailed discussion of how to plan deceptions and calculate their detectability and effectiveness. Some of the chapters provide further technical details of specific deception techniques

and their application. Cyberdeception can be conducted ethically and efficiently when necessary by following a few basic principles. This book is intended for advanced undergraduate students and graduate students, as well as computer professionals learning on their own. It will be especially useful for anyone who helps run important and essential computer systems such as critical-infrastructure and military systems.

Reprogramming the World

Featuring a wide range of international case studies, Ethics, Technology, and Engineering presents a unique and systematic approach for engineering students to deal with the ethical issues that are increasingly inherent in engineering practice. Utilizes a systematic approach to ethical case analysis -- the ethical cycle -- which features a wide range of real-life international case studies including the Challenger Space Shuttle, the Herald of Free Enterprise and biofuels. Covers a broad range of topics, including ethics in design, risks, responsibility, sustainability, and emerging technologies Can be used in conjunction with the online ethics tool Agora (<http://www.ethicsandtechnology.com>) Provides engineering students with a clear introduction to the main ethical theories Includes an extensive glossary with key terms

Introduction to Cyberdeception

Social science from Western countries continues to have the greatest global influence, but the field is expanding rapidly in Asia and Latin America, particularly in China and Brazil. In sub-Saharan Africa, social scientists from South Africa, Nigeria and Kenya produce 75% of academic publications. In South Asia, barring some centres of excellence in India, social sciences as a whole have low priority. These are a few of the findings from World Social Science Report, 2010: Knowledge divides. Produced by the International Social Science Council (ISSC) and co-published with UNESCO, the Report is the first comprehensive overview of the field in over a decade. Hundreds of social scientists from around the world contributed their expertise to the publication. Gudmund Hernes, President of the ISSC, Adebayo Olukoshi, Director of the United Nations African Institute for Economic Development and Planning (IDEP), Hebe Vessuri, Director, Venezuelan Institute for Scientific Research (IVIC), and François Héran, Director of Research, National Institute for Demographic Studies (INED), France, are among the experts who presented the Report during its official launch at UNESCO Headquarters in Paris on 25 June 2010.

Ethics, Technology, and Engineering

Provides the first comprehensive post-Heller account of the Second Amendment as constitutional law - dispelling many myths along the way.

World Social Science Report 2010

In the American judicial system, jurors hold an awesome responsibility. They have the power to grant millions of dollars in damages, to declare someone guilty or not guilty of a crime, and, in some states, to decide if another human being should live or die. The twelve real-life court cases presented here not only offer students a fascinating inside look at the court system, they give them the opportunity to step into the jury box and experience American justice in action. All the key factors of jury trials are discussed: expert witnesses, the allowance of certain kinds of evidence, claims of diminished capacity, and much more. Each case is followed by a series of interactive questions that test readers' knowledge of the issues involved. And at the end of each chapter students will find out how the real jury decided—and why. As entertaining as it is educational, You're the Jury offers a hands-on introduction to a unique aspect of the American legal system. Norbert Ehrenfreund has served as a judge for seventeen years in the Superior Court of California. Lawrence Treat is a founder and former president of the Mystery Writers of America, a three-time Edgar Allan Poe Award winner, and the author of the highly successful Crime and Puzzlement series.

The Positive Second Amendment

Frederick Nebel's unforgettable character Jack Cardigan was one of the main reasons behind the success of the legendary Dime Detective Magazine. His hard-boiled P.I. stories were a major influence to other writers of the era, yet only a handful have been reprinted since their original 44-story run eighty years ago. Volume 1 of this series contains the first 11 installments, complete and uncut, with

an all-new introduction by Will Murray and the original illustrations by John Fleming Gould. "Death Alley (November, 1931)," "Hell's Pay Check (December, 1931)," "Six Diamonds and a Dick (January, 1932)," "And There Was Murder (February, 1932)," "Phantom Fingers (March, 1932)," "Murder on the Loose (April, 1932)," "Rogues' Ransom (August, 1932)," "Lead Pearls (September, 1932)," "The Dead Don't Die (October, 1932)," "The Candy Killer (November, 1932)," and "A Truck-Load of Diamonds (December, 1932)."

A Germaphobic P.I. in Mexico City who has "a taste for clothing loud as a thunderbolt," Mercado is considered "the smartest detective in Mexico." Battling mystery as well as the corrupt Colonel Gomez of the Federal District Police, Mercado is the first of his kind in popular fiction. Written by D.L. Champion, this eccentric P.I. appeared in a number of stories published in the 1940s in the pages of Dime Detective, the prestigious crime pulp second only to the legendary Black Mask in its impact on the genre.

The Complete Casebook of Cardigan, Volume 1

Intelligence professionals are employees of the government working in a business that some would consider unethical-the business of spying. This book looks at the dilemmas that exist when one is asked to perform a civil service that is in conflict with what that individual believes to be "ethical." This is the first book to offer the best essays, articles, and speeches on ethics and intelligence that demonstrate the complex moral dilemmas in intelligence collection, analysis, and operations that confront government employees. Some are recently declassified and never before published, and all are written by authors whose backgrounds are as varied as their insights, including Robert M. Gates, former Director of the Central Intelligence Agency; John P. Langan, the Joseph Cardinal Bernardin Professor of Catholic Social Thought at the Kennedy Institute of Ethics, Georgetown University; and Loch K. Johnson, Regents Professor of Political Science at the University of Georgia and recipient of the Owens Award for contributions to the understanding of U.S. intelligence activities. To the intelligence professional, this is a valuable collection of literature for building an ethical code that is not dependent on any specific agency, department, or country. Managers, supervisors, and employees of all levels should read this book. Creating the foundation for the study of ethics and intelligence by filling in the gap between warfare and philosophy, Ethics of Spying makes the statement that the intelligence professional has ethics.

Champions Vol. 2

Black Mask, the greatest American detective magazine of all time, is back with another issue. This time around, it includes nine new stories in the Black Mask vein by Brian Townsley, Jane Jakeman, Brian Stanley, Hannah Honeybun, William Burton McCormick, Frank Megna, Jonathan Sheppard, Michael Bracken, Jim Doherty, as well as a new article on Raymond Chandler's The Little Sister by Katrina Younes. In addition, Boris Dralyuk has kindly supplied his translation of Isaac Babel's "Lyubka the Cossack" and arranged for its reprinting here. And, as with previous issues, Black Mask collects some of the best hard-boiled detective fiction from the Popular Publications vaults, as written by some of the genre's best: Dashiell Hammett, D.L. Champion, Carroll John Daly, Frederick Nebel, T.T. Flynn, and Frederick C. Davis.

The Complete Cases of Mariano Mercado, Volume 1

Nanobiotechnology is the convergence of existing and new biotechnology with the 1 ability to manipulate matter at or near the molecular level. This ability to manipulate matter on a scale of 100 nanometers (nm) or less is what constitutes the nanotechnology revolution occurring today, the potentially vast economic and social implications of which are yet to be fully understood (Royal Society, 2004). The most immediate way to understand the implications of nanobiotechnology for ethics is to consider the real life concerns of communities that are mobilizing within civil society. The conflicts and ethical

debates surrounding nanotechnology will, almost by definition, emerge on the fault lines between different civil society actors, researchers and financial interests associated with nanobiotechnology, as well as (potentially) government regulators. These fault lines are all reflected within the concerns (as expressed discursively) of the communities mobilizing. This chapter will explore converging disciplines regarding converging technologies. Converging Technologies (CT) are already a familiar theme in the next generation of biotechnology, nanotechnology, pharmacogenomics and proteomics research and development. Nanobiotechnology means that previously separate disciplines (IT, physics, chemistry, and biology) are merging and converging to create new applications and even new life forms through converged technological platforms. Schummer (2004), and Glimell and Fogelberg (2003, p. 43), note the predominance of interdisciplinarity as a core theme of nano-discourse.

Black Mask 2019 Yearbook

"Every time I find the meaning of life, they change it." The words of Reinhold Niebuhr provide the title and set the tone for what is a wryly humorous look at some of the great philosophical pronouncements on the most important question we can face. Daniel Klein's philosophical journey began fifty years ago with just this conundrum; he began an undergraduate degree in philosophy at Harvard University to glean some clue as to what the answer could be. Now in his seventies, Klein looks back at the wise words of the great philosophers and considers how his own life has measured up. Told with the same brilliantly dry sense of humour that made *Travels with Epicurus* a Sunday Times bestseller, *Every Time I Find the Meaning of Life, They Change It* is a pithy, dry, and eminently readable commentary on one of the most profound subjects there is.
