Fresh Water in International Law

Fresh water is an environmental, economic, social, and cultural commodity. This book provides a thorough assessment of its protection, management, and uses in international law. It explores the international, regional, and national regulatory frameworks that make up the international legal regime regulating fresh water.

Nile Water Rights

The book provides a comprehensive assessment of the law governing the use and management of the Nile and considers, more broadly, how international water law can guide the development of a legal and institutional framework for cooperation over shared freshwater resources. It defines the current state of international water law and discusses the content of the United Nations Convention on the Law of the Non-Navigational Uses of International Watercourses. On this basis, it assesses the Nile water treaties and the 2010 Cooperative Framework Agreement for the Nile, and examines their compliance with international law, with a specific focus on the legal consequences of South Sudan's secession from Sudan. Moreover, the book recommends important amendments to the 2010 Agreement. Building on these recommendations, it addresses the implementation of the principle of equitable and reasonable use regarding the Nile, illustrating the extent to which the principle can provide a conceptual framework for regulating water use. The book is a valuable resource for academics and practitioners alike as it combines legal assessment with a discussion of how international water law principles can be implemented in practice.

The Un Convention on the Law of the Non-Navigational Uses of International Watercourses

The United Nations Convention on the Law of the Non-Navigational Uses of International Watercourses plays a crucial role in protecting and managing international watercourses and other sources of fresh water. Boisson de Chazournes, Mbengue, Tignino, and Sangbana head a team of experts in this Commentary, examining the travaux préparatoires leading to the Convention and the practice that has developed since the adoption of the Convention in 1997. Tackling the rationale and objectives of the provisions, they offer crucial insights to the Convention's impact on the development of a universal regime for shared water resources. Examining cross-cutting topics such as the core water principles, the prevention and settlement of water disputes, the relationship between the Convention and other legal instruments, as well as the role of the ICJ and other judicial means to solve water disputes, this book is crucial to all those who seek a deep understanding of water law.

African Basin Management Organizations

In African Basin Management Organizations - Contribution to Pollution Prevention of Transboundary Water Resources, Komlan Sangbana highlights how the protection of water resources and their ecosystems has become a key focus of basin organizations in Africa.

Cross-border Water Trade: Legal and Interdisciplinary Perspectives

Cross-border Water Trade: Legal and Interdisciplinary Perspectives is a critical assessment of one of the growing problems faced by the international community - the global water deficit. Apart from theoretical considerations it has very practical consequences, as cross-border water trade appears to constitute one of the most effective ways of balancing water deficits worldwide.

Recueil Des Cours

The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects. The work of the Hague Academy receives the support and recognition of the UN. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law. The Human Right to Water and International Economic Law

This book discusses the international right to water and the liberalization of water services. It is concerned with the harmonization of the right to water with the legal systems under which liberalization of water services has taken or may take place. It assesses paths of harmonization between international human rights law and international economic law in this specific field. The issue of the compatibility between the fulfilment of the right to water and the liberalization of water services has been at the heart of a passionate public debate between opponents and advocates of the privatization of the utility. The book provides an unbiased analysis of different international legal regimes under which the liberalization of water services has occurred or is likely to occur, notably international investment law, international trade law and European Union law, in order to assess whether the main features of the right to water can be guaranteed under each of these systems of law and whether there is space for prospective harmonization. The work will be an invaluable resource for academics, researchers and policy-makers working in the areas of International Human Rights Law, International Economic Law, International Water Law, International Trade Law and EU Law.

A History of Water, Series III, Volume 2: Sovereignty and International Water Law

As global climate change threatens to change radically both the political and physical climate with regard to water issues, so a reassessment of some of the fundamental principles of international water law is emerging. One of the most important principles being reassessed is the sovereign equality of states. This volume brings together more than thirty leading international water and legal specialists to explore the development and changing relationship between water, state sovereignty and international law. Offering fresh insights into one of the most pressing issues in global water policy, Sovereignty and International Water Law will form an essential reference for water professionals, legal specialists and policy makers alike.

Ressources en Eau, Leur Planification, Et Leur Gestion

The Academy is an institution for the study and teaching of public and private international law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the" "Hague Academy of International Law." This volume contains: - Regles generales du droit des cours d'eau internationaux, par L. CAFLISCH, professeur a l'Institut universitaire de hautes etudes internationales de Geneve. - Politics, Law and Force in the Interstate System by G. TUNKIN, Professor at the University of Moscow.

Recueil Des Cours - Collected Courses, 1989-VII

When the margin IS the center, perspectives shift

The United Nations World Water Development Report – N° 3 - 2009 – Freshwater and International Law (the Interplay between Universal, Regional and Basin Perspectives)

L'eau est omniprésente sur notre planète : 70% de la surface de la terre est constituée par les océans. Cependant, l'eau douce rendue disponible aux besoins humains ne compte que pour 0,25% du total des réserves mondiales en eau. On comprend dès lors les interrogations actuelles liées à la diminution de la disponibilité de l'eau douce dans le monde. Ce constat, dû à une convergence de plusieurs facteurs tels que l'accroissement démographique, la salinisation progressive des eaux, le déversement de polluants divers ou les aléas climatiques rendent les enjeux de sa conservation et de son utilisation durable d'autant plus vifs. Dans ce contexte, une approche juridique est nécessaire pour concilier les différents usages de l'eau, assurer sa préservation et son utilisation durable. Le droit international trouve son fondement dans la nécessité d'une approche globale du cycle naturel de l'eau, mais ne rencontre pas moins de difficultés à concrétiser une approche intégrée des différents usages de l'eau. La prise en considération simultanée de l'eau en tant que marchandise, droit de l'homme, élément du territoire de l'État ou investissement privé pousse le droit international à appréhender juridiquement ces différents aspects. Celui-ci le réalise à travers l'application à l'eau de ces branches de droit spécialisés mais cela aboutit à une approche qui reste fragmentée et sectorielle. Ce constat explique que, face à ce qui est présenté comme une impossibilité du droit international positif à envisager l'eau de façon globale, des propositions doctrinales en appellent à l'élaboration d'un nouveau statut juridique de l'eau au niveau international, mais leur concrétisation se heurte à des obstacles parfois surmontables, parfois insurmontables. L'originalité de l'ouvrage intéressera tant les praticiens du droit international que les professeurs, les chercheurs et les étudiants de dernier cycle.

Remoteness Reconsidered

Das Buch befasst sich mit den Vorgaben des internationalen Wasserrechts für Abkommen zwischen Anrainerstaaten über die Nutzung und Bewirtschaftung gemeinsamer Wasserläufe. Der aktuelle Stand des internationalen Wassergewohnheitsrechts wird dargelegt und der Regelungsgehalt der UN-Wasserlaufkonvention erläutert, Abkommen auf regionaler und wasserlaufspezifischer Ebene werden skizziert. Anschließend werden die bisherigen Nilverträge und das noch nicht in Kraft getretene Kooperationsrahmenabkommen für den Nil dargestellt, rechtlich gewürdigt und auf ihre Übereinstimmung mit dem internationalen Wasserrecht untersucht. Auch die eingehende Prüfung einer Vertragsnachfolge Südsudans ist Teil der Darstellung. Schließlich wird das völkerrechtliche Leitprinzip zur Nutzungsverteilung, der Grundsatz ausgewogener und angemessener Nutzung, auf den Nil angewandt und dazu konkretisiert. Die Arbeit zeigt auf, inwieweit dieser Grundsatz ein Konzept für eine Nutzungsverteilung in der Praxis zu liefern vermag.

L'eau en droit international

L'annuaire est publié en deux volumes. Le premier volume contient les comptes rendus analytiques des séances de la Commission du droit international. Le second volume comprend les documents relatifs aux questions débattues. Il contient en particulier le rapport que la Commission adresse chaque année à l'Assemblée générale. La Commission traite notamment des sujets suivants : procédures d'arbitrage, immunités diplomatiques, droit de la mer, droit de la nationalité, droit conventionnel et droits et devoirs des Etats. Les éditions précédentes sont disponibles sur demande.

African Journal of International and Comparative Law

Dans le passé récent, on a assisté à une accélération notable des réformes législatives en matière forestière dans le monde. Reconnaisant de plus en plus les intérêts multiples liés à la foresterie, le droit forestier est plus attentif aux fonctions sociales et environnementales des forêts, et il accorde une importance accrue à la durabilité de leur gestion, avec la participation d'un large éventail d'acteurs publics et privés. Les domaines dans lesquels les lois forestières ont été généralement réorientées comprennent notamment gestion forestière locale et privée, les fonctions écologiques des forêts, la planification de l'aménagement forestier et les contrats d'exploitation des forêts. Cette étude législative essaie de dégager, sur une base régionale, les tendances majeures des législations forestières contemporaines. La présente publication analyse un échantillon de lois forestières d'Europe et d'Afrique. Un précédent volume (Etude législative 66) a été consacré aux législations américaines et asiatiques.

L'eau en commun

A concise, clear, and legally rigorous introduction to international environmental law and practice covering the very latest developments.

Internationales Recht auf See und Binnengewässern

This publication contains the texts of the papers presented at the UN Colloquium, together with a record of those presentations and of the discussions which took place around them.

Droit international et droit comparé des cours d'eau internationaux, éducation à une culture d'une eau partagée et protégée, 18/19/20 juin 1998

A Bridge Over Troubled Waters: Dispute Resolution in the Law of International Watercourses and the Law of the Sea offers novel comparative analysis from leading experts on the resolution of disputes concerning international watercourses and the oceans.

Wasserrechte am Nil

This volume provides a comprehensive examination of epidemics and international law from the perspective of general international law. Featuring thirty-one essays by researchers from around the world and from various areas of expertise, it demonstrates how epidemics shape - and are shaped by - international legal norms across varying domains of international law. This volume is the product of collaborative work conducted between August 2020 and April 2021 as part of the Centre for Studies and Research on Epidemics and International Law.

Le Régime juridique des ressources en eau internationales

Annuaire de la Commission du Droit International 1982, Vol. II, Partie 1
