Intro

Have you ever wondered how experts repair crashed vehicles?  
post-accident Nissan car

They strip and dismantle all unsalvageable parts for replacement

Then drill out soldered joints and remove damaged panels

A new tail section must be welded and installed with precision accuracy

This team of genius, talented mechanics performs jobs with great care

Next, a new rear fender is fitted and intensely welded into place

An angle grinder smooths out any welding work ready for polishing

The entire car is sealed, painted and then varnished to the highest standard

The car is washed, polished, kitted back up and ready to go

Just like a wound they cut out and remove all the unsafe, damaged parts

The best way to weld sheet metal panels together is by butt-welding

Keep this area clean by using a nozzle dip to clear any spatter

Make sure you always have goggles and gloves on

Then they get to work rust-proofing the wheel arch and sealing joints

Good seam sealing will prolong the life of a vehicle after restoration

Extreme front collision repair on a vehicle - Extreme front collision repair on a vehicle by Mechanic Han 104,967 views 10 months ago 13 minutes, 27 seconds - In this video, we show the step-by-step process of **repairing**, a vehicle that has been involved in an extreme front **collision**,.
