She returned to England a few hours later having put in an offer on a rundown old barn in the rural Seven Valleys area of Pas de Calais. This was not something she'd expected or planned for. Janine eventually gave up her job in London to move with her husband to live the good life in France. Or so she hoped. While getting to grips with the locals and la vie Française, and renovating her dilapidated new house, a building lacking the comforts of mains drainage, heating or proper rooms, and with little money and less of a clue, she started to realize there was lot more to her new home than she could ever have imagined. These are the true tales of Janine's rollercoaster ride through a different culture - one that, to a Brit from the city, was in turns surprising, charming and not the least bit baffling.

Buying or selling a home is a significant life decision. And, choosing the right home for your family, lifestyle, and budget is one of the most important decisions you will ever make. The process of buying your home is not taught in high school but is one of the most necessary pieces of knowledge you should acquire in life. The event can be extremely stressful, especially when you are doing it for the first time. The truth is that purchasing a new home can be complicated, emotional, and fraught with both perils and expenses. Nevertheless, understanding the process can make the task much more manageable. And one of the links in the chain is involving a professional. Securing a professional to watch out for your interests is good common sense. Many people seem to find the idea of getting a professional to handle their home transaction quite daunting. But it shouldn't be. This book explains the process in simple everyday language and provides the fundamentals that should help anyone succeed at it. Furthermore, the home that looks perfect may well be precisely that - but if not, you certainly don't want to find yourself pouring hard-earned dollars into repairs that become apparent only after you have settled. Beyond that, as a homebuyer, you may be excited about your new home. However, until the closing is final, you still have a lot that you need to consider. Many homebuyers make mistakes before closing that can delay the sale. So, the question is, how can this be avoided? How can you be made aware in advance of the potential pitfalls of buying a home, so you don't make the same errors as you go through the process? I believe you don't want to burn your fingers or make the costly mistakes of others while trying to purchase your dream house. You may,

therefore, wish to take out quality time to read through this informative manual before making your best decision. I hope that this book will help you immensely in purchasing your dream home. KEVIN REID SHIRLEY

There are currently 100,000 Britons living in France, and several factors make it the preferred location for them, such as its geographical proximity to the UK, the availability of health, education and transport services, a lower population density than the UK, and climatic and cultural factors. When looking to purchase a property, often only two options are considered : buying a finished property or one which needs renovating. There is, however, a third option which is extremely popular in France, namely to select one of the fully insured house builders who will take full responsibility for building a property to your design on a piece of land in the location that you have chosen. This system gives maximum choice as regards location and design, avoids the risks and stress involved with a renovation, and can be substantially cheaper than purchasing an existing dwelling. " Build Your Dream House in France" explains the processes, from purchasing a plot of land, finding a builder, negotiating the contract with the builder, obtaining services from utility companies, the various stages of the build (illustrated with 14 colour photographs), handover of the finished house, and any after-sales issues.
