Managing Difficult People

Corporate life today is challenging. Most of the organizations I work with are dealing with chaotic processes and cultures. Managers are tasked with making it all work well. It's more than just a job; it's a matter of emotional, mental, and physical survival! That's the reason for the title. If the manager can survive, then there's hope for the rest of the organization. I've spent over 15 years coaching and consulting with managers in all types and sizes of organizations. I believe that management is a sacred role and, properly done, results in the greatest level of efficiency. There's no way to do a good job though without the proper tools. That's the reason for this book. I sat down and brainstormed the best management tools, models, concepts, and techniques and combined them into a practical guide. In a way, these could be considered a "greatest hits" collection. This guide is to be used in good times and bad times. It should help you prevent a crisis and navigate you out of one. You're only as good as your tools and training. I can do the training and I'm giving you the tools. Get out there and make it happen!

You're in Charge Now

This may be the most important book you or anyone else will read in the next fifty years. Assuming humanity survives that long. Draining the lifeblood of industrial civilization, the terminal decline of oil and gas production will spark a crisis far more dangerous than international terrorism, and more urgent than climate change. World leaders know it, so why aren't they telling? The last oil shock is the secret behind the crises in Iraq and Iran, the reason your gas bill is going through the roof, the basis of a secret deal cooked up in Texas between George Bush and Tony Blair, the cause of an imminent and unprecedented economic collapse, and the reason you may soon be kissing your car keys and boarding pass goodbye. David Strahan explains how we reached this critical state, how the silence of governments, oil companies and environmentalists conspires to keep the public in the dark, what it means for energy policy, and what you can do to protect yourself and your family from the ravages of the last oil shock.

Meeting the Press

This new edition is essential reading for all managers responsible for the welfare of their staff. As well as advising on the complicated legal obligations, it also explains how to ensure an appropriate level of control over health risks.

It examines natural, man-made, and terrorist disasters, and offers insight into the different strategies required for distinct scenarios, as well as the need to be prepared for the cascade effect of secondary events resulting from the original disaster. Real case studies examining medical disaster response This volume provides a powerful and unique case example through a chronology of the events of September 11th, offering a firsthand account and insight into the quintessential test case for disaster response effectiveness. It also profiles other notorious events—including Hurricane Katrina, the Madrid bombings, the SARS outbreak in 2004, and the sarin gas attack in Tokyo in 2005—as seen through the eyes of the expert contributors who witnessed and responded to these tragedies. The book presents the lessons learned from these events by the contributing authors who acted on the front lines of the medical disaster response. It is a valuable reference manual for emergency planning, response, and healthcare professionals to confront future disasters and help prevent and mitigate destruction and unnecessary casualties.
