Donald Hoffman: The Nature of Consciousness [Technical] - Donald Hoffman: The Nature of Consciousness [Technical] by Theories of Everything with Curt Jaimungal 363,309 views 3 years ago 3 hours, 3 minutes - Donald Hoffman a cognitive psychologist and Professor in the Department of Cognitive Sciences at the University of California, ...

Introduction

Hoffman's thought on the state of the country during COVID and what it entails about his theories

Why he meditates for 3 hours daily, and what type of practice it is

Hoffman's diet and health habits

On computational psychology (Hoffman's initial background)

Outlining (technically) the conscious agent model, and the motive force behind the lettering

Consciousness as primary to Being, as the impediment for rationalists

Why neural correlates aren't *just* correlates, but instead can play causal role (playing devil's advocate) and the limits of the "virtual reality" metaphor

Nima Armani Hamed's amplituhedron, and consciousness

Local hidden variables / realism may be saved, via loopholes in Bell's theorem

The assumption of uniform probability of fitness functions on cyclic groups, etc. is a problem for a theory that says our perceptions are non-veridical (ie. that they don't match "reality")

Evolution entails that we don't see the truth / reality as it is

On the over simplification of evolutionary models (outputting down to the Real Line of dimension 1 without further structure)

The intensity of meditation, and fear of letting go / fear of the unknown

Illusions are failures to guide adaptive behavior.

The various philosophical theories on truth (correspondence, pragmatic, deflationary, etc.)

Spacetime as a data compression tool for conscious agents

On the nature of causality

How is reality objective, when in Hoffman's model it's predicated exclusively on subjective agents

What is "you"? What is "identity"? What is the "self"? (Eastern religions vs Western religions)

How does Free Will fit into a stochastic model?

Douglas Hofstadter's "strange loop" model of consciousness & Tononi's Integrated information theory vs. Donald Hoffman's

Where God fits into all of this, as well as Hoffman's definition of God

What happens when you die?

Gödel's incompleteness theorem's implications for Hoffman's model

John Vervaeke's other forms of knowledge which aren't "propositional"

Landauer's limit (fastidious critiques)

On the moon not existing when you don't look at it

Do you see the same color red that I see? (and other experiences / qualia)

The paradox of pursuing truth, though truth is inimical (relative to fitness)

Where does Deepak Chopra take Hoffman's message too far + what Jesus meant by "I am the truth / the way / the life"

Why Would Our Minds Conceal Reality from Us

What Is the Deeper Reality behind Space-Time

The Hard Problem of Consciousness

Conscious Realism

Psychophysics

So There Are Physical Things like Electrons and Protons That Have Genuine Physical Properties but They Also Have Genuine Non-Physical Properties Namely these Conscious Experiences Then that's a Form of Dualism and Most Scientists Don't Like Dualism We Want To Avoid Dualism and the Theory That I'm Proposing of Conscious Realism Is Not Dualistic It's a Monist Theory It's Saying Consciousness Is Fundamental and the Only Kind of Stuff There Is Is Consciousness Space Time and Matter Are Simply Forms of Conscious Experiences They'Re Not Something Independent of Consciousness the Form of Pan'psychism That I Just Described Would Be a Form of Dualism I Can Begin To Answer that Question It Turns Out that There Are Ways for Example When Two Conscious Agents Interact and You Write Down the Mathematics of Their Interaction and Look at It the Mathematics of Their Interaction Also Satisfies the Definition of Being a Conscious Agent So but the Theory Is Saying Then Is the Dynamics of Interacting Conscious Agents Is Also a Conscious Agent and I Expected as I in My Colleagues Look at this Mathematics More More Carefully We'LI Find that There Are Many Many Different Ways That Conscious Agents Can Interact and Combine To Create New New Consciousness

And I Want To Explore with You What these Greater Minds Might Be Like but Just in Order To Understand this Sort of Sequence of Minds Coming Together Is It Your View that You Know Our Two Minds Interacting Now Are Creating a New Conscious Agent and if Not What Do You Think Is the the Necessary Level of Interaction Where a New Mind or a New Conscious Agent Becomes Instantiated I Think that It's a Plausible Hypothesis that the Two Consciousnesses of the Two Hemispheres in Normal Human Beings with no Corpus Callosum Damage or Coordinating Together To Form a Single Consciousness and a Single Unified Person That Doesn't Destroy the Separate Consciousnesses of the Two Hemispheres Independently under Their Two Personalities

Because You Know as You Said What Is God if Not an Infinite Mind and but the Interesting Thing about this Specific Approach of Yours Is that It Leads to Us Potentially Being Able To Say Precise

Things about What an Infinite Mind Might Be like So for Example You've Suggested Omnipotence and Omniscience Are Not Necessarily Attributes of an Infinite Mind Which of Course Have Been Traditionally Attributed to God but Also nor Would an Infinite Mind Need To Be as You've Said Alone in Its Infinity so There May Be Many Infinite Minds so Donald Could You Perhaps Talk a Bit about How You Arrive at these Kinds of Conclusions Right So When You Start Combining Agents To Create Agents with More and More Conscious Experiences More and More Complexity of Their Dynamics The Idea that There's a Reason for Me To Think that these Conscious Agents the Infinite Conscious Agents Won't Know Everything and Something Called Girdle's Theorem It's a Complicated Theorem but What It Entails Is that There Is Endless Mathematical Structure and No Matter How Much Exploration One Does of Mathematical Structure All the Mathematical Structure That You Ever Explore Will Only Be a Subset of All the Structures That Are There I Mentioned before that all Conscious Experiences Are Structured and So There's Not a Divorce between Mathematical Structure and Conscious Experiences

What this Means Is that Girdles Theorem Is Telling Us that There's an Infinite Variety of Structures and Therefore of Forms of Consciousness To Be Explored and in Principle this Exploration Will Never Stop and It's Impossible Literally Impossible for any Agent To Ever Know It all and So Even these Infinite Conscious Agents Will Always Be in the Process of Exploring and if I if I Had To Guess There's a Big Question What Is It all about and What Is Consciousness up to What if We'Re GonNa Propose a Dynamics of Consciousness

And that's What the Dynamics Is about and the Reason the Demux Hasn't Stopped and It Continues and Will Continue Forever Is because Girdles Theorem Guarantees that There Is Complete Job Security in this in this Endeavor That's Fascinating and It Always Evokes a Kind of Teleological Nature to Reality Itself like as if It's Undergoing this Seeking Process this Infinite Process of Self Understanding and Just this Idea of the Possibility of Minds That Could Exist outside of Our Realm of Perception that Our Our Minds May Contribute to as Part of Our Instantiation

There Is a Kind of Spiritual Significance to that or if Not Spiritual Exactly but Transformative in Terms of How We See Ourselves in Reality in the Universe You Know because if Conscious Agents Are the Whole of Reality as You Said Then Reality Is like Us We Can See Ourselves As Much More at Home in that Kind of a Universe than We Can in the Standard Materialist View We'Re Not Significant as Humans but We Are Central as Conscious Beings to the Core Unfolding of Reality That's Right It Does Lead to a Different View of Who We Are and Our Place in in the Universe

I Know that I'll Continue To Follow Your Work with Great Interest before We Finish Where Should People Go To Find Out More about Your Research and Your Ideas Well I've Written a Book Recently Called the Case against Reality and It's Published by a Penguin in the Uk and Norton in the Us and so that's a Good Introduction to the Ideas about We'Re Not Seeing the Truth It's Just an Interface and the Last Chapter Gives some Hints about this Idea of Conscious Agents I Do Have a Mathematical Paper if for those Who Are Interested in the Mathematics if You Just Google Donald Hofmann and the Name of the Paper Is Objects of Consciousness
