Houghton Mifflin Harcourt Journeys

A Guide to Teaching Practice has long been a major standard text for all students of initial teacher training courses. This new edition has been thoroughly revised and updated to take account of the many changes that have taken place both within.

### Journeys, Grade 3

This book focuses on the emerging area of partner-driven work-integrated learning inclusive of university or industry stakeholder development, and the integration of these two major stakeholders. It explores the significant interrelationship between university and school needs in this area of research. It uses a cross-institutional approach and focuses on local communities that educational providers interact with, to highlight and discuss the issues identified in various case studies. By doing so, this book aims to create a community of practice that explores work-integrated learning from an integrated stakeholder perspective, and develops a working model to extend existing understanding in this area through integrating the ideas explored in the various chapters.
