Step-Up to Medicine

"The questions serve as a self-assessment tool, allowing students to think through clinical scenarios without answer choices influencing their thought process. Most questions end in "what are the appropriate next steps in managing this patient?" Imagine yourself as the clinician taking care of these patients: What test(s), if any, would you order next?"--Provided by publisher.

Step-Up to Medicine

This bestselling volume in the popular Step-Up series provides a high-yield review of medicine, ideal for preparing for clerkships or clinical rotations, shelf exams, and the USMLE Step 2. Clinical pearls, full-color illustrations, and "Quick Hits" provide essential information in an efficient, easy-to-remember manner, perfect for medical, physician assistant, and nurse practitioner students. Now enhanced with integrated instructor support, Step-Up to Medicine, Fifth Edition delivers exactly what students need to know—both for exam preparation and for practical use in the evaluation and treatment of patients.

Step-up to medicine

This book is a primary review tool to prepare students for both the internal medicine clerkship and the end-rotation NBME shelf examination. This logical alternative to several limited-focus books blends a bullet-outline format students prefer in a review book with comprehensive paragraphs, as needed, for optimal preparation. Illustrations, charts, tables, graphs, mnemonics, and "Quick Hits" pearls for the clerkship speed and supplement learning. Ample content without superfluous detail enables students to readily evaluate and expand their knowledge of cardiology, pulmonary medicine, gastroenterology, hematology, neurology, endocrinology, rheumatology, nephrology, genitourinary disorders, fluids and electrolytes, dermatology, and musculoskeletal problems. A new section in this Second Edition presents 100 USMLE-style clinical vignette-based questions with answers. A color insert contains over thirty full-color images. A companion Website will offer the fully searchable text and color photographs.

Step-up to Medicine

Now thoroughly updated and revised, this best-selling volume in the popular Step-Up series provides a high-yield review of medicine, ideal for preparing for clerkships or clinical rotations, shelf exams, and the USMLE Step 2. Clinical pearls, full-color illustrations, and "Quick Hits" provide essential information in an efficient, easy-to-remember manner, perfect for medical, physician assistant, and nurse practitioner students. Step-Up to Medicine, Fourth Edition delivers exactly what you need to know--both for exam preparation and for practical use in the evaluation and treatment of patients. Content is thoroughly updated and revised, based on extensive research with faculty and students. Enhanced high-yield outline format, Quick Hits, and Clinical Pearls make this edition even more time-saving and practical. A new 100-question, clinically-oriented practice exam is a practical self-assessment tool to prepare for the questions you will face in clinical practice. Succinct, outline approach keeps "extra" material to a minimum, focusing on the core content you need to know. Clinical pearls help you "file away" clinical connections for handy retrieval at test time and aid in the transition from basic science to clinical medicine. Easy-to-follow algorithms show examples of effective clinical reasoning, particularly for similar complaints. Numerous charts, tables, graphs, and mnemonics aid visual learners and facilitate easy retention of essential material. Coverage includes every essential area of medicine, including body system diseases and disorders; fluids, electrolytes, and acid-base disorders; hematologic diseases and neoplasms; infectious diseases; diseases of the skin and hypersensitivity disorders; and ambulatory medicine. Helpful appendices cover radiographic and electrocardiogram interpretation, physical examination pearls, workup and management of common problems on the wards, basic statistics and evidence-based medicine, and end-of-life issues and informed consent.

Step-up to USMLE Step 1

Organized by subspecialty, this case-based review covers all the information students are expected to learn during their internal medicine clerkship. Each topic begins with a brief patient history and a question about the most likely diagnosis or next step in management followed by a discussion of alternative diagnoses and management strategies. The user-friendly approach includes numerous algorithms, images, mnemonics, and tables. A companion Website will offer the fully searchable text.

NMS Medicine Casebook

This Step-Up Series volume is a high-yield, systems-based, outline-format review of commonly tested USMLE Step 2 material, including internal medicine subspecialties, required clerkship specialties, and important topics in medical practice. The user-friendly format, with numerous tables, illustrations, and flow charts, allows quick review of a vast body of facts. "Quick Hit" marginalia highlight facts likely to be tested. "Next Step" marginalia indicate what the clinician must do next after making a diagnosis. A full-color section illustrates classic presentations of dermatologic and other disorders. This edition includes additional Quick Hits, mnemonics, new illustrations, expanded coverage of ARDS, a new table on breast malignancy variants, and updated vaccination schedules.

Step-Up to USMLE Step 2

Now in its Third Edition, Step-Up is the most comprehensive systems-based review for the USMLE Step 1. The book has been widely acclaimed for its systems-based organization, which parallels the USMLE Step 1 content outline and helps students synthesize the information from their basic science courses. The popular, user-friendly format features numerous charts and diagrams and Quick Hits notes in the margins that help students integrate concepts across systems. For this edition, the author has added numerous clinical vignettes and new mnemonics to each chapter. Pharmacology has been further integrated into the systems-based format with new illustrations, tables, and references.

Step-up to USMLE Step 1

Step-Up to the Bedside, the second book in a series from the authors of Step-Up: A High-Yield Systems Based Review for the USMLE Step 1 Exam, is a compilation of 75 clinically-oriented cases. These cases

provide basic science coverage of relevant material that is frequently tested on USMLE Step 1. Each case is introduced by the patient's presenting complaint, a brief history, physical, and laboratory data. A differential diagnosis provides a means to synthesize the historical and physical data. Final diagnosis is offered. Lavishly illustrated, the cases are also interspersed with "Quick Hits" or brief bullets that provide additional information.

Step-up to the Bedside

Here is the first single, primary review tool to prepare students for both the internal medicine clerkship and the corresponding end-rotation NBME shelf examination. This logical alternative to several, limited-focus books blends a bullet-outline format students prefer in a review book with comprehensive paragraphs, as needed, for optimal preparation. A wealth of illustrations, charts, tables, graphs, and mnemonics speed and supplement learning. Ample content without superfluous detail enables students to readily evaluate and expand their knowledge of cardiology, pulmonary medicine, gastroenterology, hematology, neurology, endocrinology, rheumatology, nephrology, genitourinary disorders, fluids and electrolytes, dermatology, and musculoskeletal problems.

Step-up to Medicine

Step-up to the Bedside

Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician

relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Crossing the Quality Chasm

Thoroughly revised and updated for its Fourth Edition, Step-Up to USMLE Step 1 is the most effective comprehensive systems-based review for the USMLE Step 1 exam. 5th Edition Medicine Step-Up Series

From the outset of their set of experiences until present day times Jews have practiced a gigantic effect on the improvement of clinical science. They have forever been kind in their consideration for the debilitated and held the clinical calling in extraordinary regard. In antiquated times medication and religion were firmly associated. The ministers were the caretakers of general wellbeing. The question with respect to the legitimacy of human obstruction in disorder - viewed as heavenly retaliation - failed to inconvenience the Jews, since they came to see the doctor as the instrument through whom God could impact the fix. Jewish doctors in this manner thought about their employment as profoundly enriched and not only a normal calling.

Step-Up to Family Medicine

Step-Up to Geriatrics provides a high-yield review of geriatric medicine for students taking a geriatric clerkship. Clinical pearls, clinical vignettes, full-color illustrations, and "Quick Hits" provide essential information in an efficient, easy-to-remember manner. "Quick Hits" in the margins highlight highly testable topics. Clinical pearls and vignettes help you "file away" clinical connections for handy retrieval at test time, and aid in the transition from basic science to clinical medicine. A 100-question, clinically-oriented practice exam at the end of the book is an ideal self-assessment tool to prepare you for the questions you'll be faced with in clinical practice. More than 100 full-color photographs and line drawings illustrate key concepts throughout. Easy-to-follow algorithms show examples of effective clinical reasoning. Numerous charts, tables, graphs, and mnemonics aid visual learners and facilitate easy retention of essential material. Bold terms point out key terminology for added emphasis. Written for medical students, Step-Up to Geriatrics is also an ideal resource for residents on a geriatric rotation, geriatric fellows, or physicians seeking board certification or recertification, as well as PA and nurse practitioner students and professionals.

Step-Up to Medicine (2023) Fifth Edition

The inspiring and hilarious story of Patch Adams's quest to bring free health care to the world and to transform the way doctors practice medicine • Tells the story of Patch Adam's lifetime quest to transform the health care system • Released as a film from Universal Pictures, starring Robin Williams Meet Patch Adams, M.D., a social revolutionary who has devoted his career to giving away health care. Adams is the founder of the Gesundheit Institute, a home-based medical practice that has treated more than 15,000 people for free, and that is now building a full-scale hospital that will be open to anyone in the world free of charge. Ambitious? Yes. Impossible? Not for those who know and work with Patch. Whether it means putting on a red clown nose for sick children or taking a disturbed patient outside to roll down a hill with him, Adams does whatever is necessary to help heal. In his frequent lectures at medical schools and international conferences, Adams's irrepressible energy cuts through the businesslike facade of the medical industry to address the caring relationship between doctor and patient that is at the heart of true medicine. All author royalties are used to fund The Gesundheit Institute, a 40-bed free hospital in West Virginia. Adams's positive vision and plan for the future is an inspiration for those concerned with the inaccessibility of affordable, quality health care. Today's high-tech medicine has become too costly, impersonal, and grim. In his frequent lectures to colleges, churches, community groups, medical schools, and conferences, Patch shows how healing can be a loving, creative, humorous human exchange--not a business transaction.

Winner of the Young Authors Award at the BMA book awards 2019! AND Highly Commended in the Medicine category! Here's what the BMA reviewers said: "I would unreservedly recommend this book to any medical student and indeed anyone else who wanted to learn more about internal medicine including junior doctors, nurses, physicians' assistants. I would have loved a book like this when I was a medical student." Medicine in a Minute is a new full-colour text covering the fundamentals of undergraduate medicine in one book. Medical students no longer have the time or inclination to read the huge texts that used to dominate this market - they need a concise book that covers the core information they have to know, and in a user-friendly format: Medicine in a Minute is this book! The book is edited and written by two of the authors behind the bestselling Cardiology in a Heartbeat and features several common design elements and features. It has quickly found favour with medical students and is consistently one of the bestselling medical student texts. The book is divided into body systems and then each section within the particular body system follows a consistent pattern: Definition Epidemiology Risk factors Differential diagnosis Aetiology Pathophysiology Clinical features Investigations Management Medicine in a Minute is a student-friendly, concise text that you will want close to hand throughout your studies.

Case Files Internal Medicine, Third Edition

Like its best-selling predecessor, the fifth edition of this popular series contains over 450 multiple-choice questions, updated references, color photographs and ECG tracings. MKSAP for Students is intended for third-year students participating in their required internal medicine clerkship and for fourth-year students on an advanced medicine clerkship. All questions are formatted as clinical vignettes that resemble the types of questions students encounter on the examination at the end of the clerkship and on the USMLE licensing examination. Each question has a detailed answer critique that identifies the correct answer, an explanation of why that answer is correct and the other options are incorrect, an educational objective and a short bibliography. Succinct Key Points summarize the important take home messages for each question. MKSAP for Students 5 is supported by its companion textbook, Internal Medicine Essentials for Students. All questions in MKSAP for Students are associated with relevant content in the Essentials textbook that can directly answer the question. Features: * Covers the common problems and disorders a student is likely to encounter * Over 450 NEW multiple-choice questions * Updated references, color photographs, and ECG Tracings * Questions formatted as clinical vignettes to resemble the types of questions on the examination * Key points to summarize important information for each question

Advertising Law in Europe and North America

Consumer law and policy continues to be of great concern to both national and international regulatory bodies, and the second edition of the Handbook of Research on International Consumer Law provides an updated international and comparative analysis of the central legal and policy issues, in both developed and developing economies.

Handbook of Research on International Consumer Law, Second Edition

Most cross-border advertising occurs uncontroversially. However, because international advertising activity falls under so many diverse areas of law, some familiarity with the dense web of legislation, regulation, and case law that may effect its use is essential for all advertisers. This well-known book, now in a fully updated third edition, provides all the necessary information in an easy-to-use country-by-country format. Twenty-six country reports, each by a local expert, provide detailed information on the particular legal environment in each country vis-à-vis advertising, including specific effects of all relevant treaties and trade agreements. Among the issues and topics taken into account are the following: · effect of import restrictions on advertising; · use of price comparisons in advertising; · ‘cold calling’; · consumers’ right to dispute resolution; · ‘blacklisted’ practices; · use of a language other than that of the target country; · special rules for agricultural products; · principles of non-discrimination and equal treatment of nationals; · precautionary principle versus risk principle; · protection of trademarks; · false or deceptive indication of source; · product ‘placement’ in non-advertising communications; · respectful interaction with religious, cultural, and social values; and · when a statement may be deemed ‘misleading’. Because the freedom to market a product simultaneously in several countries is a significant economic benefit, the invaluable information and guidance in this book on what is legally possible in a broad range of countries will be enormously beneficial to firms in all fields that engage in the sale and marketing of products or services. Corporate counsel and marketing directors will warmly welcome this new edition of a proven handbook. "

International Advertising Law

This study will address various IP-related issues that are important for the efficient management of companies active in creating and implementing advertising content and campaigns.

Managing Intellectual Property in the Advertising Industry

This is a truly international effort, and one with a strong commitment to human rights by the highly reputable authors coming from different jurisdictions! The many facets of today's consumer law are presented to the reader, including developing countries a fascinating effort in a dynamically emerging field of law! We are comprehensively informed about such bread and butter areas as advertising, unfair terms, consumer guarantees, product safety and liability, consumer credit, and redress. But traditional consumer law concepts and remedies are facing challenges in more complex areas, like services of general internet where consumers and private users should enjoy equal access to universal services, with the internet where speed must not be a pretext to eliminate standards of fair dealing, with risky investment services under the problematic paradigm shift from investor protection to investor confidence. A book to read, to think about, to work with for everybody interested in the future of consumer markets and law in a time of economic crisis! Norbert Reich, University of Bremen, Germany This is a richly interesting collection of essays, written by leading names in the field. It offers a thoroughly reliable survey of key tensions and challenges in modern consumer law and brilliantly combines thematic overview with detailed analysis. It will stimulate comparative thinking, it will provide a source of information and it will be welcomed by consumer law scholars all over the world. Stephen Weatherill, University of Oxford, UK Consumer law and policy has emerged in the last half-century as a major policy concern for all nations. This Handbook of original contributions provides an international and comparative analysis of central issues in consumer law and policy in developed and developing economies. The Handbook encompasses questions of both social policy and effective business regulation. Many of the issues are common to all countries and are becoming increasingly globalised due to the growth in international trade and technological developments such as the Internet. The authors provide a broad coverage of both substantive topics and institutional questions concerning optimal approaches to enforcement and the role of class actions in consumer policy. It also includes comparative insights into the influential EU and US models of consumer law and relates consumer law to contemporary trends in human rights law. Written by a carefully selected group of international experts, this text represents an authoritative resource for understanding contemporary and future developments in consumer law. This Handbook will provide students, researchers and policymakers with an insight to the main policy debates in each context and provide models of legal regulation to assist in the evaluation of laws and the development of consumer law and policy.

Handbook of Research on International Consumer Law

This book will be of interest to advertising law practitioners and students of European law. Divided into two parts, it first analyses commercial communications at the level of EC law. In the second part, the regulatory environment of member countries of the European Community is considered in depth. Among the topics examined are misleading advertising - interpreted through primary and secondary legislation and selective judgments of the European Court of Justice. Specific sectors are also considered, such as food, pharmaceuticals, tobacco and television industries. Useful addresses and appendices on the most significant Directives and Codes of Practice regulating the fields of advertising are also included.

The European Handbook on Advertising Law

In the last two decades, accelerating technological progress, increasing economic globalization and the proliferation of international agreements have created new challenges for intellectual property law. In this collection of articles in honor of Professor Joseph Straus, more than 60 scholars and practitioners from the Americas, Asia and Europe provide legal, economic and policy perspectives on these challenges, with a particular focus on the challenges facing the modern patent system. Among the many topics addressed are the rapid development of specific technical fields such as biotechnology, the relationship of exclusive rights and competition, and the application of territorially limited IP laws in cross-border scenarios.

European Access

The third edition of an established text, this book provides comprehensive treatment of international marketing issues and includes expanded coverage of Eastern Europe and the Pacific Rim. New for this edition are the expanded use of mini cases within the text to illustrate the latest developments in marketing, together with expanded coverage of: South East Asia and the Pacific Rim, Central and Eastern Europe, Globalization, Culture, Financial aspects of marketing. Included throughout are self-assessment and discussion questions, key terms, references and bibliography.

Patents and Technological Progress in a Globalized World

Many areas of the law, numerous statutes, self-regulatory codes, European legislation and human rights conventions now govern advertising. This title sets out to explain concisely and comprehensively the myriad rules which control advertising.

International Marketing

The law on marketing and advertising has undergone profound changes based on the EU directives on unfair commercial practices and misleading and comparative advertising. The legislation partially requires full harmonisation and contains a comprehensive blacklist of prohibited practices. However, in other areas, only minimum harmonisation is required. A comprehensive case law from the CJEU has emerged, but still many issues remain open, unclear and debated. The EU Commission has an active interest in the field and has published numerous reports on the question. In addition it has developed revised, comprehensive guidelines on marketing business to consumer (B2C), which are fully discussed here. Further Commission initiatives in the area on business to business (B2B) marketing are also in the making, underlining the importance of this new collection.

Advertising Law and Regulation

Seminar paper from the year 2002 in the subject Business economics - Law, grade: 1,0, Savonia University of Applied Sciences, course: Marketing Law, 19 entries in the bibliography, language: English, abstract: It is not an easy task to create a nice film, wonderful music or a new software. But since it is really easy to copy the created economic value, this work has to be protected in order to keep this innovation process going and provide an incentive for the creation of investment in new works. Therefore a need for legal protection had arisen, which led to enacting Intellectual Property rights. Many countries have seen the need for this protection. The following work outlines the European and partly the International Legislation of Intellectual Property Rights by first explaining the specific property right and further providing information about European and International legislation. Internationally, IPR are regulated by conventions like the Patent Cooperation Treaty, the Madrid Agreement for the international registration of brands, the Hague Agreement for industrial signs, and the Bern Convention of copy rights. Within the EU, the European Patent Office and the EU Regulation on Trademarks are

responsible for the enforcement. Nationally, the national legislation as well as the registration offices take care of those issues. The IPR consist of Copyright, Trademark, Patent, and Design. They all are generally described as intellectual property or intangible property because they are property rights that cannot be touched or felt like personal property (e.g. car) or real property (e.g. land). However, the terms have different meanings and define different things.

Marketing and Advertising Law in a Process of Harmonisation

Addressing a critical need, Advertising and Public Relations Law explores the issues and ideas that affect the regulation of advertising and public relations speech. Coverage includes the categorization of different kinds of speech afforded varying levels of First Amendment protection; court-created tests for laws and regulations of speech; and non content-based restrictions on speech and expression. Features of this second edition include: overviews and synopses for each chapter extended excerpts from major court decisions appendices providing a chart of the judicial system, a summary of the judicial process, an overview of alternative dispute resolution mechanisms, and the professional codes for media industry and business associations online materials for instructors. The volume is intended for upper-level undergraduate and graduate students in media, advertising and public relations law or regulation courses. It also serves as an essential reference for advertising and public relations practitioners.

Marketing Law - A brief guide European and International aspects of Marketing Law

Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in the United Kingdom surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in the United Kingdom will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

Advertising and Public Relations Law

"This invaluable guide focuses specifically on advertising law and the myriad rules controlling the advertising industry. It covers all aspects of the law as it affects advertising, from European legislation and copyright law to libel and obscenity laws. It clearly explains the laws, statutes and self-regulatory codes that govern advertising and there are sections given to the specific issues affecting television, radio and cinema. New edition due in 2007."

Media Law in the United Kingdom

As the generic pharmaceutical industry continues to grow and thrive, so does the need to conduct adequate, efficient bioequivalence studies. In recent years, there have been significant changes to the statistical models for evaluating bioequivalence. In addition, advances in the analytical technology used to detect drug and metabolite levels have made bioequivalence testing more complex. The second edition of Handbook of Bioequivalence Testing has been completely updated to include the most current information available, including new findings in drug delivery and dosage form design and revised worldwide regulatory requirements. New topics include: A historical perspective on generic pharmaceuticals New guidelines governing submissions related to bioequivalency studies, along with therapeutic code classifications Models of noninferiority Biosimilarity of large molecule drugs Bioequivalence of complementary and alternate medicines Bioequivalence of biosimilar therapeutic proteins and monoclonal antibodies New FDA guidelines for bioanalytical method validation Outsourcing and monitoring of bioequivalence studies The cost of generic drugs is rising much faster than in the past, partly because of the increased costs required for approval—including those for bioequivalence testing.

There is a dire need to re-examine the science behind this type of testing to reduce the burden of development costs—allowing companies to develop generic drugs faster and at a lower expense. The final chapter explores the future of bioequivalence testing and proposes radical changes in the process of biowaivers. It suggests how the cost of demonstrating bioequivalence can be reduced through intensive analytical investigation and proposes that regulatory agencies reduce the need for bioequivalence studies in humans. Backed by science and updated with the latest research, this book is destined to spark continued debate on the efficacy of the current bioequivalence testing paradigm.

Advertising Law and Regulation

This book identifies both the general and specific laws and regulations that apply to the advertising of products and services in Ireland. Divided into two parts, the first section focuses on law, regulation, and the other key issues to be considered when advertising generally, such as consumer protection and contract law. The second section contains chapters on specific advertising law, regulations, and codes of practice imposed on certain industries or services, including financial services, solicitors, and alcohol advertising. The book focuses particularly on recent and little-known developments not covered in other legal texts. The Law of Advertising in Ireland will have global appeal, as it is applicable to any company, whether located in Ireland or not, whose advertisements will be visible to individuals within Ireland (including online). [Subject: Advertising Law, Company Law, Commercial Law, Consumer Law, Irish Law]

Overseas Business Reports

Traditional microeconomic theory has much to offer a manager. It suggests ways to increase profits by setting prices and packaging services, using advertising to increase demand and shows how internet auction sites like eBay affect competition and profitability. By using game theory to present and solve a manager's decision-making problems and by focusing on the strategic nature of these problems, this text makes microeconomic theory much more intuitive and relevant for the business student. The text is separated into four sections: basic microeconomic theory of the firm and the basic tools of game theory problems related to the strategic interaction between firms, including price and quantity competition and product differentiation issues arising from strategic interactions within the firm, including vertical and horizontal integration, training and motivating workers, and labour unions marketing economics including information problems, advertising, durable goods and the product life cycle. This book will be suitable for any student with a background of introductory economics. The authors include a variety of international examples and case studies from the business world to expand and illustrate key concepts, and provide end-of-chapter exercises to test students' grasp of the material. An online supplement comprising of problems and solutions as well as PowerPoint slides is available for lecturers.

Handbook of Bioequivalence Testing, Second Edition

Those lawyers lacking marketing expertise and operating with modest funds can find the help they need in this practical guide book. It provides a comprehensive overview of each element of marketing communications from advertising and branding to social media and websites. This second edition also features a new chapter covering GDPR.

Introduction to Sport Marketing is an accessible and engaging introduction to key concepts and best practice in sport marketing. Aimed at students with little or no prior knowledge of marketing, the book outlines a step-by-step framework for effective sport marketing, from conducting market analysis and developing a strategy, through to detailed planning and implementation. The book has a wider scope than other sport marketing textbooks, recognising that students are just as likely to have to employ

their marketing skills in community sport or the not-for-profit sector as in professional sport, and therefore represents the most realistic and useful sport marketing text currently available. Now in a fully revised and updated second edition, the book has expanded coverage of digital and social media, product innovation, services and relationship marketing, and key contemporary issues such as social responsibility and sustainability. It features a much wider range of international cases and examples, covering North America, Europe, and the vibrant and rapidly developing sport markets in Asia-Pacific, the Middle East and Latin America. Every chapter includes a range of useful features to help the reader to engage with fundamental principles and applied practice, such as problem-solving exercises and review questions. Introduction to Sport Marketing is an essential textbook for any degree-level sport marketing course.

Marketing Practices Regulation and Consumer Protection in the EC Member States and the US

Advertising is an important and visible component of marketing, competition, and consumer awareness. As many companies grow and expand to serve multinational audiences worldwide, there is a concomitant need to understand culture, customs and regulation in the world markets. Not only businesses but consumers and students as well need to understand the workings of advertising and its regulation in worldwide markets. This book is designed to fill this need for students and professionals. The book takes a thorough and critical view of the process in 21 countries, representing four continents of developed countries. An important feature of this handbook is the consistent, carefully plotted format of each chapter, facilitating easy access to key information. For each country, the chapters cover the following: form of government history of regulation along with current operating regulation systems route/manner in which cases are brought forward to regulating bodies advertising codes, if any, and how they work amount of money spent on advertising by year consumerism and its role in advertising specific regulation of advertising to children, health advertising and tobacco advertising sanctions and control of advertising found inadmissible position of commercial speech in country--if any Countries included are Argentina, Australia, Canada, Chile, China/Hong Kong, Colombia, Belgium, Brazil, Denmark, Finland, France, Japan, Korea, Mexico, Peru, Portugal, Spain, Sweden, the United States, and the United Kingdom. Each chapter's contributing author is a known expert in advertising with a particular insight on that country's language, culture, and advertising industry.

The book delineates, with extraordinary clarity and precision, the working of unfair competition law throughout the European Union. Its four comprehensive chapters encompass: basic considerations of definition, subject matter, enforcement, and applicable law: international provisions under the Paris convention, TRIPS, and WIPO model law; analysis of relevant EC directives and regulations and ECJ jurisprudence; and extensive discussions of the national unfair competition laws of all 25 Member States. For each Member State, specific topics covered include such considerations as the following: sources of law; competition law in a nutshell; regulation of advertising; direct marketing; sales promotion; risk of confusion; disparagement, defamation; misappropriation, imitation; impediment of competitors; and breach of the law. The author also provides a selected bibliography of sources for each country. It would be difficult to find a more useful analysis of European Unfair Competition Law than this systematic study. It is practical, thorough, clarifying, and readable, all at the same time. The author untangles the

most complex of apparent contradictions with impressive skill. Copies of this book will quickly take their places on the working shelves of interested practitioners, academics, and officials throughout Europe.

Censorship

Virtually every business is involved in advertising and marketing in one form or another. However, advertising is subject to a complex and often daunting web of law and regulation. Although in many cases there have been attempts to harmonise relevant laws, there are still significant national variations. Furthermore, in recent years digital marketing and targeting methods have changed the face of the advertising industry beyond recognition. Updated for 2020, *International Advertising Law* addresses the relevant law and regulations, as well as setting out practical considerations. The book covers key areas of advertising law such as local complaints procedures and enforcement, comparative advertising, influencer campaigns, sales promotions, ambush marketing, product placement, direct marketing and online behavioural advertising. The book also addresses the particular requirements in certain industries that are subject to specific advertising regulations (eg, gambling, alcohol, pharmaceuticals, financial products/services, food and tobacco/e-cigarettes). Edited by Paul Jordan, partner and head of advertising and Andrew Butcher, senior associate at UK law firm Bristows, this book includes chapters from leading experts in 30 jurisdictions. This new edition of *International Advertising Law* is essential reading for lawyers, in-house counsel, advertising executives and anyone else involved in the advertising/marketing industry. The book serves as an invaluable and straightforward guide to navigating these complex legal and regulatory regimes.

Chambers & Partners' the Legal Profession

The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level. It is an umbrella provision, which uses general clauses to protect consumers. How effective this approach is and how it relates to the existing *acquis* are fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing *acquis*. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.

The Global Advertising Regulation Handbook

This collection examines the theoretical, analytical and political implications of global developments involving telecommunications and related technologies. The book's contributors - from fields such as economics, political science and communication studies - relate research on the political economy of communication with the work of international political economy scholars. The book stimulates cross-disciplinary debates among readers in these and other areas in order to, first, critically evaluate recent global developments involving communications and, second, to encourage the development of a more holistic and inclusive approach to these and related issues.

Advertising & Marketing Law

Built on a strong foundation, *Basic Marketing 18e with ConnectPlus and LearnSmart* provides an integrated teaching and learning solution for presenting the four Ps framework and managerial orientation with a strategy planning focus. The Perreault franchise was the pioneer of the "four Ps" in the introductory marketing course. The unifying focus of *Basic Marketing* has always been on how to make marketing decisions in deciding what customers to focus on and how best to meet their needs. Consistent with our belief in continuous quality improvement, this edition has been critically revised, updated, and rewritten to reflect new concepts, new examples, recent "best practices," and to tightly

integrate the best digital tools in the industry for ensuring that students are prepared to engage in classroom lectures and pursue future business and marketing careers.

Unfair Competition Law

The Yearbook of Consumer Law provides a valuable outlet for high quality scholarly work which tracks developments in the consumer law field with a domestic, regional and international dimension. Furthermore, it provides an essential resource for all those, academic and practitioner, working in the areas of consumer law and policy.

International Advertising Law

Few applied disciplines are more sensitive to cross-cultural issues than marketing and consumer psychology. The chapters prepared for this volume reflect awareness of both similarities and differences within and across cultures. They include analyses of methodological issues, theoretical investigations of cultural and social values and their implications for marketing specialists, studies of gender- and sub-culture specific advertising, and investigations of advertising efforts in several different international markets. The scholars and advertising professionals who contributed these chapters will have much to say to consumer psychologists and marketing specialists alike.

European Fair Trading Law

Trade mark law practitioners agree that Ulrich Hildebrandt's Trade Mark Law in Europe hugely enhances their work. This fourth edition follows the same well-known, intensely practical, time-saving format, with each provision of current law (Directive 2015/2436) reproduced in its original English wording and annotated with relevant passages from all relevant decisions of the European Court of Justice, as well as relevant provisions of the Community Trade Mark Regulation and the national trade mark acts of all Member States implementing the Directive. The author's expert commentary on each provision expressly marks major changes to previous versions of the Directive, highlights when case law concerning a previous version remains relevant and translates passages that lack an official English text. Among the fundamental questions addressed are the following: When is it possible to register a geographical indication as a trademark? Are colours and sounds capable of registration? When may the reputation of a mark be invoked to protect it? How mundane could a sign be and still claim to be distinctive? When can it be said that there has been no genuine use of a trade mark? Where does the Court's function theory influence the trademark law? Given a topic or keyword, appendices assist in the quick finding of any provision of the Directive and relevant case law. There is no other resource presenting the original wording of ECJ case law, broken down by specific points of law and directly related on an article-by-article basis to EU and Member State trade mark legislation. As a highly organized presentation of key information, this is an ideal initial tool that makes any research into European trade mark law fast and easy, whether for academic purposes or actual legal practice. Lawyers, in-house counsel, judges, and academics will all welcome this new edition.

Strategic Advertising Management

Yip, Emeritus Professor of Marketing and Strategy, Imperial College Business School. Professor Pervez Ghauri teaches International Business at Birmingham Business School. He is Founding Editor for International Business Review (IBR) and Consulting Editor for Journal of International Business Studies (JIBS). Philip R. Cateora is Professor Emeritus at the University

of Colorado. His teaching spanned a range of courses in marketing and international business from fundamentals through to doctoral level.

The Global Political Economy of Communication

This significantly revised and updated second edition addresses the rapid development of EU copyright law in relation to the advancement of new technologies, the need for a borderless digital market and the considerable number of EU legal instruments enacted as a result. Taking a comparative approach, the Commentary provides comprehensive coverage and in-depth commentary on each of the EU legal instruments and policies, both from an EU and an international perspective. Alongside full legislative analysis and article-by-article commentary, the Commentary illustrates the underlying basic principles of free movement and non-discrimination and provides insights into the influence of copyright on other areas of EU policy, including telecoms and bilateral trade agreements.

An Economic History of Modern China

'This book is a remarkable tour de force. Joseph Chai offers a fine synthesis of thinking about the nature and origins of China's long-run economic growth and structural change. Through the meticulous use of an impressive range of sources, he explores some of the most challenging puzzles of China's economic history, such as its failure to match the modern industrial revolutions of Western Europe, or, closer to home, to rival Japan's economic transformation in the final decades of the nineteenth century. His definition of history is broad and his narrative extends down to the present day, thereby illuminating continuities and discontinuities across not only the historical divides of 1840 and 1911, but also those of 1949 and 1979. But despite its ambitious scope, Chai's analysis is authoritative, nuanced and full of detail. It will surely become necessary reading not only within the academic community of China scholars and students, but also among that even larger audience of readers seeking to understand the "rise of China".' Robert Ash, University of London, UK 'For most people interested in the contemporary Chinese economy, the story begins with Deng Xiaoping's policy of Opening and Reform in 1978. This is especially true of students from China, where modern history is still taught in a simple, politically

determined framework. This situation urgently needs remedying and Joseph Chai's new book is a valuable step in this direction. Chai surveys China's economic growth from the earliest times to the present day explaining the key turning points and the intellectual puzzles that arise in this long evolution. This book will be of interest to the general reader and will be valuable as a textbook for students studying any aspect of China's current development and prospects.' Christopher Howe, University of London, UK 'Joseph Chai places the recent phase of China's spectacular economic growth in its historical context in his well-researched, interesting and accessible overview of the economic history of China. Because no similar up-to-date book is available in English, English readers will find this book particularly welcome. Valuable attributes of his exposition include analyses of various economic puzzles (for example, why did China, which was once the world's economic leader, falter, suffer economic retardation, fall behind Europe and begin its economic resurgence later than Japan?) and his thoughtful considerations of the prospects for China's future economic growth. This book is highly recommended.' Clem Tisdell, The University of Queensland, Australia As a country's current development is path dependent, the rise of China and its strategic implications can only be understood in a historical context. Hence, the key to understanding contemporary China is the understanding of its past. So far there has been an absence of a comprehensive text dealing with Chinese economic history in the English language. An Economic History of Modern China fills this important gap, focusing on modern Chinese economic growth and comprehensively surveying the patterns of China's growth experience over the past 200 years, from the Opium wars to the present day. Key events are traced back to their foundations in history to explain their impact on China's modern economic growth.

Sino-American Economic Relations, 1944-1949

The economic relationship between the U.S. and China during the 1940s has long been neglected, with few scholarly works focusing on the period. This era was overshadowed by the political and diplomatic changes during and after the failure of the Nationalists in 1949. Without a close and insightful look into the reconstruction of China with American involvement during the late 1940s, one cannot identify the problems which led to the Nationalists' failure, nor can one answer the questions dealing with the impact of American economic policy toward China during that time.

Introduction to the Economic History of China

This concise 1999 introduction focuses on China's transition to economic modernisation.

Economic Change in China, C.1800-1950

A comprehensive survey of Chinese economic history from 1800 to the present from an international team of leading experts.

The Cambridge Economic History of China

(2nd Edition: July 6, 2012) In *The Chinese Dream*, a groundbreaking book about the rising middle class in China, Forbes columnist and China expert Helen Wang challenges us to recognize that some of our fears about China are grossly misplaced. As a result of China's new capitalist paradigm, a burgeoning middle class-calculated to reach 800 million within the next fifteen years-is jumping aboard the consumerism train and riding it for all it's worth-a reality that may provide the answer to America's economic woes. And with China's increasing urbanization and top-down governmental approach, it now faces increasing energy, environmental, and health problems-problems that the U.S. can help solve. Through timely interviews, personal stories, and a historical perspective, China-born Wang takes us into the world of the Chinese entrepreneurial middle class to show how a growing global mindset and the realization of unity in diversity may ultimately provide the way to creating a saner, safer world for all.

The Chinese Dream

The Fifth Edition of *American Economic History* is preceded by the superb reputation of earlier editions, and of Hughes in particular, known for his writing style. Cain has carefully revised and updated the text while maintaining the elegant writing style. The presentation is nontechnical and rich in economic theory and quantitative techniques.

American Economic History

By 2015, China may well have the world's largest economy. In *The Chinese Century*, Oded Shenkar shows how China is restoring its imperial glory by infusing modern technology and market economics into a non-democratic system controlled by the Communist party and bureaucracy. Shenkar shows why China's quest for global success differs radically from predecessors such as Japan, India, and Mexico... why it represents a fundamental restructuring of the global business system... and why it will transform the roles of participants in the global economy. He previews tomorrow's new competitive ground rules, terms of employment, and consumption patterns, and shows how Chinese ascendancy is redrawing political, economic, and social battle lines. Learn why the U.S. is most vulnerable to China's ascent... how China's disregard for intellectual property creates sustainable competitive advantage... how China's growth impacts global businesses and individual purchasing decisions. Above all, Shenkar shows what you must do to survive and prosper in "The Chinese Century."

The Chinese Century

The first comprehensive study of China's economic development across 3,000 years of history to be published in English.

An Economic History of China

Written in the early 1960s and published during the Cultural Revolution, this book is China's leading text on the emergence and development of capitalism in England, the United States, France, Germany, and Japan. It has retained its relevance by its emphasis on the importance of economic factors in historical change, thus confirming Deng Xiaoping's vision of China's development driven by economics. Here is a perspective on the historical development of capitalism as it applies to the histories of the major capitalist countries; it should prove interesting to students of Chinese thought on economic development filtered through the unique Chinese vision of Marxism.

An Introduction to the Economic History of China

First published in 1967. Based on original Chinese sources, including the press and government documents, this book describes the operation of the Chinese economy in the twentieth century. Certain trends become apparent, notably the extent to which China's economic life is decentralized and the tendency towards self-sufficiency within provinces and smaller administrative units. Among the topics covered are: Agriculture, the organization of large and small scale industry, mining and transport, management and labour in state enterprises. The fiscal system, together with the operation of the banks and the control of currency, credit and prices, and economic planning are also discussed.

An Economic History of the Major Capitalist Countries

First Published in 2005. Routledge is an imprint of Taylor & Francis, an informa company.

A Concise Economic History of Modern China (1840-1961)

This volume comprises twelve papers written by Chinese scholars on various aspects of the history of ancient Chinese economic thought. The contributions are preceded by an introduction which gives an overview of the development of the subject of history of economic thought in China, and which also provides an historical context to the individuals who constitute the major "schools" of ancient Chinese economic thought. The authors of the papers are leading scholars who have dominated this research area since the founding of New China in 1949, while the broad range of topics covered by the contributions includes questions of methodology, detailed and sometimes controversial interpretations of texts and "schools"

The History of Ancient Chinese Economic Thought

This wholly original reassessment of critical issues in modern Chinese history traces social, economic, and ecological change in inland North China during the late Qing dynasty and the Republic. Using many new sources, Kenneth Pomeranz argues that the development of certain regions entailed the systematic underdevelopment of other regions. He maps changes in local finance, farming, transportation, taxation, and popular protest, and analyzes the consequences for different classes, sub-regions, and genders. Pomeranz attributes these diverse developments to several causes: the growing but incomplete integration of North China into the world economy, the state's abandonment of many hinterland areas and traditional functions, and the effect of local social structures on these processes. He shows that hinterlands were made, not merely found, and were powerfully shaped by the strategies of local groups as well as outside forces. China

After a meteoric rise, China's growth has come to a screeching halt. Salvatore Babones provides an up-to-date assessment of how China's economic problems are undermining its challenge to the Western-dominated world order. He tells how liberal individualism has become the leitmotif of American Tianxia.

China's New Political Economy

Covering the time span from the Shang to the Qing Periods (1520BC - 1911AD), Gang Deng examines important factors in the decline of the Chinese economy from medieval sophistication to modern underdevelopment. These factors include: * resource endowments * socio-economic structure * property rights * state and bureaucracy * ideology and values * geo-political environment * internal rebellions * external invasions and conquests *The Premodern Chinese Economy* is a comprehensive analysis of China's economic history and provides essential background to the study of this country's modern struggle for growth and development. Deng's emphasis on comparative analysis offers new insights into the concept of underdevelopment and theories of transitional economics. This will become a major reference work in the fields of Chinese studies, economic history and development studies.

The Making of a Hinterland

Key Papers in Chinese Economic History since 1949 offers a selection of outstanding articles that trace the origins of the modern Chinese economy. Topics covered include agriculture and the rural economy; industrialisation and urbanisation; finance and capital; political economy and international connections.

American Tianxia

This comprehensive Handbook provides an in-depth analysis of the nature of East Asian economic integration alongside thoughtful insights into contemporary issues, such as agricultural development,

structural transformation and East Asian trade, alongside skills and human capital development policies of ASEAN. Contributors also provide detailed explanations on trade, poverty and Aid for Trade, institutional reforms, regulatory reform and measuring integration.

The Premodern Chinese Economy

In the Eighth Edition of this classic text on the financial history of bubbles and crashes, Robert McCauley joins with Robert Aliber in building on Charles Kindleberger's renowned work. McCauley draws on his central banking experience to introduce new chapters on cryptocurrency and the United States as the 21st Century global lender of last resort. He also updates the book's coverage of the recent property bubble in China, as well as providing new perspectives on the US housing bubble of 2003-2006, and the Japanese bubble of the late 1980s. And he gives new attention to the social psychology that leads people to take the risk of investing in Ponzi schemes and asset price bubbles. For the first time in this revised and updated edition, figures highlight key points to ensure that today's generation of finance and economic researchers, students, practitioners and policy-makers—as well as investors looking to avoid crashes—have access to this panoramic history of financial crisis.

Chinese Economic History Since 1949

The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story—including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

Handbook on East Asian Economic Integration

Examines financial crises of the past and discusses similarities between these events and the current crisis, presenting and comparing historical patterns in bank failures, inflation, debt, currency, housing, employment, and government spending.

American Economic History

This volume marks fifty years of an innovative approach to writing economic history often called "The Cliometrics Revolution." The book presents memoirs of personal development, intellectual lives and influences, new lines of historical research, long-standing debates, a growing international scholarly community, and the contingencies that guide and re-direct academic careers. In conversation with cliometricians of the next generation, 25 pioneering scholars reflect on changes in the practice of economic history they have observed and have helped to bring about, examining the rise of Western economies and their economic interrelationships, and the impact of modern economic growth on human health, mortality and even happiness. The conversations presented here are engaging, informative and – more often than one might expect – humorous. Together with a framework provided by the editors, they tell a tale of how cliometricians, their allies and their critics, have helped to transform what we know about the economic past.

American Economic Interests in China, 1900-1908

Asia will redraw the map of economic progress over the next twenty-five years. Growth is necessary to solve economic and social problems, but harder to achieve as the age of plenty gives way to the age of

scarcities. The challenge opens the doors for an Asian economic model based on shifting of productivity for the individual to groups, ecological productivity instead of economic productivity, and a reversal to traditional Asian values - less materialistic than Western values. A new paradigm for economic thinking emerges to replace the one launched in the West 200 years ago.

Manias, Panics, and Crashes

Based on an investigation of economic and resource allocation factors and their close relation to economic power, this book puts forward the power paradigm, a new economic research paradigm revealing the relationship among power, institutions, and resource allocation mechanisms, helping to establish a valid connection between macroeconomics and microeconomics and shedding light on real-world economic issues. Drawing on classical, neoclassical, and institutional economics and how these schools of thought have impacted on economic development in China over the past century, the book sheds light on distribution processes and argues that enterprise contracts, market pricing, policies, laws and regulations can all be classified as interest distribution mechanisms informed by a variety of power games. The power paradigm suggests that to achieve full utility and an optimal allocation of resources to foster social welfare, power reciprocity needs to be shared among different economic agents at the same hierarchy level while making sure that power and responsibility are equivalent for each economic agent. The book will appeal to research students and academics interested in heterodox economics, pluralist approaches, institutional economics, and game theory.

Death by China

This book provides a solid overview of trade and business opportunities in the Pacific Alliance, focusing on the key drivers of economic growth and development in Chile, Peru, Colombia, and Mexico. It addresses the political, economic, and social benefits that accrue when commerce and markets are made freer, and implications this poses for American businesses. Further, it surveys how key economies of Latin America have learned from past failures and are poised to capitalize on them in the future. It will offer a detailed understanding for business scholars, practitioners, and entrepreneurs looking to explore new business ventures in dynamic trade union.

This Time Is Different

International trade has shaped the modern world, yet until now no single book has been available for both economists and general readers that traces the history of the international economy from its earliest beginnings to the present day. *Power and Plenty* fills this gap, providing the first full account of world trade and development over the course of the last millennium. Ronald Findlay and Kevin O'Rourke examine the successive waves of globalization and "deglobalization" that have occurred during the past thousand years, looking closely at the technological and political causes behind these long-term trends. They show how the expansion and contraction of the world economy has been directly tied to the two-way interplay of trade and geopolitics, and how war and peace have been critical determinants of international trade over the very long run. The story they tell is sweeping in scope, one that links the emergence of the Western economies with economic and political developments throughout Eurasia centuries ago. Drawing extensively upon empirical evidence and informing their systematic analysis with insights from contemporary economic theory, Findlay and O'Rourke demonstrate the close interrelationships of trade and warfare, the mutual interdependence of the world's different regions, and the crucial role these factors have played in explaining modern economic growth. *Power and Plenty* is a must-read for anyone seeking to understand the origins of today's international economy, the forces that continue to shape it, and the economic and political challenges confronting policymakers in the twenty-first century.

Reflections on the Cliometrics Revolution

Under the impressive editorship of A.J.H. Latham and comprising high quality essays on a topic of rising interest to scholars and policymakers, this volume makes some valuable contributions to regional and global dynamics of trade. With contributions from leading names in the field of economic history - such as D.A. Farnie - this book will be useful reading for scholars interested in global economic history, globalization and regional trade, and Asian studies.

How Asia Can Shape the World

This book is a treatise against neoliberalism illuminated by the path of China. China is a model to be mimicked, but more so theoretically than by replication. If anything, nations of the global South must rid themselves of neoliberally imposed 'one-size-fits all' models, instrumentalised to shift value to US empire. Neoliberal models, robbing nations of their histories and resources, are negative 'best practice' serving the interests of the hegemon. Developing nations need to search for the theory that corresponds to their own conditions and development strategies. China's experience, anchored in labour as the historical agent, offers numerous theoretical cues as to how to build comparable home-grown paths. Thinking development with a subject voids reductionist politics in favour of sober class analysis. The study concludes by restating the age-old wisdom that there is no development without the rule of labour.

Trends in American Economic Growth, 1929-1982

This Handbook provides a comprehensive overview of the relationship between financial and real sector development. The different chapters, written by leading contributors in the field, survey research on the importance of financial development for economic growth, the causes and consequences of financial fragility, the historic development of financial systems in several major economies and regions of the world, and the regulatory and supervisory underpinnings of financial sector development.

The Dragon Slayer

"A collection of three Latin American folktales retold in graphic novel form"--

The Crystal Frontier

_____ A DRAMATIC FICTIONAL PORTRAIT OF THE US-MEXICO BORDER, MIGRATION, AND ITS IMPACT ON PEOPLE'S LIVES _____ Through this network of nine personal stories, Carlos Fuentes sets out to explain Mexico and America to each other – and to the rest of the world. He presents a dramatic fictional portrait of the relationship between the United States and Mexico, as played out in a Mexican dynasty led by a powerful Mexican oligarch with complex ties north of the border. It is the story of Mexican families who send their sons north to provide for whole villages with dollars and of Mexican tycoons who exploit their own people. Young Jose Francisco grows up in Texas, determined to write about the border world – the immigrants and illegals, Mexican poverty and Yankee prosperity – stories to break the stand-off silence with a victory shout, to shatter at last the crystal frontier.

Arroz Con Leche: Popular Songs and Rhymes from Latin America

A collection of traditional Latin American songs and rhymes, in Spanish and English, with the music included.

Genesis

"An epic work of literary creation . . . There could be no greater vindication of the wonders of the lands and people of Latin America than Memory of Fire." —The Washington Post Eduardo Galeano's monumental three-volume retelling of the history of the New World begins with Genesis, a vast chain of legends sweeping from the birth of creation to the era of savage colonialism. Through lyrical prose and deep understanding, Galeano (author of the celebrated Open Veins of Latin America) recounts creation myths, pre-Columbian societies, and the brutality of conquest, from the Andes to the Great Plains. Galeano's project to restore to history "breath, liberty, and the word" unfolds as a unique, powerful work of literature. This daring masterpiece sets the past free, weaving a new kind of history from mythology, silenced voices, and the clash of worlds. Genesis is the first book of the Memory of Fire trilogy, which continues with Faces and Masks and Century of the Wind.

The Other Side

Award-winning Mexican author Juan Pablo Villalobos explores illegal immigration with this emotionally raw and timely nonfiction book about ten Central American teens and their journeys to the United States. You can't really tell what time it is when you're in the freezer. Every year, thousands of migrant children and teens cross the U.S.-Mexico border. The journey is treacherous and sometimes deadly, but worth the risk for migrants who are escaping gang violence and poverty in their home countries. And for those refugees who do succeed? They face an immigration process that is as winding and multi-tiered as the journey that brought them here. In this book, award-winning Mexican author Juan Pablo Villalobos strings together the diverse experiences of eleven real migrant teenagers, offering readers a beginning road map to issues facing the region. These timely accounts of courage, sacrifice, and survival—including two fourteen-year-old girls forming a tenuous friendship as they wait in a frigid holding cell, a boy in Chicago beginning to craft his future while piecing together his past in El Salvador, and cousins learning to lift each other up through angry waters—offer a rare and invaluable window into the U.S.–Central American refugee crisis. In turns optimistic and heartbreaking, *The Other Side* balances the boundless hope at the center of immigration with the weight of its risks and repercussions. Here is a necessary read for young people on both sides of the issue.

Redeemers

In *Redeemers*, acclaimed historian Enrique Krauze presents the major ideas that have formed the modern Latin American political mind during the late nineteenth and twentieth centuries—and looks

closely at how these ideas were expressed in the lives of influential revolutionaries, thinkers, poets, and novelists. Here are the Cuban José Martí; the Argentines Che Guevara and Evita Perón; political thinkers like Mexico's José Vasconcelos; and the writers José Enrique Rodó, Mario Vargas Llosa, Octavio Paz, and Gabriel García Márquez. Redeemers also highlights Mexico's Samuel Ruiz and Subcomandante Marcos, as well as Venezuela's president Hugo Chávez, and their influence on contemporary Latin America. In his brilliant, deeply researched history, Enrique Krauze uses the range of these extraordinary lives to illuminate the struggle that has defined Latin American history: an ever-precarious balance between the ideal of democracy and the temptation of political messianism.

Comics Beyond the Page in Latin America

Comics Beyond the Page in Latin America is a cutting-edge study of the expanding worlds of Latin American comics. Despite lack of funding and institutional support, not since the mid-twentieth century have comics in the region been so dynamic, so diverse and so engaged with pressing social and cultural issues. Comics are being used as essential tools in debates about, for example, digital cultures, gender identities and political disenfranchisement.

World Literature, Cosmopolitanism, Globality

From today's vantage point it can be denied that the confidence in the abilities of globalism, mobility, and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken. In the face of this crisis, a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision. World Literature, Cosmopolitanism, Globality: Beyond, Against, Post, Otherwise offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses, aesthetics, and political positions of liberal cosmopolitanism and neoliberal globalization. Departing basically (but not exclusively) from different examples of Latin American literatures and cultures in globalized contexts, this volume provides innovative insights into critical readings of World Literature and its related conceptualizations. A timely book that embraces highly innovative perspectives, it will be a mustread for all scholars involved in the field of the global dimensions of literature.

Guide to the Perfect Latin American Idiot

Three Latin American writers quote, dissect and review this character in a cultural critique that combines analysis with humor and a relentless self-criticism.

The Night Will Be Long

A CRIME READS BEST BOOK OF THE YEAR An addictive and nuanced narrative about conflict-rife Colombia. A boy witnesses a violent confrontation in a remote part of town in the state of Cauca, Colombia. Minutes later, someone arrives at the scene to clear up all trace of the incident. No one in town claims to have heard or seen anything, and yet an anonymous accusation launches a dangerous investigation that unfolds within the corrupt world of the Christian churches of Latin America. A story that urgently reveals inequality and violence that govern an entire country, *The Night Will Be Long* is a devastatingly humorous thriller that will appeal to fans of Roberto Bolaño and Fernanda Melchor's *Hurricane Season*. Santiago Gamboa's fascinating characters introduce an addictive and nuanced narrative about conflict-rife Colombia.

Land of Smoke

"Land of Smoke is one of my favourite books by one of my favourite Argentinian authors." – Samanta Schweblin, author of *Seven Empty Houses* Dazzling, hallucinatory short stories by a rediscovered Argentinian contemporary of García Márquez, whose groundbreaking novel *January* is being published in English for the first time Resplendent with otherworldly imagery and beguiling prose, *Land of Smoke* presents a uniquely compelling voice in Latin American literature. An old man wakes up one morning to find that his beloved garden, the envy of all his neighbours, is floating away with him on board. A young woman moves to Buenos Aires, bringing with her a replacement head. A meek German missionary leaves Paraguay for the Pampas, completely unprepared for what he will encounter there. Dazzling and hallucinatory, the stories collected here recall the masters of magical realism — but with Gallardo's distinctive, idiosyncratic slant

Great Spanish and Latin American Short Stories of the 20th Century/Grandes cuentos españoles y latinoamericanos del siglo XX: A Dual-Language Book

"This collection, because of its exceptional theoretical coherence and sophistication, is qualitatively superior to the most frequently consulted anthologies on Latin American women's history and literature . . . [and] represents a new, more theoretically rigorous stage in the feminist debate on Latin American women."—Elizabeth Garrels, Massachusetts Institute of Technology

Women, Culture, and Politics in Latin America

In *The Politics of Decolonial Investigations* Walter D. Mignolo provides a sweeping examination of how coloniality has operated around the world in its myriad forms from the sixteenth century to the twenty-first. Decolonial border thinking allows Mignolo to outline how the combination of the self-fashioned narratives of Western civilization and the hegemony of Eurocentric thought served to eradicate all knowledges in non-European languages and praxes of living and being. Mignolo also traces the geopolitical origins of racialized and gendered classifications, modernity, globalization, and cosmopolitanism, placing them all within the framework of coloniality. Drawing on the work of theorists and decolonial practitioners from the Global South and the Global East, Mignolo shows how coloniality has provoked the emergence of decolonial politics initiated by delinking from all forms of Western knowledge and subjectivities. The urgent task, Mignolo stresses, is the epistemic reconstitution of categories of thought and praxes of living destituted in the very process of building Western civilization and the idea of modernity. The overcoming of the long-lasting hegemony of the West and its distorted legacies is already underway in all areas of human existence. Mignolo underscores the relevance of the

politics of decolonial investigations, in and outside the academy, to liberate ourselves from canonized knowledge, ways of knowing, and praxes of living.

The Politics of Decolonial Investigations

The Law of Love

Traducere de Cornelia R. Dulescu Prin dragoste, o femeie salvează de la moarte un indian otrăvit de veninul unui șarpe. Din această pasiune tîmuitoare se va naște Eva, botezată astfel ca să iubească viața. Orfan de mamă, Eva își croiește un drum presărat cu lacrimi, dar și cu miracolele pe care le pot face dragostea și bunătatea. Destinul ei și al tovarșilor ei de călătorie se întrec în tapiseria complicată și multicoloră a istoriei sud-americane iar vocea Evei Luna deapănă, cu nostalgie și umor, povestea fascinantă a unei femei pe care viața a iubit-o.

First Spanish Reader

The gripping story of two families struggling to overcome their own destinies. A mosaic of treachery and revenge, of possible and impossible loves, and of the great adventure that is living and surviving in a land marked by intolerance and outrage. Marian Miller, an NGO aid worker, is asked to write a report on illegal Jewish settlements on Palestinian territories. In order to do so, she wants to make sure she understands both sides of the story. Marian arranges a meeting in Israel with Ezekiel Zucker, an elderly man who, like many others, has a lot to tell and also, a secret to hide. Ezekiel will narrate his story as if it were a massive jigsaw puzzle with many complex pieces and Marian will tell him the version she's familiar with: the Arab one. At the twilight of the 19th century, the Zuckers are banned from their homeland of Russia because they are Jewish. After undergoing unspeakable horrors and injustices under the tsar's rule, they set out for the Promised Land and buy land owned by the Ziads, an Arab family headed by a man named Ahmed. The two men, Ahmed Ziad and Samuel Zucker, will establish a strong bond, a friendship that can overcome religious and political differences and that will continue on for generations. This riveting family saga that culminates in 1948 is not only Julia Navarro's best and most ambitious novel yet, it's a tale filled with real people taking responsibility for their own destinies by following their dreams and fighting for their lives. An unforgettable novel that, like all of history's greatest books, conceals many novels within.

Eva Luna

Rich selection of works by Nicaraguan writer Rubén Darío, the high priest of the modernismo school of literature, features poems and stories from Azul (Blue), Prosas profanas (Worldly Hymns), and others.

Shoot Me, I'm Already Dead

Latin America is experiencing a boom in graphic novels that are highly innovative in their conceptual play and their reworking of the medium. Inventive artwork and sophisticated scripts have combined to satisfy the demand of a growing readership, both at home and abroad. Posthumanism and the Graphic Novel in Latin America, which is the first book-length study of the topic, argues that the graphic novel is emerging in Latin America as a uniquely powerful force to explore the nature of twenty-first century subjectivity. The authors place particular emphasis on the ways in which humans are bound to their non-human environment, and these ideas are productively drawn out in relation to posthuman thought and experience. The book draws together a range of recent graphic novels from Argentina, Brazil, Chile, Mexico and Uruguay, many of which experiment with questions of transmediality, the representation of urban space, modes of perception and cognition, and a new form of ethics for a posthuman world. Praise for Posthumanism and the Graphic Novel in Latin America '...well-referenced and... well considered - the analyses it brings are overall well-executed and insightful...' This contributed volume is a real "who is who" in Latin American psychology. Edited by the most prominent psychology researcher alive in the region, the book presents a comprehensive panorama of psychology in Latin America as a science, as a profession and as a way of improving the quality of life of individuals and communities. Despite its achievements, Latin American psychology is little known

by the international psychological community. In order to fill this gap, Dr. Rubén Ardila has invited the most important researchers and practitioners in the region to present an overview of psychology as both a profession and a research field in Latin America in the following areas: · Scientific research · Professional issues · Clinical and health psychology · Developmental psychology · Educational and school psychology · Organizational and work psychology · Social psychology · Community psychology · Legal and forensic psychology Psychology in Latin America – Current Status, Challenges and Perspectives seeks to place Latin American psychology on the map of international psychology, and by doing so it aims to foster cooperation between researchers, practitioners and students from the region with its peers from all over the world.

Posthumanism and the Graphic Novel in Latin America

A comprehensive, encyclopedic guide to the authors, works, and topics crucial to the literature of Central and South America and the Caribbean, the Encyclopedia of Latin American Literature includes over 400 entries written by experts in the field of Latin American studies. Most entries are of 1500 words but the encyclopedia also includes survey articles of up to 10,000 words on the literature of individual countries, of the colonial period, and of ethnic minorities, including the Hispanic communities in the United States. Besides presenting and illuminating the traditional canon, the encyclopedia also stresses the contribution made by women authors and by contemporary writers. Encyclopedia of Latin American Literature

The first-ever collection of Latin American science fiction in English.

Theatre of Crisis

Presenting and interrogating an array of texts and discourses, this collection brings into focus a broad range of topics whose common denominator is the intersection between cultural productions and politics in different moments of the history of Latin America and Spain. From the struggles of class distinction, identity and community in 19th and 20th century and contemporary Latin America as explored in photography, literature and film, to how political and sexual transgressions from medieval times to the present are portrayed in Hispanic literature, and the ways that canonical and non-canonical texts in Spain have been defying hegemonic power relations in the 20th century and beyond. This volume provides fresh approaches from well-established scholars, as well as from a new generation of researchers whose works enlighten the reader about the rich facets of such intersections. This publication also offers a background to pursue further research in these areas and to serve the general public interested in Latin American and Spanish literary and cultural studies, and those seeking a greater understanding of social and economic change in both Latin America and Spain: specifically, issues of inclusion and citizenship; the constraints on state power in the neoliberal era; the strategies used by texts to create subjects that are not bound to conventional identity formations; and the challenges and possibilities of subverting the gaze of the institutional spectator.

Cosmos Latinos

Striking in its imagery, its history, and its breathtaking scope, Latin American fiction has finally come into its own throughout the world. Collected in this brilliant volume are thirty-five of the finest writers of this century, including: Jorge Louis Borges, Carlos Fuentes, Garbriel Garcia Marquez, Jorge Amado, Octavio Paz, and many more.
