## Malta

Examines the facts of the European Union.

### The European Union Facts and Figures

How do factors such as small size, insularity, vulnerability and remoteness influence a small state's behaviour in international relations? What are the major problems and events shaping Malta-EU relations? How can Malta's position in the EU be described? In which way can this small island state defend and enforce its own interests in such a dominant regional organisation in which all members, varying in size and power, try to protect and press ahead their specific aims? This thesis is an attempt to answer these questions and to provide a basis for further discussions and elaboration.

### Malta and the European Union

Malta has bucked the trend of its EU Mediterranean neighbours in many ways. This smallest of EU states barely dipped into recession during the global financial crisis and remains a stable member of the Eurozone whilst also having one of the lowest infringement rates and highest transposition of EU law records amongst the 28 member states. Providing the first comprehensive study of Malta's complex road to EU membership this book looks at the impact of membership on the country's political structures and processes and explains the principal factors that have conditioned the country's Europeanization experience. Reflecting Malta's unique and often contentious road to membership, the book explores the historical context and outlines how Maltese processes and policies have changed since membership and whether a causative link exists between these changes and Malta's membership of the EU. A wide range of primary and secondary sources facilitate the study complemented by a series of interviews with a broad range of Malta's political and social actors as well as individuals from EU institutions. This depth of analysis enables a holistic view of Malta's first decade of EU membership and helps establish the fundamental characteristics of Malta's unique Europeanization experience.

### Malta in the European Union

This comparative work examines the political and social context of interest groups in Malta and Ireland, two small island states at the periphery of an integrated continent. The author explores the impact of the European Union on their civil society's organizations and their gradual transformation at differing speeds and logics of Europeanization.

### The Europeanization of Interest Groups in Malta and Ireland

While some contributions provide overviews, others examine key partners (Spain, Morocco, Egypt), for national interests and ambitions have surfaced repeatedly. This is one of the first assessments of the Euro-Mediterranean Partnership, focusing primarily on its political and economic dimensions.

### The Euro-Mediterranean Partnership

The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security

measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

## The European Union

By analysing case studies through the lens of new constructivist Institutional perspective, this book sheds new light on the failure of EU policies in the Mediterranean. It suggests that these failures are the result of problems at the very heart of EU policy-making which clearly privilege economic concerns over social concerns.

## The Eastern Enlargement of the European Union - a Successful Story?

The Economies of European Union Small Member and Candidate States deals with the small states and candidate states of the EU, with a focus on their economic structure and performance, and the impact of EU membership (past, actual and potential) on the economy. The small states to be covered are those with a population of 3 million or less, namely: Cyprus, Estonia, Iceland, Latvia, Lithuania, Luxembourg, Malta, Macedonia, Montenegro and Slovenia. This title adds to the literature on the EU, on regional integration generally and on small states. It delves into the special constraints of small economic size, and examines why and how the small states of Europe manage to compete, albeit not without difficulty, with the larger states in the block, where free trade prevails. The book answers the following research questions: What are the special economic development constraints faced by the small states of the EU? What policy options have been used by, or are available to, these small states to address these constraints? How can the economic resilience and competitiveness of these states be enhanced? Has EU membership been mostly advantageous for these small states? What are the

economic prospects for these states as EU member states? The book is aimed primarily for students of EU affairs and of regional integration in general. It will also be useful for students of subjects relating to small states. It may also appeal to policy makers of small states, and to officials of international and regional organisations that have a constituency that includes small states.

### Small States and the European Union

This book brings together articles discussing controversial questions raised by European Enlargement towards Eastern Europe, Cyprus and Turkey. The author focuses on each of the applicant countries and their views on questions surrounding enlargement, relying on up to date source documents and speeches relevant to these issues. The first section of the book presents points of view from each of the applicant countries with regard to specific problems of European Enlargement, grouped under sections dealing with issues of democratic representation and citizenship rights, social, political and economic impacts of the *acquis communautaire* requirements, as well as convergence of the current European Union policies--such as the Common Agricultural Policy--to meet to needs of the applicant countries. The second part of the book offers documents including relevant European Union treaties and speeches that represent the European Union stance on these issues. There is a glossary of key terminology.

### European Union

Before the latest EU enlargement substantial changes in the integration process were predicted as a result of the accession of 10 new member states, with some forecasting cataclysmic consequences. This book, the first *ex post* assessment of EU enlargement, provides evidence to the contrary, while also providing examples in which the new members have been able to influence the EU policy output with their liberal attitudes on economic and social policy.

### Adjusting to EU Enlargement

For the earnest student of Europe, this unique work brings together a basic review of essential segments of intellectual thinking. In this volume, pertinent conceptual relationships, substantial relevant particulars, and an array of specific mechanics are all intertwined and used as a focus to examine the ongoing complex European integration process. By defining important parameterizations, this text develops a paradigm probing the current-day international activities which are rapidly leading to meta-national European supra-nationality. The most basic substantive of the integration process is the collective various peoples of Europe with their individual diversities. The origins of these collective diversities, the defining historical nationhood precedent, is herein examined, revealing the essential elements of individual identities, ethnologies, linguistic collectivities, and other antecedents imputing elements which compose the substance and stuff today coalescing into tomorrow's future harmonized European identity. This book is unique as it traces from many different origins the elements that are merging Europe into one collective future. This book sketches a process of onward integration as a continuation of what has happened in the past. This argument is augmented with many time lines, definition martial, and historical presentation, making it easy for the reader to grasp straightforwardly the wide-ranging substance out of which a single whole is being constructed. As a cognitive dynamic, movements such as the Nordic League, European Union, and EFTA as well as many other entities have been noted-- movements each in their own way, all contributing to an overall integrated Europe. As the more prominent initiative, the European Union with its diverse and constituent parts is carefully presented, as well as its unique decision-making process which is working to focus singular interests into collective benefits. Integration is an inevitable byproduct of continentalization, itself a sub consideration of globalization. The time and perhaps the gestalt of the end result of this activity is not known; however, with a comprehensive overview the motion is clearly identifiable, and the direction unequivocally certain. The Single House of Europe is being built of very different elements. This book defines these elements in terms of a paradigm for understanding the process of integration, the process that is rapidly forming the new Single House of Europe.

### Malta and the EU

The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union’s expansion has become primarily eastward.

The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the 'identity' conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between 'widening' and 'deepening' and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author's conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging Union to continue to 'deliver the goods.' A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote 'an ever closer union of the peoples of Europe,' this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.

### Microstate Security in the Global System

Academic Paper from the year 2018 in the subject Business economics - Economic Policy, University of Malta (Institute of European Studies), course: M.A. European Politics, Economics and Law, language: English, abstract: The aim of this paper is to identify the best media strategy for a Maltese union in order to stop an governmental policy not in their favour. It is here requested to find a way to convince the union not to use the social media strategy; the assumption is that it would not be cost effective. In the first part the paper highlights some basic background information about what outside lobby is and then it goes more into detail, and analyses the different media strategies the union could use and which steps exactly are requested. In the second part, the goal is to bring out arguments against the use of social media, for this purpose second literature will be used. This paper will also consider some alternative strategies before getting to the conclusion.

### Toward an Understanding of Europe

Economic integration is one of the most noteworthy issues in international economic policy at the end of the twentieth century. The recent examples of the European Union (EU) and the North American Free Trade Association (NAFTA) have raised important questions about the economic integration process and the possible establishment of economic unions in other parts of the world. Against the backdrop of the financial crisis in Europe and prospects of increasing integration in Asia, this volume showcases research from an international array of researchers to provide a basic understanding of the current issues, problems, challenges, and opportunities for achieving integration, addressing both empirical and theoretical aspects of such topics as monetary union, social policy reform and social union, public finance and technology policy. The chapters in Part 1 are focused primarily on economic issues, while Part 2 covers on social policy, the welfare state, and political reforms, with a particular emphasis on the European Union. Among the questions addressed: What are the main determinants and implications for socio-economic integration? How can economic policy influence the growth and integration process? Why is innovation important for regional economic development? What has been the policy response so far and what lessons have we learned from it? And finally, what are our action lines for the future?

### Enlargement of the European Union

Is Turkey on the way to meet the economic Copenhagen criteria? The enlargement process that the European Union faced the last decade stirred the debate again about the role Turkey has to play and whether or not Turkey should be part of the European Union. While the enlargement with the Central and East European countries of the former Soviet Union was a logical process, given the strong trade relationships and the political and historical context of these countries, the potential enlargement with Turkey is much more complex and controversial. The main innovation of the present study is that it unravels the complexity of the Turkish case by approaching the problem from different angles in a comprehensive way. In particular, by tuning in on the historic, political and economic processes, new insights are obtained about the feasibility of Turkish accession to the EU. By combining lessons from the existing literature, the use of new data and the analysis of the political economic processes, a new

perspective on the enlargement question – with the key Copenhagen criteria used as a corner stone - is offered.

### Lobbying in the European Union

Argues that the process of European integration has drifted into serious crisis. French and Dutch voters blatantly rejected the Treaty establishing a Constitution for Europe in the summer of 2005, thus freezing the constitutional process for at least a year.

### European Socio-Economic Integration

What purpose does the EU serve? Why and how was it set up? How does it work? What has it already achieved for its citizens, and what new challenges does it face today? In a globalised world, can the EU compete successfully with other major economies while maintaining its social standards? How can immigration be managed? What will Europe's role be on the world stage in the years ahead? Where will the EU's boundaries be drawn? And what future is there for the euro? These are just some of the questions explored by EU expert Pascal Fontaine in this 2017 edition of his popular booklet *Europe in 12 lessons*. Pascal Fontaine is a former assistant to Jean Monnet and former professor at the Institut d'Études Politiques, Paris.

### Turkish Accession to the EU

This book is concerned with the future shape of Europe in the post 1992, post Maastricht era. The Community has been using the single market programme and the Maastricht treaty as a means of deflecting, or at least delaying dealing with, the attentions of its immediate neighbours. The various initiatives that have been undertaken - the European Economic Area with EFTA, the Europe agreements with Poland, Hungary and Czecho/Slovakia and the redirection of the EC's Mediterranean policy - have provided only partial and temporary responses. The fundamental issue of where the boundary of the European Community should end remains to be settled. In this book, the authors provide an examination of the underlying issues and the current state of play regarding likely future enlargement of the EC, and consider each of the principal, actual, or potential applicant countries in turn.

### Europe in 12 Lessons

This book investigates the paradox of rich countries of Western Europe, who have high levels of poverty whilst proclaiming its eradication as one of the primary social and economic goals. It looks at how policies often do not achieve their goals, why countries need mechanisms to reduce wage inequality and why they choose to provide universal benefits instead of systems of selective benefits targeted at the poor. Along with cross-countries comparisons, the volume also presents analysis of the minimum income in France, Portugal, Italy, Finland, Ireland, Belgium, and Greece.

### Global Governance and the Emergence of Global Institutions for the 21st Century

The sixteenth edition of *Social policy in the European Union: state of play* has a triple ambition. First, it provides easily accessible information to a wide audience about recent developments in both EU and

domestic social policymaking. Second, the volume provides a more analytical reading, embedding the key developments of the year 2014 in the most recent academic discourses. Third, the forward-looking perspective of the book aims to provide stakeholders and policymakers with specific tools that allow them to discern new opportunities to influence policymaking. In this 2015 edition of *Social policy in the European Union: state of play*, the authors tackle the topics of the state of EU politics after the parliamentary elections, the socialisation of the European Semester, methods of political protest, the Juncker investment plan, the EU's contradictory education investment, the EU's contested influence on national healthcare reforms, and the neoliberal Trojan Horse of the Transatlantic Trade and Investment Partnership (TTIP).

The Handbook on European Enlargement (HEE) is the most comprehensive legal commentary on the enlargement process, which brings together fifty-two leading authors from Member States and candidate countries, working at the European Commission, universities and in public administrations. The underlying rationale of the HEE is to depict and analyze the legal framework for the enlargement process and to provide a comprehensive guide to academics, practitioners and students. It covers the Europe Agreements and Association Agreements, decisions of the Association Councils, appropriate judgments of the ECJ, the Accession Partnerships, the candidate countries' National Plans for the Adoption of the Acquis as well as the role of the European Commission (Progress Reports), the funding instruments that underpin the whole process (PHARE, ISPA, SAPARD) and the legal orders of the candidate countries.

"Territorial cohesion" strives for a more balanced spatial development and seeks to improve integration throughout the EU. The scientific articles in this volume examine the interpretations of this term, the challenges of European spatial development policy, and the problems and concepts involved in achieving territorial cohesion. Two short reports illustrate the implementation of territorial cohesion on the basis of two research projects.

#### Sustainable Development in the European Union

Over the years, the European Union has developed relationships with other international institutions, mainly as a result of its increasingly active role as a global actor and the transfer of competences from the Member States to the EU. This book presents a comprehensive and critical assessment of the EU's engagement with other international institutions, examining both the EU's representation and cooperation as well as the influence of these bodies on the development of EU law and policy.

#### Social policy in the European Union: state of play 2015

'This book is a very good consideration of the uncertainties and difficulties involved in the intervention of EU institutions in Europe.' - Dominique Redor, ECSA Review Economic Policy in the European Union analyses the key issues confronting Europe as we enter the 21st century. It focuses mainly on the transition problems linked with the creation of European Monetary Union as well as more specific issues such as social, labour, environmental and science and technology policy.

#### The ABC of European Union Law

This unique book, representing the main output of the Jean Monnet Multilateral Research Project granted by the European Commission, is dedicated to the legal and political dimension of the European Union policy towards its Eastern neighbours, namely Ukraine, Belarus, Moldavia, Azerbaijan, Georgia and Armenia. The Eastern Partnership clearly occupies a privileged position in the EU's external relations and constitutes an important "Eastern axis" of the European Neighbourhood Policy. The book examines relevant material from a broad perspective, and attention is paid to the in-depth analysis

of Eastern Partnership Agreements and the new Association agreements, examining their place in the External Relations Law of the EU and the legal mechanisms of their operation. In this respect, comparisons with the previous Association agreements with the states of the Central Europe are also made here. A great part of the book is also dedicated to an analysis of the issues of human rights, the rule of law, and legal approximation as a key element of the acceptance of duties of the association countries. Recent political unrest in Ukraine in connection with the delay of the signature of the EU-Ukraine Association Agreement has also shown that this contract instrument is considered to be a key indicator in geopolitical terms, as a concrete expression and powerful symbol of the future orientation of this Partnership state and its willingness to share common European values. This volume's analysis of this document enables a better understanding of the reasons for, and the core of, this development. The diversity of contributors to this book allows a multi-perspectival analysis, incorporating views from old and new EU Member States, as well as Partnership states, and reflects the recent experiences of the Czech Republic, Slovakia and Estonia with regards to the implementation of the Association Agreements. The volume is also opened by the preface of the Commissioner for the Enlargement, Eastern Partnership and the Association, Stefan Füle, and reflects his experience in these matters.

### Handbook on European Enlargement

This comprehensive volume comprises original essays by authors well known for their work on the European Union. Together they provide the reader with an economic analysis of the most important elements of EU law and the mechanisms for decisions within the EU. The Handbook focuses particularly on how the development of EU law negotiates the tension between market integration, national sovereignty and political democracy. The book begins with chapters examining constitutional issues, while further chapters address the establishment of a single market. The volume also addresses sovereign debt problems by providing a detailed analysis of the architecture of the EU's monetary institutions, its monetary policy and their implications. The depth and breadth of the Handbook's coverage make it an essential reference for students, scholars and policymakers interested in the complexities of the European Union.

### Andorra and the European Union

Writing in *History of European Ideas*, Jan-Erik Lane from the University of Oslo noted that Frendo's 'excellent study' showed how Maltese politics had always been 'conflict ridden'. 'And, amazingly, the cleavages have a strong cultural undercurrent making the notion of a nation-state in the tiny island of Malta far from self-evident. What Frendo penetrates is a complex adversarial game where Malta repeatedly challenges imperial prerogatives, but at the same time there are sharp dissents between indigenous camps.' Party Politics is 'a lesson in the embryology of national identity, from which modern Malta has emerged as a small, independent, democratic, European state in the central Mediterranean, capable of acting as interlocutor between north and south, and east and west', noted Barry Collet (University of Melbourne) in *The Australian Journal of Political Science*. Frendo's 'scholarly and lucid analysis', he added, shows that by virtue of its experience Malta 'has much to offer the international community in understanding nationalism, and in handling its consequences.' According to Frank Coppa in New York, writing for the *Canadian Review of Studies in Nationalism*, in the emergence of party rivalry and national sentiment in Malta 'the historical and sociological dimensions complement the political one, as Frendo examines the interaction of society and politics.' Thus, Party Politics in a Fortress Colony 'is of interest not only as one of political conflict within the former British Empire and the development of a two-party system, but it is also important as a study of Mediterranean life in general, and the formation of national character in Malta in particular.' 'Here, at long last, was a book exploring the national reality with an absolute respect for the truth', observed Geoffrey Hull (University of Sydney) in *The Sunday Times*. 'None of the well-known flaws of history writing in Malta - tribal or national chauvinism, cultural cringes and politically motivated parti pris - has a place in Party Politics. It is so reassuring to discover in Henry Frendo the historian a truly European polymath who can foray intelligently and fruitfully into the related disciplines of literature, linguistics, anthropology, economics and sociology... a Maltese scholar with a sharp eye constantly on the rest of the world.' In *Melita Historica* Victor Mallia-Milanes from the University of Malta described it as 'a book of such high calibre' with 'a wealth of new insights' that could 'serve as a model both for undergraduates and for fellow scholars'.
