The Stone Light

How do James Bond's X-ray glasses work, the ones he uses to see whether the lady at the roulette table has a pistol concealed in her underwear? Is it really possible to launch oneself into the air and catch up with a plane that is free-falling towards the earth? Or to shoot down a helicopter with a pistol? In this lively and informative book, Germany's boldest physics professor Metin Tolan analyses the stunts and gadgets of the 007 films and even answers the question of all questions: Why does Bond drink his vodka martini shaken, not stirred? "So much entertaining science is a rare thing." Spiegel Online

The City of Flame and Shadow

Why does the secret agent never seem to die? Why, in fact, has the secret agent not only survived the Cold War - which critics and pundits surmised would be the death of James Bond and of the genre more generally - but grown in popularity? *Secret Agents* attempts to answer these questions as it investigates the political and cultural ramifications of the continued popularity and increasing diversity of the secret agent across television, film, and popular culture. The volume opens with a foreword by Tony Bennett, and proceeds to investigate programs, figures, and films such as *Alias*, *Austin Powers*, *Spy Kids*, the «new» Bond Girl, *Flint*, *Mission Impossible*, *Jason Bourne*, and concludes with an afterword by Toby Miller. Chapters throughout question what it means for this popular icon to have far wider currency and meaning than merely that of James Bond as the white male savior of capital and democracy.

Shaken, Not Stirred!

Capus takes us on an exploratory journey via the loss of a Spanish vessel laden with gold and jewels in the South Seas, the burial of treasure, an ancient map, and a long and dangerous voyage across the Pacific, to prove that Robert Louis Stevenson's "treasure island" actually exists; and that it exists in a place quite different from where hordes of treasure-hunters have been seeking it for generations. In fact,

he posits, it was for this reason alone that Stevenson spent the last five years of his life in Samoa. On a long trip round the Pacific islands with the idea of writing articles for American periodicals, Stevenson, travelling with his beloved wife, Fanny, and stepson Lloyd Osbourne, had no notion of stopping at Samoa when their ship made landfall in December 1889. Yet, only six weeks later, at the age of 39, he would invest all his available assets in a patch of impenetrable jungle and spend the rest of his life there. This book traces what led Stevenson to Samoa and the origins of his famous story. For facing him from this unlikely spot was another island – a conical isle, Tafahi, where legends abound, and it was, Capus suggests, this isle that would cause him to change the course of his life.

This World Fantasy Award winner in the vein of *Animal Farm* delves into a lab worthy of a mad Nazi scientist—but run by a brilliantly sadistic rodent. In the annals of American literature, there has never been a character quite like Doctor Rat, PhD. From one of the most indispensable storytellers in speculative fiction, this biting satire introduces a narrator of learned charm and humor, and a twisted logic that is absolutely chilling. Doctor Rat is a credit to his species. A survivor of the most refined scientific experiments, now removed from the maze, he has become a valued and productive member of the academic community. When he must administer a lethal dose, he comforts his fellow rats with his compassionate slogan: “Death is freedom.” But everything changes when animals worldwide begin to rebel, refusing to accept their proper places in the natural order of things: as test subjects, pets, or food. And only Doctor Rat has the courage to defend mankind from the ungrateful animal kingdom. Hailed by the *Los Angeles Times* as “dazzlingly original” and “occasionally quite beautiful,” Doctor Rat is a sly and stylish indictment of fanaticism in mice and men. “A truly imaginative impresario . . . [Doctor Rat] teases your conscience with educated wit and versatile improvisation, not to mention the casual flick of the tail about to be cut off.” —Kirkus Reviews

Ian Fleming and James Bond

The staying power of the world's most dashing secret agent and the evolution of the James Bond franchise are explored in this smart yet nostalgic collection of essays. Leading writers, including Raymond Benson, J.A. Konrath, Raelynn Hillhouse, and John Cox, discuss the ten sexiest Bond girls, the best villains, and the controversy surrounding the latest actor to play James Bond. Topics covered range from the playful—how to build a secret lair and avoid the perennial mistakes made by would-be world dominators—to the thought-provoking, such as Bond's place in the modern world, his Oedipal tendencies and perceived misogyny, and the unerring allure of the charming spy.

Mistress of the Empire

“A glorious treat awaits you at the literary table of Donia Bijan.” —Adriana Trigiani Set against the backdrop of Iran’s rich, turbulent history, this exquisite debut novel is a powerful story of food, family, and a bittersweet homecoming. When we first meet Noor, she is living in San Francisco, missing her beloved father, Zod, in Iran. Now, dragging her stubborn teenage daughter, Lily, with her, she returns to Tehran and to Café Leila, the restaurant her family has been running for three generations. Iran may have changed, but Café Leila, still run by Zod, has stayed blessedly the same—it is a refuge of laughter and solace for its makeshift family of staff and regulars. As Noor revisits her Persian childhood, she must rethink who she is—a mother, a daughter, a woman estranged from her marriage and from her life in California. And together, she and Lily get swept up in the beauty and brutality of Tehran. Bijan’s vivid, layered story, at once tender and elegant, funny and sad, weaves together the complexities of history, domesticity, and loyalty and, best of all, transports readers to another culture, another time, and another emotional landscape.

James Bond in the 21st Century

“Bond. James Bond.” Since Sean Connery first uttered that iconic phrase in *Dr. No*, more than one quarter of the world’s population has seen a 007 film. Witty and urbane, Bond seduces and kills with equal ease — often, it seems, with equal enthusiasm. This enthusiasm, coupled with his freedom to do what is forbidden to everyone else, evokes fascinating philosophical questions. Here, 15 witty, thought-provoking essays discuss hidden issues in Bond’s world, from his carnal pleasures to his license to kill. Among the lively topics explored are Bond’s relation to existentialism, including his graduation “beyond good and evil”; his objectification of women; the paradox of breaking the law in order to ultimately uphold it like any “stupid policeman”; the personality of 007 in terms of Plato’s moral psychology; and the Hegelian quest for recognition evinced by Bond villains. A reference guide to all the Bond movies rounds out the book’s many pleasures.

The Bond Affair

Ernst Marti devoted his life to researching the etheric realm--the subtle area between the physical and spiritual. Taking the numerous statements and references by Rudolf Steiner as his starting point, Marti develops our understanding of the etheric world in various fields--from the theory of knowledge to the natural world, music, the realm of color, eurythmy, and medicine. He proposes exciting bridges between the ancient and medieval worldview and the present and future of the natural and spiritual sciences. Having studied the world of the ethers in volume 1, here Dr. Marti explores the world of formative (or morphogenic) forces. Beginning with the sensory qualities of the visible world, he studies the nature of sense perception, the origin of morphogenic forces, and their phenomenology. In three key sections he examines the formative forces of shape, or form, including growth movements in plants and how they relate to eurythmy and the forces of color; the formative forces of life, or the planetary origin of the morphogenic forces of life and the seven life processes and their relation to rhythm; and the formative forces of substance--the zodiac and the planets and the formative forces of metals. In this concluding volume of his seminal work, Marti also offers pertinent comments on the nature of potentization in homeopathic medicine.

James Bond and Philosophy

Struggling to cope with a marriage in difficulty and a business under pressure, Jack and Alison Heywood suffer every parent's worst nightmare. Their two children are involved in a horrific road accident which leaves seven-year-old Frankie in a coma and her elder brother, Ben, severely traumatized. After three months, little Frankie has become simply the coma case in room four, fifth floor. Worse still, prolonging her existence may be damaging Ben, who is withdrawing further and further into an emotionally turbulent world of his own. But then, with all hope fading, a slender lifeline emerges. The Heywoods hear of a revolutionary, experimental clinic in America, run by brilliant neurologist, Elizabeth Chase. Lizzie knows what it is like to be a young person locked away in a dark place and it is this that fuels her work on the frontiers between unconscious existence and oblivion. But her work is high pressure and high risk, pushing at the very limits of accepted medical practice. As the Heywoods arrive in America, they find Lizzie and her clinic besieged by the law, the media, human rights activists and the medical establishment. Against this background, and with the children stranded in uncharted regions of the subconscious, only a supreme act of sacrifice can show them the way back. Profound and immensely powerful, *The Lazarus Child* is an extraordinary story of hope and despair, of redemption and resurrection. With its celebration of human endeavour and healing, it stands out as a novel for our times: strange, compelling and unforgettable.

Writers, observers, and practitioners of international politics frequently invoke the term "geopolitics" to describe, explain, or analyze specific foreign policy issues and problems. Such generalized usage ignores the fact that geopolitics as a method of understanding international relations has a history that includes a common vocabulary, well-established if sometimes conflicting concepts, an extensive body of thought, and a recognized group of theorists and scholars. In *Geopolitics*, Francis P. Sempa presents a history of geopolitical thought and applies its classical analyses to Cold War and post-Cold War international relations. While mindful of the impact of such concepts as "globalization" and the "information revolution" on our understanding of contemporary events, Sempa emphasizes traditional geopolitical theories in explaining the outcome of the Cold War. He shows that, the struggle between the Western allies and the Soviet empire was unique in its ideological component and nuclear standoff, the Cold War fits into a recurring geopolitical pattern. It can be seen as a consequence of competition between land powers and sea powers, and between a potential Eurasian hegemonic power and a coalition of states opposed to that would-be hegemony. The collapse of the Soviet empire ended the most recent threat to global stability. Acting as a successor to the British Empire, the United States organized, funded, and led a grand coalition that successfully countered the Soviet quest for domination. No power or alliance posed an immediate threat to the global balance of power. Indeed, the end of the Cold War generated hopes for a "new world order" and predictions that economics would replace geopolitics as the driving force in international politics. Russian instability, the nuclear dimension of the India-Pakistan conflict, and Chinese bids for dominance have turned the Asia-Pacific region into what Mahan called "debatable and debated ground." The Lazarus Child

How are we connected to the world around us? This question, says Rudolf Steiner, is one that lives subliminally, drawing us into the depths of the psyche. There, our candle of consciousness tends to flicker and go out. But spiritual schooling can relight it, so that we learn to perceive realms of our being beyond the restricted self. Whilst Steiner was undertaking major lecture tours of Germany and England, he took time to address his followers at the world centre of anthroposophy in Dornach, Switzerland. He speaks here on three major topics: 'The Life of the Human Soul', 'Spiritual Striving in Relation to Earth's Evolution' and 'The Contrast Between East and West'. The common theme, however, is our mutual responsibility for what the human being and the world will eventually become – which, according to Steiner, is far from a foregone conclusion. Even the way we think can change and affect the future: the degree, for example, to which we concentrate our picturing in meditation, infusing head thinking with warmth of heart. Rudolf Steiner reveals a hugely complex picture of interrelationships between humanity and the cosmos. Our head, heart, lungs and limbs all reveal subtly different qualities of connection with the invisible realities that continue to sustain us. Our eyes, for instance, only gradually

evolved into organs of sight and were once vital organs, as our lungs are now. The lungs, in turn, will similarly evolve to provide us with another form of perception. As is usually the case, Steiner addresses a wide variety of topics in addition to those above. Included in this volume are thoughts on the significance of the cinema; the nature of the halo; technology as the 'true foundation' of the modern worldview; asceticism in the Middle Ages; the world of machines and the world of rite and worship; yoga and modern meditation exercises; pain as an awakener of knowledge; the emergence of the belief in ghosts; and the connection between stomach acid and soul qualities.

The Fan Man

In an astonishing series of lectures on the science of spiritual knowledge, Rudolf Steiner begins by addressing an audience in Dornach, Switzerland – where, only months earlier, his architectural masterpiece, the first Goetheanum, had been destroyed by fire. He discusses the nature of our planetary system, revealing the planets that are characterised by freedom and those that determine destiny. The spirits of the moon live in seclusion, preserving 'original wisdom' and reflecting powers connected to sexuality, whereas the sun creates harmony. Jupiter is 'the thinker', whilst the spirits on Saturn act as 'living memory'. Speaking in London, Steiner states that the things that happen to people in sleep are more important than anything that occurs during waking hours! Human beings, he says, must learn to see themselves as an image of spirits and spiritual activities on earth. In a break from the theme, and returning to Dornach, Rudolf Steiner reports on his recent visit to England and Wales, where he attended an educational conference in Ilkley, a Summer School in Penmaenmawr and a school for the disadvantaged in the East End of London. Steiner speaks of the particular atmosphere he experienced in West Yorkshire and North Wales, where remnants of Druid spirituality live in the surroundings. The latter theme emerges strongly in the next lectures, which examine the Druid priest's sun initiation and perception of moon spirits. The Druids investigated the secrets of the universe, influencing both social and religious life. Steiner also describes the mythic being of Woden, who signified the birth of intellectuality and the subsequent fear of death – which, he asserts, can be healed by the Mystery of Golgotha. In the final section, Rudolf Steiner discusses: 'The past, present and future development of the human mind'. Again, he references the importance of Druid culture, noting that the ground plans of the stone circles in Penmaenmawr are similar to that of the first Goetheanum. He also points to the crucial roles of the ancient Mysteries and Christ's deed in human development.

Geopolitics

The Cold War contains a selection of official and unofficial documents which provide a truly multi-faceted account of the entire Cold War era. The final selection of documents illustrates the global impact of the Cold War to the present day, and establishes links between the Cold War and the events of 11th September 2001.

Initiation Science

In the second volume of Larbalestier's Magic trilogy, Reason Cansino has learned the painful truth: she must make the choice to use the magic that lives in her blood and die young or refuse to use the magic and lose her mind.

The Cold War

Contemporary interest in the meditative schooling of mindfulness is usually associated with Eastern traditions. Rudolf Steiner spoke of the same phenomenon, although he used the terms 'attentiveness' and 'dedication' – or, combining these two, 'pure perception'. This way of mindfulness and reverence is not in conflict with spiritual paths founded on thinking or pure thought. However, as the texts in this anthology indicate, methods based exclusively on thinking cannot be successful if they are not supported by perception, feeling and will. In counterbalance to today's increasing intellectualization, the meditative exercises featured here connect with the perceptive activity of the human being's sensory organs. They could also be understood as exercises for developing empathy, helping to make our relationship with the world around us more conscious and intense. Rudolf Steiner's texts are sensitively edited and arranged by Andreas Neider, whose introduction and notes add further clarity to the theme.

All My Sisters

Fans of the Bartimaeus sequence will devour this book – a cracking adventure brimming with magic, intrigue and a treasure trove of characters that the reader can't help but fall for. We find everyone's favourite irascible djinni serving at the court of King Solomon in 950 BC Jerusalem, where he is causing his customary chaos and must help a girl assassin sent by the Queen of Sheba to steal the all-powerful Ring of Solomon. The comic relief is perfectly timed, the dialogue sharp and snappy and the fiendishly clever plot perfectly handled with Jonathan's trademark flair and command of language. Thrills, chills and a danger-spiked finale make Ring of Solomon an absolute must-read.

Magic Lessons

What binds contemporary Europeans together in terms of cultural values that go beyond a common interest in economic growth? In a time of resurging nationalist movements all over Europe, the need for what former President of the European Commission Jacques Delors called a "soul for Europe" has become more urgent than ever. In this volume, Delors's 25 years old appeal to the churches is taken seriously. In particular, contributions to a common sense of belonging that have been made by the traditions of European Protestantism are carefully investigated. In nineteen case studies, topics and areas as varied as theological identity, religious tolerance, political philosophy, ethics, the arts, the scientific mentality, and the economy are covered. It appears that despite the rise of religious pluralism throughout Europe, aspects of the Protestant ethos continue to be key to societal cohesion in many places. It is Henry's third visit to the Faerie Realm, but this time in a rather different guise and to a rather different kind of place. Holly Blue is Queen and Lord Hairstreak appears to be proposing a truce between the Faeries of the Night and the Faeries of the Light. Meanwhile Prince Pyrgus has stumbled across some mysterious crystal flowers with an apparently formidable secret weapon, and there are rumours of a demon invasion led by Beleth, the Prince of Darkness. Queen Blue, wary of her uncle's uncharacteristic generosity, pays a visit to the Spicemaster's labyrinth in an attempt to divine the possible future of the Realm. She is warned to beware of someone close, little realising just how careful she will need to be - and when she is kidnapped by the most unlikely candidate, the Realm rapidly descends into chaos. In a dramatic adventure, Blue, Pyrgus and Henry will find themselves in the midst of a furious battle to protect the future of the Realm and secure the throne for the rightful ruler.

The Ring of Solomon

"Social theory has largely abandoned a focus on labor and with it its empirical foundation, while the sociology of work has neglected the production of theory more generally. It is for precisely this reason that Capitalism and labor has become a standard work on this subject. Labor and employment relations have become both increasingly diverse as well as less secure while, at the same time, labor and distributional struggles are being waged ever more fiercely. Adequately grasping these changes requires innovative impulses emerging from the analysis of capitalism, just as the sociology of work has a lot to contribute to the former. In this translated and updated edition the authors discuss current theoretical approaches in an attempt to once again conceive capitalism and labor together"--Back cover.
