

Biology Academic Final Review Exam Answers

[#biology exam answers](#) [#final exam biology](#) [#biology academic review](#) [#exam prep biology](#) [#biology exam solutions](#)

Ace your biology final exam with our comprehensive review and answer key. This guide provides solutions and explanations to help you understand key biological concepts, improve your exam performance, and solidify your knowledge for future academic success. Get ready to confidently tackle your biology final with our expert-curated content.

All syllabi are reviewed for clarity, accuracy, and academic integrity.

The authenticity of our documents is always ensured.

Each file is checked to be truly original.

This way, users can feel confident in using it.

Please make the most of this document for your needs.

We will continue to share more useful resources.

Thank you for choosing our service.

This document is highly sought in many digital library archives.

By visiting us, you have made the right decision.

We provide the entire full version Final Exam Biology Review Answers for free, exclusively here.

Biology Academic Final Review Exam Answers

Intro

Which term defines the following: All body systems must be in a condition of balance for the body to survive and work properly.

Where is the ulna bone in relation to the metacarpals?

What one of the following is not a type of fat?

What cells in the body are responsible for waste removal?

Which of the following is the medical term for the knee?

How many layers is the skin composed of?

What is another term that describes the gene's genetic makeup?

Bile from the liver is stored and concentrated in what organ?

Which of the following organs is responsible for absorbing vitamin K from the digestive tract?

What term defines the mass-weighted average of the isotope masses that make up an element?

Somatic cells undergo which process to produce more

12 What is the pH of an acid?

What is the protective layer around nerves called?

Which part of the nervous system regulates voluntary actions?

Which of the following is NOT considered a mammal?

Which of the following bases is not found in DNA?

Which of the following is not an example of a polar bond?

Through the processes of photosynthesis and oxygen release, _____ provide energy that supports plant growth and crop output.

Which law describes the relationship between volume and temperature with constant pressure and volume?

What is the name of the muscle used to aid in respiration in humans?

Which of the following choices have an alkaline base?

Which of the following organs are NOT included in the thoracic cavity?

Which of the following infections is caused by a bacterium?

20 What is the name of the appendages that receive communication from other cells?

Carbohydrates are broken down in the digestive system. Where does this process begin?

20 Which of the following is NOT a function of the kidneys?

After blood leaves the right ventricle where does it travel to next?

A person has blood type O-. What blood type may this person receive blood from?

What is the name of the tissue that separates the lower ventricles of the heart?

What type of muscle is myocardium (heart muscle)?

What uses mechanisms that direct impulses toward a nerve cell's body?

Which of the following is NOT an action that the endocrine system is responsible for?

Which of the following is NOT part of the lymphatic system?

30 The atomic number is the same as?

Which term describes the destruction of red blood

30 Which of the following is NOT part of the appendicular skeleton?

39 The process of molecules from a solution containing a high concentration of water molecules to one containing a lower concentration through the partially permeable membrane of a cell.

40 What is the term for the tissue in which gas exchange takes place in the lungs?

6 rubric bio spring final review worksheet 2022 video - 6 rubric bio spring final review worksheet 2022 video by Duncan Wilson 28 views 1 year ago 4 minutes, 26 seconds - Use this **review**, to self-correct your **Spring Final Review**, worksheet and **review**, for the **Spring Final Exam**,.

UNITS 5: EVOLUTION (Chapters 10-12)

Biodiversity. The variety of living things can be global or down to ecosystem

Charles Darwin- Developed Theory of Natural Selection. Nature selects beneficial traits. Published book with his theory in 1859 On the Origin of

Natural selection-A process where nature (natural) selects what traits are beneficial to survival and eliminates those that are detrimental.

Extinction- When species disappears (one or many) because of competition or catastrophic events

Directional selection- Selective pressures cause a directional shift in phenotype. I.e. peppered moth during the Industrial Revolution.

Stabilizing selection - Selective pressures causes extreme phenotype to be lost and curve 'squeezes together' Robins typically lay four eggs. Population after natural selection Original population

Disruptive selection- Selective pressures causes average phenotype to disappear and extreme phenotypes are more beneficial. (c) Diversifying selection Population after natural selection white rabbits are better able to than white rabbits, resulting in

Coevolution-cases where two (or more) species reciprocally affect each other's evolution. Change (evolve) in response to each other.

Convergent evolution process whereby organisms not closely related, independently evolve similar traits as a result of having to adapt to similar environments or ecological niches.

Divergent evolution organisms evolve and become increasingly different.

Artificial selection - Process where humans select traits desired in offspring, I.e. domesticated dogs, vegetables, livestock, etc.

Vestigial structure-the remnants of organs or structures left over from evolutionary past. Structures usually reduced in size and no longer function

Homologous structures- "Same structures, different function". (same bones in all structures)

Analogous structures-"Same function, different structures". (different structures all for flight)

Geographic isolation-when geographic feature (river, ocean, desert, canyon, landmass) prevents members of two populations from mating. This

Reproductive isolation-when members of two populations no longer mate together. (includes geographic, temporal, behavioral isolation) This

Mesozoic era- Geologic era in which dinosaurs (reptiles) ruled the earth. Ended with mass extinction

Cenozoic era-Most recent geologic era. Began after mass-extinction event. "Age of mammals"

Genetic Drift- mechanism of evolution in which allele frequencies of a population change over generations due to chance. Decreased genetic diversity

Founder effect- When a small population starts a new colony. Can be accidental, or purposeful.

Decreased genetic diversity in resulting population

Bottleneck effect- When a small population is created by natural disasters (fires, floods, earthquakes, etc.) Decreased genetic diversity in resulting po

Gene pool- Combined genetic information of a population

Adaptation-structure, feature, or behavior of an organism that improves its chances of survival.

Miller Urey Experiment-Simulated Earth's early atmosphere and conditions to see if organic molecules could be made (Building blocks of life)

crossing over (during meiosis)- when 'legs' or 'arms' of chromosomes cross over neighboring chromosomes during meiosis and exchange parts of themselves (produces new genetic variation)

UNITS 6: ECOLOGY (Chapters 13-16)

Levels of Organization. The study of the interaction between living things and the environment can be studied at different levels (small to big)

Population- a group of the same species that lives in a given area.

Biome- Distinct biological communities that have formed in response to a shared physical climate.

Biosphere. The area on Earth where life exists

Autotroph-Also known as producers, make their own energy by photosynthesis or chemosynthesis.

Heterotroph-Also known as consumer. Organisms that have to eat something to obtain their energy.

Predation- When one organism pursues, captures, and eats another organism.

Food chain- Feeding relationships showing the flow of energy from producers to consumers. A simple

single link between organisms.

Food web- Feeding relationships showing the flow of energy from producers

Trophic levels- Name for each level in a food chain. Goes from producer primary consumer secondary consumer tertiary consumer

Niche-the interrelationship of a species with all the biotic and abiotic factors affecting it. This reduces competition with other species.

Primary succession-begins in essentially lifeless areas (no soil), because of recent lava flows, newly formed sand dunes, or rocks left from a retreating glacier.

Secondary succession. The natural process that returns a damaged ecosystem back to its mature form. (starts with existing soil) Secondary Succession

Biotic factors- Living things in an environment Biotic Factors Producers Consumers Decomposers

Abiotic factors-Non-living factors that help shape ecosystem ABIOTIC FACTORS these are the non-living components of the ecosystem

Symbiosis (list 3 types)- close relationship between 2 organisms in which at least one benefits.

Immigration- The movement of individuals into a population. Increases population size.

Emigration- The movement of individuals out of a population. Decreases population size.

Exponential growth curve- Forms J-shaped curve with exponential growth. Eventually will level off and form logistic growth curve.

Logistic growth curve-formed when resources begin to limit population size, until it reaches its carrying capacity and levels off

Carrying capacity- Point at which growth rate levels out due to limits on required resources (food, water, space, sunlight, etc.)

Density dependent factors- limiting factors that constrains (limits) population size that vary based on the size of the population. (increases competition, predation, disease, and parasitism)

Density independent factors-Limiting factors that aren't influenced by population size. Includes natural disasters, seasonal weather, pollution, etc.

Climate-The long term weather patterns in an area. Helps determine biomes. (Temp & rainfall)

Weather- The day to day conditions

Biology Dynamics Of Life Answers

This glossary of biology terms is a list of definitions of fundamental terms and concepts used in biology, the study of life and of living organisms.... 94 KB (11,418 words) - 16:24, 5 March 2024

Evolutionary biology is the subfield of biology that studies the evolutionary processes (natural selection, common descent, speciation) that produced the... 31 KB (3,423 words) - 09:13, 23 February 2024

(2007). "Altered Dynamics of DNA Bases Adjacent to a Mismatch: A Cue for Mismatch Recognition by MutS". *Journal of Molecular Biology*. 374 (1): 39–53.... 9 KB (886 words) - 16:39, 3 December 2023

System dynamics (SD) is an approach to understanding the nonlinear behaviour of complex systems over time using stocks, flows, internal feedback loops... 23 KB (2,964 words) - 07:15, 1 February 2024

roles alongside natural selection in three areas of evolutionary biology, namely population dynamics, molecular evolution, and morphogenesis. However... 60 KB (6,729 words) - 22:27, 7 March 2024

Valsecchi: Biology of Gene Dosage Alterations René Ketting: Biology of Non-Coding RNA Anton Khmelinskii: Proteome Organisation & Dynamics Julian König:... 15 KB (1,468 words) - 23:20, 30 December 2023

October 2023. Purves WK, Sadava DE, Orians GH, Heller HC (2000). *Life: The Science of Biology*. Macmillan. p. 736. ISBN 978-0-7167-3873-2. Retrieved 23 March... 60 KB (6,725 words) - 11:47, 22 February 2024

between departments.[citation needed] Biology and molecular biology – Gene regulation, single protein dynamics, bioenergetics, patch clamping, biomechanics... 16 KB (1,637 words) - 02:45, 10 January 2024

Systemic design, for example using the double diamond approach. System dynamics of stocks, flows, and internal feedback loops. Viable system model: uses... 19 KB (1,896 words) - 12:06, 12 March 2024

Soil biology is the study of microbial and faunal activity and ecology in soil. Soil life, soil biota, soil fauna, or edaphon is a collective term that... 24 KB (2,670 words) - 18:15, 6 February 2024

Quarterly Review of Biology. 58 (2): 185–207. doi:10.1086/413216. JSTOR 2828805. S2CID 83956410. Michod RE. (2000) Darwinian Dynamics: Evolutionary Transitions... 17 KB (1,318 words) - 10:16, 2 February 2024

Nietzsche, biology, and metaphor, 2002, p. 117 Bowler, Peter J. *Life's splendid drama: evolutionary biology and the reconstruction of life's ancestry 1860-1940*... 31 KB (4,082 words) - 15:01, 26 February 2024

sciences of biogeography, evolutionary biology, genetics, ethology, and natural history. Ecology is a branch of biology, and is the study of abundance... 208 KB (21,325 words) - 22:16, 23 March 2024

Blair (2022-02-12). "Teaching Dynamics to Biology Undergraduates: the UCLA Experience". *Bulletin of Mathematical Biology*. 84 (3): 43. doi:10.1007/s11538-022-00999-4... 16 KB (1,628 words) - 17:25, 1 November 2023

plant science (or plant sciences), plant biology or phytology, is the science of plant life and a branch of biology. A botanist, plant scientist or phytologist... 135 KB (14,209 words) - 15:58, 23 February 2024

modelling of evolutionary dynamics, that suffering dominates enjoyment in nature. Matthew Clarke and Ng, in 2006, used Ng's welfare biology framework... 15 KB (1,802 words) - 23:58, 17 August 2023

In biology, altruism refers to behaviour by an individual that increases the fitness of another individual while decreasing their own. Altruism in this... 55 KB (6,493 words) - 10:03, 13 January 2024

Population ecology is a sub-field of ecology that deals with the dynamics of species populations and how these populations interact with the environment... 26 KB (2,766 words) - 13:11, 27 January 2024

Ginzburg, L. R. (1989). "Coupling in predator-prey dynamics: ratio dependence". *Journal of Theoretical Biology*. 139 (3): 311–326. Bibcode:1989JThBi.139..311A... 34 KB (4,246 words) - 13:38, 30 October 2023

OCLC 947600. Strogatz, Steven H. (1994). *Nonlinear Dynamics and Chaos: With Applications to Physics, Biology, Chemistry, and Engineering*. Addison Wesley.... 24 KB (2,905 words) - 20:58, 18 November 2023
