Beginning as a marginal group in Galilee, the movement initiated by Jesus of Nazareth became a world religion within 100 years. Why, among various religious movements, did Christianity succeed? This major work by internationally renowned scholar Udo Schnelle traces the historical, cultural, and theological influences and developments of the early years of the Christian movement. It shows how Christianity provided an intellectual framework, a literature, and socialization among converts that led to its enduring influence. Senior New Testament scholar James Thompson offers a clear, fluent English translation of the successful German edition.

### Public Library Catalog

This new edition of Karen Blair's popular anthology originally published in 1989 includes thirteen essays, eight of which are new. Together they suggest the wide spectrum of women's experiences that make up a vital part of Northwest history.

### The First One Hundred Years of Christianity

Exploring nonviolent images of atonement—The "sacrifice" of Jesus is one of the most central doctrines in Christianity—and one of the most controversial, especially in contemporary debate (and after the appearance of films such as *The Passion of the Christ*). The implications of a violent parent and the necessity of innocent suffering are profoundly troubling to many people. Are they nevertheless necessary elements of Christian theology? Christian A. Eberhart makes a decisive contribution to these debates by carefully and clearly examining the Old Testament metaphors of sacrifice and atonement and the ways these metaphors were taken over by early Christians to speak of the significance of Christ. Eberhart shows that these New Testament appropriations have been misunderstood as requiring a logic of necessary violence; rather they speak to larger Christological themes concerning the whole mission and life of Jesus.

WHEN IT COMES TO MURDER, THERE'S ALWAYS A CHOICE... The only thing more varied than how people are killed is the many, many ways people try to get away with this terrible crime. Now masterful mystery writer Dorothy Salisbury Davis brings together 23 classic stories of crime and suspense, whodunits and detective stories from some of the finest authors of the 1950s. Ross Macdonald's classic P.I. Lew Archer takes a chilling case in California, where the mob isn't the only deadly thing under the West Coast sun. Margaret Millar brings us the tale of the couple next door who ensnares their neighbor in a tangled web of love and deception. Margaret Manners invites us to a bar for a drink and a quick little story of a con man who got what he deserved—and how the man accused of his murder walked free. And Michael Gilbert's brilliant detective Gladwyn Hughes must get to the bottom of an ambassador assassinated in front of forty-five witnesses before a war

breaks out in Europe over the murder. Twenty-three stories of criminals, victims, and always, always multiple choices of murder... Featuring stories by: ROBERT ARTHUR LAWRENCE G. ### The History of Minnesota

Animals were everywhere in the early modern period and they impacted, at least in some way, the lives of every kind of early modern person, from the humblest peasant to the greatest prince. Artists made careers based on depicting them. English gentry impoverished themselves spending money on them. Humanists exercised their scholarship writing about them. Pastors saved souls delivering sermons on them. Nobles forged alliances competing with them. Foreigners and indigenes negotiated with one another through trading them. The nexus between animal-human relationships and early modern identity is illuminated in this volume by the latest research of international scholars working on the history of art, literature, and of sixteenth- and seventeenth-century Germany, France, England, Spain, and South Africa. Collectively, these essays investigate how animals - horses, dogs, pigs, hogs, fish, cattle, sheep, birds, rhinoceroses, even sea-monsters and other creatures - served people in Europe, England, the Americas, and Africa to defend, contest or transcend the boundaries of early modern identities. Developments in the methodologies employed by scholars to interrogate the past have opened up an intellectual and discursive space for - and a concomitant recognition of - the study of animals as a topic that significantly elucidates past and present histories. Relevant to a considerable array of disciplines, the study of animals also provides a means to surmount traditional disciplinary boundaries through processes of dynamic interchange and cross-fertilization.

### The History of the Study of Landforms Volume 2 (Routledge Revivals)

The Beats and the Academy marks the first sustained effort to train a scholarly eye on the dynamics of the relationship between Beat writers and the academic institutions in which they taught. Rather than assuming the relationship between Beat writers and institutions of higher education was only a hostile one, The Beats and the Academy begins with the premise that influence between the two flows in both directions. Beat writers' suspicion of established institutions was a significant aspect of their postwar countercultural allure. Their anti-establishment aesthetic and countercultural stance led Beat writers to be critical of postwar academic institutions that tended to dismiss them as a passing social phenomenon. Even today, Beat writing still meets resistance in an academy that questions the relevance of their writing and ideas. But this picture, like any generalization, is far too easy. The Beat relationship to the academy is one of negotiation, rather than negation. Many Beats strove for academic recognition, and quite a few received it. And despite hostility to their work both in the postwar era and today, Beat works have made it into syllabi, conference presentations, journal articles, and monographs. The Beats and the Academy deepens our understanding of this relationship by emphasizing how institutional

friction between the Beats and institutions of higher education has shaped our understanding of Beat Generation literature and culture—and what this relationship between Beat writers and the academy might suggest about their legacy for future scholars.

### The American Scholar

Some of the greatest works in English literature were first published without their authors' names. Why did so many authors want to be anonymous--and what was it like to read their books without knowing for certain who had written them? In *Anonymity*, John Mullan gives a fascinating and original history of hidden identity in English literature. From the sixteenth century to today, he explores how the disguises of writers were first used and eventually penetrated, how anonymity teased readers and bamboozled critics--and how, when book reviews were also anonymous, reviewers played tricks of their own in return. Today we have forgotten that the first readers of *Gulliver's Travels* and *Sense and Sensibility* had to guess who their authors might be, and that writers like Sir Walter Scott and Charlotte Brontë went to elaborate lengths to keep secret their authorship of the best-selling books of their times. But, in fact, anonymity is everywhere in English literature. Spenser, Donne, Marvell, Defoe, Swift, Fanny Burney, Austen, Byron, Thackeray, Lewis Carroll, Tennyson, George Eliot, Sylvia Plath, and Doris Lessing--all hid their names. With great lucidity and wit, *Anonymity* tells the stories of these and many other writers, providing a fast-paced, entertaining, and informative tour through the history of English literature.

In this insightful book, Alexander Styhre examines how corporations, often understood primarily as economic entities or legal devices, seek to influence and shape the market and the wider society in which they operate. Given the scope of such activities in most advanced economies, Styhre argues that corporations are political agents in their own right and that they must be critically analyzed in these terms.

### Information Computing and Applications, Part II

The 2008 financial crisis has come to be known as the Great Crisis. Just when the world thought that, with the Fall of the Berlin Wall, Marxism would die and be buried, the Great Crisis of the first decade of the 21st century, has triggered a renewed interest in Marxism. This book looks at Marx's seminal work – *Capital, A Critique of Political Economy* – from an energy perspective. By combining the thoughts of this great thinker with those of scholars on energy, both past and present, this book serves to enhance the scientific thought of Marx, by using energy as a conceptual and analytical tool. With the capitalist economy taking repeated beatings since 2008, mainstream economic science is also under critical scrutiny for the unpredictable manner in which it has thus far analysed the global capitalist system. The invisible hand and self-interest theses of Adam Smith and his adherents are proving to be unworthy of their 250 year ideological grip on mankind and the natural environment. The 500 year-old capitalist system itself is showing signs of wear and tear, and so are its sciences that have thus far attempted to analyse it, if not uphold it. With the growing acknowledgement of energy as a central entity in all of aspects of life, disciplines such as economics are giving rise to interdisciplinary sciences such as econophysics; and sociology may see a revival of its founding discipline – sociophysics. All disciplines, it seems, will have to incorporate energy as a field of study in their curricula. Marx's thoughts in *Capital* are an amalgamation of science, philosophy, history, sociology, political economy, and anthropology, among others. *Capital: An Energy Perspective* provides a fresh look at the physical workings of the capitalist economy – by using Marx's *Capital* as a framework of interpretation and analysis.

### Contemporary Sociological Theory

An encyclopedic guide to 20th-century communism around the world The first book of its kind to appear since the end of the Cold War, this indispensable reference provides encyclopedic coverage of communism and its impact throughout the world in the 20th century. With the opening of archives in former communist states, scholars have found new material that has expanded and sometimes altered the understanding of communism as an ideological and political force. *A Dictionary of 20th-Century Communism* brings this scholarship to students, teachers, and scholars in related fields. In more than 400 concise entries, the book explains what communism was, the forms it took, and the enormous role it played in world history from the Russian Revolution through the collapse of the Soviet Union and beyond. Examines the political, intellectual, and social influences of communism around the globe Features contributions from an international team of 160 scholars Includes more than 400 entries on major topics, such as: Figures: Lenin, Mao, Stalin, Ho Chi Minh, Pol Pot, Castro, Gorbachev Events: Cold War, Prague Spring, Cultural Revolution, Sandinista Revolution Ideas and concepts: Marxism-Leninism, cult of personality, labor Organizations and movements: KGB, Comintern, Gulag, Khmer Rouge Related topics: totalitarianism, nationalism, antifascism, anticommunism, McCarthyism Guides readers to further research through bibliographies, cross-references, and an index

### The Political Constitution of the Corporation

This book examines the role of foreign languages and cultures in the Algerian educational system, highlighting how cultural imperialism and supremacy persist through damaging language ideologies and the privileging of colonial languages such as French and English. The authors challenge the claim that the Algerian educational system can be considered 'neutral', arguing instead that it was and still is the outcome of a conflict between Arabised and Francophone elites, serving strategic and ideological objectives rather than cultural or pedagogical goals. This book will be relevant to students and scholars of language education, language policy and planning, and the history and politics of the Arab and Muslim world, especially those interested in the influence of Western languages and cultures and the democratisation of educational systems.

Everything is ready, but our men are afraid...

Listen up!

Do not hesitate!

Believe!

Believe in our victory!

We chose this location! Not the invaders!

We chose this time! Not the enemy!

Our Father in Heaven stands with the faithful!

With the LORD we will win the peace!

I will not leave you again.

You're hurt?

The Holy Spirit never abandoned us.
